We are as strong as you make us.
This catalog is current as of the time of publication and effective from January 1, 2018 to December 31, 2018 unless superseded. From time to time, it may be necessary or desirable for Stanbridge University to make changes to this catalog due to the requirements and standards of the school’s accrediting body, other governmental agencies, or the U.S. Department of Education, or due to market conditions, employer needs or other reasons. The catalog shall be updated and issued at least annually in accordance with the requirements of state regulations. Any updates may be made by the use of supplements or inserts accompanying the catalog with electronic notification to current students.
Letter from the President

For over two decades, we at Stanbridge University have been working to provide quality education that bridges the gap between where people are and where they dream to be. As we rise to meet new challenges, we are reminded that it is our student body, beautifully diverse and unflinchingly bold, that makes our institution strong. Their stories, strengths and tenacity breathe life into our philosophy: that every person has the potential to soar, and when given the right tools, can learn to believe not only in themselves, but in others. This personal metamorphosis is what changes the world for the better, and we as educators are thrilled and honored to be a part of it.

Yasith Weerasuriya | President & CEO
Stanbridge University reserves the right to make changes at any time to any provision of this catalog, including academic programs and courses, course and program schedules, school policies and procedures, faculty and administrative staff, the school calendar and other dates, and other provisions. Stanbridge University will notify students of any of the foregoing changes via email at the time the changes are made and in accordance with the requirements of accrediting and governmental regulatory agencies. The catalog will be provided either in writing or electronically to a prospective student or to any person upon request. Any program specific brochures shall also be disclosed to any interested person upon request.

Stanbridge University does not have a pending petition in bankruptcy, is not operating as a debtor in possession, has not filed a petition within the preceding five years, nor has had a petition in bankruptcy filed against it within the preceding five years that resulted in reorganization under Chapter 11 of the United States Bankruptcy Code (11 U.S.C. Sec 1101 et seq.)

Stanbridge University is accredited by the Accrediting Commission of Career Schools and Colleges (ACCSC). Located at 2101 Wilson Boulevard / Suite 302, Arlington, VA 22201, ACCSC can be reached at 703-247-4212. Their website is www.accsc.org.

Stanbridge University Los Angeles is a branch campus of Stanbridge University Irvine, California. Stanbridge University Los Angeles is accredited by the Accrediting Commission of Career Schools and Colleges (ACCSC), a recognized accrediting agency by the U.S. Department of Education.

The Stanbridge University Irvine Campus and Los Angeles, Alhambra Branch Campus are private Institutions that are approved to operate by the California Bureau for Private Postsecondary Education. The approval to operate demonstrates compliance with the California Private Postsecondary Education Act of 2009 and Division 7.5 of Title 5 of the California Code of Regulations. For more information, contact the Bureau for Private Postsecondary Education at 2535 Capitol Oaks Drive, Suite 400, Sacramento, CA 95833, www.bppe.ca.gov, toll-free telephone number (888) 370-7589 or by fax (916) 263-1897.

The Associate of Science in Nursing degree is approved by the California Board of Registered Nurses. Their website is http://www.rn.ca.gov/education/rnprograms.shtml.

The Baccalaureate Degree in Nursing at Stanbridge University is accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, 202-887-6791, https://www.aacn.nche.edu/ccne-accreditation.

The entry-level occupational therapy master’s degree program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, Suite 200, Bethesda, MD 20814-3449. ACOTE’s telephone number c/o AOTA is (301) 652-AOTA and its Web address is www.acoteonline.org. Graduates of the program will be eligible to sit for the national certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be an Occupational Therapist, Registered (OTR). In addition, most states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. Note that a felony conviction may affect a graduate’s ability to sit for the NBCOT certification examination or attain state licensure.

The Occupational Therapy Assistant program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA) through 2018/2019 in Orange County. The Stanbridge University - Los Angeles, Alhambra Branch Campus Occupational Therapy Assistant program is pending accreditation. AOTA is located at 4720 Montgomery Lane, Suite 200, Bethesda, MD 20814-3449. ACOTE’s telephone number, c/o AOTA is (301) 652-AOTA and its web address is www.acoteonline.org.

The Physical Therapist Assistant program at Stanbridge University is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE), 1111 North Fairfax Street, Alexandria, Virginia 22314; telephone: 703-706-3245; email: accreditation@apta.org; website: http://www.capteonline.org. If needing to contact the program/institution directly, please call (855) 414-4910 or email pta.admin@stanbridge.edu.

The Associate of Science in Veterinary Technology degree program is accredited by the American Veterinary Medical Association (AVMA) Committee on Veterinary Technician Education and Activities (CVTEA) (1931 North Meacham Road, Suite 100, Schaumburg, IL 60173-4360; phone: 800.248.2862; www.avma.org). The Associate of Science in Veterinary Technology degree has been approved by the Accrediting Commission of Career Schools and Colleges, ACCSC.
The Stanbridge University Vocational Nursing Program is approved by the California Board of Vocational Nursing and Psychiatric Technicians (BVNPT) in Orange County and Los Angeles. The BVNPT is located at 2535 Capitol Oaks Drive Suite 205, Sacramento, CA 95833 and can be reached at (916) 263-7800. Their website is www.bvnpt.ca.gov.

Stanbridge University is approved for veterans education benefits under Title 38 of the GI Bill® in addition to WIOA training benefits from various Workforce Investment Boards including those in Irvine, Westminster, Santa Ana, and Riverside.
Stanbridge University does not discriminate on the basis of race, color, sex, national origin, age, religion and disability. Stanbridge University is an equal opportunity provider.
ABOUT STANBRIDGE

HISTORY

Stanbridge University was founded in June of 1996 as Executive 2000. Our organization officially changed its name from Executive 2000, Inc. to Stanbridge College in August of 2004, then to Stanbridge University in January of 2017. We have operated from our present location since September 1997. Our curriculum began in 1996 with certificate programs in Information Technology and has since expanded to include programs in Nursing, Occupational Therapy Assistant and Physical Therapist Assistant as well as associate and baccalaureate degrees in Information Technology and Nursing and master's degrees in Nursing and Occupational Therapy.

MISSION STATEMENT

Stanbridge University asserts that a high quality, accessible, and relevant education is the right of every individual. The central purpose of all programs and services offered by Stanbridge University is to prepare people for occupations and professions. As such, we are dedicated to meeting the learning needs of our students. To these ends, we offer and commit to the allocation of resources in support of a variety of programs. These programs are offered in ways that recognize the needs of a diverse, changing population. Stanbridge University’s programs provide an educational environment that allows students to meet their long-term learning needs. In a time of dynamic technological change, students are encouraged to address the impact of information systems on their academic and occupational planning.

DIVERSITY STATEMENT

Stanbridge University takes great pride in its recognition as an institution of higher learning and is dedicated to maintaining a campus which honors and values diversity. As evidenced by our motto, “Strength through Diversity,” Stanbridge University encourages and celebrates the diverse nature of our faculty, staff, students, and the communities we all serve in a variety of ways.

The University recognition of diversity is evident in the following Diversity Statement, which can be found in the University Catalog:

Diversity of students, administration, faculty and staff:

The University strives to support and celebrate diversity with recognition of the rights and abilities of all members of the University community, to include religion or philosophical thought, age, ethnicity, sexual orientation, and gender. Our institutional mission, values, and commitments are best evidenced through the diverse nature of the populations of which we are constituted.

Diversity in the teaching, promotion of student cultural awareness, and scholarly efforts:

The University values the academic, intellectual, and experiential background of our administration and instructional faculty, and encourages the ways in which they lend this expertise to the benefit of cultural and intellectual awareness to our student population. This is accomplished through our curriculum, in which we expand students’ conceptual framework as they research and acquire the skills and competencies in the subject areas for the programs to which they have committed, with a focus on the importance of viewing their work through a lens which acknowledges and honors diversity.

Diversity in styles of leadership, mentoring, and strategic development:

The University benefits from the variety of cultural and philosophical differences that constitute the wide range of governance, leadership, and management that makes up this higher education environment. The strength and direction provided by leadership at all levels is dependent on the organizational contributions of each member.
### ABOUT STANBRIDGE

**INSTRUCTIONAL FACILITIES**

| Irvine Main Campus mailing address: 2041 Business Center Drive, Suite 107 | Los Angeles Branch Campus mailing address: 2215 W. Mission Road |
| Irvine, CA 92612 | Alhambra, CA 91803 |
| (949) 794-9090 (phone) | (949) 794-9094 (fax) |
| Website: www.stanbridge.edu | Website: www.stanbridge.edu |

The Irvine Main campus physical address is: 2041 Business Center Drive, Suite 107, Irvine, CA 92612. Starting in 2011, the campus has expanded to include classrooms and labs in other buildings in the complex at 2021 Business Center Drive and 2061 Business Center Drive.

The Los Angeles branch campus physical address is: 2215 W. Mission Road, Alhambra, CA 91803.

**ADDRESSES WHERE INSTRUCTION IS OFFERED**

Stanbridge University provides instruction for on-campus courses at 2021, 2041 and 2061 Business Center Drive, Irvine, CA 92612. The Branch Campus provides instruction for on-campus courses at 2215 W. Mission Road, Alhambra, CA 91803. The university provides instruction for clinical and fieldwork courses in off-campus facilities that are contracted by the university for this purpose.

Stanbridge University also offers online education not offered in real time. Coursework is completed at a location determined by the student. Stanbridge University delivers some courses in an online format with the first class session only held on campus and/or a clinical component.

All the classrooms except the A&P/Microbiology, Cadaver, Nursing Skills, Simulation Labs, Virtual Reality, and Therapy Labs contain the following at each student station: desk, chair, and desktop computer or laptop with appropriate hardware and operating system configurations to allow the use of lab scenario training and study resources. Classrooms are equipped with audio/visual equipment for training DVDs and a SMART board. The computers also provide access to the online exam station for computerized testing.

The Learning Resource Center lab offers computers with access to study resources.

The clinical skills labs offer LCD monitors or a Smart Board for watching training videos while performing clinical procedures, fully electric hospital beds, anatomically correct manikins, sinks, and various medical equipment, ranging from feeding pumps to suction machines. The high-fidelity simulation lab contains 7 high fidelity manikins and the software and hardware to run the manikins in a variety of clinical scenarios.

The school also offers an Online Library consisting of over 12,000 books and additional journals for homework, research, and casual reading. The Online Library can be accessed anywhere and at any time with a PC and an Internet connection.

### COURSES WITH SECONDARY OBJECTIVES

Although Stanbridge University offers courses with secondary objectives, these courses are not within the university’s scope of accredited programs. The courses with secondary objectives are prefixed with the acronym CE or EXT and currently include the following: CE 1005 Skin Problems in the Elderly (Wound Care), EXT 1004 Tracheostomy and Oxygen Delivery Devices, EXT 1002 Respiratory Ventilator Competency, EXT 1004 Tracheostomy and Oxygen Delivery Devices, EXT 1005 Introduction to Wound Care (Formerly Skin Problems in the Elderly), EXT 1007 Hospice Care, EXT 1032 Reimbursement Maze for Rehabilitation Services, EXT 1033 Rules to Splint By: Hands-on Static Splinting, EXT 1009 Dementia Care, EXT 1007 Hospice Care, EXT 1005 Introduction to Wound Care (Formerly Skin Problems in the Elderly), EXT 1006 Infection Prevention and Control, EXT 1033 Rules to Splint By: Hands-on Static Splinting, EXT 1034 Pediatric Feeding Therapy for the Occupational Therapy Professional, EXT 1035 Tai Chi and Yoga for Therapists, EXT 1036 How We Got Hired at Kaiser Permanente & Memorial Care: Q&A with Stanbridge LVN Alumni, and EXT 1037 Advancing Your Career: Q&A with Panel of Experts in Physical and Occupational Therapy.
ADMISSION POLICIES

HIGH SCHOOL DIPLOMA REQUIREMENT

All Applicants
All applicants must hold a high school diploma or equivalent, such as a GED. A copy of the diploma or GED documentation must be provided and it will be retained in the applicant’s file. High School diplomas must be granted by an institution (or program in the case of a home-schooled applicant) recognized by the Department of Education in the state in which he or she resides or an institution accredited by an accrediting agency, such as the Western Association of Schools and Colleges (WASC) or a similar accrediting agency (MSA, NEASC, NCA, SACS, NWAC). Bachelor’s degrees will be accepted in lieu of a high school diploma. Bachelor’s degrees must be granted by an Institution accredited by an accrediting agency recognized by the United States Department of Education. Transcripts for degrees and diplomas awarded by foreign schools must be translated and evaluated for U.S. high school education equivalency (at applicant expense) before they may be accepted. Stanbridge University does not provide courses in ESL (English as a Second Language). All classes at Stanbridge University are taught in English. International students should refer to the admission requirements for International Students, below. The school complies with the Americans with Disabilities Act of 1990. If you are interested in attending the School but are in need of reasonable accommodations, you should schedule an appointment with the Vice President of Instruction, who coordinates compliance with Section 504 of the Rehabilitation Act of 1973 and Title III of the Americans with Disabilities Act of 1990. ADA policies are addressed in the Policies section of this catalog.

ASSESSMENT TESTING

Diploma Program Applicants

Vocational Nurse Program Applicants
The ACCUPLACER Test of the University Board is administered to Vocational Nurse applicants for admission to the program. Minimum scores for admission are:

<table>
<thead>
<tr>
<th>Test</th>
<th>Acceptable Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCUPLACER Reading Comprehension</td>
<td>52</td>
</tr>
<tr>
<td>ACCUPLACER Arithmetic</td>
<td>32</td>
</tr>
</tbody>
</table>

The applicant may take each of the Accuplacer tests required for admission to a program up to three times initially, with at least 48 hours between attempts. If the applicant does not achieve a passing score on the required tests after three attempts, the applicant must wait three months before retaking the failed test(s). After the three-month waiting period, the applicant may take the failed Accuplacer test(s) up to three more times. If the applicant does not achieve a passing score after these three attempts, the applicant must wait one calendar year before retaking all of the Accuplacer tests required for admission to the program. The applicant will be allowed to take each of the Accuplacer tests up to three times after the one calendar year waiting period. If the applicant does not achieve a passing score on each of the required test(s) after these three attempts, the applicant will not be able to take the Accuplacer tests again for admission to a program at the university.

Associate and Baccalaureate Program Applicants
Applicants will be considered for admission to the associate or baccalaureate degree programs if they achieve the following minimum scores on the ACCUPLACER tests of the College Board administered at the university:

<table>
<thead>
<tr>
<th>Test</th>
<th>Minimum Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reading Comprehension</td>
<td>52*</td>
</tr>
<tr>
<td>Sentence Skills</td>
<td>54</td>
</tr>
<tr>
<td>Arithmetic</td>
<td>32*</td>
</tr>
<tr>
<td>Elementary Algebra</td>
<td>26</td>
</tr>
</tbody>
</table>

*Applicants to the ADN program must achieve a minimum Reading Comprehension score of 90 to be eligible for the ATI Critical Thinking Assessment Exam. A minimum ATI Critical Thinking Assessment Entrance Exam score of 68% will be needed to be eligible for an interview.

The applicant may take each of the Accuplacer tests required for admission to a program up to three times initially, with at least 48 hours between attempts. If the applicant does not achieve a passing score on the required tests after three attempts, the applicant must wait three months before retaking the failed test(s). After the three-month waiting period, the applicant may take the failed Accuplacer test(s) up to three more times. If the applicant does not achieve a passing score after these three attempts, the applicant must wait...
one calendar year before retaking all of the Accuplacer tests required for admission to the program. The applicant will be allowed to take each of the Accuplacer tests up to three times after the one calendar year waiting period. If the applicant does not achieve a passing score on each of the required test(s) after these three attempts, the applicant will not be able to take the Accuplacer tests again for admission to a program at the university.

**Associate of Science in Nursing (ADN) Applicants**

Please read and complete the following steps:

1. Complete an online application for the Associate of Science in Nursing degree program. A non-refundable $25.00 applicant fee is required to apply. Click [here](#) to apply now and start your admissions application process for an early decision.

If you are not ready to apply, but would like more information, please attend an information session and campus tour offered on campus. Click [here](#) to view the info session schedule. Please note, all prospective students must apply online before moving on to the entrance exam step.

2. After submitting your online application, take the Accuplacer examination and achieve the following preferred minimum scores on each test of this examination: Reading Comprehension 90; Sentence Skills 54; Arithmetic 46; and Elementary Algebra 26. Scheduling your exam will be coordinated by your dedicated Admissions Representative.

3. Take the ATI Critical Thinking Assessment Entrance Exam and achieve a preferred minimum score of 68% to be eligible for an interview.

Upon completion of steps 1 through 3, applicants may proceed to the following:

4. Submit an official transcript of record showing possession of a high school diploma or its equivalent, such as a (GED), from an accredited secondary school or an associate degree or higher from an accredited college or university.

5. Complete a background check.

6. Schedule and attend a meeting with a Financial Aid Officer

7. Submit Official Transcripts of all courses taken at all high schools, colleges, and/or universities.

8. Interview with the Program Director or designee, write a timed essay, and take an impromptu Math Quiz on Dosage Calculation.

   - The interviewer will use a Candidate Interview form for the interview and will award points for the applicant’s essay and responses during the interview according to a departmental rubric. The interviewer will also award points according to the departmental rubric for the applicant’s score on the Accuplacer examination; completion of an academic degree; completion of relevant prerequisite courses; grade point average for the completed prerequisite courses; and current certificates and/or work experience or volunteer work. The interviewer will combine these points with the points awarded for the interview into a total score according to the departmental rubric. Based on the total score, the applicant will be ranked among the other applicants who are applying for admission to the program with the current cohort.

   - The thirty (30) applicants who have met the minimum requirements for admission to the ADN program, and who have the highest number of combined points awarded according to the departmental rubric, will be accepted for admission to the current cohort. Should an opening occur, the applicant who has the next highest number of combined points may be accepted for admission. If there are more than thirty (30) individuals qualified for admission to a given cohort, those who are not admitted to the current cohort may reapply to be considered for admission to a subsequent cohort.

9. Submit the Transfer of Credit Request form and related documentation for evaluation of possible transfer credit. Transfer credit will only be granted under the following conditions:

   - The course is equivalent to one required in the ADN program.
### ADMISSION

- Required prerequisite science courses must have been completed within two years of the date of enrollment. Prerequisite English and math courses must be completed prior to the date of enrollment. Nursing courses must have been completed within three years of the date of enrollment.
- The grade in a prerequisite course in science (Human Anatomy, Physiology, General Microbiology) is 3.0 or higher; in another prerequisite course (English Composition, College Algebra I) or general education course (Introduction to Sociology, Developmental Psychology, Speech Communication) is 2.0 or higher; or in an RN nursing course is 3.0 or higher.
- An applicant may receive competency-based credit for an RN nursing course by passing a written examination on the theory objectives and a skills demonstration on the clinical objectives of the course. The Program Director will administer this process.

10. File all required documents with Admissions at least two (2) calendar weeks prior to the interview with the Program Director or designee and ensure all required proof of physical examination, immunizations, and valid CPR card is submitted to Admissions seven (7) days prior to the start of orientation.

11. Provide an official transcript of record demonstrating proficiency in English if the applicant obtained a high school diploma or postsecondary degree in a non-English speaking country. For this purpose, applicants must obtain the minimum score on one of the tests listed in the university’s catalog.

12. Applicants will be notified of admission to the program by a letter of invitation. An applicant may only decline the letter of invitation twice and must repeat steps 2-10 above if he or she reapplies for admission to the program.

13. Applicants who are not admitted to the ADN program may reapply for admission by repeating steps 2-10.

14. Applicants reapplying for admission only have to resubmit official transcripts of record if they have taken additional courses since the previous application for admission.

### ASSOCIATE DEGREE IN NURSING (ADN) APPLICANTS WITH CRIMINAL CONVICTIONS

#### Background Check and Licensure

California law allows for the denial of registered nursing licensure on the basis of any prior convictions substantially related to nursing practice. The California Board of Registered Nursing (BRN) requires that all convictions be reported, except for minor traffic violations, on applications for licensure. Both misdemeanor and felony convictions must be reported. This includes “driving under the influence”. Convictions must be reported even if they have been expunged. All prior or current disciplinary action against a health-care related license must be reported, whether it occurred in California or in another state or territory. The BRN reviews all prior convictions substantially related to the qualifications, functions, or duties of a registered nurse. Each application for licensure is evaluated on a case-by-case basis. See the California Board of Registered Nursing website at http://www.rn.ca.gov/applicants/lic-faqs.shtml#disc for further information.

#### Background Check and Clinical Facilities

Some clinical facilities require background checks for all employees, volunteers, and students working in the facility, independent of the required licensure background check (see below). Students will be required to submit their personal information for a background check in order to attend clinical sessions.

- Each facility judges the background of student nurses with misdemeanors or felonies on an individual basis. Denial of admission to the ADN program for students with convictions will be based on a pattern of convictions, felonies, or certain misdemeanors which will bar a student from completing a clinical rotation.
- Failure to disclose a previous conviction is typically viewed as seriously as the conviction itself, if not more so.
- Some clinical facilities may require submission of fingerprints as part of the background check.
Bachelor of Science in Nursing (Degree Completion) Applicants

Applicants will be admitted to the Bachelor of Science in Nursing (Degree Completion) program after filling out an application; speaking to an admissions representative (before or after filling out the application); submitting an official transcript of record from an accredited institution that shows completion of the required associate degree; and providing proof of RN licensure. Applicants for admission to the Bachelor of Science in Nursing (Degree Completion) program must provide proof of RN licensure from the state in which they practice and completion of an associate degree (Associate of Arts or Associate of Science) program from an accredited institution. Applicants who possess an AA or AS degree from a foreign college or nursing program must provide a translation and an evaluation of their degree prior to consideration for admission.

Occupational Therapy Assistant Applicants

- To be eligible for admission to the OTA program an applicant must first meet the minimum admission policies for an associate degree program, as described above in this catalog.

- In addition to meeting the minimum admission policies for an associate degree program, each applicant must complete a questionnaire and have an interview with a designated member of the OTA faculty. The interviewer will use a Candidate Interview form for the interview and will award points for the applicant’s responses on the questionnaire and in the interview according to a departmental rubric.

- The interviewer will also award points according to the departmental rubric for the applicant’s scores on the Accuplacer examination, other examinations, or a grade point average earned for a degree or diploma. The interviewer will combine these points with the points awarded for the questionnaire and interview into a total score according to the departmental rubric. Based on the total score, the applicant will be ranked among the other applicants who are applying for admission to the program with the current cohort.

- The 35 applicants who have met the minimum admission policies for an associate degree program and, who have the highest number of combined points awarded for the questionnaire, interview, and examination scores or grade point average, will be accepted for admission to the current cohort. Should an opening occur, the applicant who has the next highest number of combined points may be accepted for admission. If there are more than 35 individuals qualified for admission in a given cohort, those who are not admitted to the current cohort will be considered for admission into a subsequent cohort.

OCCUPATIONAL THERAPY ASSISTANT APPLICANTS – APPLICANTS WITH CRIMINAL CONVICTIONS

Applicants to the OTA program are required to complete a background check form and pay the background check fee at least one business day prior to the start of classes.

Many clinical facilities will not permit OTA applicants (or employees/volunteers) in the facility with certain felony or misdemeanor convictions as part of an overall employment policy. Stanbridge University cannot admit OTA applicants who cannot attain the mandated requirement of 640 level 2 fieldwork hours. Accordingly, applicants for admission with a felony conviction will not be granted admission to the university. Certain types of convictions, regardless of whether felony or misdemeanor, will result in denial of admission. These types of convictions include certain drug/substance abuse offenses, violent crimes and offenses requiring mandatory reporting, such as elder abuse or child abuse.

Graduates of the program will be eligible to sit for the national certification examination for the occupational therapy assistant, administered by the National Board For The Certification Of Occupational Therapy (NBCOT). After successful completion of this exam, the graduate will be a certified occupational therapy assistant (COTA). In addition, most States require licensure to practice; however, State licenses are usually based on the results of the NBCOT certification examination. A felony conviction may affect a graduate’s ability to sit for the NBCOT certification examination or attain State licensure. The NBCOT describes the nature of the questions asked on the exam candidate applications as follows:

Individuals applying for the NBCOT Certification Examination for CERTIFIED OCCUPATIONAL THERAPY ASSISTANT COTA® (COTA) must answer each of the following questions on the examination application:

1. Have you ever been charged with or convicted of a felony? (NOTE: Applicants must answer affirmatively if records, charges, or convictions have been pardoned, expunged, released or sealed.)

2. Have you ever had any professional license, registration, or certification revoked,
suspended or subject to probationary conditions by a regulatory authority or certification board?

3. Have you ever been found by any court, administrative, or disciplinary proceeding to have committed negligence, malpractice, recklessness, or willful or intentional misconduct which resulted in harm to another?

4. Have you ever been suspended and/or expelled from a college or university?

5. Have you ever been convicted of a felony? (NOTE: Applicants must answer affirmatively even if convictions have been pardoned, expunged, released, or sealed.)

6. Do you currently have a felony charge or charges against you?

7. Have you ever had any professional license, registration, or certification denied, or revoked, suspended, or subject to probationary conditions by a regulatory authority or certification board, including NBCOT?

8. Do you currently have a professional license, registration, or certification under review for possible disciplinary action?

9. Have you ever been found by any court, administrative, or disciplinary proceeding to have committed negligence, malpractice, recklessness, or willful or intentional misconduct which resulted in harm to another?

10. Do you currently have a charge(s) of negligence, malpractice, recklessness, or willful or intentional misconduct that resulted in harm to another against you?

11. Have you ever been suspended and/or expelled from a college or university?

For more information regarding this and other certification questions, or to obtain a Character Review prior to starting your program, please contact the NBCOT.

Individual State regulatory boards that issue licenses for the practice of occupational therapy must be contacted individually to inquire about certification questions or restrictions.

**Physical Therapist Assistant Applicants**

To be eligible for admission to the PTA program, an applicant must first meet the minimum admission policies for an associate degree program, as described in this catalog.

- In addition to meeting the minimum admission policies for an associate degree program, each applicant must complete a minimum of 20 hours of documented paid or volunteer work experience or observation in a physical therapy facility or related setting with a licensed PT or PTA.

- Additionally, each applicant must complete a questionnaire immediately prior to an interview with the Program Director or designee. The interviewer will use a Candidate Interview form for the interview and will award points for the applicant's responses in the interview according to a departmental rubric.

- The interviewer will also award points according to the departmental rubric for the applicant’s scores on the Accuplacer examination, other examinations, or a grade point average earned for a degree or diploma. Points will also be awarded for the level of prior education and experience in the medical or human service field. The interviewer will combine these points with the points awarded for the questionnaire and interview into a total score according to the departmental rubric. Based on the total score, the applicant will be ranked among the other applicants who are applying for admission to the program with the current cohort.
• The 45 applicants who have met the minimum admission policies for an associate degree program, and who have the highest number of points awarded for the questionnaire, interview and examination scores or grade point average, will be accepted for admission to the current cohort. Should an opening occur, the applicant who has the next highest number of combined points may be accepted for admission. If there are more than 45 individuals qualified for admission in a given cohort, those who are not admitted to the current cohort will be considered for admission into a subsequent cohort in the following calendar year.

**PHYSICAL THERAPIST ASSISTANT APPLICANTS – APPLICANTS WITH A CRIMINAL HISTORY**

Applicants to the PTA program are required to complete a background check form and pay the background check fee at least one business day prior to the start of classes. Individuals with a criminal history may be considered for admission. Stanbridge University will consider the nature and the severity of the act or crime; time that has elapsed since the commission of the act or crime; the extent to which the applicant has complied with any terms or conditions of the probation imposed; and any other relevant evidence of rehabilitation. Permission, however, to take the two examinations required for licensure – the National Physical Therapy Examination for Physical Therapist Assistants (NPTE for PTAs) and the California Law Examination (CLE) – after graduating from an accredited PTA program is determined by the Physical Therapy Board of California (PTBC) and involves the mandatory disclosure of any and all criminal offenses as part of the application process.

The following is an excerpt from the PTBC website and is provided for clarification:

**ANY AND ALL CONVICTIONS OF CRIMINAL OFFENSES MUST BE DISCLOSED** including a citation, misdemeanor and/or felony, etc. Convictions following a plea of nolo contendere MUST be disclosed. If your plea or verdict has been dismissed pursuant to Section 1203.4 of the California Penal Code and Section 2661 of the Business and Professions Code, you are required to disclose the conviction(s) on your application.

Serious traffic convictions such as reckless driving, driving under the influence of alcohol and/or drugs, hit, and run, evading a peace officer, failure to appear, driving while the license is suspended or revoked MUST be reported. This list is not all-inclusive. If in doubt as to if a conviction should be disclosed, it is better to disclose the conviction on the application.

Failure to submit proper documents of conviction(s) and/or disciplinary action(s) may delay processing of your application. Applicants with prior conviction(s) (citation, infraction, misdemeanor and/or felonies, etc.), must submit the following documents:

• A descriptive written explanation, written by the applicant, of the circumstances surrounding the conviction or disciplinary action.

• Certified copies of the arresting agency report. (If the arresting agency has purged documents, provide a letter from the arresting agency with explanation.)

• Certified copies of the court documents to include the final disposition and order. (If the court has purged documents, provide a letter from the court with explanation.)

• Copies of letters from substance related programs verifying successful completion or evidence of current participation of a personal recovery program (such as Alcoholics/Narcotics Anonymous) and other recovery support and relapse prevention groups.

• Documentation of substance assessment discharge records, intake/exit interviews and summaries of counselor’s notes, or similar types of evaluations from the program you attended.

• Compliance letters from probation officers.

• Documentation of successful completion of any other court ordered programs.

In deciding whether you qualify for a license, the PTBC will consider the nature and the severity of the act or crime; time that has elapsed since the commission of the act/crime; the extent to which the
applicant has complied with any terms or conditions of the probation imposed; and any other relevant evidence of rehabilitation.

The Physical Therapy Board of California’s primary responsibility is consumer protection. To that end, the Physical Therapy Board of California has the authority to deny a license due to a conviction of a crime or offense substantially related to the qualifications, functions, or duties of a licensee. Per Section 1399.21 of the California Code of Regulations, the Physical Therapy Board of California will determine if the applicant has met the rehabilitation criteria for denial and reinstatement of licensure.

For more information regarding this and other certification questions, please contact the PTBC.

Veterinary Technology Applicants

- To be eligible for admission to the Veterinary Technology program, an applicant must first meet the minimum admission policies for an associate degree program, as described above in this catalog.

- In addition to meeting the minimum admission policies for an associate degree program, each applicant must complete a questionnaire and an essay, and have an interview with the Program Director or designee. The interviewer will use a Candidate Interview form for the interview and will award points for the applicant's questionnaire, essay, and responses in the interview according to a departmental rubric.

- The interviewer will also award points according to the departmental rubric for the applicant's scores on the Accuplacer examination, other examinations, or a grade point average earned for a degree or diploma. The interviewer will combine these points with the points awarded for the questionnaire, essay, and interview into a total score according to the departmental rubric. Based on the total score, the applicant will be ranked among the other applicants who are applying for admission to the program with the current cohort.

The 35 applicants who have met the minimum admission policies for an associate degree program, and who have the highest number of points awarded for the questionnaire, essay, interview and examination scores or grade point average, will be accepted for admission to the current cohort. Should an opening occur, the applicant who has the next highest number of combined points may be accepted for admission. If there are more than 35 individuals qualified for admission in a given cohort, those who are not admitted to the current cohort will be considered for admission into a subsequent cohort.

Applicants to the veterinary technology program are required to complete a background check form and pay the background check fee at least one business day prior to the start of classes.

- Individuals with a criminal history may not be able to obtain licensure from the California Veterinary Medical Board. Licensure is required to work in this field. Without a license, you will not be able to obtain a job as a Veterinary Technician.

- The University does not determine whether persons with a criminal history are eligible for licensure. California state law requires a criminal background check be conducted on anyone applying for licensure as a registered veterinary technician. Determination of eligibility is made on a case-by-case basis by The California Veterinary Medical Board. The Board determines licensure eligibility at the time you apply for licensure, following a required criminal background check. State law requires that the background check be conducted on anyone applying for licensure as a registered veterinary technician.

- Individuals with a criminal history may be considered for admission to the Veterinary Technician Program on a case-by-case basis.

- Stanbridge University will consider the nature and the severity of the acts or crime, the time that has elapsed since the commission of the act/crimes, the extent to which the applicant has complied with any terms or conditions of the probation imposed, and any other relevant evidence of rehabilitation.

- Admission to the Veterinary Technician Program is NOT a guarantee that the California Veterinary Medical Board will determine that an individual is qualified for licensure.
• Internship facilities may require release of background check data and criminal convictions may affect the ability of the Veterinary Technology program to place the student in an internship and, thus, may delay the student’s graduation date or affect the student’s ability to complete the program.

The following is an excerpt from the Veterinary Medical Board RVT application instructions document and is provided for clarification:

Section 144(b) of the Business and Professions Code authorizes the Veterinary Medical Board (Board) to collect fingerprints for background checks of applicants for registration. Fingerprints must be submitted electronically via Live Scan pursuant to Penal Code Section 11077.1. Fingerprinting is required to take the RVT Examination; the results from Live Scan must be received by the Board prior to examination.

Criminal Offender Record Information (CORI) is information identified through fingerprint submission to the California Department of Justice (DOJ). CORI information includes criminal history information maintained by California local law enforcement, the DOJ, the Federal Bureau of Investigation (FBI) and other state law enforcement. CORI information is confidential and used solely for the purpose of determining whether an applicant has criminal history that would be grounds for denial of an application, or suspension or revocation of a registration pursuant to Section 475 – 499 of the Business and Professions Code.

Candidates must disclose on the application whether or not there has been any disciplinary action taken against any registration, license, or certificate as a veterinary technician or any veterinary related license including revocation, suspension, probation, voluntary surrender, or any other proceeding in any state, territory or province. A separate letter explaining the action is required.

Candidates who have been convicted of, or pled no contest to, any violation of any law of the United States, any state or local jurisdiction, or any foreign country, must attach a letter of explanation that includes the type of violation, the date, circumstances and location, and the complete penalty received. Also include certified copies of arrest records and court documents. You must include all misdemeanor and felony convictions, regardless of the age of the conviction, including those which have been set aside and/or dismissed under Penal Code Section 1000, 1203.4 or 1210.1. (Traffic violations involving driving under the influence, injury to persons or providing false information must be reported).

For more information regarding Live Scan, please refer to the “Fingerprinting Requirements” information in this package, or the Board’s web site (www.vmb.ca.gov/applicants/examinations.shtml). Your fingerprints must be processed at a Live Scan facility, and service must include both the DOJ and the FBI. Fingerprint processing fees are paid directly to the Live Scan facility.

Vocational Nurse Applicants

AGE REQUIREMENT
Vocational Nurse applicants must be at least 17 years old.

VOCATIONAL NURSE APPLICANTS WITH CRIMINAL CONVICTIONS
Applicants to the Vocational Nurse Program are required to complete a background check form and pay the background check fee at least one business day prior to the start of classes. Applicants with criminal convictions should refer to the Supplement for Vocational Nurse Applicants on page 42 for information on BVNPT licensing policies.

Many clinical facilities will not permit applicant nurses (or employees/volunteers) in the facility with certain felony or misdemeanor convictions as part of an overall employment policy. Stanbridge University cannot admit VN applicants who cannot attain the state mandated requirement of 954 clinical instruction hours. Accordingly, applicants for admission with a felony conviction will not be granted admission to the university. Certain types of convictions, regardless of whether a felony or misdemeanor, will result in denial of admission. These types of convictions include drug/substance abuse offenses, violent crimes and offenses requiring mandatory reporting, such as elder abuse or child abuse.

Applicants with misdemeanor convictions, other than those listed above, may be asked to provide additional information regarding the conviction in order for university administration to make a decision on admission based on the type, age, and gravity of the offense.
**Master of Science in Nursing and Master of Science in Occupational Therapy Applicants**

Applicants will be admitted to the master’s degree programs after filling out an application, speaking to an admissions representative (before or after filling out the application), and submitting an official transcript of record that shows completion of the required bachelor’s degree at an institution of higher education accredited by an accreditation agency that is recognized by the U.S. Department of Education. Transcripts for degrees awarded by foreign schools must be translated (if the transcript is not in English) and evaluated for equivalency to those awarded by accredited institutions in the United States (at applicant expense) before the applicant can be admitted to a master’s degree program.

**Master of Science in Nursing Applicants**

Applicants applying for the Master of Science in Nursing program must possess an associate degree in nursing with a bachelor’s degree in healthcare administration or related field or a Bachelor of Science in Nursing degree from an accredited institution and provide proof of their degree. Applicants seeking admission to the Master of Science in Nursing program will also have to show proof of unencumbered RN licensure (RN license not in denied, revoked, probationary or suspended status) from the state in which they practice.

**Master of Science in Occupational Therapy Applicants**

Applicants applying for the Master of Science in Occupational Therapy program must meet the following requirements:

1. A baccalaureate degree or its equivalent from an accredited institution with a cumulative GPA of 3.0 or higher. All prerequisites must be completed. Prerequisites:
   - Human Anatomy (with laboratory) *
   - Physiology (with laboratory)*
   - Introduction to Statistics
   - One course in Anthropology or Sociology
   - Abnormal Psychology
   - Lifespan or Developmental Psychology

*If Human Anatomy and Physiology are taken as a combined course, they must be taken for two consecutive terms and must have a laboratory course in each term.

2A. **For General Applicants**: Successful completion of all prerequisite courses with a grade of C or higher. Each prerequisite course must be equivalent to 3 semester or 4.5 quarter credits and must have been completed within five years of the date of planned enrollment.

2B. **For Applicants Bridging from Other Healthcare and Human Services Fields**: Some time limits on prerequisites may be waived if applicants have been continually employed or licensed/certified in certain healthcare or human services fields (OTA, PTA, Chiropractor, Acupuncturist, Athletic Trainer, etc.) since completion of the undergraduate program. Applicants will need to provide documentation for admission to the MSOT program.

3. An official **Graduate Record Exam** report with the following preferred minimum scores (GRE School Code 3642) is required of all applicants who do not have a master’s or doctoral degree:
   - Quantitative 144 or higher
   - Verbal 150 or higher
   - Analytical Writing 3.5 or higher

4. A minimum of thirty (30) hours of documented volunteer experience or observation in an occupational therapy-related or other health care setting. At least sixteen (16) of the thirty (30) total hours must be in direct observation of an Occupational Therapist Registered/Licensed (OTR/L) in a practice setting. This criterion is waived for applicants who are Certified Occupational Therapy Assistants.

5. An application essay to be submitted as a writing sample. The content of the application essay will be specified during the application process.

6. Successful completion of an interview with the Program Director or designee. After January 1, 2015 applicants will also be required to successfully complete an essay at the conclusion of the interview.

7. Three letters of recommendation from faculty members, therapists, and employers.
8. Applicants who have earned their baccalaureate degree from an institution of higher education in a non-English speaking country must provide an official transcript of record demonstrating proficiency in English. For this purpose, applicants must obtain the minimum score on one of the examinations listed below: TOEFL, Kaplan English, AOI University of Languages, Step Eiken Test, American Language Program, GEOS English Academy.

OCCUPATIONAL THERAPY APPLICANTS – APPLICANTS WITH CRIMINAL CONVICTIONS

Applicants to the Master of Science in Occupational Therapy (OT) program are required to complete a background check form and pay the background check fee at least one business day prior to the start of classes.

As part of an overall employment policy many clinical facilities will not permit student occupational therapists (or employees/volunteers) in the facility who have or who acquire certain felony or misdemeanor convictions. Stanbridge University cannot admit OT applicants who cannot attain the mandated 960 level 2 fieldwork hours. Accordingly, applicants for admission with a felony conviction will not be granted admission to the university. Certain types of convictions, regardless of whether a felony or misdemeanor, will result in denial of admission. These types of convictions include some drug/substance abuse offenses, violent crimes and offenses requiring mandatory reporting, such as elder abuse or child abuse.

Applicants with misdemeanor convictions, other than those listed above, may be asked to provide additional information regarding the conviction in order for university administration to make a decision on admission based on the type, age, and gravity of the offense. Students who acquire certain types of felony or misdemeanor convictions during their program may be dismissed.

Some fieldwork facilities require background checks for all employees, volunteers and students working in the facility, independent of the required felony questions on the NBCOT application and the Live Scan for state regulatory boards. Students will be required to submit their personal information for a background check in order to attend fieldwork sessions at these facilities.

Since Stanbridge has no input in the decision of the facility to accept a student or not, and since the university cannot predict how all facilities will decide upon a less than favorable result of a background check, the university cannot offer any definitive answer as to the possible barring of a student from a fieldwork facility. As some types of experience are limited to a single facility, a student could potentially be prevented from completing his or her education if the facility denies the fieldwork experience to the student.

Failure to disclose a previous conviction is typically viewed as seriously as the conviction itself, if not more so.

In addition to the background check for fieldwork facilities, a second background check of California Department of Justice and FBI records must be completed prior to licensure. This background check is not satisfied by the preadmission check.

More advanced background checks, such as Live Scan, may be required for some fieldwork placements.

Multiple background checks/Live Scans may be required for certain fieldwork settings at the student’s expense.

Graduates of the Occupational Therapy program must pass the certification exam administered by the National Board for the Certification of Occupational Therapy (NBCOT) in order to work as an occupational therapist. Applicants must be aware that felony convictions and other character issues could disqualify them from taking the NBCOT exam, as well as from receiving individual state licenses. The NBCOT describes the nature of the questions asked on exam candidate applications as follows:

*Individuals applying for the NBCOT Certification Examination for OCCUPATIONAL THERAPIST REGISTERED OTR® (OTR) must answer each of the following questions on the examination application:*

1. **Have you ever been charged with or convicted of a felony?** (NOTE: Applicants must answer affirmatively if records, charges, or convictions have been pardoned, expunged, released or sealed.)
2. **Have you ever had any professional license, registration, or certification revoked, suspended or subject to probationary conditions by a regulatory authority or certification board?**
3. Have you ever been found by any court, administrative, or disciplinary proceeding to have committed negligence, malpractice, recklessness, or willful or intentional misconduct which resulted in harm to another?

4. Have you ever been suspended and/or expelled from a college or university?

For more information regarding this and other certification questions, or to obtain an Early Determination Review prior to starting your program, please contact the NBCOT.

Credentialing Services at NBCOT
12 S. Summit Avenue, Suite 100, Gaithersburg, Maryland 20877.
Phone: (301) 990-7979. Email: character.review@nbcot.org

Individual state regulatory boards that issue licenses for the practice of occupational therapy must be contacted individually to inquire about certification questions or restrictions.

INTERNATIONAL STUDENT TOEFL REQUIREMENT
Stanbridge University defines an "International Student" as a student attending college while on a student visa or as a student attending one of the university's distance education, i.e. online programs, while not residing in the United States. Stanbridge University does not provide courses in ESL (English as a Second Language). All classes at Stanbridge University are taught in English. Accordingly, in order to be admitted to a program offered by the university, all International students must obtain the minimum score on one of the following examinations or provide the applicable official transcript of record:

- The Wonderlic Scholastic Level Examination (SLE) 17 (composite score)
- ERI Nurse Entrance Test 50 Reading Comprehension
- TOEFL Exam (Test of English As A Foreign Language) 470 Paper-based format
  150 Computer-based format
  52 Internet-based format
- Step Eiken Test
- Kaplan English
- American Language Program (UCLA-Extension) Level 105 and recommendation
- AOI University of Languages
- GEOS English Academy
- University Level English Or Writing
- Graduation from An Accredited US High School
- Passing score and transcript
- Transcript

CREDIT FOR PREVIOUS EDUCATION
Diploma and Degree Programs
Students may request an evaluation of their previous coursework for possible transfer credit, provided that before the beginning of their program at Stanbridge University, they give the Registrar of the university proof of satisfactory completion (such as an official transcript from a school that is regionally or nationally accredited, PACE and DANTES courses or a course of study or training in the Armed Forces of the United States or American Council on Education (ACE) credit recommendation) and equivalency of the coursework to the Stanbridge University course. Students requesting evaluation of their transcripts must provide a description from the school catalog for each course for which transfer credit is requested. If the course description from the school catalog is not sufficient by itself to evaluate whether the course is equivalent, a course syllabus or outline of each course for which transfer credit is requested will be required. ACE credit recommendations will be considered only for General Education course credit, not technical or core course credit or ADN program prerequisite science course (SCI prefix) credit.

Transfer credit will be granted only for those courses:
- for which a grade of "C" or better ("B" in prerequisite science courses and "B" for nursing courses in the ADN program) was earned or proof of passing a vendor's certification examination is provided; and
- which are determined to be equivalent in content and academic level to those required in the student's program at Stanbridge University.
- Certain courses in specific programs may have to be completed within 2 – 5 calendar years of the date of the student's start of coursework at the university in order to be accepted for transfer credit.
Stanbridge University recognizes credits for CLEP exams as detailed in the following chart. Credits granted for CLEP exams are shown as transfer hours on the student’s transcript and are included in the hours completed toward a degree. An official CLEP test result is required to award CLEP credit.

Advanced Placement credit may be granted for non-core courses (General Education courses) with an examination grade of 3 or better. Courses requiring laboratory will not be eligible for transfer credit based on Advanced Placement examinations.

Transfer credit will be granted for the Diploma in Information Technology program offered at Stanbridge University toward the Associate of Science in Information Technology program offered at the university or for either of these two programs toward the Bachelor of Science in Information Technology program offered at the university provided that the program for which transfer credit is being sought was completed in its entirety at Stanbridge University.

If either the Diploma in Information Technology or Associate of Science in Information Technology program offered at the university has not been completed in its entirety at the university, the student will only receive transfer credit for those courses in which a "C" grade or better was earned or for which proof of passing a vendor's certification examination is provided.

Official transcripts can be mailed directly from a school or delivered in person by the student and must be sent or given to the Registrar of Stanbridge University. To be considered official, a transcript must be received by the Registrar of the university in an envelope with an unbroken seal, and the transcript must bear the official seal and/or signature of the Registrar of the school sending the transcript. For military veterans, the DD214 and accompanying documentation will serve as a transcript for the evaluation of a course of study or training in the Armed Forces. Courses for which a grade was not awarded, but for which a certification exam was satisfactorily completed may be awarded transfer credit upon satisfactory completion of a proficiency examination given by the university. Under no circumstances will an unofficial transcript be accepted for evaluation of possible transfer credit.

**Vocational Nurse Program**

Vocational Nurse students who have been admitted to the program must indicate all previous coursework taken at other institutions on Stanbridge University’s “Request for Transfer or Competency-based Credit” form. Students may request an evaluation of their previous coursework for possible transfer credit, provided that before the beginning of their program at Stanbridge University, they provide the Registrar of the university with an official transcript of record from a school that is:

- regionally or nationally accredited;
- or a program that is approved or accredited by a state board of practical, vocational, or registered nursing;
- or a course of study or training in the Armed Forces of the United States.

In addition, students requesting evaluation of their transcripts must provide a course syllabus or outline for each course for which transfer credit is requested.
Transfer credit will be granted only for those courses:
- which have been completed within the last five calendar years;
- for which a grade of “C” or better was earned; and
- which are determined to be equivalent in credit hours, content, and academic level as those required in the student’s program at Stanbridge University.

Students will not be required to take an examination to determine whether transfer credit will be granted if transfer credit is granted. A student, however, may be tested to determine whether specific deficiencies still exist that require remediation.

Official transcripts can be mailed directly from a school or delivered in person by the student and must be sent or given to the Registrar of Stanbridge University. To be considered official, a transcript must be received by the Registrar of the university in an envelope with an unbroken seal, and the transcript must bear the official seal and/or signature of the Registrar of the school sending the transcript. For military veterans, the DD214 and accompanying documentation will serve as a transcript for the evaluation of a course of study or training in the Armed Forces. Under no circumstances will an unofficial transcript be accepted for evaluation of possible transfer credit.

If a student chooses to decline credit for any course for which the student is eligible to receive transfer credit, the student will document the declination of credit on the “Declination of Equivalent Credit” form to be filed in the student’s record. The student must accept or decline transfer credit before commencing the program for which transfer credit was requested.

Competency-based credit will be granted on the basis of a written examination for theory courses and a demonstration of the mastery of clinical objectives and a written examination for clinical courses. Each student requesting credit for previous work experience will meet with the Director of Nursing, who will describe the specific tasks, work environment, and timeframes for the written examinations for theory courses and the written examinations and demonstration of mastery of clinical objectives for clinical courses. The amount of credit which is granted will be determined on a case-by-case basis and documented in the students’ record.

Prior to taking written examinations or demonstrating mastery of clinical objectives to determine whether competency-based credit can be granted, students will be charged a one-time, non-refundable fee of $50 for each written examination and a one-time, nonrefundable fee of $100 for each demonstration of the mastery of clinical objectives. A student may appeal a denial of competency-based credit by providing a written appeal to the Director of Nursing within 3 business days after a notification of denial of credit. The Director of Nursing will review the appeal and provide the student with a copy of the decision in writing within 3 business days after receipt of the appeal. The decision of the Director of Nursing is final.

**Associate of Science in Nursing (ADN) Program**

Prior to enrollment, a student desiring entry into the Associate of Science in Nursing (ADN) program and LVN-to-ADN programs may receive transfer credit for courses in Anatomy, Physiology and Microbiology for health pre-professionals or Biology majors taken previously at another institution as long as the student has achieved a minimum GPA of 3.0 or greater in these courses. The courses must include a laboratory component and have been taken in the last two years.

Prior to enrollment, a student desiring entry into the LVN 45-Unit Option may receive transfer credit for courses in Physiology and Microbiology designed for health pre-professionals or Biology majors taken previously at another institution as long as the student has achieved a minimum GPA of 3.0 or greater in these courses. The courses must include a laboratory component and have been taken in the last two years.

Competency-based credit will be granted on the basis of a written examination for nursing theory courses and a demonstration of the mastery of clinical objectives and a written examination for clinical courses. Any student who wishes to challenge a nursing course (with an NUR prefix), the Anatomy and Anatomy Lab, Physiology and Physiology Lab or Microbiology and Microbiology Lab courses to earn academic credit by examination must successfully complete the culminating examination appropriate to the course. In the nursing theory or non-clinical courses, the terminal measures are often a final examination and/or term paper. In the case of the challenge examination the student must receive a passing grade of 80% or higher to receive credit. In the nursing clinical laboratory classes students must demonstrate competent clinical care by way of a return demonstration for all skills listed in the course syllabus being challenged. In the clinical courses where critical or life-threatening maneuvers are required, the student must perform the demonstration with 100% skill and accuracy.
Prior to taking written examinations or demonstrating mastery of clinical objectives to determine whether competency-based credit can be granted, students will be charged a one-time, non-refundable fee of $50 for each written examination and a one-time, nonrefundable fee of $100 for each demonstration of the mastery of clinical objectives.

**Awarding of Credit for Previous Education or Competency-Based Credit, Including Military Education and Experience**

Stanbridge University will conduct an evaluation of previous education and training for all veterans and will grant appropriate credit, shorten the training period proportionately, and notify the VA and student accordingly.

Stanbridge University complies with California Board of Registered Nursing regulations SB 466 as follows:

1. The University Student Catalog shall include a section referring to Awarding of Credit for Previous Education or Competency-Based Credit, Including Military Education and Experience for all students, including those that have served or are serving in the United States Armed Forces.
2. The University Associate of Science in Nursing webpage shall provide a link identified as "Transfer Credit for Military Experience" that directs to the policy.
3. A form outlining the procedures will be provided and kept as a record in the student’s file.
4. The student’s file will reflect the awarding of credit on the student transcript.

**EXPERIENTIAL LEARNING CREDIT**

Stanbridge University does not offer experiential or competency-based learning credit, except in the VN and ADN programs.

**RESIDENCY REQUIREMENT**

Students may transfer in no more than 25% of the total credits required by their program at Stanbridge University.
ADMISSION PROCEDURES

Applicants seeking admission to programs delivered on-campus must meet with an admissions representative to receive an overview of their desired program and information on the minimum requirements for admission to the program, including, if applicable, the assessment exam score requirement. Applicants seeking admission to programs delivered online must fill out an application and speak to an admissions representative (before or after filling out the application) in order to have any questions answered about the overview of their desired program and information on the minimum requirements for admission to the program.

During their in-person meetings on campus or telephone conversations for online programs:

- Applicants are given an overview of the prior programs and courses of interest to them, including the length, cost, policies, student and career services and fields of employment relevant to the program.
- Applicants are asked to schedule a time to take the assessment exam in the Test Center for those programs requiring an assessment exam and if the exam is applicable to the student.
- Applicants are required to submit a copy of a high school diploma or equivalent or an official transcript of record from an accredited postsecondary institution showing completion of the required postsecondary degree or credits and coursework, according to the requirements of the program. Applicants seeking admission to the Bachelor of Science in Nursing (Degree Completion) and Master of Science in Nursing programs will also have to show proof of unencumbered RN licensure.
- Vocational Nurse applicants must have a physical, immunizations, background check and drug screen prior to enrollment and attend an interview with the Director of Nursing, Assistant Director of Nursing or a current Stanbridge faculty nursing instructor.
- OTA and PTA applicants must complete a questionnaire and have an interview prior to admission.
- VT applicants must complete a questionnaire and an essay and have an interview prior to admission.
- MSOT applicants must complete an interview and submit an essay and three letters of recommendation prior to admission. After January 1, 2015 applicants will also be required to successfully complete an essay at the conclusion of the interview. ADN applicants must submit an essay and have an interview prior to admission. HDT applicants must complete a questionnaire prior to admission to their program.
- Students in an online program must complete a readiness assessment prior to enrollment in a program conducted online, and they must complete the ORI 1000 Orientation to Online Learning and Edverum course prior to participation in an online program in order to address the skills, competencies, and access to technology necessary to succeed in a distance education environment.

