

Dementia

Signs & Symptoms

Overview

Dementia is a general term for memory loss and decline in mental ability. For many, dementia may interfere with every day activities. Worldwide, a new case of dementia arises every 7 seconds. Education about dementia is critical to everyone in the healthcare world. Whether you're looking to add skills to your résumé or need information on how to care for a loved one, this workshop will give you critical insight to dementia.

Course Topics Include:

- Memory Loss
- Know the Ten Signs
- Healthy Aging
- Partnering with Your Doctor
- Communications & Behaviors
- Care Options
- Long-Term Planning
- Legal & Financial
