

# Respiratory Ventilator Competency

Stanbridge College Alumni Workshop

Register by 4/23/2012

## Overview

Respiratory intervention is provided in virtually all health care settings (acute, sub acute/long term, skilled nursing) and in the home. Taking the Respiratory Ventilator Competency Course will make you more competent in administering proper respiratory intervention to patients, and it will increase your chances of being hired within sub acute or acute care facilities.

The Respiratory Ventilator Competency Course will familiarize you with the anatomy of the respiratory tract and proper care for ventilator and tracheotomy equipment.

### Course Topics Include:

- Respiratory Terminology
- Respiratory Medication / Documentation
- Respiratory Disease
- Respiratory Equipment
- Tracheostomy Care
- Suctioning
- Ventilators
- Emergency Response

## Sign Up Now