Associate of Science in Nursing (ADN) Applicants

In addition to meeting the requirements for admission as stated above under ADMISSION POLICIES, applicants to the Associate of Science in Nursing (ADN) program must provide the following prior to admission to the program:

**Physical Exam**
- Proof of Health Exam signed by a medical provider (MD, NP, or PA) with no restrictions.

**Immunizations**
- MMR: Students must submit a titer or proof of immunization.
  - If previously immunized, the student should get a titer drawn before being immunized again. (The titer will be positive if the student is immune to the disease.)
  - If the titer is negative, the student needs to be vaccinated.
  - Students who have had Measles, Mumps and Rubella do not need to be immunized. (Most students will not have had the disease and will need to submit proof of immunization.)
- Varicella: The student must submit a titer or proof of immunization.
  - If previously immunized, the student should get a titer drawn before being immunized again. (The titer will be positive if the student is immune to the disease.)
  - If the titer is negative, the student needs to be vaccinated.
  - Students who have had chickenpox do not need to be immunized but need to submit proof of having the disease.
- TDaP: Students must submit proof of immunization within the last 5 years.
- Hepatitis B: Students must submit proof of a 3-shot series of immunization (or proof the series has been started).
  - If the student wishes to decline the Hepatitis B vaccine series, he/she must sign a declination form provided by Stanbridge University.
  - The student may also present a titer if previously immunized for Hepatitis B.
ADMISSION

- **PPD:** Students must submit proof of a PPD skin test within one year.
  - If the student has a previous positive PPD or BCG vaccine, the student will have to submit results from a current chest X-ray.
- **Influenza Vaccine or Declination:** Students must submit proof of influenza vaccine.
  - If the student wishes to decline the influenza vaccine series, he/she must sign a declination form provided by Stanbridge University. Students should be aware that declining the influenza vaccine may result in inability to attend clinical education at some facilities and may lead to delay of graduation.

**BLS/CPR Card**

A BLS/CPR card must be obtained from the American Heart Association. Students are responsible for maintaining the currency of their BLS/CPR card during the entire duration of the program.

**Vocational Nurse Students Admitted Under Alternate Status**

Vocational Nurse program students admitted under “Alternate” status are allowed to attend class until the first clinical experience session at a clinical facility. No more than 10% of the authorized number of students for a class will be enrolled under alternate status. If these students cannot be accommodated with clinical facility experience due to lack of space, they will be given preference for regular admission to the next program start. Students enrolled under alternate status will be charged for (and issued) courseware and supplies necessary for the on-campus portion of the curriculum. If classroom space permits, and the student converts to regular status, tuition will be due immediately. If classroom space precludes enrolling the alternate status student for the remainder of the Term, they will be enrolled in the next cohort to start at the beginning of the program and tuition (less the amount for courseware and supplies) becomes due for the new program.

**NOTICE CONCERNING TRANSFERABILITY OF CREDITS AND CREDENTIALS EARNED AT OUR INSTITUTION**

The transferability of credits you earn at Stanbridge University is at the complete discretion of an institution to which you may seek to transfer. Acceptance of the certificate, diploma, or degree you earn in the Associate of Science in Information Technology, Bachelor of Science in Information Technology, Associate of Science in Associate of Occupational Science in Occupational Therapy Assistant, Master of Science in Occupational Therapy, Associate of Science in Physical Therapist Assistant, Vocational Nurse, Associate of Science in Nursing, Bachelor of Science in Nursing (Degree Completion), Master of Science in Nursing, or Associate of Science in Veterinary Technology program is also at the complete discretion of the institution to which you may seek to transfer. If the credits or certificate, diploma, or degree in the Associate of Science in Information Technology, Bachelor of Science in Information Technology, Associate of Science in Associate of Occupational Science in Occupational Therapy Assistant, Master of Science in Occupational Therapy, Associate of Science in Physical Therapist Assistant, Vocational Nurse, Associate of Science in Nursing, Bachelor of Science in Nursing (Degree Completion), Master of Science in Nursing, or Associate of Science in Veterinary Technology program that you earn at this institution are not accepted at the institution to which you seek to transfer, you may be required to repeat some or all of your coursework at that institution. For this reason, you should make certain that your attendance at this institution will meet your educational goals. This may include contacting an institution to which you may seek to transfer after attending Stanbridge University to determine if your credits or certificate, diploma, or degree will transfer.

**ARTICULATION AGREEMENTS**

This institution has not entered into any transfer or articulation agreements with any other school for the currently offered programs.
GENERAL INFORMATION
Stanbridge University is an eligible institution participating in federal and state financial aid programs and private educational lending programs. Financial aid is available to those who qualify.

FINANCIAL AID PROCEDURE
The process of determining eligibility for financial aid uses standard formulas and standard student budgets. The Financial Aid Office recognizes that some students have unusual or special circumstances that may not be reflected in the standard process of determining eligibility. While funds are limited, and it is not always possible to fund students to their maximum eligibility for financial aid, students with special circumstances are encouraged to contact the Financial Aid Office for review of these special circumstances. Assistance in filing private loan applications is available from the Financial Aid office.

Each student is processed for financial aid based on the standard enrollment status, as defined by Stanbridge University for each program. Eligibility and disbursements of financial aid may change based on enrollment status. Because of federal financial aid regulations (excluding Pell), students whose enrollment status is less than half-time will have zero financial aid eligibility for that period. A change from full-time enrollment status could cause a loss of financial aid and create a cash pay situation for some students.

Please consult the Financial Aid Office with any questions regarding enrollment status and financial aid eligibility.

To be eligible for federal and state student financial aid programs, students must:
- Be U.S. Citizens or eligible Non-Citizens;
- Be admitted to the university;
- Be enrolled at least half-time (6 units) in a program leading to a degree or certificate;
- Be making satisfactory academic progress toward their educational objectives;
- Be registered with the Selective Service, if required;
- Not be in default on a Title IV student loan or owe a refund on a Title IV student grant;
- Demonstrate financial need for need based programs through the defined application process of the university; and
- Attend an Entrance Interview if applying for student loans.

Students (and parents of dependent students) will be asked to fill out a FAFSA form to establish eligibility for federal financial aid.

FINANCIAL AID PROGRAMS
The following is a description of the financial aid programs available at Stanbridge University. Additional information can be obtained through the Financial Aid Office.

Federal Pell Grant:
The Federal Pell Grant program provides a foundation of assistance to which other forms of aid may be added. Eligibility for the Federal Pell Grant program is determined by a standard formula that is revised and approved every year by the federal government. Unlike loans, grants do not have to be paid back.

Federal Direct Loan Program:
Federal Direct Loan Programs are administered by the Department of Education. Qualified students and their parents can borrow money for school through federally subsidized, low interest loans. The Federal Direct Stafford, Federal Direct Unsubsidized Stafford, and Federal Direct PLUS loans are available through this program.

Federal Direct Subsidized Stafford Loan:
Federal Direct Subsidized Stafford Loans are available to students with financial need. Students may borrow up to $3,500 for their first academic year at a fixed interest rate of 4.45 percent, which is established annually by the Department of Education. The interest is paid by the federal government while students are in school and for six months after students cease their enrollment. Regular payments begin six months after students cease enrollment or fail to carry at least half the normal, full-time school workload.

Federal Direct Unsubsidized Stafford Loan:
Unsubsidized Stafford Loan programs are available for students to borrow for additional education costs. Students can borrow up to $6,000 for their first academic year as a combined total with the Federal Direct Subsidized Stafford Loan, at a fixed interest rate of 4.45 percent. With the exception of demonstrating financial need, borrowers must meet all eligibility criteria of the regular Direct Federal Stafford Loan program. Interest
TUITION AND FINANCIAL AID

payments begin immediately after the loan is fully disbursed or may be added to the principal balance. Regular payments begin six months after students cease enrollment or fail to carry at least half the normal, full-time school workload.

Time Limitation on Direct Subsidized Loan Eligibility for First-Time Borrowers on or after July 1, 2013. There is a limit on the maximum period of time (measured in academic years) that a student can receive Direct Subsidized Loans. In general, a student may not receive Direct Subsidized Loans for more than 150% of the published length of the program. This is called the "maximum eligibility period". The published length of any program of study is found in the Stanbridge University student catalog.

The maximum eligibility period is based on the published length of the current program in which a student is enrolled. As a result, a change in program may affect maximum eligibility. If Direct Subsidized Loans were received for one program and then a program change occurs, the Direct Subsidized Loans received for the earlier program will generally count against the new maximum eligibility period.

Federal Direct Parent Loans for Undergraduate Students (PLUS): Federal Direct Parent Loans for Undergraduate Students (PLUS) provide additional funds for creditworthy parents to help pay for students' educational expenses. The interest rate for these loans is 6.84 percent and the repayment schedule differs.

Calculating Pell Grant Lifetime Eligibility Used
The amount of Federal Pell Grant funds a student may receive over his or her lifetime is limited by a new federal law to be the equivalent of six years of Pell Grant funding. Since the maximum amount of Pell Grant funding a student can receive each year is equal to 100%, the six-year equivalent is 600%.

How is my Pell Grant Lifetime Eligibility Used calculated?
Scheduled Award: The maximum amount of Pell Grant funding you can receive is calculated for an “award year.” An award year is a period from July 1 of one calendar year to June 30 of the next calendar year. Your “scheduled award” is partially determined by using your expected family contribution (EFC) that is calculated from the information you (and your family) provided when you filed your FAFSA. Your scheduled award is the maximum amount you would be able to receive for the award year if you were enrolled full-time for the full school year. Your scheduled award represents 100% of your Pell Grant eligibility for that award year.
Percent Used: To determine how much of the maximum six years (600%) of Pell Grant you have used each year, the Department compares the actual amount you received for the award year with your scheduled award amount for that award year. Of course, if you receive the full amount of your scheduled award, you will have used 100%. Some students do not receive their entire scheduled award for an award year. There are a number of reasons for this, the most common of which are that the student was not enrolled for the full year or that the student was not enrolled full-time, or both.

If you did not receive the full amount of your scheduled award, we calculate the percentage of the scheduled award that you did receive. For example, if your scheduled award for an award year is $5,000, but because you were enrolled for only one semester you received only $2,500, you would have received 50% of the scheduled award for that award year. Or if you received only $3,750 for the award year because you were enrolled three-quarter-time and not full-time, you would have received 75% for that year.

Lifetime Eligibility Used (LEU): The Federal Department of Education keeps track of your LEU by adding together the percentages of your Pell Grant scheduled awards that you received for each award year. You can determine how much Pell you have used and what you have remaining at http://www.studentaid.ed.gov/

Supplemental Educational Opportunity Grant
The Supplemental Educational Opportunity Grant is one of the Campus Based Programs. Stanbridge University determines which students receive this grant based on students with the lowest Expected Family Contribution (EFC), starting with students with a “$0” EFC.

The maximum award for a full academic year in the SEOG program is $4000. The minimum amount is $100. The amount of awards that Stanbridge may give depends in large part on the amount of money we receive from the Federal Government for this program. For the 2017-2018 Award Year, Stanbridge University has determined that it will award each student in the amount of $100 per Academic Year. The SEOG award is given in two disbursements per Academic Year, and Stanbridge University is required to provide a 25% non-federal share as a method to match each SEOG award.

Loss of Eligibility for Federal Financial Aid if convicted of a controlled substance offense
Students are advised that if they are convicted under federal or state law of an offense involving the possession or sale of a controlled substance while they are enrolled in an institution of higher education and while they are receiving federal financial aid, they may lose eligibility for such federal assistance.

Private Education Loans
Stanbridge University offers private loans to students through various lending institutions. Private loans, which are privately insured, cover educational expenses beyond what is covered by the federal direct loans. The student must be a U.S. Citizen, a U.S. National, or Permanent Resident and must be creditworthy. Students may be enrolled full- or half-time. If the student has no credit or a poor credit history, he/she may still qualify for a loan by applying with a creditworthy co-borrower.

• If Stanbridge University authorizes payments in an installment agreement, it is attached as an addendum to the enrollment agreement. If interest is charged, all terms and conditions comply with the Federal Truth-in-Lending requirements.

• After 30 days of delinquency on a student account, the student may be withdrawn from school and the refund policy will be applied. The student and/or financial sponsors agree to and are notified that the account may be turned over to a collection agency. The student and/or financial sponsors will be responsible for all costs associated with collections.

• Stanbridge University complies with the Federal Truth in Lending Act pursuant to Title 15 of the United States Code.

• (FTC) Notice: I may request that the initial disclosures prescribed in the Truth in Lending Act (15 United States Code §§ 1601 through 1666) be provided in Spanish before signing any loan documents.
CAL GRANT POLICY

Cal Grants are awarded by the California Student Aid Commission (CSAC). There are three different Cal Grants. Each category of Cal Grants may be renewed, but each has a different renewable policy. Cal Grants are no longer automatically renewed. Students must be eligible based on the established income and asset eligibility requirement and information based on the results of a current Free Application for Federal Student Aid.

To apply for a Cal Grant, students must complete the Free Application for Federal Student Aid (FAFSA) and turn in any additional documentation needed to complete the file. In addition, students must submit a Grade Point Average Verification form, as follows:

- Stanbridge University will submit GPAs for current students to CSAC who completed at least 36 quarter credits or 900 clock hours at Stanbridge University by March. The Financial Aid Office will electronically submit GPA by March 2nd.
- Students who have not yet completed 36 quarter credits or 900 clock hours of college coursework, at Stanbridge University must have the GPA Verification form completed accordingly.
  - If the student never attended college prior to enrolling at Stanbridge University, the form must be completed by their High School.
  - If the student attended and earned at least 36 quarter credits, 900 clock hours, or equivalent of college coursework at other colleges prior to enrolling at Stanbridge University, the form must be completed by college where credits/clock hours were earned.
  - If the student attended other colleges prior to enrolling at Stanbridge University but did not earn the equivalent of 36 quarter credits or 900 clock hours, the form must be completed by their High School.

Both the FAFSA and GPA Verification form must be mailed by March 2nd, to meet the Cal Grant deadline.

Cal Grant A

Cal Grant A is awarded to students based on financial need and GPA.

Cal Grant A is for students enrolled in a program of instruction of not less than two academic years that leads to an associate or baccalaureate degree requiring 48 semester units or that results in eligibility for transfer from a community college to a baccalaureate degree program.

There are three Cal Grant A awards: Entitlement, Transfer Entitlement and Competitive

- Cal Grant A Entitlement Award
  - Graduating high school senior who has at least a 3.0 high school GPA
  - California resident at the time of graduation
  - Meets the March 2 deadline
- Cal Grant A Transfer Entitlement award
  - High school seniors who graduate after June 30, 2000
  - Attend a California Community College, and then transfer to a qualifying baccalaureate degree-granting institution may be eligible for a California Community College Transfer Entitlement Cal Grant A.
  - Must have at least a 2.4 community college GPA (of at least 24 semester units, or the equivalent, of degree credit)
  - Meet the financial and eligibility requirements
  - Are no more than 27 years of age during the time of transfer
  - Meets the March 2 deadline
- Cal Grant A Competitive Award
  - Other students who meet all the Cal Grant eligibility requirements and who have at least a 3.0 GPA may compete for a Cal Grant A Competitive award. Selection is based on a composite score that takes into consideration of family income, parents’ educational level, GPA, time out of high school, high school performance standards and other factors, such as whether the student comes from a single-parent household or is a former foster youth

Cal Grant B

For students from disadvantaged or low-income families. The award for most first-year students covers living expenses, books, supplies and transportation, but not tuition and fees. When renewed or awarded beyond
TUITION AND FINANCIAL AID

the freshman year, the grant covers tuition and fees. The tuition and fee award amounts are the same as those for Cal Grant A. Award amounts are determined through the state budget process and may change annually. Coursework must be for at least one academic year, and students must be enrolled at least half time.

There are three Cal Grant B awards: Entitlement, Transfer Entitlement and Competitive

- Cal Grant B Entitlement Award
  - Every graduating high school senior who has at least a 2.0 high school GPA
  - California resident at the time of graduation
  - Meets the March 2 deadline

- Cal Grant B California Community College Transfer Entitlement Award
  - High school seniors who graduate after June 30, 2000
  - Attend a California Community College and then transfer to a qualifying baccalaureate-degree granting institution may be eligible for a California Community College Transfer Entitlement Cal Grant B.
  - Must have at least a 2.4 community college GPA (of at least 24 semester units, or the equivalent, of degree credit), meet the financial and eligibility requirements
  - Are no more than 27 years of age during the time of transfer
  - Meets the March 2 deadline

- Cal Grant B Competitive Award
  - Other students who meet all the Cal Grant eligibility requirements and who have at least a 2.0 GPA may compete for a Cal Grant B Competitive award. Selection is based on a composite score that takes into consideration family income, parents’ educational level, GPA, time out of high school, high school performance standards and other factors, such as whether the student comes from a single-parent household or is a former foster youth

Cal Grant C

Helps vocationally oriented students acquire marketable job skills within a short time. Training must lead to a recognized occupational goal—diploma, associate degree, license qualification or certificate—which indicates at least an entry-level job skill. Students must be enrolled at least half-time in a course of study at least four months in length. Funding is available for up to two years, depending on the length of the program, as long as academic progress is satisfactory. Cal Grant C recipients may attend occupational, career, or technical training courses at any California Community College. In addition, the awards may be used for nursing and allied health programs at a hospital school, selected courses at several independent colleges and specialized courses at eligible proprietary colleges. Cal Grant C is not for students seeking a broad general education background and may not be used for a four-year degree program, graduate study, course prerequisites or general education. All applicants who did not receive a Cal Grant A or B award and who are eligible at the first Cal Grant C-eligible school listed in their FAFSA will be sent a Cal Grant C Supplement form as part of the competition. The Supplement must be completed by the student, endorsed by the appropriate school representative or the student’s employer and returned to the Commission by the May 15 deadline if the student wishes to remain in the competition. Supplements are scored with an emphasis on educational background, vocational or occupational experience and aptitude. Additional points come from vocational or educational endorsements and grades. A counselor’s review of the completed Supplement is recommended.

*For WebGrants System EL verification purposes, if a student has completed the required number of credits they will be certified for the next grade level (36 credits completed will be certified as Level 2 Sophomore)

- Cal Grant Award
  - Correct Award Type
    - Cal Grant A- AA, BA
    - Cal Grant B- Certificate (at least 1 year in length), AA, BA
    - Cal Grant C- Certificate (at least 4 months length), AA

- Minimum Need
  - Cal Grant A: Maximum program award amount plus $1,500
  - Cal Grant B: $700
  - Cal Grant C: Maximum program award amount plus $1,500

CAL GRANT REFUND POLICY

Cal Grant policies state that if a student is charged tuition that meets or exceeds the Cal Grant award, the Cal Grant does not need to be adjusted based on a withdrawal or leave of absence. However, Cal Grant recipients may want to rescind their Cal Grant and notify the California Student Aid Commission of their leave or withdrawal in order to preserve their eligibility for a future term. Students can process a leave of absence request with the California Student Aid Commission online at [www.csac.ca.gov](http://www.csac.ca.gov) and click the link “WebGrants4Students.” In this case, the student would be responsible for covering the tuition balance on his/her student account. If a student is dismissed or withdraws from school, all unearned Title IV funds will be refunded to the Department of Ed, and any unearned funds will be returned to Cal Grant or State Funds and lastly, to Private Loans accordingly.
FEDERAL WORK STUDY PROGRAM POLICY

The Federal Work Study Program is a financial aid program funded by the Federal Government and is intended to provide part-time employment opportunities for eligible students who need additional financial resources to pursue a college education.

ISIR: Institutional Student Information Report. An electronic record received by Stanbridge University from the Federal Government when the student files a FAFSA form (Free Application for Federal Student Aid).

EFC: Expected Family Contribution. The eligibility value delivered on the ISIR.

Financial Need equals the cost of attendance minus the federal Expected Family Contribution.

Unmet need: The amount remaining after the total financial aid resources and awards have been awarded to the student to meet financial need. The formula for calculating FWS is as follows: COA - EFC - PELL - SUB - UNSUB - PLUS - SEOG = Remaining unmet need.

Eligibility:
A student must apply for financial aid each year with the Free Application for Federal Student Aid (FAFSA) to become eligible. Students who have applied for financial aid through the FAFSA application process and have been awarded Federal Work Study funds may participate. To be eligible, a student must demonstrate need that meets or exceeds the award amount authorized by the Financial Aid office. Students may reduce their student loan eligibility to be eligible for FWS. Students must be currently enrolled at least half time (9 units) to be eligible to participate.

FWS employment must be suspended or terminated in all cases where a student no longer meets federal requirements for financial aid or campus requirements for employment. A student’s FWS employment must be terminated by the last day of the pay period in which his/her award expires. If a student becomes ineligible to participate in the Federal Work Study Program, the employer immediately becomes responsible to pay the full earnings of the student. The employer is also responsible for paying student earnings once the full federal work study award has been earned.

Awarding
Funds are limited and not all eligible students will be able to participate in the program. Employment and funding are awarded on a first-come, first-served basis. Priority is given to students who demonstrate the highest need and who applied for financial aid on or before the priority deadline of March 2nd. Federal Work Study award amounts will be determined by the Financial Aid Office to maximize program effectiveness. Awards will continue to be awarded until all funds have been exhausted. FWS awards may be withdrawn or reduced according to fund availability. Students should plan on working their scheduled hours and cannot earn more than their allocated FWS award.

Job Placement
Students are responsible for finding employment on campus through Career Services or in Federal Work Study approved off-campus positions. Job placement is not guaranteed.

Employment Guidelines
The wages for the student will meet the minimum wage guidelines for the state of California, i.e. $10/hr. Eligible Federal Work Study (FWS) students earn money by working a limited number of hours per week. During non-enrollment periods, such as semester breaks, FWS students may work up to a maximum of 40 hours per week. There are no exceptions to allow a student to work during the time they should be in class. Under no circumstance can a student be authorized to earn over-time pay. Wages earned during a period of non-enrollment (excluding winter and spring breaks) must be used to cover costs associated with educational expenses for the next period of enrollment. (34 CFR 375.25b)

No campus department shall charge a student’s employment to the FWS program without the approval of the Financial Aid Office. The FWS program will be administered in accordance with all Stanbridge University Human Resources policies and procedures. All standards of employment will be met including, but not limited to, job descriptions, pay rates, hours of employment, payroll certification and other HR requirements.

Stanbridge University will offer employment both on and off campus. In accordance with federal regulations, Stanbridge University establishes contracts with non-profit agencies that serve a community need. A contract will be developed with each agency employing FWS students that outlines the responsibilities of the agency, including any administrative fees that may be applicable as well as the employer’s share of student payroll.

\(^1\)The “PERIOD OF ATTENDANCE” delineated here is “THE CURRENT PERIOD OF ATTENDANCE” in the Enrollment Agreement for each program. The data in this column is only for a specific cohort in the program that enrolls on a particular start date. The data may change for other cohorts in the program that enroll on other start dates. The data in this column may also differ for those who are not required to pay the California Student Tuition Recovery Fund (STRF) fee.

\(^2\)The data in this column may differ for those who are not required to pay the California Student Tuition Recovery Fund (STRF) fee.

### IT Programs

**PLEASE NOTE**

THE ESTIMATED TOTAL CHARGES FOR THE ENTIRE EDUCATIONAL PROGRAM WITH NONREFUNDABLE STRF does not include the following, if applicable: Additional Official Transcript Fee $5, 24-Hour Official Transcript Fee $10, Urgent Official Transcript Fee $25, Return Check Fee $25, Retake Tuition (as described in the catalog), and Additional Fees (if applicable).

### VN Program

**PLEASE NOTE**

In addition to the NONREFUNDABLE Background Check Fee of $45, THE ESTIMATED TOTAL
**TUITION AND FINANCIAL AID**

**CHARGES FOR THE ENTIRE EDUCATIONAL PROGRAM WITH NONREFUNDABLE STRF** does not include the following, if applicable: Additional Official Transcript Fee $5, 24-Hour Official Transcript Fee $10, Urgent Official Transcript Fee $25, Return Check Fee $25, Additional Immunizations and Titers, Retake Tuition (as described in the catalog), Non-Attendance at Clinical Remediation Sessions (as described in the catalog), and Additional Fees (if applicable).

Near the completion of the Vocational Nurse program, students will be expected to pay for the Board of Vocational Nursing and Psychiatric Technicians (BVNPT) Application for Vocational Nurse Licensure, Live Scan Background Check, NCLEX-PN licensing exam registration fee, and BVNPT license fee in order to apply for authorization to take the national licensing examination, register for and take the national licensing examination, and obtain a license from the BVNPT.

**ADN Program**

PLEASE NOTE
In addition to the NONREFUNDABLE Background Check Fee of $45, THE ESTIMATED TOTAL CHARGES FOR THE ENTIRE EDUCATIONAL PROGRAM WITH NONREFUNDABLE STRF does not include the following, if applicable: Additional Official Transcript Fee $5, 24-Hour Official Transcript Fee $10, Urgent Official Transcript Fee $25, Return Check Fee $25, Additional Immunizations and Titers, Retake Tuition (as described in the catalog), Non-Attendance at Clinical Remediation Sessions (as described in the catalog), and Additional Fees (if applicable).

Near the completion of the Associate of Science in Nursing (ADN) program, students will be expected to pay for the Board of Registered Nursing (BRN) Application for Registered Nurse Licensure, Live Scan Background Check, NCLEX-RN licensing exam registration fee, and BRN license fee in order to apply for authorization to take the national licensing examination, register for and take the national licensing examination, and obtain a license from the BRN.

**OTA Program**

PLEASE NOTE
In addition to the NONREFUNDABLE Background Check Fee of $45, THE ESTIMATED TOTAL CHARGES FOR THE ENTIRE EDUCATIONAL PROGRAM WITH NONREFUNDABLE STRF does not include the following, if applicable: Additional Official Transcript Fee $5, 24-Hour Official Transcript Fee $10, Urgent Official Transcript Fee $25, Return Check Fee $25; Live Scan Background Investigation Fee, Drug Test, Additional Immunizations and Titers, and Chest X-Ray per site; Special Uniforms at specific Clinical Facilities that may be required, Retake Tuition (as described in the catalog), and Additional Fees (if applicable).

After completion of the Occupational Therapy Assistant program, students will be expected to pay for the NBCOT application fee, certification exam registration fee, and NBCOT certification fee in order to apply for authorization to test, take the national certification exam and obtain certification from the California Board of Occupational Therapy.

**PTA Program**

PLEASE NOTE
In addition to the NONREFUNDABLE Background Check Fee of $45, THE ESTIMATED TOTAL CHARGES FOR THE ENTIRE EDUCATIONAL PROGRAM WITH NONREFUNDABLE STRF does not include the following, if applicable: Additional Official Transcript Fee $5, 24-Hour Official Transcript Fee $10, Urgent Official Transcript Fee $25, Return Check Fee $25; additional pre-clinical education background check, Drug Test, Additional Immunizations and Titers, and Chest X-Ray per site; Special Uniforms at specific Clinical Facilities that may be required, and Additional Fees (if applicable).

After completion of the Physical Therapist Assistant program, students will be expected to pay for the Physical Therapy Board of California (PTBC)-required Live Scan, the PTBC application fee, National Physical Therapy Exam for Physical Therapist Assistants (NPTE for PTA) exam registration fee, and California Law Exam fee in order to apply for authorization to take the national and state licensure exam and obtain licensure from the PTBC.
BSN and MSN – Online Programs

PLEASE NOTE
THE ESTIMATED TOTAL CHARGES FOR THE ENTIRE EDUCATIONAL PROGRAM WITH NONREFUNDABLE STRF does not include the following, if applicable: Additional Official Transcript Fee $5, 24-Hour Official Transcript Fee $10, Urgent Official Transcript Fee $25, Return Check Fee $25, Retake Tuition (as described in the catalog), and Additional Fees (if applicable).

Veterinary Technology Program

PLEASE NOTE
In addition to the NONREFUNDABLE Background Check Fee of $45, THE ESTIMATED TOTAL CHARGES FOR THE ENTIRE EDUCATIONAL PROGRAM WITH NONREFUNDABLE STRF does not include the following, if applicable: Additional Official Transcript Fee $5, 24-Hour Official Transcript Fee $10, Urgent Official Transcript Fee $25, Return Check Fee $25, Additional Immunizations and Titers, Retake Tuition (as described in the catalog), Non-Attendance at Clinical Remediation Sessions (as described in the catalog), and Additional Fees (if applicable).

Near the completion of the Veterinary Technology program, students will be expected to pay for the California Veterinary Medical Board (VMB) examination Application fee, the separate Examination fee, and the LiveScan Background Check fee in order to apply for authorization to take the Registered Veterinary Technician Examination. In addition, graduates must pay the American Association of Veterinary State Boards Examination Application fee to take the Veterinary Technician National Examination. Upon passing both examinations, the student will be required to pay a licensing fee to the California VMB in order to obtain a license.

MSOT Program

PLEASE NOTE
In addition to the NONREFUNDABLE Background Check Fee of $45, THE ESTIMATED TOTAL CHARGES FOR THE ENTIRE EDUCATIONAL PROGRAM WITH NONREFUNDABLE STRF does not include the following, if applicable: Additional Official Transcript Fee $5, 24-Hour Official Transcript Fee $10, Urgent Official Transcript Fee $25, Return Check Fee $25, Live Scan Background Investigation Fee, Drug Test, Additional Immunizations and Titers, and Chest X-Ray per site; Special Uniforms at specific Clinical Facilities that may be required, Retake Tuition (as described in the catalog), and Additional Fees (if applicable).

After completion of the MSOT program, students will be expected to pay for the Live Scan, NBCOT application fee, certification exam registration fee, and NBCOT certification fee in order to apply for authorization to test, take the national and state licensure exam, and obtain certification from the California Board of Occupational Therapy.

TUITION GUIDELINES

- Students are not charged a registration fee.
- Tuition changes do not affect registered and paid students.
- Replacement books, eBooks, and supplies (for lost or stolen ones OR for retaken courses will not be provided without cost to students. Students will be charged for all replacement items.
- Make-Up and Review Sessions, Student Central Access, Learning Resource Center Usage, and Career Placement Services are provided to all students.

RETURNS

- For hygienic reasons used or opened OTA, MSOT, PTA, and ASVT Student Supply Kits, and Gait Belts and worn “TOPS OR PANTS”, if applicable, are not returnable.
- Books, laptops, software, medical supplies, and uniforms are not returnable unless they are received in a NEW, UNOPENED and RETURNABLE format. No returns of these items will be accepted after midnight of the seventh day after receipt.
- No returns of eBooks will be accepted after midnight of the seventh day after receipt.
• Tuition, Book, Ebook, ATI Nurse’s Touch, Shadow Health Digital Clinical Experience, Certification Examination voucher and/or Labsim license charges are mandatory—they are not optional.
• The Shadow Health Digital Clinical Experience charge is for Bachelor of Science in Nursing students only. For the BSN and MSN programs, the cost of the books, eBooks, and supplies is to be borne by the student and is nonrefundable.
• Certification Examination voucher and/or Labsim license charges are for Information Technology students only. The Certification Examination vouchers and Labsim license are nonrefundable upon issue because they are considered used when they are issued to the student.
• Should a student decide to cancel his/her enrollment agreement, items which a student seeks to return will be thoroughly inspected by the university. If an item is deemed to be in a condition that is not new, unopened, and returnable, the student is personally responsible for paying for the items if the tuition has still not been paid or if the loan tendered does not cover the cost of the items.
• If a student fails to return the books/supplies in a new, unopened and returnable format, Stanbridge University will offset against the refund the documented cost of those books/supplies. The student shall be liable for the amount, if any, by which the documented cost of books/supplies exceeds the prorated refund amount.
• If any portion of the tuition was paid from the proceeds of a loan, the refund shall be sent to the lender or, if appropriate, to the state or federal agency that guaranteed or reinsured the loan. Any amount of the refund in excess of the unpaid balance of the loan shall be first used to repay any student financial aid program from which the student received benefits, in proportion to the amount of the benefits received, and any remaining amount shall be paid to the student.

TUITION

• Students may pay tuition via personal or bank check or through private loans or federal aid (for those programs which qualify).
• The lending companies are not affiliated with the school and award loans to those who qualify.
• Those paying with a loan must have signed loan paperwork submitted before attending the program.
• Students whose entire tuition and fees are paid by a third-party organization are not entitled to receive a refund for the tuition and fees; the organization providing the funding receives any refund.

TITLE IV FEDERAL FUNDS

• This school complies with Title IV of the federal Higher Education Act of 1965.

STUDENT LOAN INFORMATION

If the student obtains a loan to pay for an educational program, the student will have the responsibility to repay the full amount of the loan plus interest, less the amount of any refund.

If the student is eligible for a loan guaranteed by the federal or state government and the student defaults on the loan, both of the following may occur:

1) The federal or state government or a loan guarantee agency may take action against the student, including applying any income tax refund to which the person is entitled to reduce the balance owed on the loan.
2) The student may not be eligible for any other federal student financial aid at another institution or other government assistance until the loan is repaid.
CANCELLATION AND REFUND

STUDENT'S RIGHT TO CANCEL
1. You have the right to cancel your agreement for a program of instruction, without any penalty or obligations, through attendance at the first class session or the seventh calendar day after enrollment, whichever is later. After the end of the cancellation period, you also have the right to stop school at any time; and you have the right to receive a pro rata refund if you have completed 60 percent or less of the scheduled hours in your program through the last day of attendance.

2. Cancellation may occur when the student provides a written notice of cancellation at the following address: 2041 Business Center Drive, Suite 107, Irvine, CA 92612. This can be done by mail or by hand delivery.

3. The written notice of cancellation, if sent by mail, is effective when deposited in the mail properly addressed with proper postage.

4. The written notice of cancellation need not take any particular form and, however expressed, it is effective if it shows that the student no longer wishes to be bound by the Enrollment Agreement.

5. If the Enrollment Agreement is cancelled by the student or the prospective student is not accepted for enrollment the school will refund the student any money he/she paid, less a registration or administration fee not to exceed $250.00, and less any deduction for equipment not returned in good condition, within 45 days after the notice of cancellation is received.

6. If the program is cancelled before instruction begins the school will refund the student any money he/she paid, less any deduction for equipment not returned in good condition, within 45 days after the notice of cancellation is received.

7. All Federal Title IV aid refunds shall be calculated according to the Department of Education Guidelines. If the student has received federal student financial aid funds, the student is entitled to a refund of moneys not paid from federal student financial aid program funds. The refund is to be paid within 45 days of withdrawal.

ONLINE (i.e. DISTANCE) EDUCATION PROGRAMS

STUDENT'S RIGHT TO CANCEL
This Institution offers distance educational programs where the instruction is not offered in real time. The Institution shall transmit the first lesson and any materials to any student within seven days after the Institution accepts the student for admission.

The student has the right to cancel the agreement and receive a full refund before the first lesson and materials are received. Cancellation is effective on the date the written notice of cancellation is sent to: Stanbridge University, 2041 Business Center Drive, Suite 107, Irvine, CA 92612. If the Institution sent the first lesson and materials before an effective cancellation notice was received, the Institution shall make a refund within 45 days after the student's return of the materials.

Cancellation must occur prior to the receipt of the first lesson and materials, which will occur within seven days after the Institution accepts the student for admission.

This Institution shall transmit all of the lessons and other materials to the student if the student (a) has fully paid for the educational program; and (b) after having received the first lesson and initial materials, requests in writing that all of the material be sent. If the Institution transmits the balance of the material as the student requests, the Institution shall remain obligated to provide the other educational services it agreed to provide, such as responses to student inquiries, student and faculty interaction, and evaluation and comment on lessons submitted by the student, but shall not be obligated to pay any refund after all of the lessons and material are transmitted.
RETURN TO TITLE IV FUNDS POLICY
If a recipient of an FSA grant or loan funds cancels or is dismissed from school after beginning attendance, the amount of FSA grant or loan assistance earned by the student must be determined. If the amount disbursed to the student is greater than the amount the student earned, unearned funds must be returned. If the amount disbursed to the student is less than the amount the student earned, and for which the student is otherwise eligible, s/he is eligible to receive a post dismissal/cancellation disbursement of the earned aid that was not received.

The law specifies how your school must determine the amount of Federal Student Aid (FSA) assistance that you earn if you cancel or are dismissed from school. The FSA programs that are covered by this law are: Federal Pell Grants, Stafford Loans, PLUS Loans, Federal Supplemental Educational Opportunity Grants (FSEOGs), Federal Perkins Loans and in some cases, certain state grant aid (LEAP/SLEAP).

When you cancel during your payment period or period of enrollment (your school can define these for you and tell you which one applies), the amount of FSA program assistance that you have earned up to that point is determined by a specific formula. If you received (or your school or parent received on your behalf) less assistance than the amount that you earned, you may be able to receive those additional funds. If you received more assistance than you earned, the excess funds must be returned by the school and/or you.

The amount of assistance that you have earned is determined on a pro rata basis. For example, if you completed 30% of your payment period or period of enrollment, you earn 30% of the assistance you were originally scheduled to receive. Once you have completed more than 60% of the payment period or period of enrollment, you earn all the assistance that you were scheduled to receive for that period.

If you did not receive all of the funds that you earned, you may be due a post dismissal/cancellation disbursement. If the disbursement includes loan funds, you may choose to decline the loan funds so that you do not incur additional debt. Your school may automatically use all or a portion of your post-dismissal/cancellation disbursement (including loan funds, if you accept them) for tuition, fees, and room and board charges (as contracted with the school). For all other school charges, the school needs your permission to use the post-dismissal/cancellation disbursement. If you do not give your permission (which some schools ask for when you enroll), you will be offered the funds. It may be in your best interest, however, to allow the school to keep the funds to reduce your debt at the school.

There are some FSA funds that you were scheduled to receive that you cannot earn once you cancel because of other eligibility requirements. For example, if you are a first-time, first-year undergraduate student and you have not completed the first 30 days of your program before dismissal/cancellation, you will not earn any FFEL or Direct loan funds that you would have received had you remained enrolled past the 30th day. If you receive (or your school or parent receive on your behalf) excess FSA program funds that must be returned, your school must return a portion of the excess equal to the lesser of

1. Your institutional charges multiplied by the unearned percentage of your funds, or
2. The entire amount of excess funds.

The school must return this amount even if it did not keep this amount of your FSA program funds.

If your school is not required to return all of the excess funds, you must return the remaining amount. Any loan funds that you must return, you (or your parent for a PLUS Loan) repay in accordance with the terms of the promissory note. That is, you make scheduled payments to the holder of the loan over a period of time. Any amount of unearned grant funds that you must return is called an overpayment. The amount of a grant overpayment that you must repay is half of the unearned amount. You must make arrangements with your school or the Department of Education to return the unearned grant funds.

The requirements for FSA program funds when you cancel or are dismissed are separate from any refund policy that your school may have. Therefore, you may still owe funds to the school to cover unpaid institutional charges. Your school may also charge you for any FSA program funds that the school was required to return.

Cancellation and Refund Policies are also provided in the Enrollment Agreement.

In the Catalog, please refer to the Policies section for Withdrawal Policy, Leave of Absence Policy, and Dismissal Policy.
STUDENT TUITION RECOVERY FUND

You must pay the state-imposed assessment for the Student Tuition Recovery Fund (STRF) if all of the following applies to you:

1. You are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition either by cash, guaranteed student loans, or personal loans, and
2. Your total charges are not paid by any third-party payer such as an employer, government program or other payer unless you have a separate agreement to repay the third party.

You are not eligible for protection from the STRF and you are not required to pay the STRF assessment, if either of the following applies:

1. You are not a California resident, or are not enrolled in a residency program, or
2. Your total charges are paid by a third party, such as an employer, government program or other payer, and you have no separate agreement to repay the third party.

The State of California created the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic losses suffered by students in educational programs who are California residents, or are enrolled in a residency program attending certain schools regulated by the Bureau for Private Postsecondary Education.

You may be eligible for STRF if you are a California resident or are enrolled in a residency program, prepaid tuition, paid the STRF assessment, and suffered an economic loss as a result of any of the following:

1. The school closed before the course of instruction was completed.
2. The school’s failure to pay refunds or charges on behalf of a student to a third party for license fees or any other purpose, or to provide equipment or materials for which a charge was collected within 180 days before the closure of the school.
3. The school’s failure to pay or reimburse loan proceeds under a federally guaranteed student loan program as required by law or to pay or reimburse proceeds received by the school prior to closure in excess of tuition and other costs.
4. There was a material failure to comply with the Act or this Division within 30 days before the school closed or, if the material failure began earlier than 30 days prior to closure, the period determined by the Bureau.
5. An inability after diligent efforts to prosecute, prove, and collect on a judgment against the institution for a violation of the Act.

Stanbridge University reserves the right to reschedule the start of a program, when necessary or when beneficial to student success, for a period of no greater than 4 weeks. Students will receive a refund should they not wish to attend the rescheduled program.

# CLOCK AND CREDIT HOURS

A clock hour is defined as 50 minutes of instruction in a 60-minute period of time.

A credit hour is defined as an amount of work represented in intended learning outcomes and verified by evidence of student achievement for academic activities as established by the institution comprised of the following units: didactic learning environment; supervised laboratory setting of instruction; externship; and out-of-class work/preparation.

One quarter credit hour equals 30 units comprised of the following academic activities:

- One clock hour in a didactic learning environment = 2 units
- One clock hour in a supervised laboratory setting of instruction = 1.5 units
- One hour of externship = 1 unit
- One hour of out-of-class work and/or preparation for the didactic learning environment or supervised laboratory setting of instruction that are designed to measure the student’s achieved competency relative to the required subject matter objectives = 0.5 unit

CLASS HOURS

Students must refer to their schedule for the actual class dates.

- IT Evening/Weekend Programs: Tues/Thurs or Mon/Wed 6:00 – 10:00 p.m. and one Saturday per course 8:30 a.m. – 5:30 p.m.
- Occupational Therapy Assistant – Theory classes occur three or four days per week, depending on term: (Monday through Thursday or Tuesday through Friday). Theory class schedule is 8:00AM to 2:30PM. Tutorial periods for theory classes are scheduled between 2:30PM and 4:30 PM. OTA Laboratory days are 8:00AM to 4:30PM. Students must complete fieldwork days and hours based on the practices at each individual location, which is typically Monday through Friday from 8:00am to 4:30pm. Students must be prepared to follow earlier or later starts as required by the particular practices of the location. Typically, fieldwork days are Monday through Friday from 8:00am to 4:30pm (Terms 3, 4, 5, and 6). Part-Time OTA evening classes are Tuesday and Thursday evenings or Monday and Wednesday evenings from 6:00PM to 10:00PM and Saturdays from 8:00AM to 2:30PM. Part-time OTA Laboratory (Saturdays) days are 8:00AM to 4:30PM. Part-Time OTA students must complete fieldwork days and hours based on the practices at each individual location, which is typically Monday through Friday from 8:00am to 4:30pm. Students must be prepared to follow earlier or later starts as required by the particular practices of the location. Typically, fieldwork days are Monday through Friday from 8:00am to 4:30pm.
- Master of Science in Occupational Therapy – Two or three days per week (depending on term), with theory classes starting at 11:00am or later. Laboratory and theory sessions continue in the evening and conclude by 9:30pm. Students must complete the Fieldwork Review Course and fieldwork days and hours based on the practices at each individual location, which is typically Monday through Friday from 8:00am to 4:30pm. Students must be prepared to follow earlier or later starts as required by the particular practices of the location.
- Physical Therapist Assistant – Theory classes are three to five days per week, depending on term. Theory class schedule is 8:00AM to 2:30PM. (Tutorial periods for theory classes are scheduled between 2:30PM and 3:30 PM). PTA Laboratory classes are one day per week in Terms 2, 3 and 4 with a schedule from 8:00AM to 4:30PM. (Tutorial periods for laboratory classes are scheduled between 4:30 and 5:30 PM.) Clinical education courses are five days per week (Monday through Friday) in Terms 4 and 5 and are held from 8:00AM to 4:30PM (days of the week as well as daily schedule will vary depending on the site).
- Veterinary Technology Program: Four or five days per week (depending on term) Monday through Friday from 8:00AM and concluding on or before 4:30PM. Internship hours total 320 hours over 13 weeks with the hours determined by the facility or practice attended.
- VN Part-Time Program: Tuesdays & Thursdays 6:00 – 10:00 p.m. or Mondays & Wednesdays 6:00 – 10:00 p.m.; Clinical: Sat 7:00 a.m. – 3:30 p.m. and selected Sundays 7:00AM – 3:30PM. Tutorial sessions occur after class from 1:30 p.m. - 3:30 p.m. for full-time students and before class from 5 p.m. - 6 p.m. for part-time students. Students should plan to attend each tutoring session accordingly. NCLEX Review is conducted Monday through Friday from 8:00AM to 4:30PM one week near the end of the program. It is the student’s responsibility to arrange for a leave from work or other obligations to attend the NCLEX review.
- **VN Full-Time Program:** Mondays through Fridays 7:00AM to 1:30PM for Theory Classes and 7:00AM to 3:30PM for Clinical Education. (Tutorial periods for theory classes are scheduled between 1:30PM and 3:30 PM).
- **Associate Degree in Nursing (ADN):** Monday through Friday 8:00AM to 3:30PM for theory classes and skills labs. Clinical education may occur on any day of the week, including weekends, and may include morning, afternoon, and evening sessions.
- **The Bachelor of Science in Nursing (Degree Completion), and Master of Science in Nursing programs are delivered online.** Online education is not offered in real time. Coursework is completed at a location determined by the student. Classroom hours are determined by the student and the due date of assignments. The Bachelor of Science in Nursing (Degree Completion) program is offered online with an on-ground clinical component.

**Note:** Alternate days or different shifts may be required for certain ADN or VN clinical education, Veterinary Technician facility labs and Internship, MSOT/OTA fieldwork experiences, or PTA clinical practicum and affiliation courses due to clinical facility student census restrictions or facility availability. Some clinical education or fieldwork may be offered on a 10- or 12-hour shift to match clinical facilities' schedules.

### STUDENT RECORDS RETENTION POLICY

This institution permanently retains the transcripts of students as required by the Standards of Accreditation of ACCSC and section 94900(b) of the California Education Code. At a minimum, the institution maintains current records on campus for 3 years after a student's completion or withdrawal and maintains pertinent student records off campus for 5 years after a student's date of completion or withdrawal. In addition, the institution maintains records relating to federal financial aid programs as provided by federal law. The institution stores all records on or off campus in a manner secure from damage or loss.

**Confidentiality of Student Records**

Stanbridge University ensures that student academic records and personal information are protected within the guidelines of FERPA. A policy has been established to provide the institution with a written commitment to this responsibility.

Upon receiving academic records or personal information, Stanbridge University personnel assume the responsibility of maintaining the security and privacy of these records. To assure this security and privacy, it is the responsibility of the campus Registrar to allow only campus personnel with specific needs (determined by job function) access to this information.

In instances where an individual or organization outside Stanbridge University (other than those with specified legal permission) request access to student academic records or personal information, the campus Registrar must obtain a written authorization from the student for the release of the information. **Please Note:** In the case of a student who is above the age of eighteen, “individual” does include the student’s parents, regardless of their financial relationship with the institution or student.
ATTENDANCE

ATTENDANCE REQUIREMENT: ALL ON-CAMPUS PROGRAMS
Stanbridge University’s attendance policy is as follows:
- Consistent attendance is a requirement for graduation. Absences are recorded and become part of the student’s permanent record regardless of the reason for the absences.
- In order to graduate, students must complete all units and all courses of a program.
- Students absent from three consecutive sessions for reasons of illness must provide a physician’s release to be allowed to return to classes or clinical education.
- Students dismissed from school will receive a refund as described in the Financial Aid policy section of this catalog.
- Students not returning after 14 consecutive days of absence (starting from the last date of attendance) will be dismissed.

ATTENDANCE REQUIREMENT: PREGNANT STUDENTS
Students who are or who become pregnant during their program must inform their Program Director and provide a Stanbridge University Pregnancy Release Form signed by their Healthcare Provider prior to attending theory classes or performing the essential functions and abilities of the job in laboratory classes or clinical/fieldwork rotations.

Accommodations for students who are pregnant must be requested by the student in advance of the anticipated need, and no accommodation will be granted retroactively. Pregnant students must actively communicate with the Program Director and Program Administration in order to plan for possible interruptions during the program.

ATTENDANCE REQUIREMENT: ALL ONLINE COURSES
Students enrolled in online courses will have attendance monitored by participation in scheduled threaded discussions before or on the due date of the discussion. An attendance period for online classes is defined as 12:01AM on Monday through 11:59PM on the following Sunday. Those not participating for 14 consecutive days of absence (starting from the last date of attendance) will be dismissed.

Additional Attendance Requirements: IT Core Courses
Students are expected to attend 100% of scheduled class hours. Students are required to notify the school of reasons for absences in advance of the absence when possible and as soon as practicable after an absence. Remediation of graded course material is to be completed within 7 days of the absence.

Additional Attendance Requirements: Degree Program General Education Courses
With the approval of the program director, students in a degree program may drop a General Education course if the dropped course is not a prerequisite to another course in the program. The student will no longer be required to attend the dropped course but will still remain in the program. In order for the student to complete the program, the dropped course must be completed. Retake tuition will be charged for the next attempt to complete the course. A grade of Incomplete will be assigned to the course and zero grade points will be assigned. In addition, the student must attend the first session of the course that follows the dropped course in order to maintain attendance and registration in the program. If a General Education course is a prerequisite to a program core course or another General Education course, failure to attend the prerequisite course will result in dismissal from the program.

Additional Attendance Requirements: Occupational Therapy Assistant
In support of the requirements for OTA programs, OTA students may not graduate without completing the objectives for theory classes, performing fieldwork objectives and completing a minimum of two weeks of Level I fieldwork and 16 full-time weeks of Level II fieldwork.

Remediation and Limit of Theory Absences
Absences from theory classes will be remediated by completion of an assignment associated with the theory objectives for the day of absence. A maximum of 3 sessions of theory absence may be remediated in a single term.

Remediation and Limit of Fieldwork and Lab Absences
OT Lab absences will be remediated by demonstrating proficiency in the lab objectives for the day of absence. A maximum of two days of OT lab absence may be remediated in a single term. Students are responsible for
obtaining their remediation assignments from their lab instructor per the directions written on the Skills Checklist.

Absences from Level II fieldwork will be remediated by performing additional fieldwork assignments on a day-for-day basis for each absence. Students are responsible for obtaining their remediation assignments from the Academic Fieldwork Coordinator in conjunction with the fieldwork site supervisor(s). Students are limited to remediating 3 days of Level II fieldwork in a Level II placement and 6 total days in both placements. Remediation of all absences incurred in the first Level II fieldwork must be remediated prior to commencing the second Level II fieldwork. Remediation of all second Level II fieldwork absences must be completed prior to graduation and recommendation to NBCOT for the student to be allowed to take the certification examination. Multiple tardies or early outs from fieldwork are possible grounds for dismissal and are evaluated on an individual basis in collaboration with site personnel. A no-show, no-call at a fieldwork site is also possible grounds for dismissal and are evaluated on an individual basis in collaboration with site personnel. Failure to submit fieldwork time sheets per the time sheet instructions is possible grounds for failure and dismissal. Failure to submit fieldwork-related assignments per the assignment instructions, including additional projects requested by fieldwork site personnel, is possible grounds for failure and dismissal.

Makeup of Course Examinations Due to Absence
Any examination(s) missed due to absence from a theory class must be made up by the 7th day after the student returns to school or a grade of zero will be assigned to the examination. Regardless of the score achieved on the makeup exam, the maximum grade that will be entered into the student's grade record for any makeup examination in a theory class will be 75%.

Additional Attendance Requirements: Master of Science in Occupational Therapy
In support of the requirements for MSOT programs, MSOT students may not graduate without completing the objectives for theory classes, performing fieldwork objectives and completing a minimum of three weeks of Level I fieldwork and 24 full-time weeks of Level II fieldwork.

Daily and on time attendance in the MSOT program is expected for all classes. Because of the nature of a laboratory class, 100% attendance is required. A student who must miss a theory and/or laboratory class due to extenuating circumstances is responsible for informing the instructor, Program Director and the MSOT Student Services Officer of the nature of the absence prior to missing class. An absence in 3 or more days cannot be made up at the site, then additional fieldwork assignments will be assigned on a day-by-day basis for each absence, and the student must notify the Academic Fieldwork Coordinator of the absence. A maximum of two days of Level I attendance requirement, and students may need to remain at the facility until the required number of weeks has been completed. This is determined by the fieldwork site supervisor and the Academic Fieldwork Coordinator. Students are limited to making up only 3 days of Level II fieldwork via additional assignments.

Remediation of all absences incurred in the first Level II fieldwork must be completed prior to beginning the second Level II fieldwork. Additional assignments for all absences incurred in the first Level II fieldwork will be remediated by performing additional fieldwork assignments on a day-for-day basis for each absence, and the student must notify the Academic Fieldwork Coordinator of the absence. If days cannot be made-up at the site, then additional fieldwork assignments will be assigned on a day-for-day basis for each absence. Students are responsible for obtaining their additional fieldwork assignments from the Academic Fieldwork Coordinator. Additional assignments for all absences incurred in the first Level II fieldwork must be completed prior to beginning the second Level II fieldwork. Additional assignments for all
second Level II fieldwork absences must be completed prior to graduation and recommendation to NBCOT® for the student to be allowed to take the certification examination.

**Additional Attendance Requirements: Physical Therapist Assistant**

The maximum number of allowed absences in a single term is three (3). In addition, three (3) tardies or early departure (or “early out”) per term is equivalent to one absence. A tardy is defined as arrival after the scheduled start time of the class session, whether that is at the beginning of class, after lunch or after a designated break. Early departure (or “early out”) is defined as leaving after 11:00 AM for theory courses and after 12:00 PM for laboratory courses. An absence is defined as leaving theory class before 11:00 AM or leaving a laboratory class before 12:00 PM.

Remediation and Limit of Physical Therapist Assistant Theory Absences
Absences from theory classes will be remediated by completion of an assignment associated with the theory objectives for the day of absence. A maximum of 3 sessions of theory absence may be remediated in a single term. The faculty member teaching the theory course in which an absence occurs determines the type, nature, and extent of such remediation assignments. Tardy arrivals to or early departure from theory classes will be remediated with work assigned by the course instructor. For theory course absences and tardies, the student is required to complete the standard remediation procedures, which are to: (1) complete a PTA Remediation Form; (2) complete the remediation assignment which is based on the material that was missed and the length of time that the student missed class; and (3) turn in to the instructor for grading the assignment stapled to a completed PTA Remediation Form. The faculty member has the discretion to change the remediation assignment from the standard procedure if necessary to meet the student's needs. In this case, the faculty member will determine the type, nature, and extent of such remediation assignments. Tardy arrivals to or early departure from theory classes will be remediated as outlined above. A tardy is defined as arrival after the scheduled start time of the class session, whether that is at the beginning of class, after lunch or after a designated break. Early departure (“early out”) is defined as leaving after 11:00 AM for theory courses and after 12:00 PM for laboratory courses. An absence is defined as leaving theory class before 11:00 AM or leaving a laboratory class before 12:00 PM. All remediations must be completed within 7 days of the absence/tardy/early out.

Remediation of PTA Lab absence and the associated clinical skills may be completed by performing, at minimum, a demonstration of proficiency for the lab objectives for each day of absence. It is the right and responsibility of the faculty member, however, in accordance with the institutional policy “Assignment and Grading of Remediation Assignments” to determine the type, nature, and extent of any remediation assignment as well as to evaluate and assign a grade for any remediation assignment for the students in the specific course that they are teaching. Tardy arrivals or early departure from lab sessions will be remediated with work assigned by the course instructor. A tardy is defined as arrival after the scheduled start time of the lab session.

If a student misses a lab, it is his/her responsibility to contact the instructor to schedule the remediation of the missed coursework, such as the lab worksheet and clinical skills competency checklist. If a student misses a Practical Examination (“Practical”), it is his or her responsibility to contact the instructor to schedule the remediation of the Practical and achieve a passing score. Students missing a lab practical will forfeit their initial attempt to pass the practical exam. The highest grade they will be allowed to achieve is 80%.

A maximum of two (2) days of PTA Lab absence may be remediated in a single term. This is not in addition to the 3 total allowed absences. An absence is considered missing greater than or equal to 50% of instructional time. It is the student’s responsibility to notify the instructor prior to leaving class for any reason other than scheduled breaks. If a student leaves lab class after 12:00 PM, he/she will be recorded as having an early out. This missed time must be remediated. A tardy is considered to be arriving after 8:00 AM or after the completion of a scheduled break. The student will be required to remediate the missed time for being tardy.

As part of the professional education process for physical therapist assistant students, prompt, regular attendance is expected during clinical education. Students must arrive at the assigned clinical education site on time.

Students are strongly discouraged from absences during a clinical education course. The student must adhere to the clinic time schedule at all times. Absences must be arranged in advance with the clinical instructor of the clinical facility and the ACCE. For all absences from a clinical education course, including Practicum I, Affiliation I, and Affiliation II, the student and the clinical instructor, in coordination with the ACCE, will make arrangements for remediation on a day-for-day and hour-for-hour basis. Days or hours
may be remediated either by the addition of days at the end of the clinical education experience (if available) or via extended day or weekend hours. The program’s policy allows for a maximum of two days of absences that can be remediated during the Practicum course and three days of absences that can be remediated during a single Clinical Affiliation course, with a maximum of five days of absences in total in Clinical Affiliation coursework. All hours and/or days that are missed must be remediated. It is at the discretion of the clinical site whether this is acceptable.

Remediation of all absences incurred during Practicum I must be remediated prior to the start of the next course. Remediation of all absences incurred during Clinical Affiliation I must be remediated prior to commencing Clinical Affiliation II. Remediation of all Clinical Affiliation II absences must be completed prior to the start of the Program Review course.

Unexcused absences occur when the student has either failed to notify the ACCE and clinical instructor of illness or failed to obtain permission from the ACCE and clinical instructor prior to the absence. Any unexcused absence must be reported to the ACCE by the SCCE/CI immediately. More than one unexcused absence during a term will result in a course failure and may result in a hearing before the academic faculty, at which time possible dismissal from the program may be considered.

In the event of an illness, the student must notify the CI and ACCE as soon as possible. If an illness or appointment, etc. necessitates time away from the clinical site, it is the responsibility of the student to notify the ACCE as to the nature of the absence. If a student is absent for more than two consecutive clinical days (Practicum I) or more than three consecutive clinical days (Affiliation I or II) due to illness, the student must provide a physician’s written approval for the student to return to his or her assigned duties at the clinical site. A copy must be furnished to the student’s clinical instructor and to the ACCE. In concert with the SCCE and/or CI, it is at the discretion of the ACCE and Program Director as to how, or if, the missed time can and will be made up.

In the case of excessive absences (>2 days for Practicum 1, >3 days for Affiliations; see specific policy above), the clinical education experience may be ended, and the student may receive a course failure. The ACCE may modify the attendance policy at any time throughout the term if the students are notified in writing of the change.

If the student is unavoidably tardy, he/she should notify the clinical instructor and ACCE by telephone of the reason for the lateness. Even a tardy of a few minutes should be reported immediately. The SCCE or CI must report episodes of habitual tardiness to the ACCE for action by the academic faculty. Repeated tardiness (a maximum of two occurrences) will not be tolerated and may result in a hearing before the academic faculty and dismissal from the program.

Students not returning to classes after an absence of 14 days will be dismissed.

If successful completion of a clinical education course is not achieved during the normal clinical time frame the student’s clinical experience may be extended if time allows, or the student may receive a failing grade. The student will be placed on probationary status, and an individualized plan will be developed to help ensure future clinical success. If the student can extend the clinical experience, and the criteria for passing are met by the extended end date, the student will continue in the program. If the student is not able to extend the course, or if the clinical experience has been extended, yet the student is unable to pass the course by the new end date, a remediation must occur prior to placement in to another facility. The remediation is developed by the ACCE with input from the Program Director and additional faculty as needed. If the student meets the necessary criteria delineated in the individualized remediation plan, the student will be given one opportunity to repeat a single educational experience if the course failure occurs for Affiliation I or II. If the student fails Practicum I, the student cannot progress in the program. The student will have to remediate the clinical experience with the subsequent cohort.

Should extenuating circumstances exist, e.g. interpersonal incompatibility between the clinical instructor and student, etc., further remediation strategies may be pursued, including reassignment to another clinical instructor and/or clinical education facility. This decision is at the discretion of the ACCE, Program Director, and ultimately, the University President.

Makeup of Course Examinations Due to Absence or Tardiness
Any examination(s) missed due to absence from a theory class must be made up within 48 hours upon return to campus or a grade of zero (0) will be assigned. The examination is to be scheduled by the PTA Student Services Officer and taken in the Learning Resource Center. In the case that a student is tardy and misses a
quiz or an examination, the student must schedule to take the quiz or examination through the Student Services Officer after class and on the same day, or a grade of zero (0) will be assigned. Regardless of the score achieved on the makeup quiz or examination, the maximum grade that will be entered will be 75%.

**Additional Attendance Requirements: Vocational Nurse**

In support of the state requirements for Vocational Nurse Programs, VN students may not graduate without completing the objectives for theory classes, performing the clinical objectives, and completing a minimum of 960 hours of clinical education. Students not returning after 14 consecutive days (starting from the last date of attendance) will be dismissed.

The following rules govern the theory and clinical absences that a Vocational Nurse student may acquire during his/her program.

**Remediation and Limit of Theory Absences**

The student is permitted to remediate a maximum of twenty-four (24) hours of theory absences per term. Documentation for an absence is no longer necessary and will not be collected as there are no “excused absences.” An absence will simply count towards the maximum allowable twenty-four (24) hours permitted. Each absence will stand alone with or without documentation. All missed theory periods must be remediated by fulfilling course objectives through the completion of a specific assignment given to the student by his/her instructor, Director of Nursing, or other designated Stanbridge University staff member. Remediation assignments are due on the next class day, but in any case, not later than the 7th day after the assignment is issued to the student. Should the student not remediate each absence from theory sessions prior to the start of the new term, he/she will be dismissed from the program and will have the opportunity to request re-enrollment.

If the student accumulates greater than twenty-four (24) hours of absence, he/she will be dismissed from the program and will have the opportunity to request re-enrollment.

**Tardiness for Theory Classes**

Students are tardy when they arrive 5 minutes late at the start of class or are 5 minutes late returning from any break. Students are tardy if they leave any class period prior to class being dismissed by the instructor. Tardy students may remain in class for the lecture but will receive an assignment (before leaving class if arriving late and via email if leaving early) to ensure any missed material is presented to the student. The assignment is due at the next meeting for that theory class. If the assignment is not handed in at the next meeting, an additional assignment will be issued. Failure to turn in both assignments at the next session will result in issuance of a Notice of Deficiency, placement on Attendance Probation or, based on an accumulation of Notices of Deficiency, dismissal from the university.

**Makeup of Course Examinations Due to Absence**

Any examination(s) missed due to absence from a theory class must be made up by the 7th day after the student returns to school or a grade of zero will be assigned to the examination. Regardless of the score achieved on the makeup exam, the maximum grade that will be entered into the student's grade record for any makeup examination in a theory class will be 75%.

**Remediation and Limit of Clinical Absences**

The student is permitted to remediate a maximum of twenty-four (24) hours of clinical absences during terms 1-3. Clinical absences include pre-facility, laboratory, and clinical days. If a student accumulates greater than twenty-four (24) hours of absence, he/she will be dismissed from the program. Some clinical facilities have limited capacity to orient the student to the facility (which occurs only once per facility rotation). Students absent from such orientation may not attend clinical education at that facility. If an alternate facility or orientation opportunity cannot be obtained, the student may not attend clinical education and will be dismissed.

All clinical absences in a given term must be remediated within twenty-one (21) calendar days or prior to the start of the new term, whichever is shorter. Students may select and register to remediate a clinical absence within fourteen (14) days following the absence. If the student has not registered for the remediation date of their choice by the fifteenth (15th) day, the remediation day will be scheduled for the student by their Student Services Officer and the student will be informed of the scheduled date by email. Should a student not remediate each hour of absence from clinical sessions prior to the start of the new term, he/she will be dismissed from the program and will have the opportunity to request re-enrollment and will have to repeat the course(s) for which the clinical experience was not completed.
Non-Attendance at Clinical Remediation Sessions
There is no charge for remediation of clinical absences. Students who do not attend a scheduled remediation session will be deemed a “No call, no show”. “No call, no show” students will be charged a fee of $50.00. A second (and subsequent) occurrence(s) of nonattendance at a scheduled remediation session during the remainder of the program will incur a fee of $100.00. These fees must be paid prior to the university forwarding the student's Record of Nursing Program form to the California Board of Vocational Nursing and Psychiatric Technicians (BVNPT).

Tardiness to Clinical Sessions
Students are tardy when they arrive 5 minutes late at the start of a skills lab session or a clinical facility preconference or are 5 minutes late returning from any break. Students are tardy if they leave any clinical session period prior to being dismissed by the instructor. Students who are tardy at a clinical rotation may be sent home and given an absence for the day.

Additional Attendance Requirements: Associate of Science in Nursing (ADN)

Theory Attendance
Regular and timely attendance in the classroom and clinical area is necessary for students to meet the stated objectives of each course. Regular attendance demonstrates professional and responsible behavior. Patterns of tardiness, early outs, and absences are not consistent with the professional standards expected of ADN students and will result in disciplinary action.

A student may be absent one (1) day from each theory course in a 10-week quarter except in the theory component of the Mental Health course. A student may be absent no more than three (3) hours in the theory component of the Mental Health course. Documentation for an absence will not be collected as there are no “excused absences.” An absence will simply count towards the maximum allowable absence. Students must notify the instructor of any absence. Failure to provide advanced notification may result in disciplinary action.

If the student accumulates greater than one (1) day from each theory course in a 10-week quarter or more than three (3) hours in the theory component of the Mental Health course, the Dean of Students will place the student on attendance probation. If a student violates the stipulations of his/her attendance probation, he/she will be dismissed from the program. The student may request to re-enroll in the program, repeat the course from which he/she was dismissed, and continue with the sequence of other courses in the program provided space is available.

It is the student’s responsibility to sign in the e-roster at the beginning of each theory course. The theory instructor will not verify attendance after the class is over. Failure to sign in the e-roster or having a proxy student sign in the e-roster will result in disciplinary action.

Leaving Early
It is required and expected that students attend all classroom hours. This is a mandate from the Board of Registered Nursing, ACCSC and financial aid requirements. Students unable to attend lecture must notify their instructor in advance. Failure to provide advanced notification may result in disciplinary action. Early outs are not permitted. For additional questions, speak with the instructor or director Murphy.

Tardiness for Theory Classes
Students are tardy when they arrive five (5) minutes late at the start of class or after a break. A Notice of Deficiency will be given for each occurrence of tardiness. Students must notify the instructor of any occurrence of tardiness. Failure to provide advanced notification may result in disciplinary action.

Make-up of Course Examinations Due to Absence
If the absence occurs on an exam day, students must notify the instructor, director or assistant director prior to the scheduled exam time that they will not be present for the exam. If the student does not notify the instructor, the exam grade will be a zero. Only one make-up exam per course, per quarter, will be allowed. The alternate make-up exam will be administered after class on the next scheduled exam day. Regardless of the score achieved on the make-up exam, the maximum grade that will be entered into the student’s grade record for any make-up exam in a theory class will be 77%.

Clinical Attendance
Students are required to attend all clinical days. This is a mandate from the Board of Registered Nursing, ACCSC and financial aid requirements. Students MUST attend the first hospital orientation day and
electronic charting in-service for each clinical facility. Failure to attend the first clinical day and/or mandatory computer training will result in dismissal from the program.

A student may be absent one (1) day from each clinical course in a 10-week quarter except in the quarter when the Mental Health course is offered. A student may not miss any clinical hours in the clinical component of the Mental Health course. Students must make-up any clinical absence before progressing to the next quarter or they will be dismissed from the program. The lead instructor or clinical manager will determine the make-up assignment appropriate for hours missed as well as the deadline for submission.

If a student is unable to attend clinical, he/she must:

- Notify the clinical instructor at least one (1) hour prior to the scheduled clinical time. Failure to provide proper advanced notification may result in disciplinary action up to and including grade penalty, notation on clinical evaluation form, and/or being dropped from the course.
- Give the clinical instructor a physician’s release prior to returning to the clinical area if the absence was due to a contagious illness or injury. Boots, slings or other support devices are not allowed in the clinical area.
- Arrange for make-up of missed clinical time/clinical objectives on the scheduled day or by arrangement with instructor.
- Submit satisfactory make-up assignment in a timely manner to the clinical instructor.

**Tardiness for Clinical Sessions**

Tardiness results in unsafe patient care due to lack of or a curtailed shift report. Students are considered tardy when they arrive later than the designated start time at the designated location as defined by each clinical instructor or when they leave any clinical session prior to being dismissed by the instructor. Failure to notify the instructor of tardiness will result in disciplinary action and/or the student may be sent home if deemed unsafe by the clinical instructor. Failure to complete a clinical shift may constitute as a clinical absence. Early outs are not permitted. For additional questions, speak with the instructor or director Murphy.

**Additional Attendance Requirements: Veterinary Technology**

**Attendance/Tardiness**

The maximum number of allowable missed theory class sessions in a single term is nine (9) except for VET 2300 Veterinary Internship, in which only one (1) absence is allowed for the on-campus review session. Students will be marked absent if they miss more than 50% of a class session at the beginning, during or towards the end of a session. Students not remediating theory class sessions prior to the start of the new term or exceeding the limit of missed class sessions will be dismissed from the program.

Absences and tardies for theory class sessions will be remediated by completion of an assignment associated with the objectives for the missed class sessions/tardy at the discretion of the course instructor.

Remediation assignments are due no later than the 7th day after the missed session. When a student misses a class session, it is his/her responsibility to contact the instructor to schedule the remediation of the missed coursework.

It is the student’s responsibility to attend all clinical training sessions, both on and off campus in order to complete AVMA-required skills necessary for graduation.

One (1) lab/clinical absence is allowed per term. Exceptions occur with VET 2102C and VET 2221L where a student’s absence on specific essential skills lab days are prohibited. Students may remediate allowed absences with a 75% score. Students missing more than the allowed lab or clinical sessions per term are subject to dismissal from the program.

Laboratory or clinical absences will be remediated by completion of an assignment associated with the objectives for the missed session at the discretion of the course instructor.

Absences during VET 2300 Veterinary Internship and VET 2000 Veterinary Preceptorship must be remediated on an hour-for-hour basis with the clinical site prior to the end of the term.
Makeup of Course Quizzes or Examinations Due to Absence
Any examination(s) missed due to absence from a theory class must be made up within 1 week from the date the examination was given or a grade of zero will be assigned to the examination. Regardless of the score achieved on the makeup exam, the maximum grade that will be entered into the student's grade record for any makeup quiz or examination in a theory class will be 75%.
GRADING

GRADING REQUIREMENT: ALL PROGRAMS

Stanbridge University’s grading policy is as follows:

- Students must pass all the courses within a program in order to graduate (or complete their studies).
- Students will only be graded once for each course. A student wishing to repeat a course to improve his/her grade must submit a written request to the Dean of Instruction. The original grade will be marked as “Retake”, and the new grade will be reflected on the student's transcript, regardless of which is higher. Only one course may be repeated for grade improvement.
- Students who withdraw will receive a grade of “Incomplete” for courses in progress. Enrolled students who do not complete a course on time will receive a grade of “F” twenty-one (21) days after the conclusion of the course, if not remediated/completed by then.
- Transfer students will receive a notation of “XFR” for courses granted transfer credit.
- Diploma, associate and bachelor’s degree students must have a cumulative grade point average of C (2.0) or above in order to graduate. Master’s degree students must have a GPA of 3.0 in order to graduate.
- Late submission of assignments, projects and papers will result in grade reductions.
- Students may check exam grades for on-campus courses by logging in to Student Central and clicking on the “Exam Scores” link and for online courses by logging into their course to view the course grade book.

Additional Grading Requirements: Information Technology

IT students and associate degree students who do not meet the minimum passing requirement of 65% for a technical course will be placed on probation. They will be dismissed from school if they fail to remediate the failed technical course. Remediation of any failed technical course must be performed within twenty-one (21) days of the end of the course. The student will be expected to take an alternate exam on the material covered in the original end-of-term exam or complete a remediation assignment and will be considered to have successfully remediated the course when he/she has achieved a passing score on the alternate exam or assignment.
Regardless of the score achieved on the alternate exam or assignment, the maximum grade that will be entered into the student's grade record for any remediated course will be 65%.

General education courses that are failed must be successfully retaken in order to graduate from an associate or bachelor's degree program.

Most technical IT courses include a computer lab and/or online learner participation requirement. These participation grades are calculated on the final date of the course and study may occur at any time during the duration of the course. Computer lab participation may not be substituted for online learner participation, or vice versa without prior authorization. Students who pass the course final exam but receive a failing grade for the course due to deficient computer lab and/or online learner participation will be placed on probation and granted a two-week extension for makeup computer lab/online learner work.

**Additional Grading Requirements: Occupational Therapy Assistant**

Occupational Therapy Assistant students must attain a cumulative grade point average of C (75%) in each course to graduate. If a course grade is below 75%, or clinical skills are not all successfully demonstrated, the OTA student may be placed on Academic Probation and the deficiencies must be remediated within three (3) attempts and within sufficient time, as determined by the faculty/administration, to continue in the program without disruption of the program continuity. The OTA Program Exit Exam requires a score of 80% in order to pass the course and graduate.

**Theory Course Remediation**

The length of the Occupational Therapy Assistant program renders retakes for remediation purposes impossible if the student is to continue in his/her program. Remediation actions for unsatisfactory academic progress are required to be allowed to continue in the program. The student will be expected to take an alternate exam on the material covered in the original course exam and/or complete a remediation assignment and will be considered to have successfully remediated the course when he/she has achieved a passing score on the alternate exam or assignment. Regardless of the score achieved on the alternate exam or remediation assignment, the maximum grade that will be entered into the student's grade record for any remediated course will be 75%. Remediation of any failed course must be performed within twenty-one (21) days of the posting of the failing course grade or prior to the start of the next term, whichever is shorter. Students may take up to three remediation attempts (if necessary), one per week during the remediation period. If a course is not successfully remediated, the student’s failing grade will be recorded as the grade for the unremediated course and the student will be dismissed. An exception to this policy is the End of Program Examination for OTA Students. This exam has only one remediation attempt. Remediation of Term Exit Exams must occur prior to the start of the next term. Students who fail to successfully remediate a failed Term Exit Exam will be dismissed from the Occupational Therapy Assistant Program.

Students may not remEDIATE more than 3 courses in a program. If a student fails a fourth (4th) course, the student will be dismissed. Students that are dismissed due to four (4) course failures who re-enroll to the program will be dismissed upon failing a second (2nd) course after their return. Students that are dismissed, re-enroll, and fail a second course will be dismissed and will have the opportunity to re-enter the program only as a new student to repeat the entire program. The term review courses are counted as failed courses.

**Laboratory Course Remediation**

Laboratory courses are Pass/Fail based on the student achieving a minimum number of points on the Skills Checklist, which includes demonstrated skills, completion of projects, quizzes, exams and professionalism points. In the event that a student does not receive a passing laboratory grade due primarily to a deficiency in professionalism points, the student must submit a written plan of correction to address the professionalism deficiencies to the laboratory instructors, program director, or program director's designee. The plan must demonstrate that the student understands what the deficits were and how the deficits will be corrected. The student will have one (1) opportunity to submit the plan of correction within seven (7) calendar days of the end of the laboratory course. An unsatisfactory plan of correction will result in a failing grade for the laboratory course, and the student will be dismissed from the occupational therapy assistant program.

**Additional Grading Requirements: Master of Science in Occupational Therapy**

Students must pass all courses within a program in order to graduate. Students must achieve a grade of C or better to pass individual courses in the MSOT program. In order to achieve a passing grade, the student must complete all required assignments and meet attendance requirements for the course. Students in the MSOT program must maintain a grade point average of B (3.0) or above in order to graduate. Students failing a course in the MSOT program must repeat the course and are prohibited from taking courses where the failed course is a pre-requisite.
The Term Exit Exam and End of Program Examination exams are graded as PASS or FAIL. Students will have two attempts to pass the Term Exit Exam or End of Program Exams. If students fail the remediation attempt, they will need to meet with the Program Director for advisement. Students who fail to successfully remediate a failed Term Exit Exam or Program Exit Examination will be dismissed from the Master of Science in Occupational Therapy program. Students may only remediate one Level I fieldwork course and one Level II fieldwork course per enrollment.

Students who withdraw will receive a grade of “INC” for the course in progress. Enrolled students who do not complete a course on time will receive a grade of “F” within twenty-one (21) days after the conclusion of the course if assignments have not been completed.

Students may remediate only one of the three Level I fieldwork courses if one of the courses is failed. A student may remediate a failed Level II fieldwork course 1 time. Two failed Level I fieldwork courses will result in dismissal from the program. Two failed Level II fieldwork courses will result in dismissal from the program.

**Additional Grading Requirements: Physical Therapist Assistant**

Physical Therapist Assistant students must attain 75% in each theory course and 80% in each PTA lab course in order to graduate. If a theory course grade is below 75%, a laboratory course grade is below 80%, or clinical skills are not all successfully demonstrated, the PTA student will be placed on Academic Probation and the deficiencies must be successfully remediated. The deficiencies will have been successfully remediated if the student achieves a minimum score of 75% for theory courses or 80% for laboratory courses, or a successful demonstration of clinical skills.

**Theory Course Remediation**

The length of the Physical Therapist Assistant program renders retakes of an entire course for remediation purposes impossible if the student is to continue in the program. Remediation actions for unsatisfactory academic progress are required to be allowed to continue in the program. The progression into the clinical education coursework involved in the program is an exception to the rule. In general, the student may progress to clinical education experiences (PTA 2010, 2030, and 2040) if he/she has passed all PTA courses in the curriculum prior to any given clinical education course. This includes the demonstration of competency in performing the specific clinical skills that are appropriate for the level of coursework that has been completed up to the point of time in which the clinical education course is to occur. This policy operates in compliance with the current program guidelines on the “Clinical Skills Competency Checklist” found in the Clinical Education Handbook.

1. In order for a student to be eligible to take Clinical Practicum I (PTA 2010), he/she must successfully complete all coursework in Terms 1, 2 and 3. Any course or competency that is not successfully completed must be successfully remediated prior to beginning PTA 2010. Students must demonstrate satisfactory academic progress in the concurrent courses in Term 4 prior to beginning PTA 2010.

2. In order for a student to be eligible to take Clinical Affiliation I (PTA 2030), he/she must successfully complete all coursework in Terms 1, 2, 3, and 4 and demonstrate competency in all clinical skills identified on the Clinical Skills Competency Checklist. Any course or competency that is not successfully completed must be successfully remediated prior to beginning PTA 2030.

3. In order for a student to be eligible to take Clinical Affiliation II (PTA 2040), he/she must successfully complete all coursework in Terms 1, 2, 3, and 4 and demonstrate competency in all clinical skills identified on the Clinical Skills Competency Checklist. The student must also successfully complete PTA 2030 prior to beginning the clinical education coursework for PTA 2040.

In regard to theory courses a student will be expected to take an alternate exam on the material covered in the course that was failed or complete a remediation assignment and will be considered to have successfully remediated the course when he/she has achieved a passing score on the alternate exam or assignment. Regardless of the score achieved on the alternate exam or remediation assignment, the maximum grade that will be entered into a student’s grade record for any remediated course will be 75%. Remediation of any failed course must be performed within twenty-one (21) days of the posting of the failing course grade or prior to the start of the next term, whichever is shorter. If a student fails both a theory and lab course within the same term, the student must successfully remediate the theory course prior to attempting to remediate the lab course. Students may not sit for the Term or Program Exit Examination until all courses in the respective Term are successfully remediated. Students may take up to three remediation examinations, if necessary, per failed course and with a maximum of one every two days during the remediation period. If a course is not successfully
remediated, the student’s failing grade will be recorded as the grade for the unremediated course and the student will be dismissed. An exception to this policy is the End of Program Examination for PTA Students. This exam has only one remediation attempt. Remediation of the Term Exit Exam must occur prior to the start of the next term. Students who fail to successfully remediate a failed Term Exit Exam will be dismissed from the Physical Therapist Assistant Program.

Students may not remediate more than three (3) courses in a program. If the student fails a fourth (4th) course, the student will be dismissed. End-of-Term cumulative exams are not counted as courses for the purpose of calculating the number of failed courses.

In order to achieve passing grades for PTA Lab I, II and III, students must complete the following skills checks:

1. **Lab Activity List**: All of the activities listed in each of the respective sections must be signed off by an instructor, signifying that the student has performed each of the activities listed. The lab list must be completed by the end of the same lab day and turned in on the due date listed on the course schedule in order to earn full points, and before the student can qualify to participate in the subsequent lab practical exam.

2. **Clinical Skills Competency Checklist (CSCC)**: Students must be signed off by an instructor for all competencies listed in the respective section. The CSCC must be turned in at 8:00 am on the specified due date to earn full points and before the student can qualify to take the next lab practical exam. Students are given the CSCC two weeks prior to the competency due date which delineates the expectations that must be met in order to successfully be signed off by an instructor as demonstrating competence. The student has 3 opportunities to pass a CSCC. If the student fails to pass the CSCC on the third attempt, the student fails the course. The student must successfully pass all competencies prior to being allowed to remediate the course at the end of the term. All courses must be successfully remediated prior to the start of the next term. They will be allowed 2 additional attempts to pass each failed competency. If the student fails to pass upon the 2nd attempt, they will not be able to remediate the course, and will be dismissed from the program.

3. **Clinical Skills Practical Examinations**: Students are given a set amount of time to participate in a five-section lab practical examination. In section one the student is given the examination scenario to review prior to performing the skills. In sections two, three and four, the students rotate between sections performing the skills outlined in the plan of care. In section five the students document the skills that they perform in a SOAP note format. Following completion of the SOAP note, the students are given immediate, individualized one-on-one feedback as to their performance by an instructor.

Students must achieve a score of 4/5 (80%) or greater on each of the three sections tested on the exam. Students who demonstrate safe and accurate performance, knowledge and communication skills will achieve a 4/5 for the respective sections. Students who do not achieve a score of ≥4/5 will be required to re-take and pass the section(s) that they failed.

If a student fails to perform a Critical Safety Element in section two, three or four, the student immediately fails the entire exam.

Students must remediate the failed exam or section(s) within five business days. The student may re-take a Practical Examination twice within this time period, if necessary. The highest grade possible on a remediation Practical for this course is 80%. If a student does not successfully remediate a lab practical, they fail the lab course. In PTA Lab I (PTA Lab 2002) and PTA Lab II (PTA 2003) student is only allowed a total of 5 practical exam remediation attempts for the entire course. The student will fail the course after the 5th remediation attempt. In PTA Lab III (PTA 2004) a student is only allowed a total of 4 practical exam remediation attempts for the entire course. The student will fail the course after the 4th remediation attempt. Failure of the lab course requires that the student take a comprehensive lab practical examination which is taken at the end of the term. Students must still participate in the remainder of the course. Students will have two opportunities to successfully remediate the course. Failure to successfully remediate the lab course results in dismissal from the PTA Program.

Any student who fails a practical exam has mandatory tutoring for the PTA Lab course until they successfully remediate the exam. Any student who fails the course is still eligible to continue in the program and has mandatory tutoring for the PTA Lab course through the remainder of the term.
Critical Safety Elements (CSE) are essential for successful completion of PTA Lab I, PTA Lab II and PTA Lab III. Competency with CSEs indicate that a student carries out the intervention per the plan of care in a manner that minimizes risks to the patient, self, and others. Examples of CSEs include, but are not limited to:

- Ability to follow and appropriately carry out the plan of care (POC) established by the PT.
- Safe implementation of the POC based upon patient diagnosis, status, and response to intervention without placing the patient in jeopardy of harm or injury.
- Demonstration of knowledge regarding contraindications and precautions for specific patient diagnosis relative to the physical therapy interventions within the POC (e.g. following the total hip precautions when transferring a patient after total hip replacement; choosing an appropriate assistive device for the weight bearing status and abilities of the patient for gait).
- Ability to correctly identify physiological measures (HR, BP, RR, blood glucose levels, etc.) outside of parameters that allow for safe therapeutic exercises/intervention and provide proper response and notification of the PT, physician, or nurse.
- Ensures safety of self and others by washing hands correctly, following universal precautions, able to competently set up a sterile field, and don/doff PPE without contaminating materials, patient, or self to prevent the spread of infection
- Uses acceptable techniques for safe handling of patients with proper body mechanics, guarding, and level of assistance; employs standard safety precautions such as: always locking a wheelchair prior to transferring a patient, appropriate use of a gait belt with transfers and gait training, washing hands prior to and after each patient contact, recognizing environmental hazards to safe ambulation, transfers, or other therapeutic intervention.
- Establishes and maintains safe working environment (e.g. monitoring of lines and tubes and other medical equipment, checks physical therapy equipment and assistive devices for maintenance and/or disrepair, eliminates work place hazards).
- Requests assistance when necessary (e.g. from CI, utilizes and monitors support personnel)
- Ability to recognize patient responses during therapeutic intervention that may indicate a life-threatening condition (shortness of breath, chest pain, sudden dizziness, sudden dysarthria, etc.) and provide proper response and notification to the PT, physician, or nurse.
- Correct interpretation of weight bearing status and ability to choose appropriate assistive device for weight bearing status and individual’s abilities.
- Utilizes appropriate gait pattern and assistive device relative to patient's weight bearing status and assistive device.
- Demonstrate knowledge of facility/institutional safety policies and procedures.

Additional CSEs may be identified as part of each clinical skill taught and tested as part of the Lab Practical Examination.

If successful completion of a clinical education course is not achieved during the normal clinical time frame the student’s clinical experience may be extended if time allows, or the student may receive a failing grade. The student will be placed on probationary status, and an individualized plan will be developed to help ensure future clinical success. If the student can extend the clinical experience, and the criteria for passing are met by the extended end date, the student will continue in the program. If the student is not able to extend the course, or if the clinical experience has been extended, yet the student is unable to pass the course by the new end date, a remediation must occur prior to placement in to another facility. The remediation is developed by the ACCE with input from the Program Director and additional faculty as needed. If the student meets the necessary criteria delineated in the individualized remediation plan, the student will be given one opportunity to repeat a single educational experience if the course failure occurs for Affiliation I or II. If the student fails Practicum I, the student cannot progress in the program. The student will have to remediate the clinical experience with the subsequent cohort.

Additional Grading Requirements: Vocational Nurse

Vocational Nurse students must attain a cumulative grade point average of C (75%) in each course to graduate. If a course grade is below 75%, or clinical skills are not all successfully demonstrated, the nursing student is placed on Academic Probation and the deficiencies must be remediated.

Theory Course Remediation

The length of the Vocational Nurse program renders retakes for remediation purposes impossible if the student is to continue in his/her program. Remediation actions for unsatisfactory academic progress are required to be allowed to continue in the program. The student will be expected to take an alternate exam on the material covered in the original course exam and will be considered to have successfully remediated the course when he/she has achieved a passing score on the alternate exam. Regardless of the score achieved
POLICIES

on the alternate exam, the maximum grade that will be entered into the student’s grade record for any remediated course will be 75%.
Remediation of any failed course must be performed within twenty-one (21) days of the end of the course or prior to the start of the next term, whichever is shorter. Students may take up to three (3) remediation examinations (if necessary), one per week during the remediation period. If a remediation examination is not taken in one of the seven day periods after failing a course, the examination is forfeited and may not be taken. If a course is not successfully remediated, the student’s failing grade will be recorded as the grade for the unremediated course and the student will be dismissed. An exception to this policy is the End of Program Examination for VN students. This exam has only one remediation attempt. Remediation of a Term Exit Exam must occur prior to the start of the next term. Students who fail to successfully remediate a failed Term Exit Exam will be dismissed from the Vocational Nurse program.

Students may not remediate more than 3 courses in a program after completing Term 1. If a student fails a fourth (4th) course, (counting from the first failed course after starting Term 2) the student will be dismissed. Students are also required to make up any examination(s) missed because of an absence from class. Any examination(s) missed due to absence from a theory class must be made up on the seventh (7th) day that the student returns to school. Regardless of the score achieved on the makeup exam, the maximum grade that will be entered into the student’s grade record for any makeup examination in a theory class will be 75%. The Term Exit Exam is not counted as a course for the purpose of calculating the number of failed courses.

Clinical Objective Remediation
Students are required to complete remediation for any unmet clinical objectives: clinical experience not demonstrated during the normal clinical schedule must be performed in the skills lab or in the clinical facility within twenty-one (21) calendar days of the original clinical absence. In the event the objective cannot be physically performed (for example, the student is no longer in a Maternal or Pediatric environment), the Program Director will arrange for a suitable clinical environment (if available) or give a suitable assignment.

Students accomplishing technical clinical objectives but deficient in professional objectives, such as manner/attitude, effort, or respect for others, may be placed on probation as specified in this catalog. Probation requires written notification to the student of the deficiency, outlining actions necessary to be removed from probationary status and a date by which the actions must be completed.

Students re-enrolling after a leave of absence, withdrawal or dismissal will be required to complete academic and prefacility requirements to ensure their retention of knowledge and safe nursing practice.

Additional Grading Requirements: Associate of Science in Nursing (ADN)
Note: Regardless of the overall course grade, all assigned work must be completed in order to pass each nursing course. The theory and clinical components of each nursing course must be taken concurrently. In accordance with Associate Degree Nursing Program requirements, a student must pass both the theory and clinical components of a course to be allowed to continue within the program. If a student fails either the theory or clinical component of a nursing course, he/she must repeat both components of the course and successfully complete these components before progressing in the program. Students must have a cumulative grade point average of “C+” or above in order to graduate.

Theory Grades
In accordance with the university’s grading scale, a student will be given a grade from “A+” to “F” on all assignments, quizzes, presentations, and examinations in the theory component of each nursing course and in the prerequisite and co-requisite courses of the nursing program. Nursing students must earn a minimum grade of a “C+” in all prerequisite science courses and in the theory component of all nursing courses, and a grade of “C” in the prerequisite English and Algebra courses and the co-requisite (i.e., general education) courses in order to progress in the program.

Clinical Grades
Students will be given a PASS or FAIL grade on the demonstration of clinical objectives in the clinical component of each nursing course.

Clinical Performance Requirements
Performance and practice of clinical skills constitute a large portion of the student’s time in the program. Evaluation of clinical performance is obtained through the objectives on the Clinical Performance Evaluation Tool. These evaluations are completed at mid-clinical and/or end-of-clinical evaluations. If the student is insufficiently prepared for the clinical experience, he/she will be asked to leave the clinical setting and time
lost will be considered a clinical absence. Make-up of clinical absences for students will be determined on an individual basis.

**Content Master Series (CMS) Examinations**
In addition to passing each course with the minimum passing grade, students must pass the program exit examination with a minimum score of 90% predicted probability of passing the NCLEX-RN on the first attempt (in accordance with the scoring rubric of the examination). If the predicted probability of passing the licensure examination is not calculated, the required minimum score for passing is at or above the National Mean for that version of the examination.

**Additional Grading Requirements: Online Courses**
Online courses are delivered through Stanbridge University’s Edverum platform, a modified Moodle modular course management system, providing students access to course instructions, syllabi, discussion forums, slides, and videos as well as exams and assignments for each course.

Assignments or projects received for online course credit will be graded and the evaluation or response to the submission will be provided within 5 business days. Late submission of assignments, with a grade penalty for late submission, may be allowed by individual instructors as specified in the course syllabus. Students in the BSN (Degree Completion) program should review the BSN Program Catalog Supplement in the BSN Program section of this catalog for additional information regarding online submission of assignments.

**Remediation of Online Courses**
Remediation actions for unsatisfactory course performance are required in the event an online course is failed. The student will be expected to take an alternate exam on the material covered in the original course exam or complete a remediation assignment and will be considered to have successfully remediated the course when he/she has achieved a passing score on the alternate exam or assessment. Regardless of the score achieved on the alternate exam or assignment, the maximum grade that will be entered into the student’s grade record for any remediated course will be 75%. Remediation of any failed course must be performed within twenty-one (21) days of the end of the course or prior to the start of the next term, whichever is shorter. Students may take up to three remediation examinations or submit three assignments (if necessary). Exams may be taken or assignments submitted one per week during the remediation period. If an exam or assignment is not taken or submitted during one of the three weeks following the course, it is forfeited and may not be included as a remediation attempt. Note: BSN (Degree Completion) Program students may not remediate failed courses. Please see the BSN Program Catalog Supplement in the BSN Program section of this catalog.

**Additional Grading Requirements: Veterinary Technology**
Veterinary Technology students must attain a cumulative grade point average of C (75%) in each course, including general education courses, to graduate excluding the program exit exams for which the requirements are listed under graduation requirements. If a course grade is below 75%, the course must be remediated. Students may not remediate more than three (3) courses in a program. If the student fails a fourth (4th) course, the student will be dismissed. End-of-Term cumulative exams are not counted as courses for the purpose of calculating the number of failed courses.

**Remediation**
Remediation actions for unsatisfactory academic progress in a theory course are required for a student to continue in the program. If a student fails a course with a final grade below 75%, the student will be expected to remediate the course failure by taking an alternate cumulative examination on the material covered in the original course. The student will be considered to have successfully remediated the course if he/she achieves a passing score of 75% or higher on the alternate examination. Students will not be allowed to take a course Remediation Exam until all homework assignments for the course have been turned in and the student is cleared by the Instructor.

Students may attempt the alternate theory remediation examination three (3) times. Regardless of the score achieved on the alternate examination and completed homework assignments, the maximum grade that will be entered into the student’s grade record for any remediated course will be 75%. Remediation of any failed course must be performed prior to the start of the next term. If a course is not successfully remediated, the student’s failing grade will be recorded as the grade for the unremediated course, and the student will be dismissed from the program.

Failure of a laboratory or clinical course cannot be remediated and will result in dismissal from the program.
Essential Skills Policies
Students will receive a copy of the essential skills book in booklet form for their own reference. All successfully completed skills will be signed off by the course instructor and documented in each cohort’s essential skills binder which is maintained in the ASVT office. All essential skills required for graduation must be completed with a “pass” score by the end of VET 2101.
SATISFACTORY ACADEMIC PROGRESS

The following describes Stanbridge University’s satisfactory academic progress policy. The school’s SAP policy for Title IV, HEA students is the same as the school’s standards for students enrolled in the same educational programs who are not receiving Title IV aid.

Students will receive a monthly progress report, which will include a list of classes taken, grades received, hours/days missed, and total number of hours completed. It will also include warning messages to those who are not meeting the attendance and grade guidelines and who are either placed on probation or will be placed on probation if correctional steps are not taken. The following describes how satisfactory progress is monitored.

QUANTITATIVE REQUIREMENT: PROGRAM COMPLETION TIME LIMIT AND GPA
Students have a maximum of 1 ½ times beyond the normal length of the program to complete their chosen course of study (or program). Students not finishing by the extended timeframe will be dismissed. Students must meet attendance requirements established for their program.

Attainment of satisfactory progress (attendance, credit earned and GPA) is monitored at the completion of each term for MSOT, MSN, BSN (Degree Completion), ADN, VN, OTA, PTA, and VT students. Upon reaching 50% and 100% of original program completion, based on credit hours scheduled or weeks of classes completed for programs less than 40 weeks, the same will be monitored for BSIT, ASIT, DMAD and HDT students. At 50% of program completion, a minimum GPA and a minimum of 34% of total program credits must be earned. Students failing to meet these benchmarks will be placed on Probation. At the 100% mark of the original program the student must have accumulated 67% of the required program quarter hours of credit, the student’s GPA must meet the required minimum and the student must be able to attain the required graduation GPA by 150% of original program length. Any student not able to meet the 150% benchmark must be dismissed.

**Appeal of Determination of Unsatisfactory Progress (All Students)**

A student may appeal to the President for a reversal of a determination of unsatisfactory academic progress on the following grounds:

- Incorrect recording of attendance or examination grades;
- Incorrect assignment of grades for projects, assignments, or remediation work;
- Failure to meet satisfactory progress requirements based upon
  - The death of a relative of the student;
  - An injury or illness of the student; or
  - Other special circumstances.
The appeal must be filed in writing by the student. After review of the appeal, the decision of the President is final.

Removal of probationary status is based on remediation of absences, reestablishment of satisfactory academic progress by passing or remediating a failed course or adhering to the Code of Conduct or professional clinical objectives.

**Additional Satisfactory Academic Progress Requirements: Veterans Administration**
Veterans or eligible persons will be evaluated weekly to determine satisfactory progress. Students not meeting the 65% passing requirement will be placed on probation. Those not meeting the 65% passing requirement in the next week will have their benefits terminated.

**Additional Satisfactory Academic Progress Requirements: Information Technology**
Tutorial sessions may be mandatory for students at risk of not meeting satisfactory academic performance requirements.

**Additional Satisfactory Academic Progress Requirements: Occupational Therapy Assistant**
Tutorial sessions and meetings with the university’s Academic Success Coordinator may be mandatory for students at risk of not meeting satisfactory academic performance requirements.

The level I and level II fieldwork portions of the OTA program are considered to be part of the entire curriculum and must be completed within a maximum of 1 ½ times beyond the normal length of the program. Students who do not finish level I and level II fieldwork within this time frame will be required to apply for admission and repeat the program as a new student. Tutorial sessions and meetings with the university’s Academic Success Coordinator may be mandatory for students at risk of not meeting satisfactory academic performance requirements.

**Additional Satisfactory Academic Progress Requirements: Master of Science in Occupational Therapy**
Any student who receives less than a 3.0 GPA for a term will be placed on academic probation during the term following the receipt of the deficient grade point average. If the student receives a term grade point average during the term of academic probation that is not a minimum of 3.0 and is not sufficient to increase the student’s cumulative grade point average to a minimum of 3.0, the student will be dismissed from the MSOT program.

Academic probation is only granted for one term of the MSOT program.

If the student receives a term or cumulative grade point average of less than 3.0 in the fifth term of the MSOT curriculum, the student is ineligible for Level II fieldwork and will be dismissed from the program.

**Additional Satisfactory Academic Progress Requirements: Physical Therapist Assistant**
Academic progress is monitored throughout the program. If a student fails a lab course at any point within the course, the student is required to attend mandatory tutoring for the remainder of the course until it has been successfully remediated. If a student is failing a theory course on a day of an exam, the student is required to attend mandatory tutoring that day.

At a minimum, clinical performance during Clinical Practicum I, Clinical Affiliation I and Clinical Affiliation II (PTA 2010, 2030 and 2040, respectively) is assessed at the mid-term and final. The CI is required to complete the web-based Physical Therapist Assistant Clinical Performance Instrument (PTA CPI) at or near the completion of the middle week of the clinical education experience and again at the completion of the course. The PTA CPI must be reviewed with the student to provide a progress report on his/her clinical performance. Any red flag issues that are identified before that point in time are to be brought to the attention of the ACCE, who may notify the student of the issue and its potential impact on his/her course grade.

**Additional Satisfactory Academic Progress Requirements: Vocational Nurse**
Attainment of satisfactory progress (attendance, credit earned and GPA) is monitored at the completion of each term for VN students. Tutorial sessions may be mandatory for students at risk of not meeting satisfactory academic performance requirements.

**Additional Satisfactory Academic Progress Requirements: Associate of Science in Nursing (ADN)**
Attainment of satisfactory progress (attendance, credit earned and GPA) will be monitored at the completion of each quarter. Students must achieve a “C+” or higher in the theory component and a Pass in the clinical component of each nursing course as well as a “C+” or higher in each of the prerequisite science courses.
and in the prerequisite English and algebra courses and the co-requisite (i.e., general education) courses in order to progress in the program. Tutorial sessions may be mandatory for students at risk of not meeting course requirements. Students may also be referred to the Academic Success Coordinator in the Learning Resource Center for assistance with study skills and time management in order help the student make academic progress.

**Class Retakes: Information Technology**

IT program students will be charged audit/retake tuition for any course that they audit for the purpose of review or repeat to improve their grade. Space in the course will be allotted on a space available basis with first priority being given to students who are taking the course for the first time.

**Class Retakes: Vocational Nurse**

Vocational Nurse students who elect to repeat a previously passed course (due to dismissal/withdrawal and subsequent re-enrollment) will have the grade earned in the repeat course recorded on the official transcript.

**Financial Aid Warning**

Stanbridge University evaluates SAP at the end of each payment period. Students who do not meet SAP measures described above will be put on Financial Aid Warning for one payment period. Students who are put on a Financial Aid Warning continue to receive Title IV aid for the next payment periods after they receive the warning status. The status will be conferred automatically without the student appealing the SAP status.

If a student falls below a 2.0 GPA, or if the student is not completing the required amount of clock hours to keep Pace with the requirements for graduation within the 150% time frame, will result in the student being placed on Financial Aid Warning for one payment period. A student who is put on a Financial Aid Warning can continue to receive Title IV, HEA funding for the next payment period after they receive the warning status.

If the student is not meeting Satisfactory Academic Progress at the end of the Financial Aid Warning Period, the student will be placed on Academic Development Status, with a loss of Title IV, HEA funding and will be required to meet specific criteria of an improvement plan to assist them in regaining SAP and Title IV, HEA eligibility. During this period the students will not be eligible to receive Title IV, HEA funds but he/she may continue on a cash pay basis with an approved payment plan. Arrangements for payment must be approved within 10 school days of notification of development status.

If a student is making SAP at the end of the Financial Aid Warning, they shall be returned to normal SAP status with no loss of Title IV eligibility.

**APPEAL PROCESS**

Students who do not make SAP at the end of the Financial Aid Warning period lose their Title IV financial aid eligibility and will be placed on Academic Development Status, with a loss of Title IV, HEA funding, with the right to appeal. The student may have the opportunity to have their Title IV, HEA financial aid eligibility reinstated by appealing the Academic Development Status, with a loss of Title IV, HEA funding decision and placed on Financial Aid Probation if the appeal is granted.

Students may have the opportunity to have their financial aid eligibility reinstated by appealing the decision and being placed on Financial Aid Probation. Students have five (5) business days after being notified to institute an appeal. The appeal must be in writing and given to the Executive Director, who will meet with the Financial Aid Academic Appeals Committee to make a decision on the appeal.

The bases on which a student may file an appeal are: injury or illness; death of a relative; or other special circumstance. Students must provide supporting documents and describe in writing any unusual circumstances that warrant special consideration. Students must provide information as to why they did not make SAP and what has changed that will allow them to make SAP by the next evaluation point.

The Executive Director will provide a decision in writing within ten (10) business days.

**FINANCIAL AID PROBATION**

If Probation Status is granted, students regain Title IV, HEA eligibility for the next eligible payment period only. Students must be making SAP at the end of the payment period to regain Title IV, HEA funding for the next payment period.
Students who regain SAP at the next reporting period regain full eligibility for Title IV, HEA funding. Students not making SAP continue to be ineligible to receive Title IV funds without the option to appeal.

REINSTATEMENT OF TITLE IV, HEA AID

Reinstatement of aid is limited to the period under evaluation. Students making SAP by the conclusion of the Warning or Probation period will be removed from the warning/probation status and will regain eligibility for Title IV, HEA funding.

A former student requesting to be reinstated as an active student should do so in writing. Supportive documentation and/or information concerning any mitigating circumstances should be noted in the request. The requesting prior student shall be notified of the Reinstatement Review within five (5) business days following the decision of the Financial Aid Academic Appeals Committee.

LEAVE OF ABSENCE

A student may request a Leave of Absence for a period of up to 90 days. An approved Leave of Absence will be granted when the absence is emergent or unforeseen and there is a reasonable expectation that the student will return to the university. The reasons for granting an approved Leave of Absence may include, but are not limited to, the student having serious medical problems, military duty, pregnancy, or jury duty. For an approved Leave of Absence, the student must provide a written request that is signed and dated and documentation that supports the reason for the request. Extensions may be requested if the student’s circumstances warrant; the student, however, may be on approved Leave of Absence for a maximum of 180 days in any twelve-month period. (Note: Extensions must be requested; they are not automatically granted if the student remains absent). The student will be dismissed from the university if he/she does not return at the conclusion of the approved Leave of Absence, unless an extension has been granted.

If a student does not return from an approved Leave of Absence on the expected return date, the student will be dismissed from the university and a Return of Title IV Funds calculation will be processed.

Return of Title IV Funds

If the student is the recipient of a Title IV, HEA loan, failure to return from an approved Leave of Absence may result in changes to loan repayment terms, including exhaustion of some or all of the grace period. (If a student does not return from the Leave of Absence, the 6-month grace period is retroactively applied back to the beginning of the leave of absence date).

Changes to Private Loans

The student is solely responsible for contacting any financial aid sources/lenders from which they may receive financial aid in order to determine any changes that may occur in any grace period or repayment schedule for financial aid based on the increased length of their program due to a Leave of Absence. The student must also contact any financial aid source or lender to determine whether interest on the loan(s) will continue to accrue while on Leave of Absence.

Resumption of Classes

If the Leave of Absence is of sufficiently short duration, students will be allowed to rejoin their track and resume their studies. Remediation of theory course material per the requirements of the student’s program is required, as is remediation of missed clinical education for Vocational Nurse students. Missed sessions during a Leave of Absence, however, will not be counted as absences for attendance purposes, and students will not be placed on Attendance Probation or dismissed for absent periods during a Leave of Absence.

If the leave is of longer duration, and the student cannot rejoin his/her original cohort, the student will be readmitted to the beginning of the course during which the leave commenced.
PROBATION

Students will be notified in writing once they are placed on probation. Students on probation will have a Notice of Probation placed in their permanent academic file and the probationary status noted on their official transcript. Students on probation will not be able to print unofficial transcripts or use the services of Career Services. Students placed on academic or conduct probation will not be eligible for the Dean’s List for the term during which the probation was enforced. A Notice of Probation will be issued if:

Attendance
- The student in the Occupational Therapy Assistant, Physical Therapist Assistant, or Vocational Nurse program fails to remediate a theory absence within 7 days of the absence being recorded.
- The student in the Occupational Therapy Assistant, Physical Therapist Assistant, or Vocational Nurse program fails to schedule a remediation date within 21 days of a clinical absence being recorded.
- The student in the Vocational Nurse program fails to turn in both the first and second assignments at the next class session after having failed to turn in the first assignment for tardiness in a theory class.

Academic
- The student has failed a course and has not remediated the course within 21 days.
- The student fails to meet the benchmarks for attainment of satisfactory progress as defined in the Satisfactory Academic Progress section of the school’s catalog.
- The student fails to attend mandatory assigned tutoring.
- A student in the Master of Science in Occupational Therapy program who receives less than a 3.0 for a term will be placed on academic probation during the term following the receipt of the deficient grade point average.

Conduct
- The student violates any of the terms in the school’s Code of Conduct for students.
- A VN, OTA, PTA, VT, or MSOT student fails to demonstrate professional conduct in the clinical facility.

Financial Aid Probation
- The student does not make Satisfactory Academic Progress at the end of a Financial Aid Warning Period, and successfully appeals the loss of Title IV financial aid eligibility.

SUSPENSION

A student will be suspended for a period of time, as determined by the university administration if the student is judged to have violated the Code of Conduct and his/her actions or expressions indicate remaining on campus or at a clinical facility can reasonably be expected to lead to further incidents. The period of suspension may encompass on-site lecture or off-campus (clinical education) activities. Students who are suspended must remediate absences as required in the attendance policy. Students will not have absences due to suspension counted against remediation limits for either theory or clinical education. A record of the suspension will be placed in the student’s file.
WITHDRAWAL

You may withdraw from the school at any time after the cancellation period (described above) and receive a pro rata refund if you have completed 60 percent or less of the scheduled hours in the current payment period of your program through the last day of attendance. The amount of that refund is “pro-rated” according to the not completed portion of the program less the cost of any equipment returned in good condition (good condition does not include equipment that has a broken seal, for which a log-on occurred, or that is marked or damaged in any way) and a registration or administration fee not to exceed $250.00.

Return to Title IV Funds Policy
This policy applies to students who withdraw officially, unofficially or fail to return from a leave of absence or are dismissed from enrollment at the School. It is separate and distinct from the School refund policy. (Refer to institutional refund policy)

The calculated amount of the Return of Title IV, HEA (R2T4) funds that are required to be returned for the students affected by this policy, are determined according to the following definitions and procedures as prescribed by regulations.

The amount of Title IV, HEA aid earned is based on the amount of time a student spent in academic attendance, and the total aid received; it has no relationship to student's incurred institutional charges. Because these requirements deal only with Title IV, HEA funds, the order of return of unearned funds do not include funds from sources other than the Title IV, HEA programs.

Title IV, HEA funds are awarded to the student under the assumption that he/she will attend school for the entire period for which the aid is awarded. When student withdraws, he/she may no longer be eligible for the full amount of Title IV, HEA funds that were originally scheduled to be received. Therefore, the amount of Federal funds earned must be determined. If the amount disbursed is greater than the amount earned, unearned funds must be returned.

The Payment Period for Clock Hour Schools is one-half of the academic year or program length (whichever is less).

The Date of Determination is the date that the institution determines the student has withdrawn from the program. For schools that are required to take attendance, the date of determination is no longer than 14 days after the Last Date of Attendance. The Date of Determination starts the clock for timely refunds of Title IV funds, within 45 days after the “Date of Determination”.

The Withdrawal Date for schools required to take attendance is the Last Date of Attendance (LDA).

The institution has 45 days from the date that the institution determines that the student withdrew to return all unearned funds for which it is responsible. The school is required to notify the student if they owe a repayment via written notice.

The school must advise the student or parent that they have 14 calendar days from the date that the school sent the notification to accept a post withdraw disbursement. If a response is not received from the student or parent within the allowed time frame or the student declines the funds, the school will return any earned funds that the school is holding to the Title IV, HEA programs.

Post-withdraw disbursements will occur within 90 days of the date that the student withdrew.

Withdrawal Policy
“Official” Voluntary Withdrawal
A student is considered to be “Officially” withdrawn on the date the student notifies the Financial Aid Director, Registrar, or School Director in writing of their intent to withdraw. The date of the determination for return and refund purposes will be the earliest of the following for official withdrawals:

1. Date student provided official notification of intent to withdraw, in writing.
   or
2. The date the student began the withdrawal from the School’s records.

A student will be permitted to rescind his notification in writing and continue the program, if so chosen. However, if the student subsequently drops, the student’s withdrawal date is the original date of notification of intent to withdraw.
Upon receipt of the withdrawal information the School will complete the following:

Determine the student’s last date of attendance as of the last recorded date of academic attendance on the school’s attendance record, and perform two calculations:

- The student’s ledger card and attendance record are reviewed to determine the calculation of Return of Title IV, HEA funds the student has earned, and if any, the amount of Title IV, HEA funds for which the school is responsible. Returns made to the Federal Funds Account are calculated using the Department’s Return of Title IV, HEA Funds Worksheets, scheduled attendance and are based upon the payment period.

- Calculate the school’s refund requirement (see school refund calculation).

The student’s grade record will be updated to reflect his/her final grade.

Stanbridge University will return the amount for any unearned portion of the Title IV, HEA funds for which the school is responsible within 45 days of the date the official notice was provided.

If applicable, the School will provide the student with a letter explaining the Title IV, HEA requirements. To include:

The amount of Title IV, HEA assistance the student has earned. This amount is based upon the length of time the student was enrolled in the program based on scheduled attendance and the amount of funds the student received.

Any returns that will be made to the Federal program on the student’s behalf as a result of exiting the program. If a student's scheduled attendance is more than 60% of the payment period, he/she is considered to have earned 100% of the Federal funds received for the payment period. In this case, no funds need to be returned to the Federal funds.

Advise the student of the amount of unearned Federal funds and tuition and fees that the student must return, if applicable.

Supply the student with ledger card record noting outstanding balance due to the school and the available methods of payment. A copy of the completed worksheet, check, letter and final ledger card will be kept in the student’s file.

In the event a student decides to rescind his or her official notification to withdraw, the student must provide a signed and dated written statement indicating he/she is continuing his or her program of study and intends to complete the payment period. Title IV, HEA assistance will continue as originally planned. If the student subsequently fails to attend or ceases attendance without completing the payment period, the student's withdrawal date is the original date of notification of intent to withdraw.

Unofficial Withdrawal
Any student that does not provide official notification of his or her intent to withdraw and is absent for more than 14 consecutive calendar days, fails to maintain satisfactory academic progress, fails to comply with the school's attendance and/or conduct policy, does not meet financial obligations to the school, or violates conditions mentioned in the School contractual agreement, will be subject to termination and considered to have unofficially withdrawn.

Within two weeks of the student’s last date of academic attendance, the following procedures will take place.

- The Student Services office will make three attempts to notify the student regarding his/her enrollment status.
- Determine and record the student’s last date of attendance as the last recorded date of academic attendance on the attendance record.
- The student’s withdrawal date is determined as the date the day after 14 consecutive calendar days of absence.
- Notify the student in writing of their failure to contact the school and attendance status resulting in the current termination of enrollment.
• Stanbridge University calculates the amount of Federal funds the student has earned, and, if any, the amount of Federal funds for which the school is responsible.
• Calculate the school’s refund requirement (see school refund calculation).
• Stanbridge University’s Controller will return to the Federal fund programs any unearned portion of Title IV funds for which the school is responsible within 45 days of the date the withdrawal determination was made, and record on student’s ledger card.
• If applicable, the School will provide the student with a refund letter explaining Title IV requirements:
  o The amount of Title IV aid the student has earned based upon the length of time the student was enrolled and scheduled to attend in the program and the amount of aid the student received.
  o Advise the student in writing of the amount of unearned Title IV, HEA aid and tuition and fees that he/she must return, if applicable.
  o Supply the student with final student ledger card showing outstanding balance due the school and available methods of repayment.
  o A copy of the completed worksheet, check, letter, and final ledger card will be kept in the student’s file.

Withdraw Before 60%
The institution must perform a R2T4 to determine the amount of earned aid through the 60% point in each payment period. The institution will use the Department of Education’s prorate schedule to determine the amount of the R2T4 funds the student has earned at the time of withdrawal.

Withdraw After 60%
After the 60% point in the payment period, a student has earned 100% of the Title IV, HEA funds he or she was scheduled to receive during this period. The institution must still perform a R2T4 to determine the amount of aid that the student has earned.

Stanbridge University measures progress in clock hours and uses the payment period for the period of calculation.

The Calculation Formula:
Determine the amount of Title IV, HEA aid that was disbursed plus Title IV, HEA aid that could have been disbursed.

Calculate the percentage of Title IV, HEA aid earned:

\[
\text{HOURS SCHEDULED TO COMPLETE} \div \text{TOTAL HOURS IN PERIOD} = \% \text{ EARNED} \quad \text{(rounded to one significant digit to the right of the decimal point, e.g. .4493 = 44.9%.)}
\]

If this percentage is greater than 60%, the student earns 100%.

If this percent is less than or equal to 60%, proceed with calculation.

Percentage earned from (multiplied by) Total aid disbursed or could have been disbursed = AMOUNT STUDENT EARNED.

Subtract the Title IV aid earned from the total disbursed = AMOUNT TO BE RETURNED.

100% minus percent earned = UNEARNED PERCENT
Unearned percent (multiplied by) total institutional charges for the period = AMOUNT DUE FROM THE SCHOOL.

If the percent of Title IV aid disbursed is greater than the percent unearned (multiplied by) institutional charges for the period, the amount disbursed will be used in place of the percent unearned.

If the percent unearned (multiplied by) institutional charges for the period are less than the amount due from the school, the student must return or repay one-half of the remaining unearned Federal Pell Grant.

Student is not required to return the overpayment if this amount is equal to or less than 50% of the total grant assistance that was disbursed or could have been disbursed. The student is also not required to return an overpayment if the amount is $50 or less.

Stanbridge University will issue a grant overpayment notice to student within 30 days from the date the school’s determination that student withdrew, giving student 45 days to either:

Repay the overpayment in full to Stanbridge University
OR
Sign a repayment agreement with the U.S. Department of Education.

Order of Return
Stanbridge University is authorized to return any excess funds after applying them to current outstanding Cost of Attendance (COA) charges. A copy of the Institutional R2T4 work sheet performed on your behalf is available through the office upon student request.

In accordance with Federal regulations, when Title IV, HEA financial aid is involved, the calculated amount of the R2T4 Funds is allocated in the following order:

- Unsubsidized Direct Stafford loans (other than PLUS loans)
- Subsidized Direct Stafford loans
- Direct PLUS loans
- Federal Pell Grants for which a Return is required
- Federal Supplemental Educational Opportunity Grant
- Iraq and Afghanistan Service Grant for which a Return is required
- Other Title IV assistance
- State Tuition Assistance Grants (if applicable)
- Private and institutional aid
- The Student

Earned Aid:
Title IV, HEA aid is earned in a prorated manner on a per diem basis (clock hours) up to the 60% point in the semester. Title IV, HEA aid is viewed as 100% earned after that point in time. A copy of the worksheet used for this calculation can be requested from the financial aid director.

Post Withdraw
If you did not receive all of the funds that you have earned, you may be due a post-withdraw disbursement. Stanbridge University may use a portion or all of your post-withdraw disbursement for tuition and fees (as contracted with the School). For all other school charges, the School needs your permission to use the post-withdraw disbursement. If you do not give permission, you will be offered the funds. However, it may be in your best interest to allow the school to keep the funds to reduce your debt at the school.

The post-withdrawal disbursement must be applied to outstanding institutional charges before being paid directly to the student. Both grants and loans must be disbursed within 180 days of the date of determination in a post-withdrawal disbursement.

Institution Responsibilities
Stanbridge University’s responsibilities in regard to Title IV, HEA funds follow:

- Providing students information with information in this policy;
POLICIES

• Identifying students who are affected by this policy and completing the return of Title IV funds calculation for those students;
• Returning any Title IV, HEA funds due to the correct Title IV programs.

The institution is not always required to return all of the excess funds; there are situations once the R2T4 calculations have been completed in which the student must return the unearned aid.

Overpayment of Title IV, HEA Funds
Any amount of unearned grant funds that a student must return is called an overpayment. The amount of grant overpayment that you must repay is half of the grant funds you received. You must make arrangements with the School or Department of Education to return the amount of unearned grant funds.

Student Responsibilities in regard to return of Title IV, HEA funds
Returning to the Title IV, HEA programs any funds that were dispersed to the student in which the student was determined to be ineligible for via the R2T4 calculation.
Any notification of withdraw should be in writing and addressed to the appropriate institutional official.
A student may rescind his or her notification of intent to withdraw. Submissions of intent to rescind a withdraw notice must be filed in writing. Either these notifications, to withdraw or rescind to withdraw must be made to the Registrar.

Refund vs. Return to Title IV
The requirements for the Title IV, HEA program funds when you withdraw are separate from any refund policy that Stanbridge University may have to return to you due to a cash credit balance. Therefore, you may still owe funds to the school to cover unpaid institutional charges. Stanbridge University may also charge you for any Title IV, HEA program funds that they were required to return on your behalf.

If you do not already know what the School refund policy is, you may ask your Schools Financial Planner for a copy.

Return to Title IV questions: If you have questions regarding Title IV, HEA program funds after visiting with your financial aid director, you may call the Federal Student Aid Information Center at 1-800-4-fedaid (800-433-3243). TTY users may call 800-730-8913. Information is also available on student aid on the web www.studentaid.ed.gov.

ONLINE (i.e. DISTANCE) EDUCATION PROGRAMS

WITHDRAWAL FROM THE PROGRAM
You may withdraw from the school at any time and receive a pro rata refund if you have completed 60 percent or less of the scheduled days in the current payment period in your program through the last day of attendance. The refund will be less a registration or administration fee not to exceed $250.00, and less any deduction for books, eBooks, and materials not returned in new condition as stated as refundable on the enrollment agreement. A refund will be made within 45 days of withdrawal.

If the student has completed more than 60% of the period of attendance for which the student was charged, the tuition is considered earned and the student will receive no refund. All Federal Title IV aid refunds shall be calculated according to the Department of Education Guidelines.

For the purpose of determining a refund under this section, a student shall be deemed to have withdrawn from a program of instruction when any of the following occurs:

▪ The student notifies the Institution of the student’s withdrawal or as of the date of the student’s withdrawal, whichever is later.
▪ The Institution terminates the student’s enrollment for failure to maintain satisfactory progress; failure to abide by the rules and regulations of the Institution; and/or failure to meet financial obligations to the Institution.

For the purpose of determining the amount of the refund, the date of the student's withdrawal shall be deemed the last date of recorded attendance. The amount owed equals the daily charge for the program (total institutional charge, minus non-refundable fees, divided by the number of days or hours in the program), multiplied by the number of days or hours the student attended, or was scheduled to attend, prior to withdrawal. For distance education students scheduled days is based on a five-day week, which does not include Saturday
or Sunday, or any defined holiday as enumerated in Section 6700 of the California Government Code (specific holidays published in the catalog).

If the student has received federal student financial aid funds, the student is entitled to a refund of moneys not paid from federal student financial aid program funds.
DISMISSAL

Dismissal from school may occur if:

- The student does not finish a program within the maximum number of credit hours allowed, i.e. the credit hours attempted exceed 1.5 times the credit hours required to complete the program.
- The student does not return from an approved Leave of Absence.
- The student grossly violates the university’s Code of Conduct.
- The student fails to meet the terms stipulated in a Notice of Probation.
- The student is absent for more than 14 days without notifying the university.

Program Specific Dismissal Policies

**VN Program**

- The student in a Vocational Nurse program accumulates more than 24 hours (3 days or 2 days depending if the rotation is on a 12-hour schedule) of clinical absences in a term or fails to remediate clinical absences prior to the start of the next term.
- The student in a Vocational Nurse program accumulates greater than 24 hours (4 sessions in a full-time program and 6 sessions in a part-time program) of theory absence in a single term or fails to remediate theory absences prior to the start of the next term.
- The student in a Vocational Nurse program is absent from a mandatory facility orientation period, and an alternate facility and orientation cannot be arranged.
- The student does not remediate a failed course in 3 attempts within 21 days or before the start of the next term, whichever is shorter. The student must take one attempt per week or the attempt is forfeited.
- The student in a Vocational Nurse program fails to remediate a course after three attempts in Term I or fails four courses in Terms II through IV.
- The student in a Vocational Nurse program commits an unsafe nursing practice in the clinical facility.
- The student in a Vocational Nurse program does not pass the exit examination with a minimum score of 90% predicted probability of passing the NCLEX-PN on the first attempt (in accordance with the scoring rubric of the examination).

**ADN Program**

- The student in an ADN program receives below a C+ in any of the prerequisite science courses, below a C in any of the other prerequisite or co-requisite courses, or below a C+ in the theory component or below a Pass in the clinical component of a nursing course.
- The student in an ADN program accumulates greater than three (3) hours of absence in the theory component of the Mental Health course, or more than one (1) day of absence in the theory component of one (1) course in any quarter other than that in which the Mental Health course is offered.
- The student in an ADN program misses any clinical hours in the clinical component of the Mental Health course, or more than one (1) day of clinical absence in the clinical component of one (1) course in any quarter other than that in which the Mental Health course is offered.
- The student in an ADN program fails to attend the first clinical day and/or mandatory computer training.
- The student in an ADN program fails to make up all clinical absences before progressing to the next quarter.
- The student in an ADN program commits an unsafe nursing practice in the clinical facility.
- The student in an ADN program does not complete a minimum of twenty-eight (28) hours of community service by the end of the program.
- The student fails to complete enrollment in the Orange County Medical Reserve Corps before the end of the second term of his/her academic program.
OTA Program
- The student in an Occupational Therapy Assistant program exceeds greater than 18 hours of theory absence, exceeds 16 hours of Lab absence, exceeds 2 days of Level 1 fieldwork absence in a term, exceeds 3 days of absence in a Level II fieldwork or Level II fieldwork and fails to provide sufficient documentation for the absences.
- The student has multiple tardies or early outs or is a no-show, no-call at a facility.
- The student commits an ethical violation in, or related to, the fieldwork facility.
- A student who does not complete all fieldwork requirements within a maximum of 1 ½ times beyond the normal length of the program will be dismissed and required to reapply for admission and repeat the Occupational Therapy Assistant program as a new student.
- The student commits an unsafe practice in the fieldwork facility.
- The student fails a fourth (4th) course.
- The student that is previously dismissed due to four (4) course failures, and re-enrolls into the Occupational Therapy Assistant program and fails a 2nd course.
- The student does not remediate a failed course in 3 attempts within 21 days or before the start of the next term, whichever is shorter. The student must take one attempt per week or the attempt is forfeited.
- The student does not remediate a failed term exit exam after 3 attempts or before the start of the next term.
- The student does not pass the Program Exit Exam with a minimum required score of 75%, and is unable to obtain an 75% through remediation via the remediation policy. Only one (1) remediation attempt is permitted for the program exit exam. Should a student fail the program exit exam they will be dismissed from the program.
- The student does not complete a minimum of sixteen (16) hours of community service by the end of the program.

PTA Program
- The student in a Physical Therapist Assistant program accumulates greater than three (3) days of theory course absences in a single term, greater than two (2) days of absence in any PTA Lab course, greater than two (2) days of absence in the Clinical Practicum course, greater than three (3) days of absence in a single Clinical Affiliation course or greater than five (5) days of absence total of both Clinical Affiliation coursework in a term.
- The student in a Physical Therapist Assistant program that does not remediate each absence prior to the start of the new term.
- The student does not remediate a failed theory course in 3 attempts within 21 days or before the start of the next term, whichever is shorter.
- The student does not remediate a failed Lab course in 2 attempts before the start of the next term.
- The student in a Physical Therapist Assistant program fails a fourth (4) course in the program.
- The student in a Physical Therapist Assistant program commits an unsafe practice in the clinical education facility.
- The student in a Physical Therapist Assistant program does not pass the Program Exit Exam with a minimum required score of 600 on the PEAT Examination.
- The student in a Physical Therapist Assistant program does not remediate a failed term or program exit exam after 3 attempts or before the start of the next term.
- The student in a Physical Therapist Assistant program does not successfully remediate a failed program exit exam after one attempt.
- The student in a Physical Therapist Assistant program does not complete a minimum of sixteen (16) hours of community service by the end of the program.

VET Program
- The student fails to complete enrollment in the Orange County Medical Reserve Corps before the end of the second term of his/her academic program.
- The student in a Veterinary Technology program commits an unsafe practice in the clinical facility.
- The student fails to complete enrollment in the Orange County Medical Reserve Corps before the end of the second term of his/her academic program.
- The student in a Veterinary Technology program that does not remediate each absence prior to the start of the new term.
- The student in a Veterinary Technology program accumulates greater than nine (9) missed theory course sessions per term and fails to provide sufficient documentation for the absences.
• The student in a Veterinary Technology program accumulates more than one absence in any laboratory or clinical course per term, with the exception of VET 2102L and VET 2121C for which no absences are permitted.
• The student does not remediate a failed course in 3 attempts within 21 days or before the start of the next term, whichever is shorter. The student must take one attempt per week or the attempt is forfeited.
• The student in a Veterinary Technology program fails a laboratory or clinical course.
• The student in a Veterinary Technology program does not pass the Program Exit Exam with a minimum required score of 85%.
• The student in a Veterinary Technology program does not remediate a failed term or program exit exam after 3 attempts or before the start of the next term.
• The student in a Veterinary Technology program does not complete a minimum of twenty (20) hours of community service by the end of the program.
• The student fails to complete enrollment in the Orange County Medical Reserve Corps before the end of the second term of his/her academic program.

RN-BSN Program
• The student in an RN-BSN program fails more than three (3) theory courses or the student does not receive a grade of C or better when repeating a failed course.
• The student in an RN-BSN program has a lapsed RN license, CPR certification, or professional liability insurance policy.
• The student in an RN-BSN program does not maintain a 3.0 GPA before the completion of the Capstone course.

MSN Program
• The student in an MSN program fails more than two (2) theory courses or the student does not receive a grade of C or better when repeating a failed course.
• The student in an MSN program does not maintain a 3.0 GPA by the completion of the Capstone I and II courses.
• The student in an MSN program does not complete the Capstone project within 36 weeks after being issued an incomplete for the Capstone II course.
• The student in an MSN program has a lapsed RN license, CPR certification, or professional liability insurance policy.

MSOT Program
• The student in an Occupational Therapy program accumulates more than three (3) absences per course.
• The student in an Occupational Therapy program fails a (1) Level I fieldwork course or two (2) Level II fieldwork courses.
• The student in an Occupational Therapy program receives a term or cumulative grade point average less than 3.0 in the sixth term of the OT curriculum.
• The student in an Occupational Therapy program receives a term grade point average during the term of academic probation that is not a minimum of 3.0 and is not sufficient to increase the student’s cumulative grade point average to a minimum of 3.0.
• The student in an Occupational Therapy program is repeatedly late for or leaves early from any class, fieldwork, or other program-related function, on or off campus.
• The student in an Occupational Therapy program receives three (3) Unsatisfactory Professional Behavior Evaluation ratings in the program.
• The student in an Occupational Therapy program commits an unsafe or unethical practice in any class, fieldwork, or other program-related function, on or off campus.
• The student in an Occupational Therapy program fails to successfully retake a failed Term Exit Exam or Program Exit Examination.
• The student in an Occupational Therapy program fails that same course twice.
• The student in an Occupational Therapy program does not complete a minimum of sixteen (16) hours of community service by the end of the program.

DISMISSAL APPEAL PROCESS
Stanbridge University students have the right to appeal an academic dismissal. There are three levels of appeal for a dismissal. Students who have been dismissed may submit a letter of appeal detailing the reason for dismissal and the rationale for the appeal to the dean of instruction at dean.instruction@stanbridge.edu. An unfavorable decision at the dean’s level may be appealed to the vice president of instruction at
VP.instruction@stanbridge.edu. If the unfavorable appeal decision is upheld by the vice president of instruction, a final appeal may be made to the president at president@stanbridge.edu. Decisions by the president are final and not subject to further university appeal. Students whose dismissal is upheld by the president and who are eligible for readmission may apply for readmission using the guidelines below.

READMISSION AFTER DISMISSAL
Students who have been dismissed from Stanbridge University may apply for readmission. All Readmission requests must be made in writing to the Director of Student Services, with a copy to the Program Director. A student who is requesting readmission may be required to attend a readmission meeting with various members of the administration and instruction teams. The President, Dean of Instruction, Dean of Students, Director of Student Services, Program Administration, and the student’s instructors from previously attended courses, or any combination thereof, will evaluate each student's case to make a decision regarding readmission, and they will set forth guidelines for said student's readmission. The decision and subsequent guidelines, if any, will be communicated in specific detail by the Director of Student Services to the student via email within three (3) weeks of the conclusion of readmission meeting. Readmission after dismissal will require payment of a non-refundable Student Tuition Recovery Fund (STRF) assessment even if a STRF assessment was paid for a previous enrollment. If a tuition change occurred after the original enrollment and before the readmission enrollment, the new tuition amount will be used to calculate the amount due for readmission enrollment. Readmission is dependent on sufficient space in the cohort the student desires.

Readmission after Dismissal for Attendance Reasons
Students dismissed for clinical or theory course attendance deficiencies may apply for readmission at the university in a new track of their program of study. If readmitted, students dismissed for attendance deficiencies will resume their studies at the beginning of the course from which they were dismissed. Students will be financially responsible for retake tuition for hours of theory and clinical education associated with courses not previously satisfactorily completed and being retaken.

Readmission after Dismissal for Academic Reasons
Students dismissed for failing to remediate an unsatisfactory course grade may apply for readmission in another track in their program, commencing at the beginning of the failed course. Students will be financially responsible for retake tuition for hours of theory and clinical education associated with courses not previously satisfactorily completed and being retaken.

Students dismissed for failing four (4) courses may apply for readmission in a new track at the point of the term from which they were dismissed. Students repeating coursework in a required repeat of a term are financially responsible only for prorated tuition for repeated hours of theory and the hours of clinical education associated with courses not satisfactorily completed.

Failure to pass a course after multiple attempts is an indication that a student is unable to comprehend or learn the knowledge required to perform the occupational tasks afforded by the education, making it necessary for Stanbridge University to dismiss the student without the opportunity for readmission.

Readmission after Dismissal for Unsafe Nursing/Fieldwork/Clinical Education or Clinical Practice Reasons
Students dismissed for reasons of unsafe nursing/fieldwork/clinical education or clinical practice reasons may apply for readmission to Stanbridge University. Each case will be evaluated individually, based on the severity of the actions that resulted in the student's dismissal. Students may be refused readmission, allowed to reenroll with additional conditions specified in writing as part of the enrollment contract, or reenrolled without conditions. Students will be financially responsible for retake tuition for hours of theory and clinical education associated with courses not previously satisfactorily completed and being retaken.

Readmission after Dismissal for Conduct Reasons
Students dismissed for conduct infractions may apply for readmission to Stanbridge University. Each case will be evaluated individually, based on the severity of the actions that resulted in the student's dismissal. Students may be refused readmission, allowed to reenroll with additional conditions specified in writing as part of the enrollment contract, or reenrolled without conditions. Students will be financially responsible for retake tuition for hours of theory and clinical education associated with courses not previously satisfactorily completed and being retaken.
READMISSION AFTER WITHDRAWAL
Students who have withdrawn from Stanbridge University may apply for readmission. The Director of Student Services, Dean of Students, and Program Administration will evaluate each student's case to make a decision regarding readmission, and they will set forth guidelines (if necessary) for said student's readmission. Readmission after withdrawal will require payment of a non-refundable Student Tuition Recovery Fund (STRF) assessment even if a STRF assessment was paid for a previous enrollment. If a tuition change occurred after the original enrollment and before the readmission enrollment, the new tuition amount will be used to calculate the amount due for readmission enrollment. Readmission is dependent on sufficient space in the cohort the student desires to join.

DENIAL OF READMISSION APPEAL PROCESS
Stanbridge University students have the right to appeal a denial of readmission. There are three levels of appeal for a denial of readmission. Students who have been denied readmission may submit a letter of appeal to the dean of instruction at dean.instruction@stanbridge.edu. The appeal letter will specify the reason for dismissal, the reason(s) for denial of readmission cited by the readmission committee, and the rationale for the appeal. An unfavorable decision at the dean's level may be appealed to the vice president of instruction at VP.instruction@stanbridge.edu. If the unfavorable decision is upheld by the vice president of instruction, a final appeal may be made to the president of the university at president@stanbridge.edu. Decisions by the president are final and not subject to further university appeal. Students whose denial of readmission is upheld by the president may not apply for readmission.
GRADUATION

**Graduation Requirements for Diploma Students**
Diploma Students must achieve a GPA of at least 2.0 in order to graduate. Satisfactory completion of all the courses in a program must occur within 150% of the program quarter hours of credit attempted for diploma programs greater than 40 weeks in length. A diploma appropriate to the student’s program will be issued to each graduate.

**Graduation Requirements for Master’s, Bachelor’s, and Associate Degree Students**
Bachelor’s degree and associate degree students must achieve a GPA of at least 2.0 in order to graduate. Master’s degree students must achieve a cumulative GPA of 3.0 in order to graduate. Only those graduate level courses in which a student earns the equivalent of a 2.0 or better may be applied toward the total number of credits required for graduation. Satisfactory completion of all the courses in a program must occur within 150% of the program quarter hours of credit attempted. Bachelor of Science in Nursing (degree completion) program students must complete 90 quarter hours of credit in their program (of which up to 20% of the 90 quarter hours of credit in the program may be transfer credit from other institutions).

**Graduation Requirements for Master’s Degree in Occupational Therapy Students**
Master’s degree students must achieve a cumulative GPA of 3.0 in order to graduate. Only those graduate level courses in which a student earns the equivalent of a 2.0 or better may be applied toward the total number of credits required for graduation. In addition, students in the Master of Science in Occupational Therapy program must achieve a passing grade in all fieldwork experiences. Students in the MSOT program must also complete Level II fieldwork courses within 12 months following completion of the theory and fieldwork components of Terms 1 through 5.

In order to graduate, students in the MSOT program must complete a minimum of 16 community service hours by the end of the program.

**Graduation Requirements for Occupational Therapy Assistant Students**
In addition to passing each course with a 75% or better grade, Occupational Therapy Assistant students must pass a program exit examination with a minimum score of 75%. This examination has only one remediation attempt.

In order to graduate, students in the Occupational Therapy Assistant program must complete a minimum of four hours of community service per term during terms 1 through 4 for a total of 16 community service hours by the end of the program.

**Graduation Requirements for Physical Therapist Assistant Students**
In addition to passing each theory course with a 75% or better grade and each lab course with an 80% or better grade, including all clinical education coursework and the clinical competency skills checklists associated with program, PTA students must pass a program exit examination with a minimum score of 600. This examination has only one remediation attempt.

In order to graduate, students in the Physical Therapist Assistant program must complete a minimum of four hours of community service per term during terms 1 through 4, or a total of 16 community service hours by the end of the program.

**Graduation Requirements for Vocational Nurse Students**
In addition to passing each course with a 75% or better grade, Vocational Nurse students must pass the Vocational Nurse Program exit examination with a minimum score of 92% predicted probability of passing the NCLEX-PN on the first attempt (in accordance with the scoring rubric of the examination). If the predicted probability of passing the licensure examination is not calculated, the required minimum score for passing is at or above the National Mean for that version of the examination.

In order to graduate, students in the Vocational Nurse program must complete a minimum of four hours of community service per term during terms 1 through 3, or a total of 12 community service hours by the end of the program.

Students in the Vocational Nurse program must also complete enrollment in the Orange County Medical Reserve Corps before the end of the second term of the program.
Graduation Requirements for ADN and LVN-to-ADN Nursing Students
In addition to passing each course with the minimum passing grade, ADN and LVN-to-ADN Nursing students must achieve a cumulative GPA of “C+” or above in the program and pass the nursing program exit examination with a minimum score of 92% predicted probability of passing the NCLEX-RN on the first attempt (in accordance with the scoring rubric of the examination). If the predicted probability of passing the licensure examination is not calculated, the required minimum score for passing is at or above the National Mean for that version of the examination.

In order to graduate, students in the ADN and LVN-to-ADN program must complete a minimum of four hours of community service per term during terms 1 through 7, or a total of 28 community service hours by the end of the program.

Students in the ADN and LVN-to-ADN program must also complete enrollment in the Orange County Medical Reserve Corps before the end of the second term of the program.

Graduation Requirements for LVN 45 Unit Option Students
In addition to passing each course with a minimum passing grade, LVN 45 Unit Option students must achieve a cumulative GPA of “C+” or above in the program and pass the nursing program exit examination with a minimum score of 92% predicted probability of passing the NCLEX-RN on the first attempt (in accordance with the scoring rubric of the examination). If the predicted probability of passing the licensure examination is not calculated, the required minimum score for passing is at or above the National Mean for that version of the examination.

In order to graduate, LVN 45 Unit Option students must complete a minimum of four hours of community service per term during terms 1 through 7, or a total of 28 community service hours by the end of the program.

Students in the LVN 45 Unit Option program must also complete enrollment in the Orange County Medical Reserve Corps before the end of the second term of the program.

Graduation Requirements for Veterinary Technology Students
All essential skills required for graduation must be completed with a “pass” score by the end of VET 2101.

A minimum grade of 750 on the Program HESI Exam, and a minimum grade of 85% in the Jurisprudence Exam is required for graduation.

In order to graduate, students in the Veterinary Technology program must complete a minimum of four hours of community service per term during terms 1 through 5, or a total of 20 community service hours by the end of the program.

Students in the Veterinary Technology program must also complete enrollment in the Orange County Medical Reserve Corps before the end of the second term of the program.
TRANSCRIPTS

Upon the completion/termination of their studies students will be issued an official transcript for all courses they have taken. Students on probation will not be issued official transcripts. A total of three official transcripts will be issued to the student or forwarded to another school within two business days at no cost to the student. Official transcripts ordered by a student to be picked up by the student but which are not picked up within 30 days of the order date will be destroyed. Additional Official Transcripts issued or forwarded within two business days will be issued after payment of a $5.00 fee per transcript.

Twenty-Four Hour Official Transcripts may be requested for pick-up within 24 hours of the request after a payment of a $10.00 fee.

Urgent Official Transcripts may be requested for urgent pick-up (within two hours of the request) after a payment of a $25.00 fee and if the request is made by telephone or in person before 2:00PM on the day the pick-up is desired.

Students and graduates may view and print their unofficial transcript at any time through Student Central.
CODE OF CONDUCT

Students at Stanbridge University are responsible for regulating their own conduct and for respecting the rights and privileges of others. Students are expected to conduct themselves in a manner compatible with the function of the university as an educational institution. Students are expected to respect and obey all civil and criminal laws. Failure to show respect for the standards of behavior is cause for disciplinary action.

A student may be disciplined for one or more of the following causes related to university activity or attendance:

- The unlawful use, sale, or possession on university property of any controlled substance, or presence on university property under the influence of any controlled substance (including medical marijuana and alcohol).
- The unlawful use, sale, or possession of any poison on university property, or presence on university of any poison.
- Continued disruptive behavior, continued willful disobedience, habitual profanity or vulgarity, or the open and persistent defiance of the authority of, or persistent abuse of, university personnel.
- Assault, battery, bullying, or any threat of force or violence upon a student or university personnel.
- Willful misconduct resulting in injury or death to a student or university personnel, or willful misconduct resulting in cutting, defacing, theft, or other injury to any real or personal property owned by the university personnel, or students in attendance at the university.
- Willful or persistent smoking in an area where smoking has been prohibited by law or by university policy.
- Persistent, serious misconduct where other means of correction have failed to bring about proper conduct.
- The forgery, alteration, or misuse of university documents, records, or identification, or knowingly furnishing false information to the university.
- Cheating, plagiarizing or any other form of dishonesty in relation to a university course or program.
- The unauthorized entry or use of university property.
- Disorderly, lewd, indecent, or obscene conduct on university property.
- The possession or use of any firearms, explosives, dangerous chemicals, or other potentially harmful implements or substances while on university property or at a university-sponsored function without the prior authorization of the University President.
- Rape, sexual assault, or harassment, including, but not limited to, sexual harassment of any student, university personnel or personnel or patients at a clinical facility.
- The obstruction or disruption of the university’s educational or administrative process.
- Attempting to perform any previously identified act that constitutes a cause for disciplinary action.
- The unauthorized interaction with animals participating in the Veterinary Technology program.
- Any misconduct which endangers the health and well-being of animals being used in the Veterinary Technology program.
- Any other cause not previously listed which is identified as good cause by the university administration.

All rules apply to both on-campus and off-site classes, activities, and functions, including clinical education and externships.

Substance Abuse
To assist in achieving a campus free of the problems of substance abuse, the University has adopted policies prohibiting the unlawful manufacture, sale, distribution, possession or use of controlled substances and alcohol, including medical marijuana, on Stanbridge property or at official functions on/off-campus. Any member or group of the Stanbridge community violating these policies and regulations will be subject to disciplinary action. In order to enforce this policy Stanbridge University reserves the right to request persons subject to the policy to take fitness for duty tests. Positive results from a fitness for duty test shall be grounds for disciplinary action. Also, the university may perform inspections of persons, personal property, or vehicles located on university property or off-site at official university functions (such as clinical education or externships) in order to assure a drug-free, alcohol-free environment. Failure to agree to a fitness for duty
test or inspection will be considered a violation of this policy, and appropriate disciplinary measures will be
taken as described above.

Reasonable Suspicion Testing: A student will be asked to take a Fitness for Duty Test after an instance of
Reasonable Suspicion has been documented. Such a test is voluntary, but failure to take the test will result
in disciplinary action, up to and including dismissal.

POLICY REGARDING ACADEMIC DISHONESTY

Any student who engages in academic dishonesty, including, but not limited to, plagiarizing another person’s
work; cheating on an examination or assignment; distributing copies of examinations, assignments, or answer
sheets to other students; passing off another’s work as one’s own; and/or aiding one or more other students
in committing the same or similar acts of academic dishonesty will be given a grade of zero for the exam or
assignment in which the infraction occurred. If a student commits a second (2nd) act of academic dishonesty,
he or she will be dismissed from the university. All acts of academic dishonesty will be recorded on a Notice
of Deficiency form and placed in the student’s permanent academic file. A student may appeal his/her
dismissal from the university for academic dishonesty. The appeal must be made in writing to the President.
The decision of the President on the student’s appeal will be final.

EMAIL ACCOUNT REQUIREMENT

Students are required to provide an email address upon registration. This address will be used to send
information to students, including schedule confirmations, changes and reminders, notices of deficiency,
reports of progress, administrative action, probation, and other official communications. Students must daily
review the messages to the email address provided to the University and update the email address on file
when it changes. If a student does not have an email address at enrollment, assistance will be provided for
the student to establish a no-charge email account and access the new account from the Learning Resource
Center.

USE OF ELECTRONIC MULTIFUNCTION DEVICES

Electronic multifunction devices include, but are not limited to, cell phones, iPads, iPods, MP3 players, student-
owned computers, etc.

- Electronic Multifunction Devices may not be used while in a class/clinical area, unless specifically
  authorized, as in the case of a VN program-issued netbook computer or instructor-permitted laptop
  computer for taking notes during class.

- Use of a program-issued netbook computer is limited to use of the electronic drug guide; no other
  functions of the netbook computer may be used during any class or clinical rotation.

- Use of classroom equipment to access the Internet and personal email during class breaks will
generally be authorized by all instructors. Installation of any executable program on classroom
  systems without specific permission of the instructor is not authorized nor is the download of any
  copyrighted material.

- The university employs filtering technology to reduce the possibility that students may encounter
  objectionable content. Requests to configure the filter to permit access to specific websites for
  educational purposes should be directed to the Dean of Instruction via the instructor.

- Students are responsible for keeping the school informed of changes in their home address, email
  address, and phone number(s).

(Note: Vocational Nurse clinical facilities, Occupational Therapy Assistant fieldwork facilities and/or Physical
Therapist Assistant clinical education facilities may have stricter rules on the use of electronic devices than
those outlined above. Vocational Nurse students, Occupational Therapy Assistant students, and Physical
Therapist Assistant students must comply with any local rules on the use of electronic devices that may be
required by the clinical facilities in their program.)
GRIEVANCE POLICY

Complaints or grievances may be made in person or via telephone, e-mail, fax, postal mail, or any other type of correspondence. (Please see the telephone and fax numbers of the university on page 1 of this catalog.)

Students who want to report a complaint or grievance should address the appropriate parties in ascending order in the chain of communication at the university: Instructor, Program Director, Dean of Student Services, Dean of Instruction, Vice President of Instruction, President.

If a student has a complaint or grievance against any person listed in the chain of communication, the student may make the report of the complaint or grievance to the next person above the one against whom the complaint or grievance is being made.

OTHER GRIEVANCE RESOLUTION AUTHORITIES

ACCSC
Schools accredited by the Accrediting Commission of Career Schools and Colleges must have a procedure and operational plan for handling student complaints. If a student does not feel that the school has adequately addressed a complaint or concern, the student may consider contacting the Accrediting Commission. All complaints reviewed by the Commission must be in written form and should grant permission for the Commission to forward a copy of the complaint to the school for a response. This can be accomplished by filing the ACCSC Complaint Form. The complainant(s) will be kept informed as to the status of the complaint as well as the final resolution by the Commission. Please direct all inquiries to:

Accrediting Commission of Career Schools and Colleges
2101 Wilson Blvd., Suite 302
Arlington, VA 22201
(703) 247-4212
www.accsc.org

A copy of the ACCSC Complaint Form is available at the school and may be obtained by contacting the President of the university or online at www.accsc.org.

Bureau for Private Postsecondary Education (BPPE)
Any questions a student may have regarding this catalog that have not been satisfactorily answered by the institution may be directed to the Bureau for Private Postsecondary Education at 2535 Capitol Oaks Drive, Suite 400 Sacramento, California, 95833, www.bppe.ca.gov, toll-free phone number (888) 370-7589 or by fax (916) 263-1897.

As a prospective student, you are encouraged to review this catalog prior to signing an enrollment agreement. You are also encouraged to review the School Performance Fact Sheet, which must be provided to you prior to signing an enrollment agreement.

A student or any member of the public may file a complaint about this institution with the Bureau for Private Postsecondary Education by calling (888) 370-7589 toll-free or by completing a complaint form, which can be obtained on the bureau's Internet Web site www.bppe.ca.gov.

Board of Vocational Nursing and Psychiatric Technicians (BVNPT): Vocational Nurse Students
The Board of Vocational Nursing and Psychiatric Technicians
2535 Capitol Oaks Drive, Suite 205
Sacramento, California 95833
Telephone (916) 263-7800; FAX (916) 263-7855

Veterans Administration: Reimbursement to Veterans and Eligible Persons
For information or for resolution of specific payment problems, the veteran should call the Department of Veterans Affairs nationwide toll-free number at 1-800-827-1000.

Accreditation Council for Occupational Therapy Education (ACOTE®): Occupational Therapy and Occupational Therapy Assistant Students
The American Occupational Therapy Association, Inc.
4720 Montgomery Lane

NONDISCRIMINATION AND HARASSMENT POLICY

Stanbridge University prohibits discrimination on the basis of race, color, sex, religion, national origin, ethnic group identification, ancestry, age, physical or mental disability, medical condition, military service, marital status, pregnancy, sexual orientation, or on any other basis prohibited by law. The university is committed to providing equal opportunities to all individuals in all programs and activities which it conducts.

Sexual harassment is a form of sex discrimination and includes unwanted sexual advances, requests for sexual favors and other verbal or physical conduct of a sexual nature when submission to or rejection of the conduct explicitly or implicitly affects an individual’s learning environment, unreasonably interferes with an individual’s performance, or creates an intimidating, hostile or offensive learning environment. Individuals engaging in this behavior are in violation of state and federal statute and are subject to disciplinary action, including student dismissal and employee termination.

Individuals who feel they have been subjected to discrimination or harassment through words or actions, including intimidation, bullying or sexual harassment, may file a complaint with the President of the university.

POLICY IN EVENT OF A SEXUAL ASSAULT

Policy. Sexual assault is a criminal activity prohibited in all employee and student areas, buildings, properties, facilities, service areas, satellite facilities of Stanbridge University and any location where classes/instruction are conducted. It is the policy of the Stanbridge to ensure, to the extent possible, that students, faculty, or staff who are victims of a sexual assault committed at or upon the grounds of or facilities maintained by the university shall receive information, follow-up services and referrals to local community treatment centers.

Definition of Sexual Assault. “Sexual assault” includes, but is not limited to, rape, forced sodomy, forced oral copulation, rape by a foreign object, sexual battery, or threat of sexual assault.

Notification. In the event a sexual assault is reported to any staff or faculty member, with the consent of the victim and without delay, that staff or faculty member will notify the President by the most expeditious means available. (Note: Staff personnel will use the employee contact list if the President is not present on site. Leaving a telephonic message or written/email message is not sufficient contact.) If the President cannot be affirmatively contacted, the next senior administrator on site will be notified.

Pursuant to legal requirements, and with the victim’s concurrence, the President will notify the appropriate local law enforcement agency of the reported sexual assault and obtain an ambulance to transport the victim to the hospital, as necessary.

Provision of support services to victims. The President, (or in his absence, the next senior administrator) is responsible for ensuring services are available to victims, such as referral to a counseling center or other appropriate agencies in the community for immediate, short-term, crisis counseling or long-term counseling. This information shall be provided with sensitivity and in consideration of the personal needs of the victim.

Information provided to victims. The President will keep the victim informed of the status of any student disciplinary proceedings and the results of any disciplinary action or appeal of such disciplinary action in connection with the sexual assault. The Dean of Instruction will be tasked with providing the necessary assistance to help the victim deal with any academic difficulties that may arise from the assault.

Disciplinary options for victims. As advised by retained counsel, the President will provide each victim of sexual assault with information about the following options: criminal prosecution, civil lawsuits, the disciplinary process through the university, the availability of mediation, and academic assistance.
FRATERNIZATION POLICY

Consensual Relationships
Stanbridge University is committed to the principle that the learning and working environment of its students, employees, and guests should be free from sexual harassment and inappropriate sexual conduct. Sexual harassment is a form of sex discrimination that is illegal and is proscribed by institutional policy. All employees and students are accountable for compliance with this policy. Established violations will lead to disciplinary actions which may include termination of employment or permanent dismissal of a student from the University. This policy applies to all officers, administrators, and supervisors; regular, contract and temporary faculty members; and teaching assistants, staff members and students. This policy also pertains to actions that affect any employee, student, or guest of Stanbridge University.

Professional Risks
It is in the interest of Stanbridge University to provide clear direction and educational opportunities to the University community about the professional risks associated with consensual/romantic or consensual/sexual relationships between members of the university community where a conflict of interest and/or a power differential between the parties exists. A consensual relationship is defined as a romantic and/or social engagement arranged by personal invitation between two individuals or arranged by a third party. Romantic relationship is defined in this policy as a mutually desired courting activity between two unmarried individuals. Individuals entering such relationships must recognize that:

1. CONFLICTS OF INTEREST may arise when such relationships occur between and among faculty or staff and students. University policies and ethical principles preclude individuals from evaluating the academic performance of others with whom they have consensual/romantic or consensual/sexual relationships.

2. POWER DIFFERENTIALS between the parties in consensual/romantic or consensual/sexual relationships may cause serious consequences even when conflicts of interest are resolved. Individuals entering into such relationships must recognize that:
   A. the reasons for entering, maintaining, or terminating such a relationship may be a function of the power differential;
   B. where power differentials exist, even in a seemingly consensual relationship, there are limited after-the-fact defenses against charges of sexual harassment. Furthermore, under certain situations, consensual relationships may be outside the scope of employment for university employees and, if so, an individual would not be covered by the university’s liability protection in subsequent litigation.

Consensual/Romantic or Consensual/Sexual Relationships
A consensual/romantic or consensual/sexual relationship between individuals who occupy different levels of authority in the university automatically and inevitably carries the potential for evolving into a sexual harassment case of very serious implications, either from a subsequent change of attitude by the subordinate partner or from a contemporary complaint from a disadvantaged third party. Relationships of this sort are against university policy and forbidden in those instances in which the partner with higher status and/or power has explicit or implicit authority over, or the power to reward or punish, the partner with lower status and/or power. It follows that consensual/romantic or consensual/sexual relationships between staff or faculty members and students are also forbidden and against university policy.

Reporting Policy
Where a conflict of interest exists, or may exist, in the context of a consensual/romantic or consensual/sexual relationship, both individuals shall notify their instructor or immediate supervisor. In conjunction with the university administration, the instructor or supervisor shall have the responsibility for making arrangements to eliminate or mitigate a conflict whose consequences might prove detrimental to the university or to either party in the relationship, including action which may result in termination of an employee of the university or dismissal of a student. The instructor, supervisor and university administrator shall act with the proviso that it is almost always the case that the individual with the power or status advantage in the relationship will bear the burden of accountability.
ADA POLICY

Stanbridge University does not discriminate in admission or access to our program on the basis of age, race, color, sex, disability, religion, sexual orientation, or national origin. If you would like to request academic adjustment or auxiliary aids, please contact the university’s Vice President of Instruction. You may request academic adjustments or auxiliary aids at any time. The university’s ADA Compliance Office is responsible for coordinating compliance with Section 504 of the Rehabilitation Act of 1973 and Title III of the Americans with Disabilities Act of 1990. Applicants who are persons with disabilities, as defined in paragraph 104.3(j) of the regulation under Section 504 of the Rehabilitation Act of 1973, may apply for admittance into the program. The university will work with the applicant or student to determine whether reasonable accommodations can be effective and/or are available.

Any qualified individual with a disability requesting an accommodation or auxiliary aid or service should follow this procedure:
1) Notify the university’s ADA Compliance Office in writing of the type of accommodation needed, date needed, documentation of the nature and extent of the disability, and of the need for the accommodation or auxiliary aid. The request should be made at least four weeks in advance of the date needed. You may contact the university’s ADA Compliance Office by telephone at (949) 794-9090 Ext. 5206 or via email at ada@stanbridge.edu.
2) The university’s ADA Compliance Office will respond within two weeks of receiving the request.
3) If you would like to request reconsideration of the decision regarding your request, please contact the university’s ADA Compliance Office within one week of the date of the response. Please provide a statement of why and how you think the response should be modified.

TITLE IX POLICY

In accordance with Title IX of the federal regulations, no person at Stanbridge University is excluded on the basis of sex from participation in, is denied the benefits of, or is subjected to discrimination under any educational program or activity receiving federal financial assistance. In accordance with the amendment in 1987 program or activity includes all the operations of the educational institution.

Assistant Coordinator of Title IX - Ms. Sasha Heard, Assistant Director of Accreditation and Compliance, 2041 Business Center Drive, Suite 107, Irvine, CA 92612 Phone No.: (949) 794-9090 Ext. 5206

CAMPUS SAFETY AND SECURITY POLICIES

Campus Access and Security
Stanbridge University is located in an office building complex, which provides public access to other tenant businesses and their visitors. The building management does not provide security patrols because the complex is located in the service area of the Irvine Police Department. Parking lots are lighted at night as are building entrances. The normal exercise of personal awareness of surroundings in any public area is recommended while on campus during daylight and evening hours.

Off-Site Security during Clinical Education Experiences
When participating in a clinical education experience, the student will follow the facility-specific emergency action plan. This includes the safety measures that are in place, whether in the form of a security guard or service or via a phone call to 911. Each student is oriented by a facility designee on the policies and procedures related to security at that facility.

Reporting of Police, Fire, and Medical Emergencies
Police, fire, or medical emergencies can be reported by dialing 911 from any telephone on campus because all telephones on the university campus are tied into the 911 emergency system and the emergency numbers are posted throughout the campus. Students, faculty, and staff are also informed that non-emergency calls for service can be made by calling the appropriate non-emergency contact number from any campus phone.

Reporting of Criminal Activity
Stanbridge University requires that all criminal activity be reported to its administration and, in most instances, to the local police agency. In the event that any student, faculty, or staff witnesses or becomes a victim of
criminal activity on the campus of Stanbridge University, including the clinical facilities attended by students in any program, or any activity in which students are engaged at off-campus locations of student activity officially recognized by the university, the student, faculty, or staff must immediately notify the administration of Stanbridge University, and a written report must be filed by the end of the next business day with the office of the President of Stanbridge University. Responsibility for filing the written report lies with the person(s) in charge of the premises or the function involved. The President of Stanbridge University or designee will report the criminal activity to the appropriate police agency in cases when the victim desires to file but has not yet filed a report.

In consultation with other appropriate administrative personnel, the President of Stanbridge University will determine any next steps necessary to investigate the criminal activity and to take any steps toward disciplinary action warranted against an employee or student of the university. The President or designee will also issue a formal report to all appropriate persons involved. With incidents of criminal activity where internal disciplinary action is taken against the offender, Stanbridge University reserves the right to disclose to the alleged victims the result of such disciplinary action. This action will be taken at the discretion of the President of the university.

Stanbridge University does not have its own campus law enforcement or security department. Administrative and faculty personnel have enforcement authority with regard to all school policies and procedures, work closely with state and local law enforcement agencies in the reporting of criminal activity, and encourage accurate and prompt reporting of all crimes to appropriate police agencies.

Confidential Reporting Procedures
If you are the victim of a crime and do not want to pursue action within the university’s system or the criminal justice system, you may still want to consider making a confidential report for the annual security report of the university. With your permission, the President of the university or designee can file a report on the details of the incident without revealing your identity. The purpose of a confidential report is to comply with your wish to keep the matter confidential while taking steps to ensure the future safety of yourself and others. With such information, the university can keep an accurate record of the number of incidents involving students, faculty or staff; determine where there is a pattern of crime with regard to a particular location, method, or assailant; and alert the campus community to potential danger. Reports filed in this manner are counted and disclosed in the annual crime statistics of the university.

BULLYING POLICY

Bullying can foster a climate of fear and disrespect, which seriously impairs the physical and psychological health of its victims and creates conditions that negatively affect any learning and working environment. Every college and university committed to maintaining high standards for behaviors, where every member of the University community conducts oneself in a manner which demonstrates proper regard for the rights and welfare of others. This Anti-Bullying statement therefore, seeks to educate the University community about bullying and to promote civility and respect among all its members, including the administration, faculty, staff, and students. Bullying is a violation of the Code of Conduct, and may lead to administrative action, up to and including dismissal.

DEFINITION

a. Bullying is defined as the aggressive and hostile acts of an individual or group of individuals who are intended to humiliate, mentally or physically injure, or intimidate, and/or control another individual or group of individuals.

Such aggressive and hostile acts can occur as a single, severe incident or repeated incidents, and may manifest itself in the following forms:

a. Physical Bullying includes pushing, shoving, kicking, poking, and/or tripping another; assaulting or threatening a physical assault; damaging a person’s working or studying space or personal property; and/or damaging or destroying a person’s work or study product.

b. Verbal/Written Bullying includes ridiculing, insulting, or maligning a person, either verbally or in writing; addressing abusive, threatening, derogatory, or offensive remarks to a person; and/or attempting to exploit an individual’s known intellectual or physical vulnerabilities.

c. Nonverbal Bullying includes directing threatening gestures toward a person or invading personal space, after being asked to move or step away.
d. “Cyber Bullying” is defined as bullying an individual using electronic form, including, but not limited to, the Internet, interactive and digital technologies, or mobile phones.

e. Freedom of expression and thought are essential for colleges and universities; however, there are rules of conduct that need to be enforced in light of a college’s mission and goals statements. Bullying does not fit within our organizational values, which include a culture of mutual respect.

In the event a bullying incident is reported to any staff or faculty member, with the consent of the complainant and without delay, that staff or faculty member will notify the Dean of Students and Director of Student Services by the most expeditious means available.
STUDENT SERVICES

New Student Orientation
From day one of your education at Stanbridge you will be supported in every way possible. During your orientation session, we will walk you through every facet of our academic community. We will review your program, your schedule, all of the facilities and resources available to you and will introduce you to the Stanbridge University Student Central online portal. Students in programs delivered online will receive their orientation through Edverum while students taking only selected courses of study online will receive an orientation to their program on campus and an additional orientation to their online courses via Edverum.

Academic Advising
Students can request one-on-one advising with a faculty advisor or student services officer to discuss academic or personal issues at any time.

Tutoring Services
Our programs are rigorous and designed to challenge. Occasionally students may need additional help outside of the classroom. Students can request individual tutoring by their instructors during office hours or other scheduled times.

Student Life
As dedicated as we are to providing facilities, technology, test preparation and placement assistance, we are equally dedicated to the greater good. This is what makes Stanbridge a community like no other – a living, breathing, compassionate society with the opportunity to not only change the lives of students, but the lives of others as well.

Whether it is building homes with Habitat for Humanity, holding community blood drives for the American Red Cross or fund-raising for groups like The Free Wheel Chair Mission, Smile Train, Mercy Corps or Doctors Without Borders, Stanbridge students are serving the world and making a difference every day. Students in online programs are also encouraged to engage in community service activities in the area in which they reside.

Stanbridge Student Assistance Program
Stanbridge University recognizes that balancing academic excellence and a complicated life outside of school can be stressful, and at times overwhelming. Because no one should deal with a personal crisis without a listening ear or guidance toward a resolution, we offer the Stanbridge Student Assistance Program (SSAP). The program is a free, comprehensive, and fully confidential counseling service that helps students manage or resolve a wide variety of difficult situations and is part of Stanbridge University’s commitment to student success:

• Stress and Anxiety
• Depression and Suicide
• Feeling Like an Outsider
• Alcohol and Drug Abuse
• Identity Theft Recovery
• Financial and Legal Services
• Family Conflict
• Performance Related Fears
• Prescription Drug Costs

Students may contact the Stanbridge Student Assistance Program (SSAP) by dialing 800-321-2843. In order to receive services, the student must identify as a Stanbridge Student when connected to an Intake Specialist. Students in crisis or in a situation that requires immediate assistance may reach SSAP 24 hours a day, 365 days a year. For non-urgent issues, the service is available between 7:30 am and 6:30 pm PST. An assigned counselor will contact the student within two-to-three business days of receiving the original call. Students receive three sessions per problem, per area, per benefit year, at no cost. The program also provides referrals to a variety of wellness-related community resources, such as community centers and cultural events.

LEARNING RESOURCE SYSTEM

At Stanbridge University learning continues beyond the classroom. To better serve the students the university has developed a comprehensive Learning Resource System that is uniquely effective and includes the Learning Resource Center, Online Library, and Online Learner.

Learning Resource Center
The Stanbridge Learning Resource Center is open Monday-Thursday: 6:30am-10:00pm;
STUDENT SERVICES

Friday: 6:30am-7:00pm; and Saturday and Sunday: 9:00am-5:00pm. Holiday hours are disclosed by email. The Learning Resource Center provides computer-based training modules, lab simulations and practice examinations for IT subjects, a printer and copier for student use, private collaboration rooms, library books to borrow, and internet access for research for all students. The Center is staffed by the Librarian on Monday-Thursday from 9:30 a.m. to 6:30 p.m. and Friday from 8:30 a.m. to 5:30 p.m. to assist students. The Librarian is also available via phone and email to assist students in online courses and programs with reference materials and research projects. Specializing in study skills, time management, and test-taking strategies, the Academic Success Coordinator is also available to assist students in the Learning Resource Center.

Stanbridge University Electronic Library Resources
Stanbridge University offers access to electronic resources through its Learning Resource System website. Students can log in to their Student Central account and access the resources anywhere, at any time. Students in the medical or allied health fields have access to the Comprehensive Index of Nursing and Allied Health Literature (CINAHL) with full-text database, the MEDLINE Complete database, and the ProQuest Nursing and Allied Health Source database, which combined offer access to over 4,000 full-text journals and related resources. In addition, the Academic Search Complete database offers students over 9,000 full-text journals in a variety of subjects, including science and technology, psychology, education, and many others. There is also a video database for the Veterinary Technician students—Veterinary Education in Video—that allows students to watch veterinary professionals work with animals in a variety of settings. If students are not able to find the full-text of the resource that they want through Stanbridge University’s resources, the LRS offers Interlibrary Loan, which allows students to send their request to the librarian. The latter will then request the article from another educational institution.

If students have questions about their homework or about using these resources, there is a 24/7 online chat reference service that is staffed by knowledgeable librarians. Students also have access to Grammarly, an automated grammar and plagiarism checker that can proofread assignments and give advice on revisions, and Turnitin, a service that checks for plagiarism.

Stanbridge Online Learner
The Online Learner is accessed via Student Central and provides self-paced modules of instruction in Microsoft topics, such as Office applications (available to all students), IT related courses and collections for study of Microsoft IT courses.

STUDENT HOUSING

Stanbridge University does not offer student housing services and assumes no responsibility to find or assist a student in finding housing. The University does not have dormitory facilities under its control. Local accommodation information can be at rentals.com.

CAREER SERVICES

The benefits of being a Stanbridge University graduate do not end after you start your first job. Our placement services are available to you at any time following your graduation. Stanbridge University takes a personal interest in mentoring and encouraging our graduates to meet their career goals. We are committed to the success of our graduates and offer a comprehensive four-step career placement process.

Career Placement Orientation
During a classroom presentation or personal consultation, our Career Placement Assistance staff will orient the graduate to the placement services program.

Resume Preparation
Our in-house experts will help guide our job-ready applicants in writing a powerful and creative resume that will help them stand out from the competition.

Mock Interview Sessions
We will take graduates through personality mapping, salary negotiations, role-playing and other specialized interview techniques that will help them to take control of the interview.
Exclusive Access to Placement Online for Job leads
Stanbridge University maintains an exclusive job placement web site for our graduates. By using an assigned user ID and password, our graduates can access targeted job openings in Southern California that are updated daily. Additionally, graduates and alumni can access a database of Southern California recruiting organizations, companies, and upcoming job fairs.

PARKING SERVICES

Vehicles on Campus
Student parking permits are provided to every student during Student Orientation. A student has full responsibility for the security of his/her vehicle and its contents. As outlined in the student code of conduct, a student will be held responsible for any prohibited items that are kept in his/her car and will be subject to disciplinary action as well as criminal prosecution.

Student Parking Rules

- The first parking permit is issued at no cost to the student. If lost or destroyed, the student can request a replacement permit from the receptionist in the front lobby for $5.00. If additional permits are needed, the third and subsequent permits will cost $25 each.
- The parking permit must be displayed by affixing it in the lower left- or right-hand corner of the back window when parked at Stanbridge. The permit numbers must be clearly visible.
- If windows have a heavy tint, then parking permits may be affixed in the lower left- or right-hand corner of the windshield. The permit numbers must be clearly visible.
- If your program has alternate parking assignments, then the appropriate additional parking permit must be displayed as directed.
- Street parking is available along Business Center Drive. Be aware of red curbs and any "no parking" signs.
- Please refer to the map of Stanbridge parking lots with student-designated spaces on Student Central. Students may only park in these designated areas.
- Do not park in the spaces reserved for guests (3-hour parking). These spaces require a special permit obtained from the receptionist at the front lobby.
- If there is no available student parking, there is additional parking at Stanbridge’s shuttle lot located at 18842 Teller Ave. in the Saddleback Church parking lot.
- A map to the shuttle lot along with the shuttle lot schedule is available through Student Central or you may ask the receptionist at the front lobby for the next available pickup.
- Parking permits may not be shared or exchanged for another student to use.
- Vehicles parked in undesignated areas or in surrounding lots are subject to be towed from the premises at students’ expense.
- Do not take up more than one parking space or straddle over the painted lines.
- After 5pm on weekdays and any time on weekends, students may park in any designated Stanbridge parking space that may be available.
- Any vehicle damage should be reported to the local police department by calling the non-emergency line (949-724-7000) or 911 if it is an emergency. Stanbridge will not investigate these claims nor release any video footage of the parking lots.

Parking Enforcement

- The parking lots are patrolled daily and if a student is found to be parking in an undesignated space, the student may be pulled out of class to move their vehicle. This may result in missed instructional time that may have to be remediated and the student will receive a Notice of Deficiency (NoD) as outlined in the student Code of Conduct.

Towing of Vehicles

- Parking in spaces for people with disabilities, in fire lanes, and in "no parking" areas may result in immediate towing.
- Building management reserves the right to tow any vehicle in violation of the parking rules.
- Vehicles are towed by private tow services, and all associated towing and storage fees are the responsibility of the owner/operator of the vehicle.
- In the event your car is in violation of the parking rules and is towed, you can retrieve your car from MetroPro Road Services by calling their dispatch office at 714-556-7600 or visiting www.metro-pro.com.

All instructors teaching technical and occupationally related courses in non-degree programs have a minimum of three years of related practical work experience in the subject area(s) taught.
BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY

1888 Clock Hours/180 Quarter Credit Hours (The approximate time to complete the program will vary according to the start and end dates of a cohort and ranges from 48 – 50 months, including school and national holidays, a one week break at Thanksgiving and a two week break in December.)

Employment/Job Title: Network and Computer Systems Administrator
Employment/Job Title: IT Manager
Employment/Job Title: Computer Systems Analyst

The Bachelor of Science Information Technology (BSIT) program supports industry-required skills for Personal Computer technicians to Wide-Area Network Engineers, as illustrated by the sample job titles listed above, responsible for such tasks as installation, configuration, and support an organization's local area network (LAN), wide area network (WAN), and Internet system or a segment of a network system. Graduates with a Bachelor of Science in Information Technology degree and appropriate work experience may advance to a position as an information technology manager or to a network designer or architect role.

Upon completion of the following requirements, Stanbridge University will confer the Bachelor of Science in Information Technology degree:

- Quarter Hours of Credit: minimum 180 quarter hours of credit,
- Scholarship requirements: a final GPA of 2.0 for all units attempted at Stanbridge University is required to graduate.

ASSOCIATE OF OCCUPATIONAL SCIENCE IN OCCUPATIONAL THERAPY ASSISTANT

2090 Clock Hours/108 Quarter Credit Hours (The approximate time to complete the program will vary according to the start and end dates of a cohort and ranges from 23 – 24 months for full time and 29 – 30 months for part time, including school and national holidays, breaks between terms, a one week break at Thanksgiving and a two week break in December.)

Employment/Job Title: Occupational Therapy Assistant
Certified/Licensed Occupational Therapy Assistants may seek employment as members of the rehabilitation team under the supervision of a Registered Occupational Therapist in Hospitals, Skilled Nursing Facilities, Outpatient Facilities, Schools, Mental Health Facilities, and Community-based Programs and as an Activity Director (independent of supervision by a Registered Occupational Therapist) in Adult Day Care Programs, Assisted Living Facilities, and Skilled Nursing Facilities. Upon completion of the following requirements, Stanbridge University will confer the Associate of Occupational Science in Occupational Therapy Assistant degree:

- Quarter Hours of Credit: minimum 108 quarter hours of credit.
- Scholarship requirements: a final GPA of 2.0 for all units attempted at Stanbridge University is required to graduate.

Upon satisfactory completion of the program, Stanbridge University will confer the Associate of Occupational Science in Occupational Therapy Assistant degree on the graduates. Following graduation from the program, students must pass the National Board for the Certification of Occupational Therapy (NBCOT) examination and apply to the appropriate State Regulatory Board for the State(s) they plan to work in to receive a license and thus become eligible for employment as a Certified Occupational Therapy Assistant, Licensed (COTA/L).

### CATALOG SUPPLEMENT FOR OTA STUDENTS

#### ADDITIONAL INFORMATION FOR OT PROGRAM STUDENTS

#### REQUIREMENTS FOR CLINICAL EDUCATION

**Medical Exam**

Prior to any activities at clinical facilities, students must undergo a physical examination, PPD skin test (and/or chest X-ray if PPD is positive). Failure to provide timely documentation of these medical requirements may result in the student missing a fieldwork course, and this may result in dismissal from the program. Students who do not complete these medical requirements will not be provided with special clinical sites that do not require the missing items. Only students who are unable to take particular vaccinations due to healthcare restrictions, and who provide appropriate documentation from their physician, are eligible for special accommodations regarding clinical site placement. These vaccinations are paid for as part of the OT equipment and supplies cost and must be completed with that of the other students in the cohort (with the exception of a chest X-ray). A three-injection series Hepatitis B vaccination is also provided to all students and is strongly recommended but not required by Stanbridge University. Students absent from on-campus health clinics are required to complete and provide proof of the aforementioned information within two weeks. Any absences accrued due to missing health records may be unexcused. Also, any student who fails to submit the required health records by the due date will receive a Notice of Deficiency from the administration. If a student has documentation of previous Hepatitis B vaccination (as proven by titer or documentation of administration of the vaccine series), he/she will not have to undergo a second vaccination. The annual influenza vaccination is not required by Stanbridge University but is highly recommended and may be required by fieldwork sites.

**BLS Certification**

Completion of a course in Basic Life Support for Healthcare Workers is required prior to clinical education in a clinical facility and is included in the Stanbridge University OTA curriculum. Students absent from the BLS class must obtain certification at their own expense before attending a clinical facility. Only the American Heart Association BLS Certification will be accepted.

#### MAINTAINING REQUIREMENTS FOR CLINICAL EDUCATION

All OTA students are responsible for maintaining the accuracy of the foregoing student health information. This includes, but is not limited to, PPD, chest X-ray, (if PPD is positive), Hepatitis B series, physical and the American Heart Association BLS. It is mandatory for each student to keep these health records current at all times. No student is allowed to attend Fieldwork with expired health information. It is the responsibility of the student to bring documentation of new health records prior to their expiration; this includes, but is not limited to, PPD tests and the American Heart Association BLS. Student Services provides optional health center referrals upon request for any student needing to update their health records. Students are responsible to pay for any necessary renewals of health records. Any student with expired health information will not be allowed to attend Fieldwork without updating the expired information. Any absences accrued due to expired health records may not have remediation limits waived. Failure to provide any of these health records in a timely manner may result in the student missing a fieldwork course and may result in dismissal from the program. Also, any student who accrues absences due to expired health records may receive a Notice of Deficiency.
**STUDENT RESPONSIBILITIES AT FIELDWORK FACILITIES**

Students are responsible for the following while at clinical facilities:

- Protecting, first and foremost, the health and safety of patients at facilities where they perform their fieldwork.
- Honoring the preservation of patient privacy by scrupulously observing confidentiality of patient information. Violation of patient confidentiality may lead to dismissal of the student from the program.
- Seeking the guidance of a Stanbridge University Fieldwork Coordinator or faculty member when unsure of what to do.
- Arranging for transportation to and from school, fieldwork facilities and other designated locations for instruction in the OTA program. (Note: Some periods of fieldwork facility education may not match other schedules (for days of the week or hours of clinical education) due to facility-driven scheduling). Students are responsible for arranging their personal schedules to meet prearranged facility schedules.
- Making the didactic and clinical schedule in the OTA Program the top priority in their personal schedule.
- Abiding by the rules and regulations of the clinical facilities during clinical rotations.
- Notifying the fieldwork site and the school’s fieldwork coordinator of any absences from a fieldwork placement. Failure to notify the site and the fieldwork coordinator will result in disciplinary action up to and including dismissal from the program.

**STUDENT ACKNOWLEDGEMENT OF RISK AT FIELDWORK FACILITY ROTATIONS**

Occupational Therapy Assistant students will be required to sign, as a condition of their presence in clinical facilities for clinical education, the following acknowledgement:

I understand that due to my fieldwork rotations at various facility settings, I will be exposed to potentially infectious materials and diseases. I agree to follow all fieldwork facility protocols regarding patient safety, personal safety, and all other protocols I have been taught at school during clinical facility orientations and during my clinical rotations.

I hereby confirm that I will seek the direction of my instructor or a facility mentor should I be unclear as to how to proceed with patient treatment or any other procedure, protocol or process at the clinical facility.

I hereby indemnify and hold harmless Stanbridge University, its employees, agents, owners and partnering clinical facilities from any liability pertaining to any infectious disease, illness, or injury I may acquire or get as a result of my participation in my fieldwork rotations, including any infectious disease, illness, or injury I may acquire as a result of my participation in a potentially dangerous clinical rotation such as at a Mental Health Unit/Ward/Facility.

**UNIFORM POLICY FOR OTA STUDENTS**

**General**

- The Student ID must be worn at chest level and be conspicuous at all times.
- Polos must bear the Stanbridge University logo on the left breast of the shirt.
- Polos must be clean and unwrinkled.
- Undershirts worn underneath the polo uniform top may be short sleeve or long sleeve but must be white, grey, or black if visible and V-neck style. No other undergarments may be visible.

**Shoes and Stockings**

- Shoes must have a rubber/non-conductive sole. No high heels.
- Shoes must be closed toe and must be clean at all times.
- Plain, non-flashy sneakers are acceptable in solid, non-bright or non-fluorescent colors.

**Jewelry, Hair, and Nails**

- For women: The only visible, pierced jewelry that is acceptable is a small, single, stud earring. Hoops, rings, or dangling earrings are not allowed. Jewelry on the tongue, eyebrows, nose, or lips is not allowed.
- For men: Visible pierced jewelry is not allowed. Facial hair must be neatly trimmed to a maximum length of ½ inch to permit proper fit of personal protective equipment (as recommended by the Center for Disease Control), and not be of a faddish or unusual appearance.
• Only a plain wedding band is acceptable.
• Hair must be pulled back out of the face and off the shoulders. Hair color must be of a natural color; faddish or unnatural colors or styles are not permitted.
• Hair accessories must be plain.
• Nails must be trimmed and kept clean at all times. Nail length must be kept at a maximum of 2 mm overhang. Artificial nails are not allowed.

Tattoos
• Tattoos and piercing are discouraged while in school due to increased chance of infection and the ability to comply with Stanbridge and hospital policy.
• Tattoos cannot be visible. White, grey, or black long-sleeved shirts or “sleeves” must be worn with scrubs to cover the tattoos.
(Note: Fieldwork facilities may have uniform regulations in addition to the requirements listed above. Students must comply with any additional uniform requirements at the fieldwork facilities in the program.)

Students not in compliance with the uniform standards policy will be issued a Notice of Deficiency.

Additional Requirements Requested by Sites
A fieldwork site may have additional requirements for students to meet in order for the students to attend the site for fieldwork. It is the responsibility of students to meet these additional requirements. These additional requirements include, but are not limited to, proof of:

• DMV driving record
• Double TB test within a specific timeframe
• MMR Vaccination and/or proof of immunity (titer)
• Drug testing
• Flu shot
• Health insurance
• Live Scan or other additional background checks
• Updated Physical Examination
• Varicella (chicken pox) Vaccination or proof of immunity

It is the student's personal and financial responsibility to complete these additional requirements and, depending on the site, to allow 4-6 weeks for the processing of results prior to the start of any fieldwork at the site. If a student is having difficulty completing the additional requirements, the student must immediately inform his or her fieldwork coordinator.

If one or more of your assigned fieldwork sites have any of these additional requirements, and you are not able to complete the additional requirements, it could impact your ability to attend fieldwork and keep you from progressing in the program. It is the student's responsibility to prepare ahead of time for the cost of any of these additional requirements.
MASTER OF SCIENCE IN OCCUPATIONAL THERAPY

2120.5 Clock Hours/119.5 Quarter Credit Hours (The approximate time to complete the program will vary according to the start and end dates of a cohort and ranges from 26 – 28 months, including school and national holidays, breaks between terms, a one week break at Thanksgiving and a two week break in December.)

Employment/Job Title: Registered Occupational Therapist.

The Registered Occupational Therapist works in a variety of settings, including hospitals, out-patient clinics (adult and pediatric), skilled nursing facilities, schools, mental health programs, and community-based programs. The Occupational Therapist will plan, organize, and conduct occupational therapy programs in hospital, institutional, or community settings to help rehabilitate those impaired because of illness, injury or psychological or developmental problems. As part of their responsibilities, occupational therapists test and evaluate patients’ physical and mental abilities and analyze medical data to determine realistic rehabilitation goals for patients; select activities that will help individuals learn work and life-management skills within the limits of their mental and physical capabilities; evaluate patients’ progress and prepare reports that detail progress; complete and maintain necessary records; train caregivers how to provide for the needs of a patient during and after therapy; recommend changes in patients’ work or living environments, consistent with their needs and capabilities; develop and participate in health promotion programs, group activities, or discussions to promote client health, facilitate social adjustment, alleviate stress, and prevent physical or mental disability; consult with the rehabilitation team to select activity programs and coordinate occupational therapy with other therapeutic activities; and plan and implement programs and social activities to help patients learn work and school skills and adjust to handicaps.

Scholarship requirements: Master’s degree students must achieve a cumulative GPA of 3.0 in order to graduate. Only those graduate level courses in which a student earns the equivalent of a 2.0 or better may be applied toward the total number of credits required for graduation. In addition, students in the Master of Science in Occupational Therapy program must achieve a passing grade in all fieldwork experiences.

Upon satisfactory completion of the program, Stanbridge University will confer the Master of Science in Occupational Therapy degree on graduates.

Upon completion of the program graduates will be eligible to apply to the National Board for Certification in Occupational Therapy (NBCOT) in order to take the national certification examination. After passing the national certification examination, graduates will be able to apply for a state license and then seek employment as a Registered Occupational Therapist.

### Faculty-Student Ratios
For the Master of Science in Occupational Therapy program, the faculty-student ratio for laboratory courses is 1-16 and the faculty-student ratio in lecture courses is 1-32.

## CATALOG SUPPLEMENT FOR MSOT STUDENTS

### ADDITIONAL INFORMATION FOR MSOT PROGRAM STUDENTS

### MISSION STATEMENT OF MASTER OF SCIENCE IN OCCUPATIONAL THERAPY PROGRAM
The mission of the Master of Science in Occupational Therapy program is to support the mission of Stanbridge University and to provide a transformative learning experience where deep learning empowers students to become engaged, innovative, and ethical practitioners with the capacity to build an occupational therapy career based on excellence. The balanced curriculum is founded on the ideals of occupational justice, occupational deprivation, and occupational engagement and recognizes the importance of a sound knowledge base, caring attitude, and the practical skills needed to serve a complex, diverse, and changing society. Through allocation of high quality resources, the overarching goal of the program is to produce graduates confident in the use of occupation to increase participation in meaningful activities. Students also recognize the importance of psychosocial aspects of care and psychological support with strong clinical reasoning skills. This is accomplished by combining rich, interprofessional connections on campus and in the community with academic rigor so that our graduates are highly valued and recognized by the profession and society.

### THE PHILOSOPHICAL BASE OF OCCUPATIONAL THERAPY
Man is an active being whose development is influenced by the use of purposeful activity. Using their capacity for intrinsic motivation, human beings are able to influence their physical and mental health and their social and physical environment through purposeful activity. Human life includes a process of continuous adaptation. Adaptation is a change in function that promotes survival and self-actualization. Biological, psychological, and environmental factors may interrupt the adaptation process at any time throughout the life cycle. Dysfunction may occur when adaptation is impaired. Purposeful activity facilitates the adaptive process.

Occupational therapy is based on the belief that purposeful activity (occupation), including its interpersonal and environmental components, may be used to prevent and mediate dysfunction, and to elicit maximum adaptation. Activity as used by the Occupational Therapist includes both an intrinsic and a therapeutic purpose.
PROGRAM CURRICULAR FRAMEWORK
The curriculum framework of the MSOT program is student-centered and prepares students to use meaningful occupation with individuals, communities, and organizations to promote occupational justice, occupational enrichment, and participation. The MSOT program prepares students for employment as a generalist qualified to work in physical rehabilitation, geriatrics, pediatrics, or mental health settings. These educational goals are accomplished through the use of a graduate curriculum framework blending the best of both the traditional and narrative models of curriculum design. See Figure 1 for the student’s experience in the MSOT program.

Figure 1. Student Experience, Stanbridge MSOT

PROGRAM GOALS
Upon graduation from Stanbridge University, the occupational therapy master’s student will:

- Have been one of a highly qualified cohort of students who possess excellent clinical reasoning based on their commitment to transformative and lifelong learning.
- Possess knowledge of the history and philosophy of occupational therapy and occupational science and the role occupation plays across the lifespan in supporting health and participation in life.
- Demonstrate the integration of basic social and biological sciences, therapeutic use of self, psychosocial aspects of care, theoretical approaches, OT frames of reference, assessment, intervention, and health care ethics.
- Design and deliver skilled, evidence and theoretically based assessments and interventions after gathering information regarding factors that influence occupational performance.
- Value health care delivery that addresses occupational injustice and diversity components of ethnicity, gender, sexual orientation, socio-economic status, and age as they impact engagement in meaningful occupations.
- Be proficient in written and oral health care communication.
- Use the listening skills needed to provide psychological support to clients regardless of practice setting.
- Use advanced technology to deliver safe, efficient, and effective health care.
- Demonstrate the ability to understand, evaluate, and apply research and other sources of information to sustain and develop the knowledge base of occupational therapy and to inform best practices.
- Be prepared to pass the NBCOT exam and become an employable generalist who can practice in areas related to children and adolescents, productive aging, mental health, work and industry, and rehabilitation, disability, and participation.
- Model exemplary professional and ethical behavior through engagement in interdisciplinary and community relationships, fieldwork, advocacy, and professional organizations.
**PROGRAM THREADS**
The following threads are elements of occupational therapy practice valued by the program and aligned with the mission and philosophy of the program. They are introduced in the first two terms of the curriculum and emphasized in increasing complexity as students move through the curriculum.

<table>
<thead>
<tr>
<th>THREAD</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Psychosocial Aspects of Care &amp; Psychological Support</td>
<td>Addressed in all practice areas: mental health, adult physical disabilities, and pediatrics.</td>
</tr>
<tr>
<td>Ethics</td>
<td>Addressed by using the AOTA Code of Ethics: use of case studies and discussions of occupational justice, deprivation, and engagement.</td>
</tr>
<tr>
<td>Occupation-Based Focus</td>
<td>Addressed by using the Occupational Therapy Practice Framework: Domain and Process as a guide to practice intentional delivery of the occupation-based message by all faculty to students in all relevant lecture and labs.</td>
</tr>
<tr>
<td>Healthcare Communication</td>
<td>Addressed by development of listening skills, dyadic communication, group communication, documentation, community program development, and research.</td>
</tr>
<tr>
<td>Evidenced-Based Clinical Reasoning</td>
<td>Addressed by use of case studies, technology and interdisciplinary learning opportunities.</td>
</tr>
<tr>
<td>Diversity</td>
<td>Addressed by reviewing content in all courses for issues involving ethnicity, gender, sexual orientation, socio-economic status, and age relative to engagement in meaningful occupations and checking for any bias or stereotyping within content.</td>
</tr>
<tr>
<td>Technology</td>
<td>Addressed by teaching students about high and low technology for clinical use and practice with technology in labs, academic components include use of netbooks, PowerPoint and online test taking.</td>
</tr>
<tr>
<td>Transformative and Lifelong Learning</td>
<td>Addressed by using engaged learning, experiential learning, practical learning, service learning, fieldwork learning, and professional organization involvement.</td>
</tr>
<tr>
<td>Employability</td>
<td>Addressed by emphasizing professional behavior, writing skills, job-related therapy skills, and use of skills check-outs, professional behavior evaluations, and leadership opportunities.</td>
</tr>
</tbody>
</table>

**STUDENT PROFESSIONAL IMAGE POLICY**
The MSOT program is a professional program and wishes to maintain an atmosphere where learning, scholarship, and community service can occur. Students in the program are expected to be well groomed and appropriately attired at all times during lectures, labs, and all other school-related activities. Students who violate the dress code will be advised to alter their appearance for reasons of safety, health, or modesty.

**Theory Courses**
- The Student ID must be worn at chest level and be conspicuous at all times.
- Undergarments may not be visible.
- Business casual is best and full coverage of cleavage and buttocks is mandatory.
- Clothing must provide appropriate coverage of the body.

**Fieldwork and Lab Courses**
For safety and decorum reasons students must follow the recommendations below while on fieldwork:

**Shoes and Stockings**
- Shoes must have a rubber/non-conductive sole. No high heels.
- Shoes must be closed toe and must be clean at all times.

**Jewelry, Hair, and Nails**
- For women: The only visible, pierced jewelry that is acceptable is a small, single, stud earring. Hoops, large rings, or dangling earrings are not allowed. Jewelry on the tongue, eyebrows, nose, or lips is not allowed.
- For men: Visible pierced jewelry is not allowed. Facial hair must be neatly trimmed to a maximum length of ½ inch to permit proper fit of personal protective equipment (as recommended by the Center for Disease Control), and not be of a faddish or unusual appearance.
- Only a plain wedding band is acceptable.
- Hair must be pulled back out of the face and off the shoulders. Hair color must be of a natural color; faddish or unnatural colors or styles are not permitted.
- Nails must be trimmed and kept clean at all times. Nail length must be kept at a maximum of 2 mm overhang. Artificial nails are not allowed.

**Tattoos**
- Tattoos and piercing are discouraged while in school due to increased chance of infection and the ability to comply with Stanbridge and hospital policy. Tattoos cannot be visible. White, long sleeved shirts or “sleeves” must be worn with scrubs to cover the tattoos.

**GRADUATE WRITING STANDARDS**
Graduate level writing is expected of all students in the Occupational Therapy program. This includes correct grammar, spelling, punctuation, sentence structure, and use of APA style. The Learning Resource Center and the Student Services department offers a variety of resources and assistance to students for improving their writing skills.

**OT CODE OF ETHICS**
In addition to the Student Code of Conduct Policy, students are to abide by the Occupational Therapy Code of Ethics and Ethics Standards (2010), which can be obtained on www.AOTA.org under “Practice / Ethics.” As described by AOTA, “The American Occupational Therapy Association (AOTA) Occupational Therapy Code of Ethics and Ethics Standards (2013) is a public statement of principles that are used by both educators and practitioners to promote and maintain high standards of conduct within the profession. The Occupational Therapy Code of Ethics and Ethics Standards is driven by 7 principles and Stanbridge University has adopted these principles for all instructors of the Occupational Therapy program. Quoting from the Occupational Therapy Code of Ethics and Ethics, these principles are the following:

**BENEFICENCE**
Occupational therapy personnel shall demonstrate a concern for the well-being and safety of the recipients of their services.

**NONMALEFICENCE**
Occupational therapy personnel shall intentionally refrain from actions that cause harm.

**AUTONOMY AND CONFIDENTIALITY**
Occupational therapy personnel shall respect the right of the individual to self-determination.

**SOCIAL JUSTICE**
Occupational therapy personnel shall provide services in a fair and equitable manner.

**PROCEDURAL JUSTICE**
Occupational therapy personnel shall comply with institutional rules, local, state, federal, and international laws and AOTA documents applicable to the profession of occupational therapy.

**VERACITY**
Occupational therapy personnel shall provide comprehensive, accurate, and objective information when representing the profession.

**FIDELITY**
Occupational therapy personnel shall treat colleagues and other professionals with respect, fairness, discretion, and integrity.

**EMAIL ETIQUETTE**
Please follow email etiquette at all times when communicating with faculty or peers because these messages reflect on our program. Use your subject line for ease of sorting emails. Do not have extended conversations over email, and beware that “voice tone” is absent and your meaning may not be communicated accurately. Be simple and direct, and avoid all capitalizations unless you feel you need them for emphasis. Email should never be substituted for directly contacting someone if there is a crucial conversation that needs to occur. Remember, our time is valuable so do not send chain letters or jokes. Please use a signature that includes your contact information. Most of all, remember that email is not private and can be retrieved and used in a court of law. Do not say anything in an email that you do not want others to see.

**PROFESSIONAL MEMBERSHIPS**
All Stanbridge occupational therapy students are required to join the American Occupational Therapy Association (AOTA), and the Occupational Therapy Association of California (OTAC). Membership in national and state professional associations will be an important part of the two leadership courses in the curriculum. Membership in these organizations has many benefits for the student. Both AOTA and OTAC
have a wealth of professional information on their websites that can be used to deepen knowledge in specific areas of occupational therapy. Other benefits include student scholarships, conferences, and access to peer-reviewed publications. Proof of membership in AOTA and OTAC is required by the third week of OT 5010 Foundations of Occupational Therapy course and must be maintained annually.

Most importantly, AOTA and OTAC advocate for the profession at the national and state level. On-line applications are available at the sites below.

American Occupational Therapy Association  
Suite 200  
Bethesda, MD 20814-3449  
(301) 652-2682

Occupational Therapy Association of California  
1401 El Camino Avenue, Suite 230  
Sacramento, CA 95815  
(916) 567-7000  
www.otaconline.org

STUDENT FOCUS GROUPS
A student focus group will be held annually to gather information from students who have completed their Level II fieldwork. The focus group will report on strengths and challenges in the curriculum. Focus groups will be held on campus and are open to the entire cohort. One faculty facilitator will also be present.

The Stanbridge Student Occupational Therapy Association (SSOTA)
The Stanbridge Student Occupational Therapy Association (SSOTA) is a student group at Stanbridge University. All students are encouraged to participate in SSOTA to learn how to advocate for the professional of Occupational Therapy, develop leadership skills and serve the community. The MSOT program stresses leadership and occupational justice. The specific goals of SSOTA are the following:
- Encourage collegiality and a sense of community among occupational therapy students.
- Promote awareness of occupational therapy on campus and in the community.
- Support professional development and leadership in occupational therapy students.
- Promote occupational justice in the community.
- Advocate for the profession of occupational therapy.
- Raise funds to use for special events or causes important to SSOTA.

NATIONAL BOARD FOR THE CERTIFICATION IN OCCUPATIONAL THERAPY
Each student who graduates from the Stanbridge University MSOT program is required to take the national certification examination given by the National Board for the Certification in Occupational Therapy (NBCOT). Students will find information about this examination at http://www.nbcot.org. Students must pass the NBCOT exam before they are eligible to be licensed in the state in which they wish to practice. The MSOT program is committed to a 100% pass rate on the examination by our students. To this end we use exams modeled after the NBCOT exam in our courses, demand a 75% average on all examinations in each course, and provide review tests throughout the curriculum. In addition, each student will take a mock NBCOT exam in the OT 5200 Professional Development Seminar.

It is each student’s responsibility to contact NBCOT upon completion of their Level II fieldwork and establish eligibility for and apply to take the NBCOT examination. There are several companies who publish review books for the NBCOT examination, and students are encouraged to purchase and study a review book prior to taking the examination. Students who do not pass the examination on the first attempt should consult with their academic advisor to set up a remediation plan.

NBCOT Exam FAQs will link you to FAQ’s about the NBCOT examination. You may take the exam as many times as you like, though there is a 30-day waiting period between examinations.

STUDENT EVALUATION OF PROGRAM, COURSES & FACULTY
Each term, students will be asked to complete an electronic survey on each course in the term. This allows students to provide the program with feedback on teaching methods, assignments, and testing. An area for comments will also be provided.
MSOT NOTICE OF DEFICIENCY POLICY
A Notice of Deficiency may be issued to an MSOT student who exhibits poor academic performance, academic dishonesty, a failure to meet clinical or skills lab objectives or inappropriate behavior on campus or in the classroom. An accumulation of Notices of Deficiency may result in a negative professional behavior evaluation or dismissal from the University. All Notices of Deficiency forms will be part of the student’s permanent academic file.

MSOT PROFESSIONAL BEHAVIOR EVALUATION POLICY
The MSOT program faculty are responsible for training students to become professionals in the health care field who are entrusted with the care of people whose mental or physical health may be compromised. As such, it is incumbent upon the faculty to assess students’ fitness for the profession through an evaluation of the degree to which students meet professional behavior standards. Professional behavior includes demonstrating a commitment to learning, appropriate interpersonal verbal and non-verbal skills, graduate level written communication, problem solving skills, critical thinking skills, and acceptance of responsibility. In addition, academic honesty, emotional maturity, reliability, and motivation are aspects of professional behavior. A certain level of professional behavior is expected as a part of the admission requirements to the MSOT program, but professional behavior is continually refined during the didactic phase of the program so that once a Stanbridge University student enters Fieldwork Level I and II, the student’s professional behavior is commensurate with the expectations of professional clinicians in the field of Occupational Therapy.

Each student in the MSOT program will receive a Professional Behavior Evaluation (PBE) by the end of each term in this format:

- Term 1: In-person meeting
- Term 2 & 3: Optional, either in-person or electronically depending on the situation of the student and preference of the academic advisor
- Term 4: In-person meeting
- Term 6: In-person meeting

The purpose of the PBE is to provide the student with feedback on his or her professional development to enhance positive scores during fieldwork and ultimately to improve employability. To obtain a satisfactory PBE, students must receive a rating of “in progress” or “satisfactory” on all items in the PBE, as well as a passing grade on the Term Exit Exam for that term. Items rated as “unsatisfactory” are expected to improve to “in progress” by the following term’s PBE. Items rated as “in progress” are expected to improve to “satisfactory” within 2 terms; except in Term 4 where all items in the PBE should be rated as “satisfactory”. Instructors have the right to issue a Notice of Deficiency (NOD) to any student who is not demonstrating professional behaviors at any point in the program. NODs will be factored into PBEs. Three unsatisfactory PBEs will result in dismissal from the MSOT program. Negative PBEs will not be expunged from a student’s record should that student be dismissed or withdraw from the program for other reasons, and later request reenrollment. Please note that other university policies may supersede this policy.

PROFESSIONAL LIABILITY INSURANCE
Students are covered by Stanbridge University for Professional Liability Insurance. The university will provide proof of this insurance to you before you begin your first fieldwork placements. Students are required to also carry individual health insurance.

HUMAN SUBJECT RESEARCH PROTOCOL
MSOT students engaged in human-subject research must identify a faculty advisor, complete an Institutional Review Board application, and have that application approved prior to starting the research.

COMMUNITY SERVICE REQUIREMENT
MSOT Students are required to participate in a community service activity during Terms 1, 3 and 5 for a minimum of 4 hours in each term.
ASSOCIATE OF SCIENCE IN PHYSICAL THERAPIST ASSISTANT

2338 Clock Hours/122 Quarter Credit Hours (The approximate time to complete the program will vary according to the start and end dates of a cohort and ranges from 23 – 24 months, including school and national holidays, breaks between terms, a one week break at Thanksgiving and a two week break in December.)

Employment/Job Title: Physical Therapist Assistant

Upon completion of the specified requirements, Stanbridge University will confer the Associate of Science in Physical Therapist Assistant degree.

Graduates with an Associate of Science in Physical Therapist Assistant degree from a CAPTE-accredited PTA program may apply to the Physical Therapy Board of California (PTBC) for permission to take the two examinations required for licensure, the National Physical Therapy Examination (NPTE) for Physical Therapist Assistants and the California Law Examination (CLE).

After passing these examinations and receiving a license from the PTBC, the student will be eligible to obtain employment as a licensed Physical Therapist Assistant.

CATALOG SUPPLEMENT FOR PTA STUDENTS

ADDITIONAL INFORMATION FOR PTA PROGRAM STUDENTS

Mission
The mission of the Physical Therapist Assistant Program is to provide a high-quality education that encompasses the theory, knowledge and clinical skills needed to produce caring, competent, and qualified entry-level physical therapist assistants.

Program Goals
1. The program will prepare graduates to serve as entry-level generalist physical therapy assistants who function effectively under the direction and supervision of a licensed physical therapist.

2. The program will offer a current, evidence-based, comprehensive curriculum that will prepare students to practice as licensed physical therapy assistants in a variety of care settings and communities.

3. The program will engage students in clinical education experiences that provide a variety of settings and locations where learners apply didactic knowledge and further develop clinical skills.

4. The program will prepare graduates to meet state licensure requirements and attain gainful employment.

Student Goals
1. Students will demonstrate proficiency in the standards of practice necessary to provide quality physical therapy services.

2. As advocates for the profession, students will demonstrate social responsibility in the community.

3. Students will provide physical therapy care in an ethical, compassionate, and effective manner.

Faculty goals
1. Faculty will maintain academic and clinical currency in the physical therapy field.

2. Faculty will provide supportive, active and stimulating learning environments.

3. Faculty will foster a learning environment of integrity, equity, and mutual respect.

Schedule
PTA students will be on campus a minimum of three days a week. Theory classes meet 8:00am – 2:30pm with a 30-minute lunch. Lab courses are held 8:00am – 4:30pm. Clinical Practicum and Clinical Affiliations are typically Monday through Friday, and typically from 8:00am – 5:00pm but this can vary by clinical site.
Clinical Education Definitions

Academic Coordinator of Clinical Education (ACCE): The program faculty responsible for planning, coordination, facilitation, administration, monitoring, and assessment of the clinical education component of the curriculum.

Student Coordinator of Clinical Education (SCCE): The individual employed by the clinical site who assigns, plans and coordinates internship assignments and monitors student on-site progress and who may mediate student and Clinical Instructor communication during the clinical internship. This is the clinical site’s primary contact for clinical education.

Clinical Instructor (CI): The physical therapist or physical therapist assistant employed by the clinical internship site that provides the clinical education component of the curriculum. CIs must have a minimum of 1 year of experience in the practice area of the student clinical education course, have active licensure as a physical therapist or physical therapist assistant, and have met clinical competency expectations of the clinical facility. Clinical Instructors with less than one year of clinical experience may serve as a CI for Practicum, which are 80 hours, under the close supervision of a CCCE who is an eligible CI.

STANDARDS OF PERFORMANCE AND PROFESSIONAL EXPECTATIONS

Minimum Required Skills of Physical Therapist Assistant Graduates at Entry-Level

The Stanbridge University PTA Program bases its program goals and student expected competencies on the American Physical Therapy Association’s (APTA) document, Minimum Required Skills of Physical Therapist Assistant Graduates at Entry-Level BOD G11-08-09-18 [Guideline][Document Updated: 12/14/2009]. This document can be accessed in Appendix A of this Handbook or online at:
http://www.apta.org/uploadedFiles/APTAorg/About_Us/Policies/BOD/Education/MinReqSkillsPTAGrad.pdf

Code of Ethics

Ethical behavior for physical therapist assistants is defined by the APTA. Students are accountable for ethical practice and behavior. The principles for ethical practice of physical therapy can be accessed in Appendix B of this Handbook or online at:
http://www.apta.org/uploadedFiles/APTAorg/Practice_and_Patient_Care/Ethics/GuideforConductofthePTA.pdf

Guidelines of Clinical Education

The ACCE is responsible for scheduling and assigning students to clinical education sites for both the Practicum and the Affiliations. Clinical assignments are based on multiple factors, including the availability of placements, and may involve out of town travel.

Students are given opportunities to share information with the ACCE and Assistant to the ACCE regarding their interests and preferences for locations and types of facilities for each level of clinical education. Beginning with new student orientation, students are encouraged to email the ACCE if they become interested in a particular facility. Students are given a form to fill out approximately six-to-nine months prior to their first clinical experience. Students rate their interests in particular settings for each clinical experience and can list specific clinical sites and cities where they are interested in going. The ACCE and Assistant to the ACCE work together to find sites that coincide with each student’s “wish list” for each of the clinical experiences. Any site that is obtained is then entered into the online EXXAT system. Approximately eight weeks prior to each clinical experience, the students rate their interest in the provided available sites, and the EXXAT system matches the student with the facility based on the ratings and geographical distance to the facility. After this time the ACCE and the Assistant to the ACCE review the matchings to ensure appropriateness of the selection. The ACCE reviews each student’s progress within the curriculum and may seek feedback from the Program Director and other faculty members as needed. Students are formally assigned by the ACCE to inpatient and outpatient settings in a manner that allows for the opportunity to complete one Practicum in an inpatient or outpatient setting, one Affiliation in an outpatient setting, and one Affiliation in an inpatient setting.

The program has contractual arrangements with numerous local and regional facilities and practices. Students are sent only to those facilities for which a contract exists. Student-accessible files containing detailed facility information are located in the department and managed by the ACCE. Students are encouraged to utilize this resource in developing their preferences and rationale for requesting
placement at a particular facility. Feedback from students who are currently in the program and who have already been assigned to facilities are a great source for informal assessment of the opportunities available. The ACCE can also provide valuable insight into the clinical sites a student may wish to consider.

Additional information regarding clinical education (i.e. syllabi, assignment sheets, problem-solving information, professionalism, etc.) is available in the clinical education materials provided to students before each specific clinical education course.

Clinical Education Within the Curriculum
The clinical education program is an essential part of the physical therapist assistant education program. Clinical education allows the student to practice and apply concepts and skills learned in the classroom and labs to the real-world setting, and it allows the student to expand his or her didactic knowledge, develop necessary communication and interpersonal skills, develop good work habits, develop clinical competencies and identify role models. Obtaining a variety of experiences fosters the development of a well-rounded, versatile physical therapist assistant and allows the student to assess future goals and needs. The clinical education program is designed to prepare the graduate for entry-level, generalist practice. While some clinical education sites may offer specialized experiences beyond entry-level, general practice that is representative geographically and through the lifespan is the priority in clinical education site assignments.

Schedule and Timelines
Clinical education is an essential part of the preparation of physical therapist assistants. The PTA curriculum includes 16 weeks of clinical education in a variety of practice settings. Clinical education coursework includes one four-week Clinical Practicum and two longer (six week) Clinical Affiliations.

**Term 4:**
Clinical Practicum I (four weeks): Offered mid-term

**Term 5:**
Clinical Affiliation I (six weeks): Offered at the beginning of the term
Clinical Affiliation II (six weeks): Offered mid-term

Site Requirements
Sites for clinical education experiences are available locally and regionally. There are also out-of-area locations that are currently available; however, students must remain in California for their clinical experiences. Clinical education site assignments are made commensurate to the content taught in the curriculum, on the basis of student’s educational needs, and on the availability of appropriate sites.

Development of contractual agreements with a variety of clinical sites is an ongoing process. The Program contracts with skilled nursing facilities; acute, subacute, and rehabilitation hospitals; ambulatory care centers; private practices; inpatient and outpatient pediatric facilities; occupational medicine centers; home health locations; and long-term acute care facilities; for example.

A primary goal of the clinical education curriculum is to build competency in generalist physical therapist assistant practice that is representative of practice geographically, across the lifespan, and across the continuum of care. To meet this goal, students are expected to complete one Practicum in either an outpatient or inpatient setting, one Affiliation in an outpatient setting, and one Affiliation in an inpatient setting. An inpatient setting is one in which the patient requires a stay in a facility to receive care. Examples of an inpatient setting include an acute care hospital or medical center, an inpatient rehabilitation facility, a skilled nursing facility, or a long-term acute care facility. Patients who can travel outside of their home to receive medical care at a clinic, center or office are considered outpatient settings. Examples of outpatient settings include pediatric clinics, orthopedic and/or sports medicine clinics, and occupational medicine clinics.

Formal Written Agreement
Before any students are assigned to a specific clinical education facility, a legal written agreement must be completed between the facility and Stanbridge University. Contracts with the PTA program are located in EXXAT, a clinical education management website that houses information related to active clinical sites. On the first of every month, an email is sent out to ACCE and Assistant to the ACCE, with notification of contracts expiring within the next 60 days. Stanbridge University contracts are effective for three years and have an automatic renewal unless otherwise indicated by one party with a written thirty-day notice of end of
Site Selection
The program makes every effort to select, develop and maintain quality clinical sites. Many of the clinical education sites are located throughout Southern California, primarily in Orange, Los Angeles, Riverside, and San Bernardino counties. Clinical sites are also available in San Diego county as well as in Central and Northern California.

Sites are selected based on the following criteria:
1. Clinical education experiences are planned to meet objectives of the program, Clinical Instructor, and individual student.
2. The site offers a stimulating environment appropriate to the learning needs of students, including an adequate number of qualified Clinical Instructors needed to meet student needs.
3. A willingness to offer clinical experiences on an ongoing routine basis.
4. Clinical site administrative support of clinical education is demonstrated.

The ACCE will consider developing additional sites at the request of students if the proposed site provides an exceptional learning experience, particularly in specialty practices. It is not the intention of the program to develop new clinical education contracts for the sole purpose of students travelling or staying near friends or family. However, every effort will be made to accommodate students who wish to have their clinical experiences out of the area.

Clinical sites may initiate contact with the ACCE to inquire about becoming a clinical education partner.

Students interested in a new site should notify the ACCE or Assistant to the ACCE. The ACCE or Assistant to the ACCE will initiate contact with the clinical site. If appropriate the ACCE may allow the student to contact the facility to gather information about the willingness to accept students from a new contract and to obtain contact information. Students then forward this information to the ACCE. At this point communication is assumed by the ACCE or Assistant to the ACCE, and the potential of formulating a long-term clinical education relationship is determined. A Clinical Experience Contract (unless use of a facility specific contract is requested) and a Clinical Education Reservation Form are sent electronically. The ACCE or Assistant to the ACCE schedules a site visit prior to a student being placed, where the Clinical Education Handbook and PTA curriculum are reviewed with the SCCE or facility designee. In some instances, the review of the clinical education program and curriculum may be done over the phone instead of in person. Electronic copies (or hard copies if requested) of the student professional liability waiver, the Clinical Education Handbook, and an overview of the PTA curriculum and clinical skills are provided once the contract is signed. Information related to the curriculum and clinical skills of the PTA students may be discussed verbally prior the signing of the contract.

Students assess their clinical site and Clinical Instructor during each clinical experience, which helps the ACCE determine if the site should be used for future students. This feedback is provided to the ACCE on the Student Evaluation of the Clinical Practicum Experience (Practicum I) and the Physical Therapist Assistant Student Evaluation: Clinical Experience and Clinical Instruction (Affiliation I and II). Students provide assessments related to their CI’s demonstration of clinical competence, professional conduct, effectiveness of instructional and supervisory skills, communication, interpersonal and performance evaluation skills. Information on the clinical site relating to client management and practice environment is gathered, including diversity of the patient mix, patient lifespan, continuum of care, and the components of care that the student participates in. Information is also provided to the ACCE during post-clinical meetings that occur following each clinical experience, through which the students share their experiences with the ACCE and fellow classmates.

Site Visits
Every effort is made to visit new clinical sites prior to a student being placed at a facility. Site visits prior to assigning a student help to determine demographics of the facility including patient population, pace of facility, other disciplines present, common interventions and diagnoses treated, and diversity of equipment and resources. Site visits also assist with development of a positive relationship with the clinical staff and are routinely performed in conjunction with student placement at the facility. The ACCE or other faculty visit each student and CI during both Affiliation I and Affiliation II. Phone consultations are scheduled with the student and clinical instructor when sites are outside of a 75-mile radius. Routinely used sites outside of a 75-mile radius may be visited approximately every two-to-three years or via other methods.
Dissemination of Student Information to Affiliating Clinics
All student background information and clinical course-specific information are provided to clinical sites four-to-six weeks prior to the clinical experience via EXXAT, the clinical education management website customized to Stanbridge University. An email is generated by the ACCE and sent to the facility’s SCCE that contains a link to EXXAT where the SCCE can access the student’s vaccination records, background check, student biography, etc. The email contains attachments where the SCCE can find the specific course syllabus, assignment sheet, list of clinical skills/expectations, etc. The Clinical Education Handbook containing clinical education policies is provided to each clinical site prior to the clinical experience, upon establishment of a contract. The handbook is also available to clinical sites electronically on EXXAT for easy reference. In order to ensure that the clinical information is disseminated to the CI from the SCCE, a separate email to the CIs containing the course specific information is sent two weeks later. CIs are encouraged to reach out to the SCCE to obtain the student-specific information as needed, if they have not already received the information from the SCCE. It is the student’s responsibility to review the course-specific information with the clinical instructor prior to the clinical experience or on the first day of the experience. Students are expected to contact the clinical site via telephone no later than two weeks prior to the start of the clinical experience, to ensure proper information transfer has occurred, to confirm their daily schedule, and to confirm the ACCE’s (or other faculty’s) clinical site visit appointment. The student then turns in a form containing this information to the ACCE.

Clinical Skills Competency Checklist
Refer to the PTA Clinical Education Handbook.

STUDENT RESPONSIBILITIES
Student Roles and Expectations
The student’s role and level of function is stated in the individual course syllabi. Students are expected to take responsibility for their own learning and demonstrate professionalism at all times. It is the student’s responsibility to inform the ACCE as soon as a problem related to clinical learning is identified. Students are required to abide by the requirements of the contract and follow the guidelines laid out in the Clinical Education Handbook, which include:
1. First and foremost, protecting the health and safety of patients at facilities where they perform their clinical education experiences.
2. Honoring the preservation of patient privacy by scrupulously observing confidentiality of patient information according to Health Insurance Portability and Accountability Act (HIPAA) guidelines. Violation of patient confidentiality may lead to dismissal of the student from the program.
3. Seeking the guidance of the program ACCE should the student have problems in the clinical setting which may include, but are not limited to, interpersonal issues with the clinical instructor that impair the ability of the student to gain clinical knowledge or working in a facility where California laws are not being followed or where the student may be in danger.
4. Arranging for transportation to and from school, clinical education facilities and other designated locations for instruction in the PTA program. The schedule at some clinical education facilities may not match other schedules (for days of the week or hours of clinical education) due to facility-driven scheduling. Students are responsible for arranging their personal schedules to meet prearranged facility schedules.
5. Making the didactic and clinical schedule in the PTA program the top priority in their personal schedule.
6. Abiding by the rules and regulations of the clinical education facilities during clinical experiences.
7. Contacting the site at least two weeks in advance to learn the specific requirements of the assigned site. Students are provided a checklist from the ACCE that lists topics to inquire about prior to each clinical experience.
8. Reviewing all necessary documents (i.e. course-specific information) with the assigned contact, either prior to arrival or upon arrival on the first day of the clinical education experience.
9. Assuming the cost associated with the clinical education experiences including travel, transportation, and housing.
10. Complying with the policies and procedures of the clinical site and the program.
11. Fulfilling all duties and assignments made by the clinical instructor and ACCE within the time limit specified.
12. Removing all patient identifiers for web-based posting of clinical education assignments on EXXAT and maintaining any discussions with in the educational context.
13. Providing honest and constructive feedback to the clinical site and ACCE.
15. Coordinating with the CI, SCCE, and ACCE to reschedule make up time for any absences.
16. Writing a letter of appreciation to the appropriate individuals (e.g. clinical instructor, department supervisor, clinical site administrator) for the educational opportunities provided.

PROGRAMS AND COURSES
Travel and Expense Expectations
Students must understand that additional responsibilities and obligations are required for clinical education. These responsibilities include provision of reliable transportation and living expenses (housing, meals, etc.). Students are responsible for their own transportation and living arrangements related to clinical education coursework, unless otherwise supported by the clinical facility. At no time will the student be considered an employee of the clinical facility.

Emergency Services
If a student is injured in off-campus educational experiences, the student—depending on the severity of injury and the clinical education setting—should access the facility’s emergency services. If those services are unavailable on-site, the student should request assistance to receive the necessary emergency services. The student will be responsible for the cost.

Objectives
Each clinical education course has course objectives that are part of the course syllabus. In conjunction with the clinical instructor, students are expected to create individualized learning objectives compatible with their learning needs and the experiences offered at the clinical site. The clinical site may also have specific objectives it has developed. In addition to the objectives developed by the University, students are expected to meet with their clinical instructors to develop additional objectives to meet the individual student’s learning needs.

RULES AND REGULATIONS
Dress Code
The student is required to adhere to the dress code of the facility. In making contact with the facility prior to the clinical education course, the student should ask about the requirements for attire. The student should at all times wear their student nametag visibly.

Attendance and Absences
As part of the professional education process for physical therapist assistant students, prompt, regular attendance is expected during clinical education. Students must arrive at the assigned clinical education site on time.

Students are strongly discouraged from absences during a clinical education course. The student must adhere to the clinic time schedule at all times. Absences must be arranged in advance with the clinical instructor of the clinical facility and the ACCE. For all absences from a clinical education course, including Practicum I, Affiliation I, and Affiliation II, the student and the clinical instructor, in coordination with the ACCE, will make arrangements for remediation on a day-for-day and hour-for-hour basis. Days or hours may be remediated either by the addition of days at the end of the clinical education experience (if available) or via extended day or weekend hours. The program’s policy allows for a maximum of two days of absences that can be remediated during the Practicum course and three days of absences that can be remediated during a single Clinical Affiliation course, with a maximum of five days of absences in total in Clinical Affiliation coursework. All hours and/or days that are missed must be remediated. It is at the discretion of the clinical site whether this is acceptable.

Remediation of all absences incurred during Practicum I must be remediated prior to the start of the next course. Remediation of all absences incurred during Clinical Affiliation I must be remediated prior to commencing Clinical Affiliation II. Remediation of all Clinical Affiliation II absences must be completed prior to the start of the Program Review course.

Unexcused absences occur when the student has either failed to notify the ACCE and clinical instructor of illness or failed to obtain permission from the ACCE and clinical instructor prior to the absence. Any unexcused absence must be reported to the ACCE by the SCCE/CI immediately. More than one unexcused absence during a term will result in a course failure and may result in a hearing before the academic faculty, at which time possible dismissal from the program may be considered.

In the event of an illness, the student must notify the CI and ACCE as soon as possible. If an illness or appointment, etc. necessitates time away from the clinical site, it is the responsibility of the student to notify the ACCE as to the nature of the absence. If a student is absent for more than two consecutive clinical days (Practicum I) or more than three consecutive clinical days (Affiliation I or II) due to illness, the student must provide a physician’s written approval for the student to return to his or her assigned duties at the clinical site. A copy must be furnished to the student’s clinical instructor and to the ACCE. In concert with the SCCE
and/or CI, it is at the discretion of the ACCE and Program Director as to how, or if, the missed time can and will be made up.

In the case of excessive absences (>2 days for Practicum 1, >3 days for Affiliations; see specific policy above), the clinical education experience may be ended, and the student may receive a course failure. The ACCE may modify the attendance policy at any time throughout the term if the students are notified in writing of the change.

If the student is unavoidably tardy, he/she should notify the clinical instructor and ACCE by telephone of the reason for the lateness. Even a tardy of a few minutes should be reported immediately. The SCCE or CI must report episodes of habitual tardiness to the ACCE for action by the academic faculty. Repeated tardiness (a maximum of two occurrences) will not be tolerated and may result in a hearing before the academic faculty and dismissal from the program.

Students not returning to classes after an absence of 14 days will be dismissed.

**Student Liability Insurance**
The university provides professional liability insurance (malpractice insurance) for all students during all levels of clinical education. Students are required to provide their own health insurance. The student should carry a copy with him/her to the clinical facility as the student may be requested to provide it to the facility for its records.

**Criminal Background Checks**
Criminal background checks are required by most facilities providing clinical education. Students are responsible for the fees incurred. Facilities may require criminal background checks of students in addition to the ones already completed during the program. The student has one background check done during the admissions process, and one done later in the program prior to clinical experiences. The student is responsible for notifying the ACCE if there is any newly reported criminal action(s) since the original admissions check.

**Physical Examination and Immunizations**
Students are first informed of the requirements for background checks, health screens, drug screens, health insurance, BLS certification, tuberculosis (TB) tests (PPD), and vaccinations during new student orientation. This orientation is followed up by an email that clearly defines the details and due dates for each of the stated requirements. Students are required to have a recent physical examination/health screen, and immunizations including measles, mumps, rubella (MMR); polio series; tetanus; diphtheria and pertussis (Tdap); and Hepatitis B. Students must also have evidence of varicella vaccination or proof of having had chicken pox.

Students are also required to have an annual, updated TB screening. A student who was immunized against TB or received treatment for TB and has a positive TB test needs to have a chest x-ray done at least every year to demonstrate that there is no evidence of active TB.

The university will provide student access to the PPD testing for TB on campus as well as the Hepatitis B vaccination series, MMR, Tdap, varicella, drug screening, and physical examination. The scheduling of this will be the responsibility of the University as part of the Enrollment Agreement. If the student is absent on the day that the PPD test is administered or read or the vaccinations are given; however, the student will be responsible for obtaining them on his or her own time and at his or her own expense. An individual who requires a chest x-ray to demonstrate that there is no evidence of active TB will be responsible to have this test completed at his or her own expense. Students are responsible for obtaining and paying for any additional immunizations and any updates of these requirements that may be necessary, should a clinical site require it.

Proof of the above is required by all clinical facilities and must be completed two months prior to the first clinical education experience (PTA 2010).

**CPR**
Students are required to attain and maintain a current BLS certification specifically for health care providers. A BLS for health care providers’ course will be made available for students per the Enrollment Agreement during Term 3. If the student fails to attend the course at the time that it is offered, the student will be responsible for completing the course on their own time and at their own expense. Other lay person training programs cannot substitute for this requirement. The student should carry a copy of the certification to the clinical facility because it may be requested by the facility for their records.
MAINTAINING REQUIREMENTS FOR CLINICAL EDUCATION

All PTA students are responsible for maintaining the accuracy of the above student health information. This includes, but is not limited to the PPD, chest X-ray (if PPD is positive), Hepatitis B vaccine series, a physical, health insurance, MMR, varicella vaccination, Tdap, and American Heart Association BLS/CPR certification. It is mandatory for each student to keep these records current at all times. No student is allowed to begin his/her clinical education with expired health information. It is the responsibility of the student to provide documentation of updated health records prior to his/her expiration. Student Services provides optional health center referrals upon request for any student needing to update his/her health records. Students are responsible to pay for any necessary renewals of health records. Any student with expired health information will not be allowed to begin the clinical education portion of the program without updating the expired information. Any absences accrued due to expired health records will be unexcused. Also, any student who accrues absences due to expired health records will receive a Notice of Deficiency for each absence. Individual facilities may require additional tests, titers, immunizations, or other information prior to the start of the clinical education course and the student is responsible for meeting these facility-specific guidelines and/or requirements as well as the costs incurred.

Drug Screening
Prior to Practicum I, all students are required to pass a drug screen at a location determined by the university, during a prescheduled week. A facility may require the student to pass an additional drug screening prior to or during the first week of a clinical education experience as a part of the facility’s procedures and requirements. Students are encouraged to ask about these tests and to obtain information in order to avoid ingesting anything that could cause a false positive result on a drug test. This screening is scheduled with the facility and will be done at the student’s expense.

Potential Health Risks
Clinical practice poses a potential for exposure to hazardous materials, infectious agents, and personal injury. Prior to beginning the clinical experience, the student must be trained in standards for preventing transmission of bloodborne and other infectious agents. The OSHA bloodborne pathogen requirement can be met if the student attended the infection control lectures in PTA 1001 Introduction to PTA and PTA 1007 PTA Practice I. The student must also successfully pass training in injury prevention and safe body mechanics. In addition, a student must complete any additional training required by the clinical site.

It is the student’s responsibility to seek all the information needed to comply with the clinical site’s policies including infection control, use/storage/labeling of hazardous materials, fire and emergency procedures, security, and incident reporting of personal or patient injury.

Exposure or Workplace Injury Plan
In the event of an exposure to an infectious agent or hazardous material or injury at the worksite, the student should seek treatment through the site’s employee health department. The student must follow site protocol for injury or exposure reporting and must promptly notify the SCCE, CI, and ACCE. The student is responsible for the costs incurred during the evaluation and treatment of injuries.

Patient Incident or Injury
Students are to immediately report to their clinical instructors all incidents or accidents involving patients or clients. The clinical instructor should report the occurrence as required by facility policy and procedures. It is the responsibility of the student and the Student Coordinator of Clinical Education to contact the ACCE to notify the latter of such incidents or accidents. Students are advised to speak to no one other than the SCCE or ACCE regarding any incident or accident in which the student was involved or that the student witnessed during the clinical experience. All matters regarding such occurrences are to be processed according to facility policy and procedures.

Statement on Disability
The Stanbridge University PTA Program does not discriminate against any student on the basis of disabling conditions. It is the student’s responsibility to self-identify and email ADA@stanbridge.edu if they feel special accommodations are warranted.

Patient Rights
The student is obligated to obtain informed consent. The student must disclose his or her status as a student and provide the patient with the name of the supervising therapist. A patient has the right to refuse treatment by the student without effects on services.
Institutional Property
All institutional/clinical site resources are considered proprietary. The student may not remove or copy resources or materials from the institution/clinical site without consent.

HIPAA Compliance
The student is required to complete training for awareness and compliance with the patient privacy regulations of the Health Insurance and Portability and Accountability Act during Term 1 of the program in PTA 1001, Introduction to PTA. The student is required to strictly adhere to HIPAA standards. The student must protect patient confidentiality and is not to discuss the patient or patient condition outside the clinical setting. Patients may be discussed with classmates and faculty for educational purposes only. All patient identifiers must be removed.

Professional Behavior
Any behavior exhibited by the student deemed inappropriate by the ACCE (course assignments and/or clinical setting), the CI, or the SCCE may result in failure of the clinical education course. Repeated or multiple issues with professionalism during a clinical experience may also result in failure.

Reporting Incidents
An incident out of the ordinary involving or witnessed by the student should be immediately reported to the CI and the appropriate facility incident report should be filled out. The ACCE should be contacted about the incident within 24 hours.

On-site Health Care or Emergency Services
There are no health care or emergency services located on campus.

Statement of Student Responsibility
It is the responsibility of each student enrolled in a clinical education course to monitor grades and progress. Clinical education courses are graded with a Pass/Fail grade and will not affect a student’s grade point average. Receiving a “Pass” grade in any clinical education course, however, is necessary to continue in the program. What constitutes a “Pass” differs with each clinical experience and is outlined in the respective syllabi related to each clinical course. Students may retake only one clinical education course a single time. If a student feels that he/she is not doing satisfactory work at mid-term, the student is responsible for making an appointment with the ACCE to design a plan for improvement. Unsatisfactory clinical coursework may interrupt the student’s ability to proceed within the curriculum or graduate. Depending on the individual circumstance, the student’s clinical experience may be extended, or the student may need to repeat the clinical experience.

Clinical Assignments
To assist students in planning, it is requested that each clinical site complete a Clinical Site Information Form (CSIF) (see Appendix D in the Clinical Education Handbook) that provides information pertinent to clinical education. Students may also use feedback from previous graduates to determine if a certain facility is deemed of enough interest to complete a clinical experience. Some facilities also have specific criteria or objectives for clinical education that may be useful in determining facility expectations. The ACCE will inform students where this information may be obtained during the clinical education orientations which are integrated throughout the Program.

The SCCE will be sent Clinical Education Reservation Forms requesting clinical placements 12 months ahead of the planned clinical education coursework start date, or as needed as new clinical education agreements are established. Information received back from clinical sites will be recorded in EXXAT. Students will have an opportunity to research available options and identify their preferences. Please see “Guidelines of Clinical Education Process” for details. The ACCE will be available to discuss the process and answer questions about student’s needs or specific facilities of interest. At no time during the selection and assignment process, are students to make contact with clinical sites. Students will rank their preferences on EXXAT on or before the specified deadline.

Clinical education assignments are made approximately six weeks in advance. Based on student input, matching by the EXXAT system (utilizes a complex algorithm which matches as many students as possible to their most desired clinical experience site), as well as feedback from the Program Director and other faculty members, students are assigned by the ACCE to either an outpatient or inpatient setting for Practicum I. Students are assigned in the same manner for the Affiliations such that they complete one Affiliation in an outpatient setting and one Affiliation in an inpatient setting.
The ACCE will review the assignments for alternative placements if it is deemed to be in the best interest of the students and/or program. Every reasonable effort will be made to share the rationale for reassignments with the students. Students will receive notification of their upcoming assignments via an email through EXXAT and be given an opportunity to discuss any concerns with the ACCE.

SCCEs are provided finalized clinical placement information for the upcoming clinical education experiences, including filled and unmatched time slots, updated clinical education policies and other relevant clinical education program information. Please see “Guidelines of Clinical Education Process” for details.

Once assignments are made, the only changes that will be allowed for students are for unexpected circumstances of hardship. The student may petition the ACCE after the assignment has been made. On an individual basis, the ACCE will consider if the assignment creates a hardship. The ACCE may consult with other faculty members, if needed, to determine the extent of the hardship. If hardship is determined, the student and ACCE will work together to find another assignment that will allow the student to meet clinical education requirements. If the ACCE decides a hardship is not present, the student must attend the assigned site or risk failing the course. If a site becomes unavailable during a planned clinical experience, the student will individually consult with the ACCE, who will make every reasonable effort to secure an equitable learning alternative. Records of site cancellations are kept for review.

Student Confidentiality
Stanbridge University affords all of its students their full rights as required by the Family Educational Rights and Privacy Act. This law was enacted to protect the privacy of students and provide for the right to inspect and review education records which are directly related to a student and which are maintained by the university or by a party acting for the university, including the clinical education site. The university may disclose personally identifiable information from the education records without the consent of the student to an outside contractor such as a clinical education site that is a party acting for the institution and performing a service which the institution would otherwise have to perform for itself. The university is not permitted to disclose that information to others without the written consent of the student, and the information is to be used only for the purpose(s) intended. A student may request amendment of the content of an education record on the grounds that the record is inaccurate, misleading, or otherwise in violation of the privacy of the student.

Termination of Clinical Education Course Due to Student Performance
If a student's conduct or performance in any way disrupts services to patients or relationships with the clinical education site, the CI may dismiss the student or the ACCE may immediately terminate the student's placement and assign a failing grade for that clinical experience. Areas of conduct are not limited to technical skills or academic preparation but also include commitment to learning, effective interpersonal skills, effective communication skills, effective use of time and resources, acceptance of feedback, professionalism, problem solving, and stress management.

The following examples may be grounds for immediate termination. The list of examples is provided for clarification but is not a comprehensive nor all-inclusive list of the unprofessional behaviors that may warrant termination:
1. Student does not exercise sound judgment, placing a patient at serious risk for injury.
2. Student behavior undermines the positive relationship between the university and the clinical site.
3. Student performance jeopardizes relationships between employees at the clinical site.
4. Student fails to adhere to department, program, or university policies and procedures.
5. Student uses poor professional judgment, lending to unsafe patient care or has unethical conduct.
6. Student fails to remediate unacceptable behavior that has been addressed.
7. Student misrepresents level of competency or practices beyond abilities.
8. Student has unreasonable absences or tardiness.
9. Student dates a patient currently undergoing any form of treatment at the clinical site.
10. Student dates a staff member employed at the clinical site.
11. Student deceives the CI or clinical staff.
12. Student informs the patient or family of personal disagreement with an aspect of care.

If the student is dismissed from the clinical education site or if the clinical experience is terminated:
1. The student will be given a grade of “Fail” for the clinical education course.
2. The student may not return to the site for future clinical experiences.
3. The student or agents of the student may not interact or contact the clinical site, its staff, or patients.
4. The student must formally meet with the ACCE to outline the remediation plan.
5. The student may be granted the opportunity one additional time to re-enroll in a clinical education course in which he/she received a failing grade. Students who do not successfully complete the course the
second time will be dismissed from the program. Students are only allowed to remediate one clinical education course, one time.

STUDENT ACKNOWLEDGEMENT OF RISK & RESPONSIBILITY
As a condition of their presence in the program and clinical facilities for clinical education, Physical Therapist Assistant students will be required to sign an acknowledgement form, which includes the following information:

I, _______________________________________, understand that while I am enrolled in the Physical Therapist Assistant program at Stanbridge University, I may be involved in activities that may increase my risk of injury or illness to a level above those associated with everyday activities of daily living. These activities may include, but are not limited to, exposure to potentially infectious blood, body fluids, and airborne pathogens and diseases (Examples: HIV, Hepatitis, TB, needle sticks); musculoskeletal injury due to performing/receiving physical therapy treatment activities on/from partners or patients in the laboratory setting or during clinical education experiences; psychological stress associated with the curriculum load which requires a significant level of commitment to successfully complete the program; and exposure to hazardous materials (Examples: bleach, rubbing alcohol, Betadine).

I am aware that certain clinical education facilities may require the successful completion of drug testing and/or additional background investigation before I am allowed to participate in the provision of care at those facilities.

I agree to follow all clinical education facility protocols regarding patient safety, personal safety, and all other protocols I have been instructed at school, during clinical facility orientations, and during my clinical rotations.

I hereby confirm that I will seek the direction of my clinical instructor (CI) or other supervising facility mentor should I be unclear as to how to proceed with patient treatment or any other procedure, protocol, or process at the clinical facility.

I hereby indemnify and hold harmless Stanbridge University, its employees, agents, owners and partnering clinical facilities from any liability pertaining to any infectious disease, illness or injury I may acquire or get as a result of my participation in my clinical education rotations, including any infectious disease, illness or injury I may acquire as a result of my participation in a potentially dangerous clinical rotation such as at a facility in which individuals with mental illness are treated.

I also understand that it is my responsibility during clinical education coursework in the provision of care to patients to identify myself correctly as a Physical Therapist Assistant student. I also understand that it is the risk-free right of patients to refuse to participate in clinical education.

STUDENT MEDIA ACKNOWLEDGEMENT & WAIVER
Physical Therapist Assistant students will be required to sign an acknowledgement form, as a condition of their presence in the program and clinical facilities for clinical education, which includes the following information:

I, ______________________________________________, hereby irrevocably consent to and authorize the use and/or reproduction of any testimonial information and all photographs or other media taken of me during any aspect of the program for any company purposes, without compensation to me. This is to include use of the original images and any variations created thereof for sale or licensing in, but not limited to, company stock photography, video, promotional media, audio, advertising media, in any way whatsoever. All negatives and positives, or digital media, and any copies of same, shall constitute property, solely and completely, of Stanbridge University.

In giving this consent, I release Stanbridge University and its representatives from any violation of any personal or proprietary right I may have in connection with such sales, reproduction, or use.

I enter into this release on behalf of my dependents, heirs, executors, administrators, and assigns.

PROFESSIONAL IMAGE POLICY FOR PTA STUDENTS
Student Dress Code
Navy blue polo shirts must bear the Stanbridge University logo (provided) on the left breast of the shirt.

Khaki pants (full-length) must be worn as part of the uniform.
PTA lecture and lab uniforms and lab coats must be clean and unwrinkled.

Name tags should be worn at all times. Badges may not be embellished with stickers, jewel-like objects, etc. Lanyards, car keys, etc., may not be hanging in pockets or visible outside of the uniform.

Undershirts worn underneath the polo uniform top may be short sleeve or long sleeve but must be white if visible. No other undergarments may be visible. Gray or navy-blue cardigan sweaters are acceptable outerwear. Hoodies (other than Stanbridge-branded outerwear) are not acceptable.

Bare feet, bare midriffs, low-cut necklines, and skin-tight clothing are not acceptable.

Hats are not to be worn inside any of the buildings, classrooms, hallways, or labs.

Shoes and socks must be worn at all times.

Shoes must have a rubber/non-conductive sole.

Shoes must be closed-toe and must be clean at all times. Neoprene or mesh-type tennis shoes are not acceptable. Canvas tennis shoes are not acceptable. Plain, black, or gray, non-flashy sneakers are acceptable.

Jewelry, Hair, and Nails
For women: The only visible pierced jewelry that is acceptable is a small, single stud earring located in the ear. Hoops, rings, or dangling earrings are not allowed. Jewelry on the tongue, eyebrows, nose, or lips is not allowed.

For men: Visible pierced jewelry is not allowed. Facial hair must be neatly trimmed to a maximum length of ½ inch to permit proper fit of personal protective equipment (as recommended by the Center for Disease Control) and not be of a faddish or unusual appearance.

Accessories on the wrist (except for watches), such as metal or silicone bracelets, are not permitted.

A watch allowing for the ability to track the passing of seconds is mandatory at all times.

Rings, if worn by the student, should be low profile and limited to one finger per hand.

Necklaces, if worn, must be inside the shirt and not be obstructive to the student or the student's classmates.

Hair must be pulled back out of the face and off the shoulders. Hair color must be of a natural color; faddish (e.g. mohawk) or unnatural colors or styles are not permitted.

Hair accessories must be plain. Decorative bows, ribbons, flowers, and headbands are not permitted.

Nails must be closely trimmed and kept clean at all times. Only clear nail polish is acceptable - other colors/designs are not allowed. Artificial nails are not allowed.

Tattoos and piercing are discouraged while in school due to increased chance of infection and the ability to comply with Stanbridge and clinical education site policy.

Tattoos cannot be visible. White long sleeve shirts or "sleeves" must be worn to cover the tattoos. (Note: Clinical education facilities may have uniform regulations in addition to the foregoing requirements. Students must comply with any additional uniform requirements at the clinical education facilities in the program.) Students not in compliance with the uniform standards policy will be issued a Notice of Deficiency.

Lab Clothes
• Laboratory uniform t-shirts will be issued; however, female students are expected to wear sports bras or swimsuits under their lab attire and male students will be asked to remove their shirts at times for laboratory skill activities. All students will be appropriately draped.
• Solid light gray shorts
• Athletic shoes and socks (same as above)
PROGRAM SEQUENCE OF TARGETED ABILITIES

The early part of the didactic portion of the curriculum focuses on knowledge and comprehension of foundational information such as the human body and its components, general education knowledge, and basic theories and processes of physical therapy. Selected content is taught to the level of perception and receiving in the psychomotor and affective domains, respectively. The early portion of the curriculum includes Anatomy and Physiology, College Writing I, Public Speaking, Psychology, Introduction to PTA, Pathology, and Documentation.

The middle part of the didactic portion of the curriculum continues to ask students to know and understand more complicated material but also begins to challenge students to apply their knowledge of the human body and its components in relation to physical therapy. Psychomotor progression is also encouraged to the level of set and guided response, and in certain components, demonstration (complex overt response). At this stage of the curriculum theoretical knowledge merges with the practical psychomotor skills students have been developing. Courses in the middle portion of the curriculum include Kinesiology, Therapeutic Exercise, Therapeutic and Measurement and Testing, PTA Practice I, Procedures, PT Through the Lifecycle, Modalities, Electrotherapy, Statistics, World Religions, and PTA Labs I and II. The many basic clinical skills that are learned up to this point in the curriculum in courses such as Procedures, Modalities, and Therapeutic Exercise prepare students for entry into the clinical setting in Clinical Practicum I that occurs in the final didactic term. Clinical Practicum I allows students to practice their skills in a real-world environment under the direction and supervision of a physical therapist, who directs and supervises the student physical therapist assistant to perform selected interventions and data collection techniques.

The latter part of the didactic portion of the curriculum includes courses related to the major practice areas and populations served by physical therapist assistants. Theoretical knowledge continues to merge with the practical psychomotor skills the students have been developing. The curriculum design now assumes that merging of knowledge (cognitive domain) and skills (psychomotor domain) will enhance the use and appreciation of each other. Courses in the latter portion of the curriculum include Orthopedic Interventions, Neurologic Interventions, PTA Practice II, and PTA Lab III.

The final part of the didactic portion includes a course entitled Professional Issues. This course leads students to the level of organization in the affective domain as displayed in their professional interactions, with encouragement to continue their progression to the level of characterization, though this last level is not addressed in formal instruction. Professional Issues precedes two Clinical Affiliation courses that encourage growth in knowledge, skill, and confidence. Students utilize didactic and previous clinical education coursework as a platform on which to build their skill set, reinforce their ethical and moral compass, identify lifelong interests and learning opportunities, and further understand and comply with rules and regulations mandated in their future role as a PTA.

Classroom Conduct
Stanbridge University adheres to its commitment of promoting an ongoing “student friendly” environment by eliminating distractions from the classroom.
Stanbridge University promotes instructional assessment and improvement of the quality of instruction by providing the instructor with a specific set of guidelines defining what is considered an appropriate or inappropriate classroom.

Classroom Rules:
The instructor is the sole individual responsible for monitoring and regulating the following activities:
1. Cell phone use is prohibited when class is in session.
2. No food or drink is allowed in the classroom, except water bottles with a re-sealable cap.
3. The viewing of inappropriate websites at any time is not allowed.
4. Any violation of the school’s regulations concerning academic dishonesty will not be tolerated.
5. Professional dress and behavior is expected of students while they are on campus.

Equipment Safety and Maintenance
Stanbridge University expects that all individuals who use the Therapy Labs and/or classrooms have access to safe and appropriately maintained equipment.
It is essential that all individuals who use the Therapy Labs, faculty, and students alike, are to check the equipment for proper function before use, and if a deficiency is found, to notify the appropriate personnel.
1. It is the responsibility of all students and faculty members to check equipment used in the classrooms and laboratory rooms for proper function prior to each use. If equipment needs repair, it:
   a) should be clearly marked for repair,
   b) reported to the program Director or to the appropriate department (e.g. IT, maintenance, etc.) for repair and,
   c) if possible, removed from service.

No one may use defective equipment or supplies.

2. Faculty should instruct students in the safe use of all equipment in labs. Students may not practice with equipment until they have been instructed on its use in class.

3. Equipment manuals are to be kept on file in the Program Director’s office or, if possible, with the unit.

4. At a minimum, an annual inventory of existing equipment is conducted under the direction of a faculty member within the PTA department. The Logistics department schedules an annual safety inspection with a clinical engineering company whose staff inspects and calibrates the equipment. The inspectors provide a final inspection report to the program which is designed to bring any equipment functional problems or equipment safety issues to the attention of the Program Director. Records of these inspections are kept in the Logistics department.

5. If an external vendor loans equipment to the program for use in class or laboratories, e.g. continuous passive motion machines, the vendor must provide a memorandum with the equipment that ensures the safety of the equipment.

Storage and Use of Hazardous Materials

Stanbridge University expects that all individuals who utilize the PTA Skills Lab and/or classrooms will understand the proper storage and use of hazardous materials.

A Safety Data Binder is located in all PTA labs which and contains the Material Safety Data Sheets for all the chemicals encountered in the labs. All chemicals are stored safely and properly in the lab cabinets.

It is essential that all individuals who utilize the PTA Skills Lab, faculty and students alike, are to understand and abide by the Cadaver Lab and Lab Safety procedures to ensure safety when dealing with hazardous materials in those labs, and if an issue arises, to notify the appropriate personnel.

1. Students will be provided a copy of the Cadaver Lab Procedures and Laboratory Safety Lab Procedures during new student orientation.

2. Students will be explained the equipment, materials, and hazardous materials they will encounter in these labs and how to maximize safety in these labs.

3. Students will sign procedure forms and kept on file for compliance and understanding of established procedures.

Clinical Safety

Stanbridge University maintains an expectation that a clinical site is considered an extension of the physical campus, and while at a site, students are expected to maintain the highest standards of personal hygiene and safety. The following standards have been identified:

1. Students will be continually monitored by faculty for practice of safety skills.

2. Students will be reminded by the faculty to incorporate safe practice in all skill labs.

3. Students who do not follow one or more of the safe practices during lab sessions will be advised of the failure and re-instructed by faculty as necessary.

4. If a student fails to follow safe practices on a lab practical, he/she will fail the lab practical and need to retake it per instructions in the syllabus.

5. If a student shows blatant disregard for the safety of a classmate, the patient and/or him/herself at any time, the consequences will be determined on an individual basis. Possibilities include but are not limited to, failure of the lab practical, failure of the class or affiliation, or removal from the program.

In addition, the following specific guidelines have been established:

Infection Control

1. All students shall practice proper hand washing technique/hand hygiene while utilizing labs.

2. Non-latex gloves are available for those with latex allergy.
Lab Skills

1. Students will be instructed to practice only those skills for which they have had prior instruction.
2. Students are expected to come to lab appropriately prepared for each skill/technique to be practiced.
3. Students should practice safe techniques at all times. Standard precautions also should be followed at all times.
4. Students will be instructed in and are expected to use proper/safe body mechanics at all times.
5. Students are responsible for reporting to faculty any equipment problems/maintenance issues, such as frayed electrical cords, cracked plugs, broken parts, missing parts, etc.
6. Students must contact the Logistics department or a PTA faculty member to be given access to laboratories outside of scheduled class times. Students are allowed to utilize those labs as long as there is not a class scheduled at the same time. Students will clean and return the lab back to its original condition found prior to using the lab.
VOCATIONAL NURSE PROGRAM

1808 Clock Hours including theory and clinical/105 Quarter Credit Hours (The approximate time to complete the program will vary according to the start and end dates of a cohort and ranges from 13 – 14 months for full time and 26 – 28 months for part time, including school and national holidays, breaks between terms, a one week break at Thanksgiving and a two week break in December.)

Employment/Job Title: Licensed Vocational Nurse

Licensed Vocational Nurses (LVNs) provide basic bedside nursing care to clients under the direction of a physician or registered nurse. The Vocational Nurse utilizes scientific and technical expertise and manual skills. Duties within the scope of practice of a vocational nurse typically include, but are not limited to, provision of basic hygienic and nursing care; measurement of vital signs; basic client assessment; documentation; performance of prescribed medical treatments; administration of prescribed medications; and performance of non-medicated intravenous therapy and blood withdrawal (which requires separate Board certification.) Upon satisfactory completion of all requirements for this program, Stanbridge University will confer a diploma in Vocational Nurse and notify the Board of Vocational Nursing and Psychiatric Technicians (BVNPT) of satisfactory completion for licensing exam authorization.

After passing the national licensing examination (NCLEX-PN) and being issued a license from the BVNPT, students are eligible to obtain employment as a Licensed Vocational Nurse.

This program exceeds the state requirements for 576 hours of theory instruction and 954 hours of clinical experience.

Students are assigned to clinical facilities according to their abilities, group dynamics, and the availability of facilities. Students are responsible for their transportation to and from facilities. When a facility is over fifty (50) miles from the campus, the students' addresses are also considered.

CATALOG SUPPLEMENT FOR VN STUDENTS

ADDITIONAL INFORMATION FOR VN PROGRAM STUDENTS

REQUIREMENTS FOR CLINICAL EDUCATION

Medical Exam
Prior to any activities at clinical facilities, students must undergo a physical examination, PPD skin test (and/or chest X-ray if PPD is positive). These are paid for as part of the VN equipment and supplies cost and must be completed with that of the other students in the cohort (with the exception of a chest X-ray). A three-injection series Hepatitis B vaccination is also provided to all students and is strongly recommended but not required by Stanbridge University. Students absent from on-campus health clinics are required to complete and provide proof of the aforementioned information within two weeks. Any absences accrued due to missing health records will be unexcused. Also, any student who fails to submit the required health records by the due date will receive a notice of deficiency from the nursing administration. If a student has documentation of previous Hepatitis B vaccination (as proven by titer or documentation of administration of the vaccine series), he/she will not have to undergo a second vaccination. The MMR, Tdap and Varicella vaccinations are required.

BLS Certification
Completion of a course in Basic Life Support for Healthcare Workers is required prior to clinical education in a clinical facility and is included in the Stanbridge University VN curriculum. Students absent from the BLS class must obtain certification at their own expense before attending a clinical facility. Only the American Heart Association Certification will be accepted.

MAINTAINING REQUIREMENTS FOR CLINICAL EDUCATION
All students are responsible for maintaining the accuracy of the foregoing student health information. This includes, but is not limited to, PPD, chest X-ray, (if PPD is positive), Hepatitis B series, physical and the American Heart Association BLS. It is mandatory for each student to keep these health records current at all times. No student is allowed to attend clinical with expired health information. It is the responsibility of the student to bring documentation of new health records prior to their expiration; this includes, but is not limited to, PPD tests and the American Heart Association BLS. Student Services provides optional health center referrals upon request for any student needing to update their health records. Students are responsible to pay for any necessary renewals of health records. Any student with expired health information will not be allowed to attend clinical education without updating the expired information. Any absences accrued due to expired health records may not have remediation limits waived. Also, any student who accrues absences due to expired health records will receive a Notice of Deficiency for each absence.

STUDENT RESPONSIBILITIES AT CLINICAL FACILITIES
Students are responsible for the following while at clinical facilities:

- Protecting, first and foremost, the health and safety of patients at clinical facilities where they perform their clinical rotations.
- Honoring the preservation of patient privacy by scrupulously observing confidentiality of patient information. Violation of patient confidentiality may lead to dismissal of the student from the program.
- Seeking the guidance of a Stanbridge University clinical instructor when unsure of what to do.
- Arranging for transportation to and from school, clinical facilities, and other designated locations for instruction in the VN program. (Note: Some periods of clinical facility education may not match other clinical schedules (for days of the week or hours of clinical education) due to facility-driven scheduling. Students are responsible for arranging their personal schedules to meet prearranged facility schedules.
- Making the didactic and clinical schedule in the VN program the top priority in their personal schedule.
- Abiding by the rules and regulations of the clinical facilities during clinical rotations.

STUDENT ACKNOWLEDGEMENT OF RISK AT CLINICAL FACILITY ROTATIONS
Vocational Nurse students will be required to sign, as a condition of their presence in clinical facilities for clinical education, the following acknowledgement:

I understand that due to my clinical rotations at various clinical facility settings, I will be exposed to potentially infectious materials and diseases. I agree to follow all clinical facility protocols regarding patient safety,
personal safety, and all other protocols I have been taught at school during clinical facility orientations and during my clinical rotations.

I hereby confirm that I will seek the direction of my instructor or a clinical facility nurse should I be unclear as to how to proceed with patient care or any other procedure, protocol, or process at the clinical facility.

I hereby indemnify and hold harmless Stanbridge University, its employees, agents, owners and partnering clinical facilities from any liability pertaining to any infectious disease, illness, or injury I may acquire or get as a result of my participation in my clinical rotations, including any infectious disease, illness, or injury I may acquire as a result of my participation in a potentially dangerous clinical rotation such as at a Mental Health Unit/Ward/Facility.

UNIFORM POLICY FOR VN STUDENTS
Professional Image Policy for VN Students

Professional Image policies are to be enforced while on campus grounds and/or clinical facilities premises, which include the parking lot, shuttle lot and while riding on the Stanbridge Shuttle Service. The student must adhere to the professional image policy guidelines listed below. If the student is off campus and wearing Stanbridge University attire, they should demonstrate awareness that they are a representative of the University and are expected to have professional behavior and demonstrate good judgement. Failure to do so may result in disciplinary action for a violation of the code of conduct. In the event of inclement weather, only program administration may approve a temporary modification of the dress code standards listed below.

VN Dress Code: Theory
- Students must wear Stanbridge uniform polo shirt and khaki dress trousers. No leggings, jeggings, or any tight-fitted items are permitted. Scrubs are for clinical sessions only.
- Clothing must be clean and unwrinkled.
- Undershirts worn underneath the polo top may be short sleeve or long sleeve but must be white if visible and V-neck style. No other undergarments may be visible.
- Stanbridge hoodie is the only outer garment allowed.
- No active wear, athletic clothing, trendy clothing, i.e. holes or tears in pants.
- No caps, hats, beanies or hoods in class.
- Hair accessories must be plain (head bands, scarves)
- Students MUST wear CLEAN, black, grey, or white sneakers.
- Socks/hosiery of any color may be worn.
- The student ID must be worn at chest level and be conspicuous at all times.
- Tattoos cannot be visible. White, long sleeved shirts or "sleeves" must be worn with polo shirt to cover the tattoos. No facial or tongue jewelry.
- Nails must be trimmed and kept clean at all times. Nail length must be kept at a maximum of 2 mm overhang. Only clear nail polish is acceptable – other colors/designs are not allowed. Artificial nails are not allowed.

VN Dress Code: Clinical
- The Student ID must be worn at chest level and be conspicuous at all times.
- Scrubs must bear the Stanbridge University name and logo on the left front chest. Scrubs must be clean and unwrinkled.
- Undershirts worn underneath the scrub uniform top may be short sleeve or long sleeve but must be white if visible and V-neck style. No other undergarments may be visible.
- Plain white hosiery must be worn at all times.
- Shoes must have a rubber/non-conductive, slip-proof sole, must be non-penetrable, completely white, and clean at all times.
- For women: The only visible, pierced jewelry that is acceptable is a small, single, stud earring (may be in ear lobe or tragus). Hoops or dangling earrings are not allowed. Jewelry on the tongue, eyebrows, nose, or lips is not allowed. No gauged ears. Only a plain wedding band is acceptable. No other visible jewelry is permitted.
- For men: No jewelry except for plain wedding band. No gauged ears. No other visible jewelry is permitted.
- Facial hair must be neatly trimmed to a maximum length of ½ inch (as recommended by the Centers for Disease Control), and not be of a faddish or unusual appearance.
• Tattoos cannot be visible. White, long sleeved shirts or “sleeves” must be worn with polo shirt to cover the tattoos.
• A watch with a sweep second hand is mandatory at all times.
• Hair must be pulled back out of the face and off the neck and shoulders. Hair color must be of a natural color; faddish or unnatural colors or styles are not permitted.
• Hair accessories must be plain.
• Nails must be trimmed and kept clean at all times. Nail length must be kept at a maximum of 2 mm overhang. Only clear nail polish is acceptable – other colors/designs are not allowed. Artificial nails are not allowed.

Consequences for Violation of the VN Professional Image Policy
If a student is determined to be in violation of any specific item(s) of the dress code, the student will be issued a Notice of Deficiency and sent home for the remainder of the day. Additionally, the student will acquire an absence for that respective class day. The student will not have the option to return to class to avoid acquiring an absence. Please refer to the attendance policy for the remediation of absences.

ADDITIONAL ATTENDANCE REQUIREMENTS FOR TERM 4 STUDENTS
Term 4 Clinical Attendance
No clinical hours may be missed during term 4 due to the length and availability of the specialty rotations. Students in the VN Program who are absent during any specialty rotation (i.e. Mental health/Psych, Obstetrics/Maternal Health, Pediatrics, and Medical Surgical) will be required to repeat the specialty rotation which, will likely result in a delay in graduation. Specialty rotations include pre-facility, laboratory and clinical days. Students may continue with the remainder of their theory and clinical courses in the term.

ADDITIONAL GRIEVANCE PROCEDURES
All students are encouraged to address concerns and grievances to their instructors and then to the university executive staff. VN program students should contact the VN Program Director, then the Dean of Instruction, and then the President.

The Board of Vocational Nursing and Psychiatric Technicians
2535 Capitol Oaks Drive, Suite 205
Sacramento, California 95833
Telephone (916) 263-7800; Fax (916) 263-7855

Background Check
Some clinical facilities require background checks for all employees, volunteers and students working in the facility, independent of the required licensure background check (see below). Students will be required to submit their personal information for a background check in order to attend clinical sessions.
  • Each facility judges the background of student nurses with misdemeanors or felonies on an individual basis. Denial of admission to the Vocational Nurse Program for students with convictions will be based on a pattern of convictions, felonies, or certain misdemeanors that will bar a student from completing a clinical rotation.
  • Failure to disclose a previous conviction is typically viewed as seriously as the conviction itself, if not more so.
  • Some clinical facilities require submission of fingerprints as part of the background check.

LICENSURE
Vocational Nurses in California are licensed by the Board of Vocational Nursing and Psychiatric Technicians in accordance with the provisions of the Nurse Practice Act, California Code of Regulations, Division 25, Chapter 1, Vocational Nurses. Completion of the BVNPT-accredited Stanbridge University VN program satisfies the requirement for completion of a course in vocational nursing. Students must apply to the BVNPT for authorization to take the licensing examination after completion of their program. Note: Tuition paid to Stanbridge University does not include fees payable to the State of California or other entities (such as those for Live Scan services or photographs) related to application for state-mandated licensing examinations or the state licensing fees themselves.

LICENSURE FOR STUDENTS WITH CONVICTIONS
By law, the Board of Vocational Nursing, and Psychiatric Technicians (BVNPT) must review the criminal record of all applicants for Vocational Nursing licenses. The Board only performs this review upon receipt of an application for licensure and cannot “pre-approve” or “pre-screen” a record to determine eligibility for licensure.
Stanbridge University, likewise, cannot determine if a conviction will be a bar to receiving a license. Full disclosure is mandatory, and failure to disclose a conviction may be grounds for denial of your application.

Because determination of eligibility is made on a case-by-case basis, having a conviction on your record will not necessarily prevent the Board from granting a license. Likewise, if you have a conviction, you may not be granted a license even if you have completed all coursework and passed the licensing examination.

The Board’s brochure on “Disciplinary Overview, Convictions, Frequently Asked Questions” is reproduced here for your information. Additional questions may be directed to the BVNPT’s Enforcement Unit at (916) 263-7827.

Do you have to report an arrest if you were not convicted?
No. You only need to report an arrest if you were convicted.

Do you have to report traffic violations and/or automobile accidents?
Yes, if a traffic ticket was issued and you were fined over $500.

What happens if you can’t obtain certified court documents and police reports on convictions?
You must submit written proof from the court or police department specifying inability to locate the required documents. The Board verifies this and bases its decision on other substantial information (e.g., letters of recommendation, evidence of rehabilitation, etc.).

Do you have to report non-payment of child support?
No. However, if your case is in the District Attorney's (DA) Office for non-payment, the DA notifies the Department of Consumer Affairs Family Support Unit. If you are deemed eligible for licensure, your license is issued on a temporary basis for 150 days. If at the end of that time period, you have not established a payment agreement with the DA’s Office, your license is suspended.

Do you have to report a conviction that was expunged (i.e., conviction was stricken or deleted from official records)?
Yes. Pursuant to Penal Code section 1203.4, you are required to report a conviction that was expunged. The law specifies that it does not relieve you from the obligation to disclose the conviction in response to any direct questions contained in any questionnaire or application for public office or for licensure by any state or local agency.

What happens if you fail to disclose all or part of your convictions?
Failure to disclose all or part of your convictions may be grounds for denial or disciplinary action as you falsified information required on your application for licensure or renewal of licensure.

Do you have to report misdemeanors, felonies and/or convictions which you pled nolo contendere?
Yes. Pursuant to Business and Professions Code, section 2878.6 (VN Practice Act) and section 4523 (PT Law), a plea or verdict of guilty or a conviction following a plea of nolo contendere is considered a conviction. Any conviction substantially related to the qualifications, functions and duties of a licensee can be grounds for denial or discipline of a license.

Do you have to report convictions if you were under 18 years old and tried as an adult?
Yes. If you were under 18 years of age, but were tried and convicted as an adult, you are required to disclose the conviction.

Do you have to report military convictions or dishonorable discharge?
Yes. Any offense or violation during your military career must be reported to the Board on the Record of Conviction form.

How does the Board determine which violations are substantially related to the applicant’s license?
Pursuant to Title 16, California Code of Regulations, section 2521 (VN Regulations) and section 2578 (PT Regulations), a crime or act shall be considered to be substantially related to the qualifications, functions, or duties of a LVN or PT if to a substantial degree it evidences present or potential unfitness to perform the functions authorized by the license in a manner consistent with the public health, safety, or welfare. Such crimes or acts shall include but not be limited to those involving the following issues:

- Procuring a license by fraud, misrepresentation, or mistake.
- A conviction of practicing medicine without a license.
- Violating or attempting to violate, directly or indirectly, or assisting in or abetting the violation of, or conspiring to violate any provision or term of the VN Practice Act or PT Law.
• Aiding or assisting, or agreeing to aid or assist any person or persons, whether a licensed physician or not, in the performance of or arranging for a violation of any of the provisions of the Medical Board of California Practice Act.
• Conviction of a crime involving fiscal dishonesty.
• Any crime or act involving the sale, gift, administration, or furnishing of “narcotics or dangerous drugs or dangerous devices” as defined in the Pharmacy Practice Act, Section 4022.

How does the Board determine satisfactory rehabilitation of an applicant for licensure or licensee?
Pursuant to Business and Professions Code sections 480 and 490, and Title 16 California Code of Regulations, sections 2522 and 2522.5 (VN Regulations) and sections 2579 and 2579.1 (PT Regulations), the Board utilizes the following general criteria to determine satisfactory rehabilitation:
• The nature and severity of the act(s) or crime(s) under consideration.
• Evidence of any act(s) committed subsequent to the act(s) or crime(s) under consideration.
• The time that has elapsed since commission of the act(s) or crime(s) under consideration.
• The extent to which the applicant has complied with any terms of parole, probation, restitution, or any other sanctions lawfully imposed.
• Evidence, if any, of rehabilitation.

What does the Board look for on the Department of Justice (DOJ) and/or Federal Bureau of Investigation (FBI) reports?
The Board reviews the RAP sheets (i.e., criminal record reports) to ensure that the conviction history matches what you provided on your Record of Conviction form and to determine if the violation is related to the qualifications of a licensee.

How can you get a copy of your RAP sheet (i.e., criminal record report)?
You may request a copy of your RAP sheet from the Department of Justice (DOJ). DOJ requires you to complete a "Record Review Process" form, complete another fingerprint card and pay a fee for processing.

To obtain more information on this process, you must contact DOJ directly.

How long does a conviction stay on your RAP sheet?
The information contained on your RAP sheet is retained indefinitely. Therefore, you should always report all convictions. Failure to disclose all past convictions may result in disciplinary action.

Why doesn’t the Board delineate the criteria for denial of a license?
The Board looks at each application for licensure on a case-by-case basis. There are many factors which must be evaluated to determine a person’s qualifications to practice.

Why do you have to take and pass the examination before a decision is made on your conviction history?
The Board does not have any authority to deny your application for examination, only your application for licensure. Therefore, the Board can only make its official determination when you have successfully met all the requirements for initial licensure.
ASSOCIATE OF SCIENCE IN NURSING

1780.5 Clock Hours/119.5 Quarter Credit Hours (The approximate time to complete the program will vary according to the start and end dates of a cohort and ranges from 24 – 25 months, including school and national holidays, breaks between terms, a one week break at Thanksgiving and a two-week break in December.)

**Employment/Job Title:** Registered Nurse

Registered nurses (RNs), regardless of specialty or work setting, treat, and educate patients and the public about various medical conditions and provide advice and emotional support to patients’ family members. RNs record patients’ medical histories and symptoms, help perform diagnostic tests and analyze results, operate medical equipment, administer treatment and medications, and help with patient follow-up and rehabilitation.

RNs teach patients and their families how to manage their illnesses or injuries by explaining post-treatment home care needs; diet, nutrition, and exercise programs; and self-administration of medication and physical therapy. Some RNs may work to promote general health by educating the public on warning signs and symptoms of disease. RNs also might run general health screening or immunization clinics, blood drives, and public seminars on various conditions.

When caring for patients, RNs establish a care plan or contribute to an existing plan. Plans may include numerous activities, such as administering medication, including careful checking of dosages and avoiding interactions; starting, maintaining, and discontinuing intravenous (IV) lines for fluid, medication, blood, and blood products; administering therapies and treatments; observing the patient and recording those observations; and consulting with physicians and other healthcare clinicians. Some RNs provide direction to licensed vocational nurses and nursing aides regarding patient care.

Upon completion of the following requirements, Stanbridge University will confer the Associate of Science in Nursing degree:

- **Quarter Hours of Credit:** minimum 119.5 quarter hours of credit.
- **Scholarship requirements:** a minimum of a “C+” in the theory component and a Pass in the clinical component of each nursing course; a minimum of a “C+” in all prerequisite science courses and a minimum of a “C” in the prerequisite English and Algebra courses and the co-requisite (i.e., general education) courses; a cumulative GPA of “C+” or above in the program; and a minimum score of 90% predicted probability of passing the NCLEX-RN on the first attempt (in accordance with the scoring rubric of the examination) or, if applicable, a minimum score at or above the National Mean for that version of the examination.

Graduates with an Associate of Science in Nursing degree from a BRN-accredited nursing program may apply to the Board of Registered Nursing for permission to take the examinations required for licensure, the National Council Licensure Examination for Registered Nurses (NCLEX-RN)®

After passing this examination and receiving a license from the BRN, the student will be eligible to obtain employment as a licensed Registered Nurse.

*This course is delivered in an online format.
Dress Code

Students are expected to comply with the dress code as outlined below. Students who do not comply with the dress code will be requested to leave campus or the clinical facility. The student will be marked absent for the period. A Notice of Deficiency may also be given.

- Student ID badge must be worn at all times above the waist.
- All students must be neat and well groomed. Students will bathe daily and use deodorant. The student should have no offensive body odor or cigarette smell. Appropriate top and bottom undergarments are required.
- Clothing must fit properly and not tight-fitting.
- On campus uniform includes red polo shirt with the Stanbridge logo, plain white under shirt or white "sleeves" to cover tattoos, plain black scrub pants (no print, no colorful embroideries or borders), white socks or neutral nylons, and white or black shoes.
  - Shoes must be closed-toed, closed-heeled and low-heeled. Shoes must be without print except for the shoe logo.
  - White shoes must be clean.
  - Only white or black shoelaces are allowed.
- In clinical, blue scrubs with Stanbridge logo must be neat and pressed.
  - Pregnant students must adopt a similar maternity scrub uniform.
  - Only clean white, closed-toed, closed-heeled and low-heeled shoes with non-skid soles and white vinyl or leather top is acceptable. Shoe logo and shoelaces, if present, must be white.
  - Only white socks or neutral nylons may be worn in clinical.
  - Stethoscope, penlight, bandage scissors, watch with second hand, calculator, black pen, paper pad are part of the clinical uniform. A “fanny pack” or “apron” may be worn over the uniform to increase the number of pockets.
- Sweaters must be solid color (only black, grey, blue, or white) without print except for Stanbridge logo.
  - Sweaters may have a hood, but the hood may not be worn over the head.
- No hats or scarves are permitted.
- Hair must be pulled back out of the face and off the shoulders.
  - Ponytail is acceptable on campus.
  - Hair must be pulled back out of the face and in a bun in clinical or when in scrubs for Skills Lab or Simulation Lab.
  - Hair color must be of a natural color. Faddish or unnatural colors or styles are not permitted.
- Facial hair must be neatly trimmed to a maximum length of ½ inch to permit proper fit of personal protective equipment as recommended by the Centers for Disease Control. Facial hair must not be of a faddish or unusual appearance.
- Gum is not allowed.
- Makeup must be suitable. Perfume, cologne or after-shave is not permitted.
- New tattoos and piercings are discouraged while in school due to increased risk of infection and the ability to comply with clinical site policy.
  - Tattoos cannot be visible. Plain white long-sleeved shirts or “sleeves” must be worn to cover the tattoos.
  - Except for pierced ears, body piercings with jewelry (brow, nose, tongue, and/or lip) are not allowed.
- Jewelry must be kept to a minimum for safety and to be consistent with professional appearance. Jewelry may include only a watch, wedding ring, engagement ring, and small-post earrings if ears are pierced (only one pair of post earrings).
- Nails must be clean, short and neatly trimmed. A clear or natural color nail polish is permitted. Artificial nails and nail wraps or extenders are not permitted.

Associate Degree in Nursing students must read the ADN Nursing Handbook for supplemental program policies.
LVN TO RN ASSOCIATE DEGREE IN NURSING PROGRAM

113 Units (The approximate time to complete the program will vary according to the start and end dates of a cohort and ranges from 24 – 25 months, including school and national holidays, breaks between terms, a one week break at Thanksgiving and a two week break in December.)

Employment Job Title: Registered Nurse

The LVN to RN associate degree program is designed for Licensed Vocational Nurses who want to take the next step in their medical career. This program allows currently licensed Vocational Nurses to transfer their education from their LVN studies to the required course work needed for the LVN-to-ADN program. Students who satisfactorily complete all required courses and pass the program exit examination at the required level will be awarded an Associate of Science in Nursing degree, and a notice will be sent to the Board of Registered Nursing of satisfactory completion (for licensing exam authorization).

Program Total: 113

*This course is delivered in an online format.

LVN TO RN 45 UNIT OPTION

42 Units (Total time to complete the program may vary based on school holidays and breaks and averages 10 months).

Employment Job Title: Registered Nurse

Licensed Vocational Nurses (LVNs) who desire to complete the minimum number of units required to take the licensure examination may apply for this option. LVNs who select the “30- Unit Option” method to satisfy the requirements for licensure as a Registered Nurse must consult the Director of Nursing (RN Programs) for an individual program consultation to discuss the advantages and disadvantages of this option prior to enrollment. Students who satisfactorily complete all required courses and pass the program exit examination at the required level will be awarded Diploma, and a notice will be sent to the Board of Registered Nursing of satisfactory completion (for licensing exam authorization).

BACHELOR OF SCIENCE IN NURSING PROGRAM (Degree Completion)

180 Quarter Credit Hours * (The approximate time to complete the program will vary according to the start and end dates of a cohort and ranges from 23 – 24 months, including school and national holidays, breaks between terms and a two week break in December.)

The Bachelor of Science in Nursing program is a post-licensure RN to BSN program for nurses who already possess an associate degree.

This program is delivered online and includes an on-ground clinical component.

Employment/Job Title: Registered Nurse (RN), Staff RN (Staff Registered Nurse), Director of Nursing, Staff Nurse, Charge Nurse, Relief Charge Nurse, Nurse Educator, Director of Staff Development.

Upon completion of the following requirements, Stanbridge University will confer the Bachelor of Science in Nursing degree.

- Scholarship requirements: a final GPA of 2.0 for all units attempted at Stanbridge University is required to graduate.

*Note: Completion of the 90 total quarter hours of credit, when added to the 90 quarter hours of transferred credit from the required associate degree, will total the 180 quarters hours of credit required for a bachelor’s degree in nursing.

†This course includes a virtual clinical component which is not included in the cost of the program.

††This course includes an on-ground clinical component of 75 hours.
CATALOG SUPPLEMENT FOR BSN STUDENTS

INCOMPLETE COURSES

If a student is passing the course before Week Five and has a compelling reason, such as an illness or the death of a relative, so that the student cannot complete the course by the end date, the student may apply in writing to the instructor to take an incomplete for the course. The incomplete must be approved by the instructor and program director by the first day of Week Five. The instructor and student will complete an Incomplete Agreement that will state what work will need to be completed and set a date for work submission in the agreement to within 10 days of the end of the course. All incomplete work must be submitted by 11:59 p.m. on the date stipulated in the Incomplete Agreement.

A reduction of one letter grade will be assessed for any course in which a student elects to take an incomplete. The student must be passing the course at the time the incomplete is granted. Discussion Boards will not be included in the work to be completed for the course.

FAILED COURSES

There is no remediation for a failed course in the Bachelor of Science in Nursing program. No coursework will be accepted for a course after the course has been completed, except in cases where an incomplete has been granted. Students who fail a course will need to repeat the course at a later date.

LATE SUBMISSION OF ASSIGNMENTS

Technological issues are not valid grounds for the submission of late assignments. If a student has difficulty uploading his or her assignment or thinks the assignment might not have uploaded correctly, the student must email his or her instructor about the difficulty and send the instructor a copy of the assignment via email before the deadline for the assignment. The assignment will not be considered late if it has been sent to the instructor via email before the deadline.

The instructor will acknowledge receipt of the assignment within 24 hours of receiving it and whether the assignment was actually uploaded into Edverum even though the student thought it had not been uploaded correctly. If the instructor states that the assignment is still not in Edverum, the student must contact the Assistant Director for Online Learning, and the latter will assist the student with correctly uploading his or her assignment. If a student does not follow the foregoing procedure, his or her paper will be considered late and graded accordingly.
MASTER OF SCIENCE IN NURSING PROGRAM

48 Quarter Credit Hours (The approximate time to complete the program will vary according to the start and end dates of a cohort and ranges from 24 – 25 months including school and national holidays, breaks between terms and a two week break in December.) This program is delivered completely online. Students will choose from Nurse Educator or Nurse Executive elective concentrations.

**Employment/Job Title:** Registered Nurse (RN), Staff RN (Staff Registered Nurse), Director of Nursing, Staff Nurse, Charge Nurse, Relief Charge Nurse, Nurse Educator, Director of Staff Development.

Upon completion of the following requirements, Stanbridge University will confer the Master of Science in Nursing degree.

- **Scholarship requirements:** An average of 2.0 is required to be achieved for each course in the program and a final GPA of 3.0 for all units attempted at Stanbridge University is required to graduate.

ASSOCIATE OF SCIENCE IN VETERINARY TECHNOLOGY PROGRAM

1894.5 Clock Hours/115 Quarter Credit Hours (The approximate time to complete the program will vary according to the start and end dates of a cohort and ranges from 23 – 24 months, including school and national holidays, breaks between terms, a one week break at Thanksgiving and a two week break in December.)

The Associate of Science in Veterinary Technology program prepares graduates to enter the field as professional veterinary team member. Upon passing state licensing requirements, which may include a background check, graduates may seek employment as veterinary technicians. Veterinary technicians assist veterinarians in a variety of duties, including observing the behavior and condition of animals; monitoring their clinical symptoms; maintaining controlled drug inventory and related log books; administering anesthesia to animals under the direction of a veterinarian; performing laboratory tests on blood, urine, and feces; administering first aid, such as emergency resuscitation or other life-saving procedures; preparing and administering medications, vaccines, or treatments; filling prescriptions; collecting samples for laboratory testing; and taking and developing diagnostic radiographs.

Employment/Job Title: Veterinary Technician, Veterinary Technician (Vet Tech), Registered Veterinary Technician (RVT)

Upon completion of the following requirements, Stanbridge University will confer the Associate of Science in Veterinary Technology degree.

As of March 1, 2014, upon graduation from the Associate of Science in Veterinary Technology program, students must pass the Veterinary Technician National Examination (VTNE) and the California Technician Examination and apply to the California Veterinary Medical Board to receive a California veterinary technician license and thus become eligible for employment as a Registered Veterinary Technician (RVT). The VTNE is given three times per year and is administered by the American Association of Veterinary State Boards (AAVSBB). The California Registered Veterinary Technician Examination will be administered by the California Veterinary Medical Board, but a timeline has not been published regarding the frequency of the examination. The current California Registered Veterinary Technician Examination administered by the California Veterinary Medical Board is offered continuously.

Scholarship requirements: A 2.0 GPA must be achieved for each course in the program and thus a cumulative GPA of 2.0 must be achieved in order to graduate from the program.

**CATALOG SUPPLEMENT FOR VETERINARY TECHNOLOGY STUDENTS**

**VACCINATIONS**

All students enrolled in the veterinary technology program are required to have proof of tetanus toxoid immunization and preexposure rabies immunization and/or proof of a protective titer (where appropriate). Within 30 days of enrollment, students must provide proof of rabies vaccination or a protective titer against rabies and proof of tetanus toxoid immunization within 5 years prior to enrollment. Students unable to provide proof of vaccinations or protective titers will be expected to participate in a vaccination program coordinated by the university which is included in the cost of the program.

Immunity to tetanus and rabies must be documented by either:
1. Written documentation providing evidence of current immunization for each organism.
2. Laboratory results verifying immunity.

**Rabies:** Rabies is a preventable viral disease of mammals most often transmitted through the bite of a rabid animal. Rabies virus infects the central nervous system, causing encephalopathy and ultimately death. Preexposure rabies vaccination is recommended for persons in high-risk groups, such as veterinarians,
veterinary technicians, animal handlers, and laboratory workers. Preexposure prophylaxis is given for several reasons. First, although preexposure vaccination does not eliminate the need for additional medical attention after a possible rabies exposure, it simplifies therapy by eliminating the need for human rabies immune globulin (HRIG) and decreasing the number of vaccine doses needed, and it minimizes adverse reactions to multiple doses of vaccine. Second, it may enhance immunity in persons whose postexposure therapy might be delayed. Finally, it may provide protection to persons with an apparent exposure to rabies.

**Tetanus:** Tetanus is an acute, often fatal, disease caused by an exotoxin produced by *Clostridium tetani*. It is characterized by generalized rigidity and convulsive spasms of skeletal muscles. The muscle stiffness usually involves the jaw (lockjaw) and neck and then becomes generalized. Seizures and death may occur. *C. tetani* is a bacterial organism widely distributed in soil and in the intestine and feces of horses, sheep, cattle, dogs, cats, rats, guinea pigs, and chickens. The organism usually enters the body through an open wound. Persons who received childhood tetanus toxoid vaccines (DTP) typically only receive booster vaccines every 10 years.

Students absent from on-campus health clinics are required to complete and provide proof of the aforementioned information within two weeks. Any absences accrued due to missing health records will be unexcused. Also, any student who fails to submit the required health records by the due date will receive a Notice of Deficiency and will not be allowed to participate in activities involving live animals.

**STUDENT RESPONSIBILITIES AT CLINICAL FACILITIES**
Students are responsible for the following while at clinical facilities (this includes facilities visited during VET 1100, VET 1200, VET 1300, VET 2000, VET 2100, VET 2200, and VET 2300 or any other ASVT course):
- Protecting, first and foremost, the health and safety of patients at clinical facilities.
- Honoring the preservation of client/patient privacy by scrupulously observing confidentiality of client/patient information. Violation of client/patient confidentiality may lead to dismissal of the student from the program.
- Seeking the guidance of a Stanbridge University instructor or clinical site when unsure of what to do.
- Arranging for transportation to and from school, clinical facilities, and other designated locations for instruction in the ASVT program. Students are responsible for arranging their personal schedules to meet prearranged facility schedules.
- Making the didactic and clinical schedule in the ASVT Program the top priority in their personal schedule.
- Abiding by the rules and regulations of the clinical facilities.
- Notifying the externship and preceptorship site and their instructor of any absences from a clinical facility. Failure to notify the site and their instructor will result in disciplinary action up to and including dismissal from the program.

**STUDENT ACKNOWLEDGEMENT OF RISK**
Veterinary Technology students will be required to sign, as a condition of their presence in clinical facilities, the following acknowledgement:

```
I understand that due to my attendance at various veterinary clinical facilities, I will be exposed to potentially dangerous animals as well as potentially infectious materials and diseases. I agree to follow all clinical facility protocols regarding patient safety, personal safety, and all other protocols I have been taught at school.

I hereby confirm that I will seek the direction of my instructor or a facility supervisor should I be unclear as to how to proceed with patient treatment or any other procedure, protocol, or process at the clinical facility.

I hereby indemnify and hold harmless Stanbridge University, its employees, agents, owners, and partnering clinical facilities from any liability pertaining to any infectious disease, illness, or injury I may acquire or get as a result of my attendance at clinical facilities.
```
Shoes and Stockings
- Shoes must have a rubber/non-conductive sole and completely cover the foot, including the heel and toes.
- Shoes must be clean at all times.
- During visits to large animal facilities, closed toed, sturdy boots that can be fully disinfected are required.

Jewelry, Hair, and Nails
- The only visible, pierced jewelry that is acceptable is a small, single, stud earring. Hoops, rings, or dangling earrings are not allowed. Jewelry on other visible parts of the body are not allowed.
- For men: Facial hair must be neatly trimmed and permit proper fit of personal protective equipment.
- Rings may be worn but may need to be removed during surgery rotation.
- A watch with a second hand is mandatory at all times.
- Hair must be pulled back out of the face and off the shoulders during labs. Hair color must be of a natural color; faddish or unnatural colors or styles are not permitted.
- Nails must be trimmed and kept clean at all times. Only clear nail polish is acceptable – other colors/designs are not allowed. Artificial nails are not allowed during surgical rotations.

Tattoos
- Tattoos and piercings are discouraged while in school due to increased chance of infection and the ability to comply with Stanbridge and hospital policy.
- Tattoos cannot be visible. Black, long sleeved shirts or “sleeves” must be worn with scrubs to cover any tattoos.

(Note: Clinical facilities may have uniform regulations in addition to the requirements listed above. Students must comply with any additional uniform requirements at the clinical facilities in the program.)

Students not in compliance with the uniform standards policy will be issued a Notice of Deficiency and repeated violations may result in disciplinary measures up to and including dismissal from the program.

PERSONAL PET POLICY
It is the policy of the ASVT program that no animals of any type be brought or allowed on campus property without prior permission from the course instructor or program director. The veterinary technology program may, at times, invite certain people to bring certain animals to campus for participation in teaching laboratories. However, veterinary technology students, like any other student on campus, cannot make the decision to bring their personal pet(s) to campus without specific, prior invitation and/or permission from a veterinary technology program faculty member. In addition, it is inappropriate for animals to be maintained in your personal vehicle during any classroom or laboratory session. If a student is found to have an animal in their vehicle during class hours, the student will be asked to leave and return without the animal. The student will be issued a Notice of Deficiency and may be subject to dismissal from the program.

STUDENT LIABILITY INSURANCE
The university provides professional liability insurance (malpractice insurance) for all students during all levels of clinical education. Students are required to provide their own health insurance. The student should carry a copy with him/her to the clinical facility as the student may be requested to provide it to the facility for its records.
PROGRAMS AND COURSES

COURSE DESCRIPTIONS

Business Courses

BUS 1110 Project Management
This course will provide students with the ability to discern their role as project managers and team members and to describe the process of turning a project mandate into quality results that are on time and on budget.

Information Technology Courses

CIS 1005 Microsoft Office Suite Installation and Use
This course provides students with theory and practice in installing, configuring, and repairing the Microsoft Office suite of applications with additional instruction for employment of the capabilities of Microsoft Word, Excel, PowerPoint, and Outlook 2010.

CIS 1006 Computer Applications
This course provides students not enrolled in IT courses instruction and hands-on practice with word processing software, spreadsheets, presentation software and email clients. Microsoft Office applications are used in the labs, while course topics are applicable to most common packages. Common professional communication formatting and email etiquette are included in the instruction.

CIS 1011 Computer Applications I
This course provides students not enrolled in IT courses with instruction and hands-on practice with Microsoft Word word processing software, PowerPoint, and Excel. Microsoft Office applications are used in the labs, while course topics are applicable to the most common Office suite applications. Common professional communication (letter) formatting is included in the instruction. Students will use PowerPoint to create presentations, including transitions and animations. Guidelines for effective presentations are covered. Students will create data tables, format, and sort data, create charts, and identify causes of Excel errors.

CIS 1012 Computer Applications II
This course provides students not enrolled in IT courses with instruction and hands-on practice with Microsoft Office Outlook and introduction to Veterinary Office software. Proper formatting and content of business emails is covered.

CIS 1010 PC Hardware and Operations
This course will prepare the student at a level of knowledge equal to a PC technician working in the field with six months of on the job training. The course covers PC hardware installation, configuration and troubleshooting, Microsoft OS (Windows 2000 to Windows 7) installation, configuration, troubleshooting and networking.

CIS 1020 Networking Functions and Operating Systems I
This course introduces students to Windows and to the networking technologies it supports. Students will be able to describe user accounts and security, identify the tools used to perform administrative tasks in a Windows-based network, and identify the networking architecture and protocols associated with networks. Students will be able to identify the hardware and software components required for network communication, including Remote Access Services, Web Services, and utilities for network maintenance.

CIS 1025 Networking Functions and Operating Systems II
This course provides students with the knowledge and skills to install and configure Windows 7 desktops, focusing on: installing, securing, networking, and browsing. It also provides students with the knowledge and skills to successfully configure mobile computers and applications that run Windows 7.

CIS 1050 Network Troubleshooting
This course prepares students to build networks from the hardware components (cables, connectors, network cards, hubs, switches, routers, and wireless access points), ensure connectivity and troubleshoot problems. Use of software utilities for connectivity and detection/removal of malware are used in the labs.

CIS 1111 Implementing Windows Clients in a Domain Environment
This course provides students with the knowledge and skills to install and configure Windows 7 desktops, focusing on: installing, securing, networking, and browsing. It also provides students with the knowledge and skills to successfully configure mobile computers and applications that run Windows 7.
CIS 1120 Introduction to Open Source Systems and Linux
This course is an introduction to GNU/Linux on stand-alone PCs. Topics covered include installing a distribution of the operating system, configuring video and network hardware, managing processes, creating, and managing user accounts, creating storage mount points, and installing applications.

CIS 2020 Network Security Concepts and Practices
This course provides the student with the basics of Network Security, including General Security Concepts, Communication Security, Infrastructure Security, the basics of Cryptology, and Operational and Organizational Security. The material prepares a student to pass the CompTIA Security+ examination.

CIS 2125 Installing and Configuring Windows Server
This course covers the initial implementation and configuration of core services including Active Directory Domain Services (AD DS), networking services, and Microsoft Hyper-V Server 2012 configuration. It includes lecture and labs on managing active directory objects, IPv4 and IPv6, implementation of group policy and local storage for file and print sharing.

CIS 2111 Configuring a Windows Server 2008 Network Infrastructure
This course provides students with the knowledge and skills to configure and troubleshoot a Windows Server 2008 network infrastructure. Students will learn to implement and configure secure network access and implement fault tolerant storage technologies, gain an understanding of the network technologies most commonly used with Windows Server 2008 and IP-enabled networks (including IPv6), and learn how to secure servers and maintain update compliance.

CIS 2141 Windows Server 2008 Active Directory Domain Services
This course provides Active Directory Technology Specialists with the knowledge and skills to configure Active Directory Domain Services in a distributed environment, implement Group Policies, perform backup, and restore, and monitor and troubleshoot Active Directory related issues.

CIS 2135 Administering Windows Server
This course covers the administration tasks necessary to maintain a Windows Server 2012 infrastructure such as Implementing Server Images, User, and Group management with Active Directory Domain Services (AD DS) and Group Policy, Remote Access and Network Policies, Data Security, Monitoring, and Update Management.

CIS 2145 Advanced Windows Server Services
This course covers advanced configuration of services necessary to deploy, manage and maintain a Windows Server 2012 infrastructure, such as advanced networking services, Active Directory Domain Services (AD DS), identity management, rights management, Federated services, network load balancing, failover clustering, business continuity and disaster recovery.

CIS 2211 LAN/WAN Routing and Switching Concepts I
This course focuses on providing the skills and knowledge necessary to install, operate, and troubleshoot a small branch office Enterprise network, including configuring a switch, a router, and connecting to a WAN and implementing network security.

CIS 2212 LAN/WAN Routing and Switching Concepts II
This course focuses on providing the skills and knowledge necessary to install, operate, and troubleshoot a small to medium-size branch office Enterprise network, including configuring several switches and routers, connecting to a WAN, and implementing network security.

CIS 2420 SharePoint Server 2010 Administration
This course is designed to validate the skills needed to plan, install, configure, and administer SharePoint Server 2010 in a team-based, medium - large environment. This class teaches you the latest generation of the SharePoint that helps information technology (IT) professionals maximize control over their infrastructure while providing mission-critical business collaboration tools that allows their people to produce the best results.

CIS 2430 PowerShell Scripting
PowerShell increases administrator productivity by automating repetitive tasks and ensuring complex, error-prone routines are performed consistently. Students gain practical experience using PowerShell to solve both one-time and recurring administrative challenges.
CIS 2511 Planning and Administering Windows Server 2008
This course provides students with the knowledge and skills to implement, monitor, and maintain Windows Server 2008 servers: plan the installation of server roles; create a configuration change plan; plan and implement Windows Server 2008 security; manage application versioning; and plan for a high-availability Windows Server 2008 deployment.

CIS 2611 Configuring Exchange Server 2010
This course provides students the knowledge to configure and manage a messaging environment: installing Microsoft Exchange Server 2010; manage routing; client access; techniques to monitor and troubleshoot an Exchange Server 2010 messaging system; and the backup and restoration of databases. They will also learn how to manage addressing and recipient objects such as mailboxes, distribution groups, and contacts; managing messaging security and policies and how to manage spam, anti-virus, and content filtering.

CIS 2640 Administering and Securing Wireless Networks
This course provides students with the knowledge and skills to set up, configure and secure enterprise wireless networks, including RF technologies, wireless standards, antenna concepts, network design, performance tuning, 802.11 network architectures, and site survey techniques.

CIS 2680 Network Intrusion Detection and Prevention
This course is designed to make network administrators aware of the security related issues and the essential skills they need to implement security in a given network.

CIS 3110 Configuring Server 2008 Applications Infrastructures
This course provides knowledge and skills for deploying Server 2008, installing, and tuning an Internet Information Services web server and configuring Terminal Services for remote connections to a Windows Active Domain.

CIS 3120 MCITP Enterprise Administrator
This course will prepare IT professionals for the role of Enterprise Administrator. Students will learn how to design application infrastructure solutions based on Windows Server 2008 to meet varying business and technical requirements.

CIS 3130 Advanced Routing I
This course teaches students how to implement, monitor, and maintain routing services in an enterprise network. Students will learn how to plan, configure, and verify the implementation of complex enterprise LAN and WAN routing solutions, using a range of routing protocols in IPv4 and IPv6 environments.

CIS 3140 Advanced Routing II
This course covers the configuration of secure routing solutions to support branch offices and mobile workers. Comprehensive labs emphasize hands-on learning and practice to reinforce configuration skills.

CIS 3150 Advanced Switching I
This course teaches students how to implement, monitor, and maintain switching in converged enterprise campus networks. Students will learn how to configure and verify the implementation of complex enterprise switching solutions. Labs emphasize hands-on learning and practice to reinforce configuration skills.

CIS 3160 Advanced Switching II
This course teaches students how to plan, configure, and verify the implementation of complex enterprise switching solutions. The course also covers the secure integration of VLANs, WLANs, voice, and video into campus networks. Comprehensive labs emphasize hands-on learning and practice to reinforce configuration skills.

CIS 3170 Advanced WAN Troubleshooting I
This course teaches students how to monitor and maintain IP networks. Skills learned include the planning and execution of regular network maintenance, based on systematic and industry recognized approaches. Labs emphasize hands-on learning and practice to reinforce troubleshooting techniques.

CIS 3180 Advanced WAN Troubleshooting II
This course teaches students how to monitor and maintain more complex, enterprise routed and switched IP networks. Skills learned include support and troubleshooting using technology-based processes and best practices, based on systematic and industry recognized approaches. Extensive labs emphasize hands-on learning and practice to reinforce troubleshooting techniques.
CIS 3610 Virtual Server Technologies
This course provides the skills to effectively deploy and administer VMWare virtual servers in the large business and enterprise environment.

CIS 4110 Database Server Tools
This course serves as an introduction to Microsoft SQL databases and the theory of relational databases in general. Syntax of SQL queries, normalization, tables, stored procedures, transactions, and control language are covered.

CIS 4210 Advanced Scripting
This course provides a comprehensive introduction to writing shell scripts. Besides covering fundamental syntax for program flow control, variable assignment and substitution, I/O control, and mathematical expressions, it emphasizes the powerful features that are unique to this shell, including built-in string operators, variable typesetting/ conversion, functions, and coprocess communication and control.

CIS 4410 Ethical Hacking
This course immerses the student into an interactive environment where they practice how to scan, test, hack and secure their own systems. The lab intensive environment gives each student in-depth knowledge and practical experience with the current essential security systems.

CIS 4420 Installing and Configuring Databases
This course provides students with instruction on writing queries and working with database entities by using the T-SQL language, creating, modifying, and deleting tables, modifying data with T-SQL statements, handling errors and optimizing the database.

CIS 4430 Maintaining Databases
This course builds skills to administer Microsoft SQL Server 2012, a cloud-ready information platform that will help organizations unlock breakthrough insights and quickly build solutions to extend data across on-premises and public clouds, backed by mission critical confidence. The course focuses on teaching individuals how to use SQL Server 2012 product features and tools related to maintaining a database.

CIS 4510 Systems Security Control and Procedures
This course provides comprehensive training in the seven domains of the Common Body of Knowledge (CBK) leading to SSCP or Associate of ISC2 certification. The course teaches security policy development, secure software development procedures, network vulnerabilities, attack types and corresponding countermeasures, cryptography concepts and their uses, disaster recovery plans and procedures, risk analysis, crucial laws and regulations, forensics, computer crime investigation procedures, physical security, and more.

Nursing Courses

CLI 2215A Term 1 Clinical Skills Lab and CLI 2215B Term 1 Clinical
This course is conducted at clinical facilities to expose the Vocational Nurse student to nursing functions appropriate to the term and experience level of the student nurse. CLI 2215A clinical sessions occur in the Skills Lab and CLI 2215B sessions are held in clinical facilities.

CLI 2216A Term 2 Prefacility Clinical Proficiency and CLI 2216B Term 2 Clinical
This course is conducted at clinical facilities to expose the Vocational Nurse student to nursing functions appropriate to the term and experience level of the student nurse. CLI 2216A is conducted in the Skills Lab to confirm the student's readiness to perform the additional responsibilities expected of a Term 2 Student Nurse.

CLI 2217A Term 3 Prefacility Clinical Proficiency and CLI 2217B Term 3 Clinical
This course is conducted at clinical facilities to expose the Vocational Nurse student to nursing functions appropriate to the term and experience level of the student nurse. CLI 2217A is conducted in the Skills Lab to confirm the student's readiness to perform the additional responsibilities expected of a Term 3 Student Nurse.

CLI 2214 Term 4 Clinical
This course is conducted at clinical facilities to expose the Vocational Nurse student to nursing specialties appropriate to the term and experience level of the student nurse. Clinical practice in Mental Health, Maternal and Pediatric facilities is included during this term.
MED 2060 Nursing Fundamentals I
This is the first of three courses that are the theoretical base for application of the nursing process at a basic level. They serve as an introduction to the history and theory of nursing, the nursing process, family nursing, nutrition, and trans-cultural concepts, as well as an introduction to the clinical setting, including ambulatory, acute, and/or long-term health care environment. The anatomy topics present an analysis of human structure integrating cellular, tissue, organ, and organ system levels of structure and relates structure to function, as well as emphasis on major organ systems and their significance in maintaining homeostasis of the whole body. Understanding of terminology for position and combinational forms is paramount.

MED 2061 Nursing Fundamentals II
This is the second of three courses that are the theoretical base for application of the nursing process at a basic level. They serve as an introduction to the history and theory of nursing, the nursing process, family nursing, nutrition, and trans-cultural concepts, as well as an introduction to the clinical setting, including ambulatory, acute, and/or long-term health care environment. The anatomy topics present an analysis of human structure integrating cellular, tissue, organ, and organ system levels of structure and relates structure to function, as well as emphasis on major organ systems and their significance in maintaining homeostasis of the whole body. Understanding of terminology for position and combinational forms is paramount.

MED 2062 Nursing Fundamentals III
This is the third of three courses that are the theoretical base for application of the nursing process at a basic level. They serve as an introduction to the history and theory of nursing, the nursing process, family nursing, nutrition, and trans-cultural concepts, as well as an introduction to the clinical setting, including ambulatory, acute, and/or long-term health care environment. The anatomy topics present an analysis of human structure integrating cellular, tissue, organ, and organ system levels of structure and relates structure to function, as well as emphasis on major organ systems and their significance in maintaining homeostasis of the whole body. Understanding of terminology for position and combinational forms is paramount.

MED 2044 Pharmacology Fundamentals
This course covers basic concepts of pharmacology including targeted systems, safeguards, and delivery of drug medications. Expected effects, adverse effects, and side effects are emphasized. Units of measurement and beginning dosage calculations are included.

MED 2045 Integumentary System
This course is the first of five beginning medical-surgical nursing courses that focus on providing nursing care to adult patients in a variety of settings, including care planning and implementation, application of medical/surgical, supervision and pharmacological classroom content to the clinical situation. Treatment of clients with compromised integumentary systems is taught. The role of the LVN and teamwork/communication with other members of the healthcare team is emphasized.

MED 2046 Sensory System
This course is the second of five beginning medical-surgical nursing courses that focus on providing nursing care to adult patients in a variety of settings, including care planning and implementation, application of medical/surgical, supervision and pharmacological classroom content to the clinical situation. Treatment of clients with compromised sensory systems is taught. The role of the LVN and teamwork/communication with other members of the healthcare team is emphasized.

MED 2047 Musculo-Skeletal System
This course is the third of five beginning medical-surgical nursing courses that focus on providing nursing care to adult patients in a variety of settings, including care planning and implementation, application of medical/surgical, supervision and pharmacological classroom content to the clinical situation. Treatment of clients with compromised musculo-skeletal systems is taught. The role of the LVN and teamwork/communication with other members of the healthcare team is emphasized.

MED 2048 Digestive System
This course is the fourth of five beginning medical-surgical nursing courses that focus on providing nursing care to adult patients in a variety of settings, including care planning and implementation, application of medical/surgical, supervision and pharmacological classroom content to the clinical situation. Treatment of clients with compromised digestive systems is taught. The role of the LVN and teamwork/communication with other members of the healthcare team is emphasized.
MED 2049 Fluid and Electrolyte Balance and Renal System
This course is the fifth of five beginning medical-surgical nursing courses that focus on providing nursing care to adult patients in a variety of settings, including care planning and implementation, application of medical/surgical, supervision and pharmacological classroom content to the clinical situation. Treatment of clients with compromised renal systems is taught. Fluid and electrolyte balance is also covered. The role of the LVN and teamwork/communication with other members of the healthcare team is emphasized.

MED 2050 Emergency and Surgical Nursing
This course is an introduction to nursing care in the perioperative environment and responses to emergency situations.

MED 2051 Cardiovascular System
This course is the first of five intermediate medical-surgical nursing courses that focus on providing nursing care to adult patients in a variety of settings, including care planning and implementation, application of medical/surgical, supervision and pharmacological classroom content to the clinical situation. Treatment of clients with compromised cardiovascular systems is taught. The role of the LVN and teamwork/communication with other members of the healthcare team is emphasized.

MED 2052 Immune System
This course is the second of five intermediate medical-surgical nursing courses that focus on providing nursing care to adult patients in a variety of settings, including care planning and implementation, application of medical/surgical, supervision and pharmacological classroom content to the clinical situation. Treatment of clients with compromised immune systems is taught. The role of the LVN and teamwork/communication with other members of the healthcare team is emphasized.

MED 2053 Oncology
This course is the third of five intermediate medical-surgical nursing courses that focus on providing nursing care to adult patients in a variety of settings, including care planning and implementation, application of medical/surgical, supervision and pharmacological classroom content to the clinical situation. Treatment of clients with cancer is taught. The role of the LVN and teamwork/communication with other members of the healthcare team is emphasized.

MED 2054 Respiratory System
This course is the fourth of five intermediate medical-surgical nursing courses that focus on providing nursing care to adult patients in a variety of settings, including care planning and implementation, application of medical/surgical, supervision and pharmacological classroom content to the clinical situation. Treatment of clients with compromised respiratory systems is taught. The role of the LVN and teamwork/communication with other members of the healthcare team is emphasized.

MED 2056 Endocrine System
This course is the fifth of five intermediate medical-surgical nursing courses that focus on providing nursing care to adult patients in a variety of settings, including care planning and implementation, application of medical/surgical, supervision and pharmacological classroom content to the clinical situation. Treatment of clients with compromised endocrine systems is taught. The role of the LVN and teamwork/communication with other members of the healthcare team is emphasized.

MED 2057 Neurological System
This course in advanced medical-surgical nursing focuses on providing nursing care to adult patients in a variety of settings, including care planning and implementation, application of medical/surgical, supervision and pharmacological classroom content to the clinical situation. Treatment of clients with compromised nervous systems is taught. The role of the LVN and teamwork/communication with other members of the healthcare team is emphasized.

MED 2058 Reproductive and Maternal Nursing
This course discusses the antepartum, intrapartum, and postpartum nursing care and goals, fetal development, and the importance of nutrition and diagnostic requirements. Client education regarding use of drugs and alcohol during pregnancy is stressed. Care of the neonate is covered in this course.

MED 2059 Pediatric Nursing
Pediatric care is focused on providing nursing care for infants, children, and their families, with an emphasis on family-centered nursing, education, health promotion and illness prevention. Normal growth, development patterns of the growing child and nursing needs in areas of functional physiological, social, and psychological
integrity are exercised in the clinical environment. Calculation of pediatric dosages for pharmaceutical products and pediatric nutrition are covered.

**MED 2107 Nursing Leadership and Supervision**
This course introduces students to Vocational Nurse leadership and management practices. It shows the role of communication skills and critical thinking as the basis for leadership and management decisions, and the legal and ethical implications of those decisions and their relevance to professional standards.

**MED 2118 Mental Health Nursing**
This course is an introduction to the major concepts, theoretical perspectives, and empirical findings in psychology, oriented to optimizing patient interaction techniques, including the role of the vocational nurse on the mental health care team. Substance abuse and addiction are discussed.

**MED 2115 Community Nursing**
This course introduces students to the role of the Licensed Vocational Nurse under the Vocational Nursing Practice Act, customer-centric service delivery and career goal achievement. Rehabilitative nursing and ambulatory care are discussed. Ethics, informed consent, advance directives, and other medico-legal topics are covered. Home care, hospice care and disaster nursing are covered.

**MED 2261 Term 1 Cumulative Exam**
This course is a review of Term I concepts, with application of theory and critical thinking to NCLEX exam-style questions. Topics presented in Term I are reviewed. Test taking techniques and stress-reduction practices are also presented.

**MED 2262 Term 2 Cumulative Exam**
This course is a review of Term II concepts, with application of theory and critical thinking to NCLEX exam-style questions. Topics presented in Term II are reviewed. Test taking techniques and stress-reduction practices are also presented.

**MED 2263 Term 3 Cumulative Exam**
This course is a review of Term III concepts, with application of theory and critical thinking to NCLEX exam-style questions. Topics presented in Term III are reviewed. Test taking techniques and stress-reduction practices are also presented.

**MED 2264 Exit Exam and NCLEX Preparation**
This course is a review of Term I-IV concepts, with application of theory and critical thinking to NCLEX exam-style questions. Topics presented in Term I-IV are reviewed. Test taking techniques and stress-reduction practices are also presented. MED 2264 includes 40 hours of review preparation for greater success taking the National Council of State Boards of Nursing NCLEX-PN® licensing examination.

**NUR 1060 Gerontology**
Prerequisite: Admission to the nursing program; will be taken concurrently with NUR 1100
This course will provide the student with the foundation for nursing practice with the older adult client. The physical and psychosocial changes associated with aging will be examined including adaptive behaviors in the normal aging person. Health and socialization, financial considerations, legal considerations of the aging client, cultural needs and interaction with the healthcare system. The need for multidisciplinary interaction with the aging client will be discussed. Common concerns of an aging population will be covered within the course.

**NUR 1100 Fundamentals of Nursing I**
Prerequisite: Completion of Anatomy, Physiology, and Microbiology with a grade of C+ or better, English Composition and College Algebra I with a grade of C+ or better
This course provides the foundation for nursing practice for the student at the beginning level using the NLN Educational Competencies Model. Nursing historical, educational, ethical, and legal concepts as well as principles of safety, evidence-based practice and quality, physical and psychosocial assessment, pharmacology, informatics, therapeutic communication, nutrition, sleep/rest, bowel and bladder elimination, geriatric nursing and wellness care are examined. Students are introduced to utilization of the nursing process, critical thinking, therapeutic communication, and basic nursing skills. Students will begin to use health assessment while providing care for adult and geriatric clients with predictable outcomes and their families in the non-acute and/or acute care settings. Multicultural considerations including gender, ethnicity, sexuality, and age are explored in relation to providing effective nursing care. Skills lab and simulation scenarios will be used to reinforce concepts learned during theory instruction.
NUR 1101 Medication Administration
Co-requisite: NUR 1100  1.5 Units
The course focuses on development of the knowledge and attitudes to ensure client safety while administering medications. Key concepts include therapeutic communication, health teaching, preparation, and administration of medication by the topical, oral, nasogastric, intradermal, subcutaneous, and intramuscular routes. Students are introduced to the administration of intravenous fluids for hydration and the concepts of administering intravenous medications within the scope of the Nurse Practice Act. Client monitoring and the legal implication of documenting medication administration are incorporated. Focus is placed on meeting the holistic needs of the client within the scope of nursing practice throughout the life span. Skills lab and some simulation exercises will reinforce concepts learned in theory lectures.

NUR 1200 Fundamentals of Nursing II  4 Units
Prerequisite: NUR 1100 with a grade of C+ or better and a grade of Pass in NUR 1101
This course continues to provide the foundation for nursing practice for the student at the beginning level using the NLN Educational Competencies Model. Students will continue to implement critical thinking, therapeutic communication, and basic nursing skills and the nursing process as the foundation of nursing practice. Basic fluid, electrolyte and acid-base concepts, dysfunction in glucose homeostasis, visual and hearing dysfunction, pain, chronic, stable respiratory dysfunction, chronic, stable cardiovascular dysfunction, impaired mobility related to neuromusculoskeletal dysfunctions and psychosocial concepts are examined. Students will begin to use health assessment while providing care for adult and geriatric clients and their families in the non-acute and/or acute care settings. Multicultural considerations including gender, ethnicity, sexuality, and age are explored in relation to providing effective nursing care. Students will continue to learn to work collaboratively with other members of the interdisciplinary health care team to provide medical surgical/geriatric client care. Skills lab and some simulation exercises will reinforce concepts learned in theory lectures.

NUR 1201 Psychiatric Mental Health Nursing  6.5 Units
Prerequisite: NUR 1200 with a grade of C+ or better
In this course, students will apply the theoretical evidence-based nursing skills using the nursing process, therapeutic communication, and critical thinking in the care of mental health clients experiencing mental, psychological, and psychiatric disorders and conditions. Students will develop improved skills in communication, client teaching, psychopharmacology and collaboration between the nurse, the client and their family members. Students will learn to work as a member of an interdisciplinary healthcare team to provide mental health/psychiatric client care. Experience is gained in the acute care and/or community health settings to enhance the development of clinical competency in meeting the health care needs of mental health clients with mental, psychological, and psychiatric disorders and conditions. Communication and simulation scenarios will allow students to reinforce concepts learned during theory class.

NUR 1300 Medical-Surgical Nursing I  12 Units
Prerequisite: NUR 1201 with a grade of C+ or better
This course has an emphasis on application of the nursing process, therapeutic communication, basic nursing skills and critical thinking in meeting the health care needs of adult medical–surgical/geriatric clients across the lifespan experiencing acute and chronic problems requiring moderately complex nursing care. There is an increased emphasis on medical-surgical/geriatric client teaching and collaboration between the nurse, the medical-surgical/geriatric client and their family. Students will use the nursing process to identify and prioritize the health care needs of adult medical–surgical/geriatric clients with less predictable outcomes or who demonstrate a change in their health status while working as a member of an interdisciplinary healthcare team. Students will learn about stress and coping, religion, culture, perioperative nursing, complementary and alternative healing modalities, evidence-based practice, informatics, safety, nutritional disorders, metabolic dysfunction, hematologic dysfunction, endocrine dysfunction, immune and connective tissue disorders, gerontology, care of the older adult, oncology, chronic pain, and Hospice care and, neurological dysfunctions. Clinical experience is gained in the acute care health setting to enhance the development of clinical competency in meeting holistic health care needs of the adult and geriatric medical-surgical clients and their families. Skills lab and simulation scenarios will reinforce concepts learned in theory lecture.
NUR 1302V Transition to Nursing  
**Prerequisite:** Completion of Anatomy, Physiology, and Microbiology with a grade of C+ or better, English Composition with a grade of C or better and official admission to the nursing program for the LVN student

This course provides an introduction to the Associate of Science Degree Nursing Program. It is designed to assist the Advanced Placement Student to transition into the nursing program. The focus of this course is on the role of the entry level registered nurse. Topics covered include the conceptual framework and philosophy of the nursing program, the NLN Educational Model, the nursing process and the required skills needed to advance into the next quarter.

**NUR 1400 Medical-Surgical Nursing II**  
**Prerequisite:** NUR 1300 with a grade of C+ or better

This course has an expanded emphasis on application of the nursing process, therapeutic communication, basic nursing skills and critical thinking in meeting the health care needs of adult medical –surgical/geriatric clients across the lifespan experiencing acute and chronic problems requiring moderately complex nursing care. There is an increased emphasis on medical-surgical/geriatric client teaching and collaboration between the nurse, the medical-surgical/geriatric client and their family. Students will use the nursing process to identify and prioritize the health care needs of adult medical –surgical/geriatric clients with less predictable outcomes or who demonstrate a change in their health status while working as a member of an interdisciplinary healthcare team. Students will learn about evidence-based practice, care of the elderly, IV therapy, the client requiring blood and blood transfusion, cardiovascular dysfunction, renal disorders, and liver disorders. Clinical experience is gained in the acute care health setting to enhance the development of clinical competency in meeting holistic health care needs of the adult medical-surgical/geriatric clients and their families. Skills lab and simulation scenarios will reinforce concepts learned in theory lecture.

**NUR 1500 Maternal and Newborn Nursing**  
**Prerequisite:** NUR 1400 with a grade of C+ or better

The emphasis in this course is placed on the application of the nursing process, therapeutic communication, basic nursing skills and critical thinking in the care of the childbearing client experiencing pregnancy and delivery and her family. Client teaching and collaboration will occur between the nurse, the client and family members. Students are expected to utilize the nursing process to identify and prioritize the health care needs of clients undergoing labor and delivery, the neonate, and patients with reproductive health issues. Students will be working as a member of an interdisciplinary healthcare team and emphasis is placed on the acquisition of knowledge, skills and attitudes needed to function within the scope of nursing practice with the childbearing client and her family. Clinical experience is gained in the acute care and/or community health setting to enhance the development of clinical competency in meeting holistic health care needs of the childbearing client experiencing pregnancy and delivery and her family. Simulation scenarios will allow students to assimilate concepts that were introduced during theory presentations.

**NUR 1600 Family and Child Nursing**  
**Prerequisite:** NUR 1500 with a grade of C+ or better

This course has an emphasis on the application of the nursing process, therapeutic communication, advanced nursing skills and critical thinking in the care of infants, children, adolescents, and their families while performing client teaching and collaboration between the nurse, the client, and their family members. Students will use the nursing process to identify and prioritize the health care needs of pediatric/adolescent clients who may have increasingly less predictable outcomes and who may demonstrate a rapid change in their health status. Students will work as a member of an interdisciplinary health care team caring for children and their families. Experience is gained in the acute care and/or community health settings to enhance the development of clinical competency in meeting health care needs of infants, children, adolescents, and their families. Increased emphasis is placed on the acquisition of the knowledge, skills and attitudes needed to function within the role of the nurse within the scope of entry level nursing practice. Simulation scenarios will allow students to assimilate concepts that were introduced during theory presentations.

**NUR 1700 Advanced Nursing I**  
**Prerequisite:** NUR 1600 with a grade of C+ or better

This course allows application of all acquired concepts, theories, knowledge, and clinical skills when caring for acutely ill medical-surgical/geriatric clients with rapidly changing and complex health care needs and their families. Emphasis is placed on the integration and synthesis of the nursing process, therapeutic communication, time management, leadership and management and critical thinking for the acutely ill patient. Medication administration, nursing skills, client teaching, communication skills, legal and ethical responsibilities, professional trends and issues, accountability, organization and time management skills and leadership and management skills in meeting the holistic health care needs of adult and geriatric clients with
rapidly changing and complex health care needs is also stressed. Collaboration with members of the multidisciplinary health care team to modify the client’s plan of care is incorporated. Experience is gained in the acute care setting managing acutely ill clients with rapidly changing and complex health care needs and their families. Simulation scenarios will allow students to assimilate concepts that were introduced during theory presentations, including mock codes.

**NUR 1800 Advanced Nursing II**  
**Prerequisite:** NUR 1700 with a grade of C+ or better  
10.0 Units

This course emphasizes the synthesis of the application of the nursing process, with medication administration, nursing skills, client teaching, communication skills, legal and ethical responsibilities, professional trends and issues, accountability, organization and time management skills, leadership and management skills, collaboration with members of the interdisciplinary healthcare team and theories. Care for patient with acute geriatric dysfunctions is included. Concepts are expanded to include professional issues in nursing, critical thinking, legal-ethical issues, quality improvement, managing a group of clients and role transition. Emphasis is placed on the application of knowledge, skills and attitudes needed for the entry level registered nurse within the scope of nursing practice. Simulation scenarios will allow students to assimilate concepts that were introduced during theory presentations. Experience is gained in the acute care settings managing multiple clients with rapidly changing and complex health care needs and their families. This course will facilitate the student’s transition into an entry-level position as a graduate nurse.

**NUR 3013 Role Transformation in Nursing**  
This course focuses on the professional aspects of nursing. The current practice of nursing is examined and a framework is developed to meet professional and educational goals. Tools utilizing evidence-based practice are integrated throughout the course. The role of professional values, nursing knowledge, and professional practice are explored and compared to the student's current practice.

**NUR 3023 Health Promotion through the Life Cycle**  
This course explores the needs of children and adults requiring healthcare from infancy through the lifespan. Through a family-centered approach, the course addresses health problems in children and adults and the impact of illness on the family. Students correlate normal growth and development with care of individuals and families throughout the lifespan while promoting healthy lifestyle strategies. There will be a focus on current in the health care system as it relates to health promotion in the pediatric and adult population and the need for an emphasis on health promotion, maintenance, and restoration. The need for nurses to provide care to individuals in a variety of settings throughout their lifespan is explored.

**NUR 3033 Theoretical Models of Nursing**  
This course introduces the nature of nursing theory. Nursing theory is analyzed as a foundation for nursing practice and research. Origins of and strategies for theory development in nursing are examined in terms of importance for the development of professional nursing.

**NUR 3043 Evidence-Based Practice**  
This course focuses on evidence-based practice in nursing and healthcare as the basis for providing appropriate, efficient, and cost-effective care, treatment, and services through the use of current scientific and technological knowledge.

**NUR 3053 Healthcare Informatics**  
This course introduces students to the concepts and practices of health informatics. Topics include major applications and vendors, decision-making methods and technologies, information systems, and emerging trends.

**NUR 3063 Principles of Teaching**  
This course provides a comprehensive overview of key educational concepts for health professionals in all disciplines. The course covers teaching and learning strategies and techniques, learner characteristics, learning styles, and the evaluation of teaching and learning.

**NUR 3073A Pathopharmacology I**  
This course focuses on principles of normal and abnormal physiology applied to health care and nursing practice. Emphasis is placed on cellular, organ, system, and holistic function of disease processes. Pathopharmacology I focuses on the cellular and immune systems, cardiopulmonary, renal, and gastrointestinal systems, and associated disease processes. The effects of drugs on the various body systems will also be examined as well as the use of medications in practice and the role of the nurse in educating patients regarding use of medications with pathophysiologic conditions. Development of analytical evidence-
based skills to assess the effectiveness of medications and prevention of medication errors will also be
discussed.

**NUR 3073B Pathopharmacology II**
This course focuses on principles of normal and abnormal physiology applied to health care and nursing practice. Emphasis is placed on cellular, organ, system, and holistic function of disease processes. Pathopharmacology II focuses on the endocrine, nervous system, GU, musculoskeletal and skin system, and the associated disease processes. The effects of drugs on the various body systems will also be examined as well as the use of medications in practice and the role of the nurse in educating patients regarding use of medications with pathophysiologic conditions. Development of analytical evidence-based skills to assess the effectiveness of medications and prevention of medication errors will also be discussed.

**NUR 4013 Ethics in the Life Sciences**
Ethics is studied as a branch of philosophy. The goal of ethics is to rationally determine what is right and wrong. Ethics is distinguished from morals. Complexities in ethical reasoning that arise from the impact of technological advances in the life sciences are discussed. The relationship between local, state and federal laws and the subject of ethics is studied with a view to how this relationship affects the practice of healthcare.

**NUR 4023 Leadership and Economics in Management**
This course focuses on the exploration of leadership, economic and management principles, and leadership theories with application to nursing practice in the provision of health care among an ever-changing healthcare spectrum. Students will also examine the fundamental economics of the U.S. health care system and how financial issues affect the role of nursing and nursing leaders. Student development in the roles of problem solver, change agent and leader are emphasized.

**NUR 4033 Advanced Physical Assessment**
This course focuses on the application of critical thinking and deductive and inductive reasoning in the assessment of the health status of individuals. The emphasis is on the systematic approach to health history and physical examination for differentiating normal from abnormal states. A holistic approach which includes the assessment of the physical, developmental, psychosocial, cultural, and spiritual dimensions will be used.

**NUR 4043 Community-Based Nursing**
This course focuses on the synthesis of population-based health and public health concepts to promote, maintain, and restore health to individuals, families, and communities. Community assessment, risk appraisal, and application of community health nursing strategies are emphasized in a community experience.

**NUR 4053 Nursing Research**
Nursing research and evidence-based practice relies on results from valid studies, which are reviewed for applicable implementation into practice. Research methods needed for systematic investigation and expansion of nursing knowledge are examined. Critical appraisal of research is emphasized with a focus on analyzing the integration of research findings into the practice setting and planning for the final Capstone project.

**NUR 4103 Capstone**
This is the capstone course in the Bachelor of Science in Nursing program. All students are expected to demonstrate the ability to conduct directed research on a concept in the nursing field, utilizing the methods of inquiry previously learned in the curriculum including experimental data collection, statistical analysis, and integration of concepts from the program.

**NUR 5000 Theoretical Foundations of Advanced Nursing**
This course examines selected theories in nursing and health. Approaches to the analysis, critique, and utilization of theories in nursing practice and scholarship are emphasized. Students develop and apply theories and analysis to an area of interest.

**NUR 5001 Pathopharmacology**
This course focuses on the deductive and inductive reasoning in the administration of medications based on pathophysiology and the application of critical thinking. The emphasis of the course is on understanding the actions and side effects of medications that are both anticipated and unanticipated applied to the pathophysiology of the disease being treated. A holistic approach to pathophysiology and pharmacology will be used to increase the understanding of how lifestyle, age and culture affect medication use and the disease process. Course discussion will follow the pathophysiology of selected body systems with introduction of
pharmacological treatments. Information on complementary medications, nutritional supplements and dietary considerations will be included. Integrative therapies and special populations will be included.

**NUR 5002 Advanced Health Assessment**
This course focuses on the assessment of the health status of individuals. The emphasis is on the systematic approach to health history and physical examination for differentiating normal from abnormal states. A holistic approach will be used which includes the assessment of the physical, developmental, psychosocial, cultural, and spiritual dimensions. There will be a review of relevant anatomy and physiology along with examples of examination techniques and corresponding written documentation of the assessment. Health promotion and special populations will be included.

**NUR 5010 Trends in Contemporary Nursing**
The course explores issues and trends in the nursing profession including such topics as: current nursing shortage, workplace issues, policy, healthcare reform, ethical behavior, and practice competencies in professional practice. Students will develop advanced knowledge about the complex issues of nursing within multidisciplinary practice in a variety of environments.

**NUR 5020 Transcultural Nursing**
This course provides an in-depth study of cultural diversity, delineating culturally competent health-care practices in a multicultural society. Assessment, planning, diagnosis, evaluation, and implementation of care for cultural differences are explored.

**NUR 5025 Epidemiology**
Epidemiology is the study of the cause, spread, and effects of disease on a given population. Students will be introduced to the principles and methods of using epidemiology in practice. The methods include models to study the behavior of disease, the collection and statistical analysis of data to detect patterns in the spread of disease, and the use of evidence-based methods to identify health risks and prevent the spread of disease in an environment. Case studies in epidemiology will be examined. Students will gain experience in interpreting epidemiological data and effectively communicating the results of statistical analysis.

**NUR 5026 Leadership, Economics, and Management**
This course deals with the economics of healthcare for nurses in more advanced practice roles. The market structure of the U.S. healthcare industry is surveyed. Some of the topics to be studied include the nature of supply and demand for healthcare services, managed care, HMOs, professional licensure, for profit and not-for-profit providers, and problems guaranteeing the integrity and privacy of patient information. The role of government regulation and financing of healthcare will be examined. Problems in healthcare such as the cost of U.S. healthcare and the aging of the U.S. population will be discussed. The healthcare industries in other countries such as Canada, Britain, and Japan will be studied to compare with current U.S. healthcare.

**NUR 5027 Leadership and Management in Nursing**
This course focuses on major responsibilities in leadership and management in the practice of professional nursing in a more advanced role. Healthcare advances and management dilemmas are examined to provide for the development of leadership in a variety of settings and when working with interdisciplinary teams.

**NUR 5028 Analysis of Data in Nursing**
This course introduces students to qualitative and quantitative research practices in nursing. Students learn to critically evaluate existing research, develop workable research questions, and choose the best methods to address the questions they ask. Students start to determine data analysis methods for their capstone project for their master's degree in this course.

**NUR 5029 Research Methodologies**
This course introduces students to qualitative and quantitative research practices in rhetoric, composition, and technical communication in nursing. Students learn to critically evaluate existing research, develop workable research questions, and choose the best methods to address the questions they ask. Students start to design their capstone project for their master's degree in this course.

**NUR 5031 Nurse Educator – Roles, Responsibilities, and Relationships**
This course will introduce the student to the Nurse Educator role in a variety of settings. This will include roles in the academic setting, staff development, and clinical nurse educator. A key focus of this course will be developing an understanding of the role of the nurse educator within the academic community. Certification standards will be an additional topic of the course.
NUR 5032 Teaching Strategies for the Nurse Educator
Effective classroom and clinical teaching/learning strategies foster sound clinical judgment, safe clinical practice, and professional development. In this course, students will develop theoretically-based, teaching/learning strategies focused on individual learner needs within classroom and clinical learning environments. Special attention will be given to the interplay of different learning circumstances including various clinical settings, learner needs and learner evaluation.

NUR 5033 Curriculum Design and Evidence-Based Practice Implementation
This course presents a systematic method for the planning, development and implementation of instructional curriculum and programs. In addition to examining the research supporting contemporary methods of instructional design, students will be required to use concepts introduced to develop a course suitable for implementation in a nursing environment. The methods of program evaluation and accreditation are also discussed.

NUR 5034 Student Assessment and Evaluation in Nursing Education
This course is designed to introduce learning evaluation concepts, including test and measurement at the didactic, clinical, and programmatic levels. Course content will include strategies to assess and evaluate learning in the cognitive, psychomotor, and affective domains.

NUR 5035 Integrating Technology into Nursing Education
This course examines a variety of innovative computer technologies that support the teaching-learning process in the classroom and clinical settings. Course content includes application of information technology in nursing practice and education. Principles of distance learning, use of the internet and the integration of computer technologies to create new, innovative models of teaching will be explored.

NUR 5036 Educational Theory: Principles, Methods, and Design
This course deals with educational principles and theories of learning, and how these educational principles and theories may be applied to nursing education. Teaching techniques which address the different styles of learning in nursing students (including computer simulation techniques) will be studied. Educational principles for dealing with students of diverse cultural backgrounds will also be taught to the nurse educator.

NUR 5041 Healthcare Finance and Strategic Planning
This course covers selected topics in both financial and managerial aspects of the U.S. Healthcare industry. Issues are evaluated and presented from the perspective of all key stakeholders including the consumer, providers, provider-organizations, payers, and the government. Use of strategic planning in practice will be discussed.

NUR 5042 Advanced Leadership and Management in Healthcare
This course focuses on developing the nurse executive as a leader and examines leadership and management concepts, principles, theories, and models in advanced nursing practice and executive roles. An emphasis is placed on techniques necessary to develop strong collaborative relationships in the healthcare environment.

NUR 5043 Human Resources Management
This course examines the role of managing personnel within today’s organizations. Key functions such as recruitment, selection, development, appraisal, retention, compensation, and labor relations are examined. Implications of legal and global environments are appraised and current issues such as diversity training, sexual harassment policies, and rising benefit costs are analyzed.

NUR 5044 Information and Healthcare Technologies
This course provides a perspective on the effective use of data and information technology to improve organizational performance in the healthcare settings. Current and future healthcare information management, decision support and knowledge management applications will be examined in the context of challenges facing healthcare organizations today. Legal and ethical issues will be explored as will the use of the Internet in healthcare.

NUR 5045 Ethical and Legal Perspectives of the Health System
This course examines legal, regulatory, and ethical considerations in health care management, and the formation of public policy in the health care setting. Emphasis is on understanding legal principles and issues including administrative and regulatory law. Additional topics include institutional and individual liability in the healthcare sector as well as HIPPA and FERPA regulations.
NUR 5046 Healthcare Policy
This course examines healthcare policy and how it affects nursing practice. Students will receive an overview of the U.S. healthcare system, including the delivery system and the various health policy groups and agencies. Healthcare policy at the local, state, federal, and international levels will be discussed, and the quality and equitability of healthcare as well as the reasons for cost growth will be examined. In addition, the course will analyze the role of various healthcare stakeholders, such as CEOs, politicians, and nursing managers, and how they influence healthcare policy reform.

NUR 5060 Capstone I (Directed Research)
This is the first capstone course in the Master of Science in Nursing program. Students are expected to demonstrate measurable proficiencies related to the program outcomes through a Capstone Project. The purpose of the Capstone Project is to provide the student with the opportunity to assume primary responsibility for their learning while pursuing an in-depth study of a concept found within their area of specialization. The course builds on previous learning in and requires application of nursing theory, psycho-social sciences, basic statistics, nursing research and experiential learning from their professional experiences. The student is encouraged to integrate the appropriate concepts of leadership, communication, research, the nursing process, and critical thinking across the health-illness continuum.

NUR 5070 Capstone II (Directed Research)
This is the final capstone course in the Master of Science in Nursing program. All students are expected to demonstrate measurable proficiencies related to the program outcomes. Students in this course will be completing and presenting their Capstone project for review and evaluation of integration of concepts from the Master of Science in Nursing curriculum. Successful completion of this culminating course will lead to the Degree of a Master of Science in Nursing.

Occupational Therapy Assistant Courses

OTA 1000 OTA Foundations
This course introduces the student to the field of Occupational Therapy, its history, and theories/models of practice. The contribution of the COTA to client wellness as part of the healthcare team is stressed, as well as the organizations regulating and guiding the practice of Occupational Therapy. AOTA’s Code of Ethics and Standards of Practice are presented. The student also will become acquainted with procedures and practices standard in the healthcare field, including HIPAA/client confidentiality and infection control in healthcare settings and the home.

OTA 1001 Human Components I
The first in a series of three courses. This course studies medical terminology and the terminology of the occupational therapy practice framework.

OTA 1002 Human Components II
The second in a series of three courses. This course focuses on human development. Human Components II explores physical and developmental aspects of the human: infant, childhood, adolescent and adult. Support for quality of life, well-being, and occupation as part of the OTA’s professional responsibility are explored, with reference to social, ethical and health and welfare issues affecting occupation.

OTA 1003 Human Components III
The third in a series of three courses. This course covers pathology. Human Components III explores the mechanisms of disease, diseases of systems and prevention.

OTA 1004 Psychology
In this course psychopathology throughout the life span is explored. The evolution of the diagnostic and statistical manual of mental disorders is examined and models of practice in psychiatry are looked at. Psychiatric disorders, their implications for function, and treatment as well as implications for occupational therapy are reviewed and discussed.

OTA 1005 Kinesiology
In this course the structure and organization of the human body are examined and analyzed in relation to the functional movements required for work, play and self-care activities. The occupational therapy biomechanical framework is reviewed. Principles of kinesiology are presented in relation to functional mobility, body mechanics and joint protection.
OTA 1006 Fundamentals of OTA Practice
Building on the concepts introduced in Term 1, this course explores the professional responsibilities, legalities, ethics, and Standards of Practice demanded of a Certified Occupational Therapy Assistant. The use of research of professional literature, continuing education, and the need to mentor OTA students is presented.

OTA 1007 Physical Dysfunction I
In this course, the normal occupational performance in development of adult roles is developed. Physical, socioeconomic, environmental factors, lifestyle choices, and physical factors that influence adult occupational performance in the roles of adulthood including homemaker and worker roles are examined. Exploration of the recovery process, from acute care to rehabilitation for physical and psychosocial conditions, is reviewed. Involvement in assessment, intervention, and therapeutic activities that facilitate age appropriate occupational behaviors is practiced. The discharge process and collaboration with other professionals and community agencies is included as part of the treatment continuum.

OTA 1008 Physical Dysfunction II
In this course, the normal occupational performance in development of adult roles is continued, to include knowledge and application of assistive devices that are fundamental in the practice of occupational therapy across diagnostic categories and age groups, an introduction to a broad range of equipment from “low technology” to complex “high-technology” devices involving micro-electronics. Topics include: adapted equipment for activities of daily living, home modifications, personal mobility and adapted driving, computer accessibility, communication aides. The environments in which assistive technologies are used will be explored including home, school, work, play and recreation.

OTA 1009 Pediatric OT
This course covers the causes, course and prognosis of disorders that occur from birth through adolescence. The principles and theories underlying learning and the developmental process will be reviewed. The OTA’s use of play in the development of self-discovery, decision-making, work-role skills will be discussed. The role of the OTA in prevention and rehabilitation programs within different types of service facilities will be explored. The role of families, care givers, teachers and significant others in the treatment process will be discussed. Assessment, program planning and treatment will be defined and performance skills necessary for successful occupational behaviors will be presented.

OTA 1010 Psychosocial Dysfunction
This course provides students with a comprehensive view of OT practice in psychosocial dysfunction. The course covers intervention techniques, interacting with clients, safety, the OTA’s role in assessment, documentation, and theoretical issues that guide mental health practice.

OTA 1011 Documentation
This course introduces students to the role of documentation in client care, the contents of documentation, including the subjective, objective, and assessment data and plan, and their importance within the health record. Application of these documentation techniques, primarily using the SOAP format, including the use of medical terminology and abbreviations, will be practiced. The relationship of documentation to the client and billing/reimbursement as well as to legal and ethical issues is also discussed.

OTA 1101 Term 1 Review
This course summarizes material from Term 1 in preparation for the Term 1 Exit Exam. Selected topics come from SCI-1020 Anatomy and Physiology, OTA 1000 OT Foundations, and OTA 2001 Term 1 Lab.

OTA 1102 Term 2 Review
This course summarizes material from Term 2 in preparation for the Term 2 Exit Exam. Selected topics come from OTA 1001 Human Components I, OTA 1002 Human Components II, OTA 1003 Human Components III, OTA 1004 Psychology, OTA 1005 Kinesiology, and OTA 2002 Term 2 Lab.

OTA 1103 Term 3 Review
This course summarizes material from Term 3 in preparation for the Term 3 Exit Exam. Selected topics come from OTA 1006 Fundamentals of OTA Practice, OTA 1007 Physical Dysfunction I, OTA 1008 Physical Dysfunction II, OTA 1009 Pediatric OT, OTA 1010 Psychosocial OT, and OTA 2003-Term 3 Lab.

OTA 2001 OTA Lab I
This OT Skills Lab course builds a foundation of basic abilities and practical knowledge that are fundamental to the practice of occupational therapy assistants. Students will focus on acquiring usable skills related to client mobility, self-care, standard equipment use, and safety issues. Students will practice a variety of skills
and begin learning how to instruct others as well as document interventions. Students will begin to analyze aspects of the whole person and begin to exercise judgment and clinical reasoning skills. Students will also complete CPR/BLS certification. Students also begin to learn how to view themselves as therapeutic instruments.

OTA 2002 OTA Lab II
This OT Skills Lab course focuses on furthering the acquisition of practical skills and knowledge. Students are exposed to more intervention ideas and perspectives. Working with the biomechanical frame of reference is a major topic. Students are introduced to the proper use of physical agent modalities in occupational therapy, vital signs, safety, managing medically complicated clients, wheelchair management, and therapeutic media. Information gathering and documentation are further integrated with practical skills.

OTA 2003 OTA Lab III
This course continues to afford students the ability to learn new practice skills as well as promote higher levels of clinical reasoning. Students practice applying group dynamics, teaching-learning, sensory integration techniques, and troubleshoot selection of interventions for various life stages and mental health symptoms. Community-based interventions and lifestyle redesign are introduced. More assessments are explored and students will continue to practice documentation.

OTA 2010 First Level I fieldwork
Level 1 fieldwork experiences provide exposure to OT practice environments with the intent of clarifying the link between the needs of real clients, and coursework. Level 1 fieldwork introduces students to the fieldwork experience and sets a foundation for later fieldwork. Level 1 fieldwork consists of directed observation and participation in various aspects of the occupational therapy process.

OTA 2020 Second Level I fieldwork
Level 1 fieldwork experiences provide exposure to OT practice environments with the intent of clarifying the link between the needs of real clients, and coursework. Level 1 fieldwork introduces students to the fieldwork experience and sets a foundation for later fieldwork. Level 1 fieldwork consist of directed observation and participation in various aspects of the occupational therapy process.

OTA 2030 First Level II fieldwork
The First Level II fieldwork experience involves an eight-week assignment of full time clinical experience under the direct supervision of a registered occupational therapist or a certified occupational therapy assistant. The student will assist in all phases of practice including observation, evaluation, treatment, and documentation. Through guided practice students will develop appropriate clinical reasoning for preparation as entry-level, generalist occupational therapy assistants.

OTA 2040 Second Level II fieldwork
The Second Level II fieldwork experience involves an eight-week assignment of full time clinical experience under the direct supervision of a registered occupational therapist or a certified occupational therapy assistant. The student will assist in all phases of practice including observation, evaluation, treatment, and documentation. Through guided practice students will develop appropriate clinical reasoning for preparation as entry-level, generalist occupational therapy assistants.

OTA 2050 Phase 1 Review
Phase 1 Review increases a student’s basic knowledge of occupational therapy topics, reviews material to promote long-term memory, and begins preparing the student for the Program Exit Exam. Students will complete reading and writing assignments via the university’s online learning system during their second Level II fieldwork.

OTA 2060 End of Program Review
The End of Program Review teaches students about the process of preparing for, setting up, and taking the NBCOT certification exam for occupational therapy assistants. Actions to take upon successful completion of the exam are also addressed. The course is designed to assist students to plan and prepare for the NBCOT exam as well as test their knowledge in selected areas. Additionally, the course covers program-specific topics in preparation for the Program Exit Exam required for graduation.
**Occupational Therapy Assistant Program: Applied General Education Courses**

**CIS 1006 Computer Applications**
This course provides students not enrolled in IT courses instruction and hands-on practice with word processing software, spreadsheets, presentation software and email clients. Microsoft Office applications are used in the labs, while course topics are applicable to the most common Office suite applications. Common professional communication formatting and email etiquette are included in the instruction. Use of accessibility software and assistive devices are explored.

**ENG 1030 Effective Professional English**
This is a comprehensive, well-rounded, thorough class that focuses on business writing. A specific focus is spent extensively on guiding students in writing business documents such as memos, letters, proposals, emails and research papers. Students are required to apply critical thinking and creative thinking to develop professional business documents that would apply to real-world scenarios. Special emphasis is placed on using primary and secondary research techniques. Documentation of those sources is explored in multiple ways; proper formatting, citing, referencing along with proper paraphrasing and summarizing of the research is both demonstrated and required. Essays are a part of the class and significant time is spent on grammar, punctuation, spelling, format, structure and development of ideas. There are also required presentations in which students need to apply and demonstrate confident verbal and non-verbal presentation techniques. Verbal and nonverbal communication is practiced and required in numerous assignments. The principles and practices of public speaking are demonstrated and required.

**HUM 1030 The Socio-Cultural Experience**
This course is an introduction to major cultures, societies, and religions of the world. The course will explore the principles, rituals, and social institutions of Southern California’s varied social-ethnic, cultural-religious populations. Practices and traditions in conflict with today’s modern world and methods to deconflict will be explored.

**SCI 1021 Anatomy and Physiology**
This course covers the basics of human anatomy and physiology including anatomical terminology, basic biochemistry, organization of the human body, cells, tissues and organs, and the integumentary, skeletal, muscular, nervous, cardiovascular, lymphatic/immune, respiratory, reproductive, endocrine, renal, and digestive systems. Positional and locational terminology is emphasized. It introduces common human disease processes and the concept of homeostasis and cellular respiration. The course is intended to provide fundamentals for later specific investigation of selected body systems and organs. This course integrates medical terminology, word roots, combining forms, and abbreviations.

**Master of Science in Occupational Therapy Program**

**OT 5000 Fieldwork Level IA**
This course provides students with the opportunity to observe an occupational therapist or other professional working with children, adolescents, adults, and older adults in a hospital, community-based setting, or other social support service. The focus of this Level I fieldwork is on psychological support and/or mental illness. Students will observe evaluations, treatment sessions, community-focused activities, and groups, as well as the role of other professionals in these settings.

**OT 5001 Fieldwork Level IB**
This course provides students with the opportunity to observe an occupational therapist or other professional working with adolescents or adults in a hospital, rehabilitation, or community-based setting. The focus of this Level I fieldwork is on physical disabilities. Students will observe evaluations, treatment sessions, community focused activities and groups, as well as the role of other professionals in these settings.

**OT 5002 Fieldwork Level IC**
This final Level I experience provides students with the opportunity to observe an occupational therapist or other professional working with children or adolescents in a hospital, rehabilitation, or community-based setting. Students will observe evaluations, treatment sessions, community-focused activities, and groups, as well as the role of other professionals in these settings.

**OT 5003 Applied Neuroscience and Occupations**
This course is designed to introduce students to the structures and physiology of the nervous system. Specific topics will include gross anatomy of the brain and spinal cord, cellular organization and function, prenatal
development, and functional divisions of the nervous system, including somatosensory, autonomic, motor, visual and vestibular systems. Normal organization of these systems is requisite for optimal occupational performance.

**OT 5004 Psychosocial Foundations of Practice**
This course is foundational to all practice and inculcates in students the importance of psychological support for all clients. Students will learn about psychological theories and OT frames of reference used in acute and community-based mental health practice. Students will gain an understanding of the origins of the theories and frames of reference used in psychiatry and the evaluation methods, role of the OT, and interventions used to influence occupational performance. A psychotropic lecture will inform students about the types of medications commonly used in practice and their side-effects. Students will also learn about group process and dynamics and how to design and implement group interventions for children, adolescents, adults, and older adults. These concepts will be practiced in the laboratory part of this course. In particular, theory and evidence-based groups in stress and illness management, time management, coping skills, values clarification, leisure, and Ross’s Five-Step Group will be performed and evaluated. Students will use standardized and non-standardized screening and assessment tools to determine the need for OT intervention, as well as practice documentation and exhibit professional skills in the laboratory part of the course.

**OT 5005 Grand Rounds**
Grand Rounds are a critical component of medical education. This course provides a venue for students to incorporate prior knowledge with content and experiences from co-occurring courses, service learning projects, and interdisciplinary connections. The course fits into the curriculum design by providing opportunities for reflection on and development of clinical reasoning, deep learning, and ethical practice. Discussion of cases, guest lectures on research or diagnoses, and videos will be used to promote a community of practice where collaborative learning and teaming take place.

**OT 5007 Gerontology Seminar**
Gerontology is the study of how people age. This seminar provides an overview of the aging process as it relates to occupational therapy. The population of aging adults in the U.S. is expanding and this added knowledge will prepare students to take the lead in supporting quality of life and managing care for the aging adult in a variety of contexts. Topics include but are not limited to theories of aging, biological aspects of aging, aging in the workplace, caregiver training, leisure counseling, spirituality and religion, aging in place, and technology.

**OT 5010 Foundations of Occupational Therapy**
This lecture and laboratory course provides an overview of occupational therapy. The course introduces students to the American Occupational Therapy Association (AOTA), the Official Documents of AOTA, and the Occupational Therapy Practice Framework: Domain and Process. Students learn about the safe use of occupations to support client participation in meaningful activities. Students will begin to practice the skills of occupational analysis, grading, adaptation, and documentation. Models of practice will also be introduced in this course. Finally, certain policies, procedures and practices standard in occupational therapy and health care, including HIPAA/client confidentiality and infection control in healthcare settings and the home will be discussed.

**OT 5011 Analysis and Assessment of Functional Human Movement**
This course examines the theory behind how individuals move their bodies from infancy to older adulthood and how movement affects occupational performance. Students learn the scientific principles of movement, including anatomical and biomechanical elements and external and internal forces affecting movement. In addition, students will learn how to analyze and assess human movement. Principles learned in the lecture part of the course will be practiced in the laboratory part of the course. The laboratory provides students with an opportunity to use clinical reasoning while analyzing and assessing human movement. Manual muscle testing, joint range of motion, palpation of muscle and bone, and evidence-based practice are key elements of the laboratory sessions. Principles learned in the lectures will be applied to supportive and functional activities in the laboratory, including stability, posture, mobility, seating, transfers, and other movement required for work, play, and leisure.

**OT 5012 Clinical Conditions in Occupational Therapy**
This course introduces students to the pediatric, physical and psychiatric conditions typically seen in occupational therapy. Psychiatric, neurological, general medical, surgical, and orthopedic diagnoses found across the lifespan will be emphasized. Etiology, signs and symptoms, course of illness, and impact on occupational performance will be discussed.
OT 5013 Occupations of Adults
Theories, models, and frames of references used to intervene with physical conditions that affect occupational performance in adulthood will be discussed. This course will use an integrated focus on cognitive, psychological, sensory-perceptual, and motor support needed for occupational performance. Students will learn concepts of treatment planning for adult physical disabilities, including evaluation methods and emerging and commonly used interventions. Use of clinical reasoning in adult physical disabilities is emphasized in the laboratory. Students will use state of the art technology to learn how to evaluate and treat orthopedic, cardiovascular, pulmonary, and neuromuscular conditions. Students will use standardized and nonstandardized screening and assessment tools to determine the need for OT intervention. Students will practice clinical reasoning while using assistive devices such as wheelchairs, crutches, canes, walkers, transfer benches, reachers, and more to enhance occupational performance. Documentation Practice will include writing evaluation reports, problem statements, long- and short-term goals, SOAP notes, reports, and discharge planning.

OT 5014 Research Methods in Occupational Therapy
Both quantitative and qualitative research methods used in occupational therapy, medicine, and the social sciences will be explored in this course. Students will learn how to read and critique a research article, develop a research question, complete a literature review, collect, and analyze data, discuss the findings, and come to a conclusion. An emphasis will be placed on becoming a consumer of the national and international resources and literature in occupational therapy, medicine, and the social sciences when making assessment or intervention choices. Understanding evidence-based practice and knowing how to access the variety of databases and websites supporting evidence-based practice are included.

OT 5015 Educational Principles of Healthcare
Educational principles, learning theory, health care literacy, and the impact of education on occupational performance will be discussed. The importance of cognitive concepts and psychological support will be integrated into discussions and course activities. Educational principles related to specific populations will be used to create and deliver a lesson plan and Prezi/PowerPoint presentation about a health issue.

OT 5016 Thesis Proposal
This thesis proposal course is the first in a series of 3 courses allowing students to integrate their professional interests with prior course content. Students will write an original thesis proposal and literature review for either a community-based program or research project under the direction of a thesis advisor. Students will understand the process of locating and securing grants and how grants can serve as a fiscal resource for scholarly activities.

OT 5030 Fieldwork Skills Review
This culminating fieldwork skills review course will prepare students for their first Level II Fieldwork. Under the guidance of department faculty, students will have the opportunity to review basic knowledge and skills needed to transition successfully to the Level II Fieldwork experience. Foundational course content will be reviewed through a combination of interactive learning experiences. Students will focus on the use of practical skills related to OT evaluation, basic assessments, goal setting, interventions, and documentation. Basic skills such as therapeutic listening, transfers, manual muscle testing, sensory testing, group leadership, equipment use and patient management related to safety will be discussed.

OT 5020 Advanced OT Skills Lab
This laboratory course will give the student additional time to develop essential clinical skills needed in a variety of practice areas. Students will choose a practice area from a menu in which they wish to improve skills. Examples of specific practice areas may include hand therapy, pediatric swallowing and feeding, sensory integration, and neuro-rehabilitation. Experts in these areas will use an experiential format with opportunities for hands-on practice.

OT 5040 Fieldwork Level IIA
The Level IIA Fieldwork experience involves a minimum of 12 weeks of full-time or part-time clinical experience under the direct supervision of a registered occupational therapist. The Level II Fieldwork experience is intended for students to integrate didactic knowledge with actual clinical practice. Through guided practice students will implement the fundamentals of practice, including screening/evaluation, goal setting, implementation of interventions, re-assessment, management of OT services, clinical reasoning, and development of professional behaviors during the fieldwork rotation. This course will focus on the physical, cognitive, and psychological needs of the clients. The fieldwork rotation may either be in a pediatric, adult, or older adult practice setting. The goal is to develop competent, entry-level, generalist occupational therapists.
OT 5041 Fieldwork Level IIB
The Level IIB Fieldwork experience involves another minimum of 12 weeks of full-time or part-time clinical experience under the direct supervision of a registered occupational therapist. The Level II Fieldwork experience is intended for students to integrate didactic knowledge with actual clinical practice. Through guided practice students will implement the fundamentals of practice, including screening/evaluation, goal setting, implementation of interventions, re-assessment, management of OT services, clinical reasoning, and development of professional behaviors during the fieldwork rotation. This course will focus on the physical, cognitive, and psychological needs of the clients. The fieldwork rotation may either be in a pediatric, adult, or older adult practice setting. The goal is to develop competent, entry-level, generalist occupational therapists.

OT 5100 Cultural Competence in Occupational Therapy
This course emphasizes the role culture plays in perceptions of wellness, health, and disease. It also teaches students about health care disparities that exist in physical and behavioral health and current trends in health status for a variety of demographic groups. Aspects of occupational injustice and deprivation will also be discussed in relation to specific cultural groups in the U.S. Terms and concepts associated with diversity and cultural competence will be discussed and used in case studies. Students will learn how to assess occupational performance and deliver interventions in a culturally sensitive manner.

OT 5101 Community Program Development
Innovative program development is the overarching goal of this course. The course will teach students how to locate a community need, perform a needs assessment, and develop a community-based program that is relevant to the knowledge and skills base of occupational therapy. The course will emphasize occupational justice, deprivation, and engagement through clinical reasoning and problem-solving in order to enhance the occupational performance and health of individuals, groups, or populations. A service learning component will be included in this course.

OT 5102 Occupations of Adults II
The emphasis in this course will be on rehabilitation and aging well with and without disabilities. Students will design and evaluate evidence-based and occupation-centered health promotion and wellness interventions for adults and those over the age of 65. This will be accomplished through lecture and discussion with an integrated focus on cognitive, psychological, sensory-perceptual, and motor support needed for occupational performance. In the companion laboratory section, students will use both standardized and non-standardized screening, assessment, and evaluation tools to determine the need for occupational therapy intervention. The evaluation of occupational performance in ADLs and IADLs, education, leisure, rest, sleep, and social participation will be emphasized and practiced. Documentation Practice will include writing evaluation reports, problem statements, long- and short-term goals, SOAP notes, reports, and discharge planning. Students will use state-of-the-art technology to learn evaluation, intervention, and community tools for various diagnosis. Assistive technology interventions, arts & crafts, and other emerging interventions will be also be explored. Students will continue to develop clinical reasoning skills demonstrated through documentation of assessment and appropriate interventions leading to meaningful outcomes measures and discharge planning.

OT 5103A Leadership, Health Policy, and Management I
This first course in the leadership, health policy and management sequence will introduce leadership theories, applicable health policy, management concepts and sociopolitical systems that impact health care delivery in the U.S. The course will introduce the various leadership and management roles that occupational therapy practitioners take on at different levels and in different practice areas. Students will learn about the U.S. Department of Health and Human Services Healthy People 2020 and analyze social and political trends in health care. Students will be encouraged to begin developing their own leadership style. A service learning component will be included in this course.

OT 5103B Leadership, Health Policy, and Management II
This second course in the leadership, health policy and management sequence takes these concepts to a deeper level and prepares students to become change agents in the profession of occupational therapy. Personal leadership skills and style will be cultivated and refined through hands-on experiences. Collaborative and empowerment models of local and global best-care practices will be explored. Issues of occupational justice, occupational deprivation, and occupational engagement will be discussed and cases studied. Students will take sociopolitical action by addressing a social/healthcare need and visit or write to leaders, policy makers, or the media.
OT 5104 Ethics in Healthcare
In this course, students will examine the essentials of ethical health care service delivery. Students will become familiar with the AOTA Code of Ethics and the ethical principles guiding practice. Case studies will give students the opportunity to demonstrate strategies for analyzing ethical issues and making decisions to resolve personal and organizational ethical conflicts. Students will also articulate the variety of informal and formal systems for resolving ethics disputes that have jurisdiction over occupational therapy practice.

OT 5105 Occupations of Children and Adolescents
This course covers the epidemiology, etiology, and course of conditions seen in childhood and adolescence. Theories and frames of reference used in pediatric OT, principles of learning, and developmental processes will be reviewed. Students will learn how to work with families, schools, and community organizations to meet the needs of this population. Governmental regulations affecting children will be discussed. Cognitive, psychological, sensory-perceptual, and motor support needed for occupational performance will be reviewed. The lab portion of this course will focus on evaluation, treatment planning, and interventions to use with children and adolescents. The evaluation of occupational performance in ADL’s, IADL’s, education, play, rest, sleep, and social participation will be emphasized and practiced. Use of high and low technology will be introduced. Documentation covering Individual Education Plans, reports, progress notes and discharge planning will be practiced.

OT 5017 Thesis Completion
This second in a series of three courses in the thesis sequence will support students in their completion of a research or community-based project based upon their literature review. Students may be collecting and analyzing data or implementing a community-based project by working closely with a faculty advisor.

OT 5018 Thesis Dissemination
This is the last course in the thesis series. As such, it represents the culmination of the thesis experience. In this course, students will have finished their data collection and analysis or their community-based project and evaluation. Students will write a thesis document to be submitted to the University’s repository and develop a poster for presentation. Participation in local, national, and international conference presentations or publications are encouraged and based on the advisor’s recommendations as appropriate.

OT 5200 Professional Development Seminar
This course provides a final opportunity for students to reflect on their professional development as an occupational therapist. Students will synthesize their skills and create a professional portfolio. Goals for Level II fieldwork success will also be identified. Key OT competencies and skills will be reviewed in preparation for the NBCOT examination. Students will also review the process for licensure and prepare for employment as an occupational therapist.

OT 5500 Review and Exit Exam
This curriculum review and exam will prepare students for the national Board for Certification in Occupational Therapy (NBCOT) exam. Students will review each of the domains of the NBCOT exam and take a practice test of questions involving each of the four domains. Students will have an opportunity to work with peers and faculty on analysis of questions. Students will also review test taking strategies.

Physical Therapist Assistant Courses

PTA 1001 Introduction to PTA
This course introduces students to the development of physical therapy practice and the role of the physical therapist assistant in providing patient care. Interpersonal skills, learning styles and communication, the multidisciplinary approach to rehabilitation is introduced. The course also familiarizes the student with health care facilities and government agencies as well as their professional organization. The role of ethics in healthcare is also introduced. Skills related to infection control, patient preparation, vital signs, patient safety, patient positioning, body mechanics, bed mobility, transfers, wheelchairs, assistive devices and gait in clinical settings are practiced at the introductory level in the lab setting.

PTA 1002 Pathology
This course examines the mechanism of disease, including immunity, inflammation, inheritance, cancer, and infectious diseases. Selected diseases of the body’s systems, such as cardiovascular, respiratory, gastrointestinal, urinary, reproductive, integumentary, endocrine, and special senses are presented as well as information regarding the effects of aging, signs and symptoms, basic medical management, implications for the PTA, and prognosis. Emphasis is placed on medical terminology and abbreviations.
PTA 1003 PT through the Life Cycle
This course examines normal and abnormal development from conception to adolescence. Emphasis is placed on the developmental sequence, testing, and treatment of neurological and orthopedic disorders in the pediatric population. Development through adulthood is covered with an emphasis on aging changes that affect function in the geriatric population and related physical therapy interventions are presented. The course also introduces various aspects of geriatric care, including, but not limited to, wellness care and adaptation to exercise modalities. Performance in the lab setting of assessments and interventions appropriate to the pediatric and geriatric populations is practiced. In addition, the service learning project is introduced in this course even though it is embedded in the syllabus of course PTA1010.

PTA 1004 Kinesiology
This course covers functional anatomy of the musculoskeletal system, including muscle origins, insertions, actions, and nerve supply, while applying biomechanics of normal and abnormal movement in the human body. The concepts of goniometry, manual muscle testing, dermatomes, and myotomes are introduced, while identification and palpation of superficial landmarks are practiced. The biomechanics of the gait cycle is also introduced. Students are introduced to using the Levels of Evidence rating scale as it applies to clinical research and the respective course assignment.

PTA 1005 Therapeutic Exercise
This course introduces therapeutic exercise theories and practical applications including those for range of motion, aerobic conditioning and reconditioning, posture awareness, stretching, strengthening, and joint mobilization. Tissue response to range of motion, stretch, and resistive exercise is also examined and lab practice of the techniques learned is integrated. The course also presents therapeutic exercise interventions that are appropriate for use during specific phases of recovery from a soft tissue, bone, or peripheral nerve disorder or injury as well as topics on prevention, health, and wellness topics.

PTA 1006 Procedures
This lecture/laboratory course is designed to develop skills commonly utilized by PTAs including positioning and draping, bed mobility, soft tissue techniques, transfers, wheelchair mobility, and gait training. Use and adjustment of assistive/adaptive devices to improve function will also be incorporated in addition to the application of cervical and lumbar spine mechanical traction and the fundamental concepts of proper body mechanics and ergonomics. This course further provides the student with the background to determine applicability of the stated procedures, including the patient assessment skills needed to determine safety and indications for the procedures as well as the skills to determine the success of the intervention administered. Students develop their skills through supervised practice with each other in the laboratory while having an opportunity to both administer and receive treatment. Proper documentation and communication of the intervention and patient outcome is also presented. Categorization of the levels and grades of evidence as defined by the Journal of Orthopaedic & Sports Physical Therapy Clinical Practice Guidelines is also emphasized.

PTA 1007 PTA Practice I
This course addresses infection control techniques, assessment of vital signs, special equipment and patient care environments, incidents and emergencies in the patient care environment, accessibility assessments and adaptations, and basic wound care. These topics are applied and practiced in the lab setting. Students are provided with and demonstrate teaching techniques for use with patients, caregivers, and other health care providers.

PTA 1008 Orthopedic Interventions
This course presents common orthopedic conditions, pathologies, and surgical procedures involving the peripheral joints and spine. The provision and progression of treatments, including procedures and modalities for each specific joint and the spine, are presented and practiced as these activities relate to tissue repair and healing response. Manual modality techniques specific to the peripheral joints are also practiced. Principles and interventions for an individual with total joint arthroplasty are also presented and practiced.

PTA 1009 Neurologic Interventions
This course examines neurological conditions, including pathology and management of medical problems of stroke, head injury, Parkinson’s disease, spinal cord and nerve injuries, and other conditions. The course also introduces techniques to facilitate neurodevelopmental treatment, proprioceptive neuromuscular facilitation, the Brunnstrom Approach, and other techniques.
PTA 1010 PTA Practice II
This course provides opportunities to learn and practice theoretical principles and practical applications of cardiopulmonary techniques, exercises, and postural drainage. Lecture and lab include wound identification, measurement, dressing, treatments, and debridement. This course introduces basic principles and indications/contraindications in the use of selected prosthetic and orthotic devices with discussion and practice in making adjustments to the various devices. Principles and applications in balance and interventions for the individual with an amputation, the physiology and control of edema, residual limb wrapping, and seating and positioning are also provided in lecture and lab settings. The research of evidence-based practice and prioritizing the grades of evidence is included. In addition, the course presents an overview of women’s health and alternative therapy interventions. Students are also expected to complete a service learning component by volunteering at a non-profit, community-based program or facility related to their course work and then reflecting on their experience. Service learning is a program that helps the students to connect what they have learned in the classroom and/or lab setting to the community.

PTA 1011 Professional Issues
This course engages the student in the discussion of professional issues and behaviors related to clinical practice in order to prepare the student for transition into the workforce. The topics help the student prepare for licensure, employment, and professional development; identify behaviors in response to legal, ethical, and professional issues; develop job placement skills; and debate socioeconomic influences related to the field of physical therapy.

PTA 1012 Therapeutic Measurement and Testing
In this course students will perform the skills associated with data collection techniques as performed by Physical Therapist Assistants (PTAs). This laboratory/lecture course is designed to develop measurement skills for joint range of motion (ROM) and muscle strength for all the peripheral joints and the spine. This course material will also develop student skills for performing neurological testing such as sensation, proprioception, kinesthesia and reflex assessment. Students will practice with each other in the laboratory providing them with the opportunity to both administer and receive care. Proper documentation and communication of the treatment application and patient outcome is included.

PTA 1013 Electrotherapy
This course is designed to introduce the student/learner to electrotherapeutic modalities in physical therapy practice which are commonly utilized by PTA’s. Lecture and laboratory activities develop problem solving skills and critical thinking in the use of electrotherapy. Basic concepts in physical properties of electricity (waveforms, types of currents, nature of electricity), electrical safety and instrumentation will be provided. Students will be introduced to the principles of therapeutic application of electrical stimulation including strengthening (NMES and Russian ES), re-education (FES), nerve regeneration with direct current, pain reduction (TENS and IFC), tissue repair (HVPC), trans-dermal application of anti-inflammatory agents (iontophoresis) and biofeedback. It provides the student with the background to determine the applicability of the stated procedures, including the assessment skills needed to determine safety, indications for the procedures, as well as the skills to determine the success of the technique/treatment administered. Students develop their skills through supervised practice with each other in the laboratory providing them with the opportunity to both administer and receive treatment. Proper documentation and communication of the technique/treatment application and patient outcome is included.

PTA 1014 Modalities
This course introduces physical agents and therapeutic modalities in physical therapy practice which are commonly utilized by PTAs. Lecture and laboratory activities develop problem solving skills and critical thinking in the use of cryotherapy, therapeutic heat, ultrasound, hydrotherapy/aquatic therapy, electromagnetic therapy (LASER, diathermy, ultraviolet light, pulsed electromagnetic fields), spinal traction and compression therapies. The course provides the student with the background to determine the applicability of the stated procedures, including the patient assessment skills needed to determine safety and indications for the procedures, as well as the skills to determine the success of the technique/treatment administered. Students develop their skills through supervised practice with each other in the laboratory while having the opportunity to both administer and receive treatment. Proper documentation and communication of the technique/treatment application and patient outcome are included.
PTA 1015 Documentation
This course introduces students to the role of documentation in patient care, the contents of documentation, including the subjective, objective, and assessment data and plan, and their importance within the medical record. Application of these documentation techniques, primarily using the SOAP format, including the use of medical terminology and abbreviations, will be practiced. The relationship of documentation to the patient and billing/reimbursement as well as to legal and ethical issues is also discussed.

PTA 2002 PTA Lab I
This course provides opportunities for application of techniques introduced in Kinesiology, Therapeutic Exercise, Procedures, Therapeutic Measurement and Testing. Covers palpation of landmarks, practical applications of various types of exercise techniques and machines used in the clinics, and a systematic approach to therapeutic exercise progression. Also stressed are practical application and demonstration of data collections skills including range of motion, manual muscle testing, therapeutic massage and neurological testing. Interventions skills related to procedures, including gait training, wheelchair management, assistive device selection and adjustment, are also performed in a laboratory setting.

PTA 2003 PTA Lab II
This course provides opportunities for application of techniques introduced in PT through the Lifecycle, Modalities, PTA Practice I and Electrotherapy as well as documentation of the treatments and techniques learned. Covers practical applications of various types of modalities, electrical stimulation and therapeutic agents used in the clinics. Also stressed are developmental sequence, testing, and treatment of neurological and orthopedic disorders in the pediatric population. Performance in the lab setting of assessments and interventions appropriate to the pediatric and geriatric populations are practiced. Skills related to infection control techniques, assessment of vital signs, special equipment and patient care environments, incidents and emergencies in the patient care environment, accessibility assessments and adaptations, and basic wound care are also practiced in a laboratory setting.

PTA 2004 PTA Lab III
This practical laboratory course includes integration of orthopedic and neurological treatment plans and progressions as well as documentation of the treatments and techniques learned. Practical application techniques discussed and learned in PTA Practice II will also be included. Interventions skills include the provision and progression of treatments, including procedures and modalities for each specific joint and the spine, manual modality techniques, neurodevelopmental treatment, proprioceptive neuromuscular facilitation, and the Brunnstrom Approach. Other skills include cardiopulmonary techniques, postural drainage, wound identification, measurement and dressing, debridement, selection and management of orthotic and prosthetic devices, interventions for amputations, edema management, women’s health and alternative therapies.

PTA 2010 Clinical Practicum I
This first clinical experience presents the students with an opportunity to experience the role of the Physical Therapy Assistant in a practical setting. The course emphasizes patient and staff working relationships, awareness of patient disorders and application of physical therapy techniques.

PTA 2030 Clinical Affiliation I
One of two separate six-week assignments are to be completed with students being exposed to a variety of clinical settings. The student completes forty clock hours per week of supervised clinical experience. The combined total of sixteen weeks of clinical experience, including PTA 2010, 2030 and 2040, prepares the student for entry-level performance.

PTA 2040 Clinical Affiliation II
Second of two separate six-week assignments are to be completed with students being exposed to a variety of clinical settings. The student completes forty clock hours per week of supervised clinical experience. The combined total of sixteen weeks of clinical experience, including PTA 2010, 2030 and 2040, prepares the student for entry-level performance.

PTA 1101 Term 1 Review
This course applies theory and critical thinking to licensing exam-style questions. Topics presented in the term are reviewed. Test taking techniques and stress-reduction practices are also presented. Students will receive feedback on weak areas of knowledge and areas of strength.
PTA 1102 Term 2 Review
This course applies theory and critical thinking to licensing exam-style questions. Topics presented in the term are reviewed. Test taking techniques and stress-reduction practices are also presented. Students will receive feedback on weak areas of knowledge and areas of strength.

PTA 1103 Term 3 Review
This course applies theory and critical thinking to licensing exam-style questions. Topics presented in the term are reviewed. Test taking techniques and stress-reduction practices are also presented. Students will receive feedback on weak areas of knowledge and areas of strength.

PTA 1104 Term 4 Review
This course applies theory and critical thinking to licensing exam-style questions. Topics presented in the term are reviewed. Test taking techniques and stress-reduction practices are also presented. Students will receive feedback on weak areas of knowledge and areas of strength.

PTA 1105 Program Review
This course applies theory and critical thinking to licensing exam-style questions. Topics presented throughout the program are reviewed through a series of online exams administered in the National Physical Therapy Examination (NPTE) Review Module. Test-taking techniques and stress-reduction practices are also presented. Students will discuss the student experience, reinforce concepts and techniques introduced in the program and identify deficiencies in knowledge and skills. This course also prepares the student for the certification examination.

Veterinary Technology Courses

VET 1001 Veterinary Medical Terminology
This course is intended to instruct in the study of language of the veterinary medical field. This course includes word construction (roots, prefixes, suffixes, and combining forms) and use of words related to veterinary procedures, testing, and disease. Focus is placed on the student’s understanding of terminology as it relates to veterinary medical disease processes and procedures.

VET 1100 Small Animal Handling and Husbandry and VET 1100C Small Animal Handling and Husbandry Clinical
This course is an introduction to the veterinary technical skills required when dealing with domestic animals and to introduce students to the field of veterinary technology. During this course, students shall understand the duties and functions of a veterinary technician and an emphasis will be made on the many positions available for the graduate technician. In addition, students will learn the most important occupational safety issues that may affect them throughout their career as a veterinary professional, the legal applications and ramifications associated with the role of veterinary technicians, as well as expected ethical responsibilities, and professional attitudes. Throughout this course, students will become familiar with the most common breeds of domestic animals, including the dog, cat, horse, cow, pig, sheep and goat, and will be introduced to the medical terminology associated with these breeds. Students shall be introduced to animal husbandry and will learn how to practice safe handling techniques, such as restraint, how to apply a muzzle and techniques needed to safely transport, encage and remove animals from kennels. Also in this course, students will learn beginning nursing skills, which will include basic behavioral assessment, application of medications, nail trims, microchipping and expression of anal glands. Additionally, students will be taught the potential safety risks that accompany animal handling.

VET 1110 Anatomy and Physiology of Animals and VET 1110L Anatomy and Physiology of Animals Lab
This course is an introduction to veterinary anatomy and physiology at the veterinary technician level. The course compares the anatomies of the major species encountered in the veterinary medical field. Topics to be discussed include anatomical terminology, basic histology and the anatomy and physiology of major organ systems.

VET 1102 Term 2 Review & Exam
This course is a review of Term I concepts, with application of theory and critical thinking to VTNE exam-style questions. Topics presented in Term I are reviewed. Test taking techniques and stress-reduction practices are also presented.
VET 1103 Term 3 Review & Exam
This course is a review of Term II concepts, with application of theory and critical thinking to VTNE exam-style questions. Topics presented in Term II are reviewed. Test taking techniques and stress-reduction practices are also presented.

VET 1104 Term 4 Review & Exam
This course is a review of Term III concepts, with application of theory and critical thinking to VTNE exam-style questions. Topics presented in Term III are reviewed. Test taking techniques and stress-reduction practices are also presented.

VET 1105 Term 5 Review & Exam
This course is a review of Term IV concepts, with application of theory and critical thinking to VTNE exam-style questions. Topics presented in Term IV are reviewed. Test taking techniques and stress-reduction practices are also presented.

VET 1200 Veterinary Clinical Nursing
This course continues instruction in the essential skills required by veterinary team members. During this course, students will learn how to perform patient physical exams and understand all data collected, such as, temperature, pulse, respiration and basic heart sounds. In addition, students will practice and perfect diagnostic sampling procedures. The procedures learned shall include blood sampling via venipuncture and diagnostic testing such as, serologic ELISA test kits, urinalysis, tonometry, fluorescein staining and Schirmer tear tests. Students will also practice administering topical and parenteral including ocular medications, subcutaneous injections, and intramuscular injections.

VET 1200C – Veterinary Clinical Nursing Clinical
This course is the laboratory component to VET 1200 Veterinary Clinical Nursing, a continuation of the essential skills required by veterinary team members. Students will learn how to perform patient physical exams and understand all data collected, such as temperature, pulse, respiration and basic heart sounds. In addition, students will practice and perfect diagnostic sampling procedures. The procedures learned shall include blood sampling via venipuncture and diagnostic testing such as serologic ELISA test kits, urinalysis, tonometry, fluorescein staining and Schirmer tear tests. Students will also practice administering topical and parenteral (including ocular) medications, subcutaneous injections, and intramuscular injections.

VET 1210 Veterinary Microbiology and VET 1210L Veterinary Microbiology Lab
This course is an introduction to infectious disease organisms commonly encountered in veterinary patients, including bacteria, viruses, rickettsial organisms, prions, and fungi. The course also includes an introduction to immunology of domestic animals. Emphasis is placed on clinical diagnostic techniques and prevention.

VET 1300 Veterinary Lab Diagnostics and VET 1300L Veterinary Lab Diagnostics Lab
This course continues instruction in the essential skills needed by veterinary team members. This course presents an introduction to the principles and procedures utilized in the veterinary practice diagnostic laboratory. Emphasis is placed on laboratory safety and management as well as the technical skills in hematology and urology. Topics include microscopy and laboratory equipment; handling of laboratory specimens, laboratory safety, quality control, and clinical chemistry diagnostic procedures.

VET 1311 Veterinary Diagnostic Imaging and VET 1311L Veterinary Diagnostic Imaging lab
This course is an introduction to the principles of diagnostic imaging as applied to veterinary patients. Topics include function and maintenance of radiographic equipment as well as common radiographic techniques for small and large animals and an introduction to alternative imaging techniques. Emphasis is placed on radiographic theory, safety regulations, and quality control.

VET 1321 Small Animal Medicine
This course is an introduction to medical disease and conditions commonly encountered in small animal patients. Topics include metabolic, genetic, and infectious diseases of dogs and cats. Emphasis is placed on nutrition, client education and communication, and nursing care.

VET 1331 Veterinary Pharmacology I
This course is an introduction to the principles of pharmacology and the pharmaceutical products commonly used in veterinary medicine. Topics include pharmacokinetics, pharmacodynamics, and pharmaceutical classifications. The course will also include introduction to dosage calculation procedures. designed to teach medical professionals methods for solving applied mathematical problems commonly encountered in the veterinary
medical field. Topics to be covered include dosage calculations of oral and parenteral medications, concentrations, dilutions, and drip rates. Emphasis will be placed on accuracy by recognizing and avoiding the causes for mathematical errors. Emphasis will be placed on drug classes, actions, and potential side effects.

**VET 1332 Veterinary Pharmacology II**

This course is a continuation of pharmacology concepts including dosage calculations. Topics include pharmacokinetics, pharmacodynamics, and pharmaceutical classifications. The course will also include a review of dosage calculation procedures. Emphasis will be placed on drug classes, actions, and potential side effects.

**VET 2000 Veterinary Technician Preceptorship**

This course provides students with an understanding of how real clinical environments function. Students are paired with veterinary professionals and have opportunities to observe and gain insight into the career path they have chosen. Clinical sites may include a small animal practice, an animal population control facility, or another animal facility.

**VET 2102 Large Animal and Equine Procedures and Public Health and 2100C Large Animal and Equine Procedures and Public Health Clinical**

This course is an introduction to medical disease and conditions commonly encountered in large animal patients with a review of large animal breeds, anatomy, and physiology and continues instruction in the essential skills needed by veterinary team members. This course will focus on technical skills needed when working with common domestic large animals including horses, bovine, small ruminants, and pigs. Emphasis is placed on large animal handling and nursing skills. Herd health management and preventative medicine will be discussed. This course also includes an overview of zoonotic diseases, especially as it applies to the One Health Initiative. Emphasis is placed on large animal nutrition, client education and communication, and nursing care.

**VET 2101 Program Review & Exam**

This course is a comprehensive review of all program concepts, with application of theory and critical thinking to VTNE exam-style questions. Test taking techniques and stress-reduction practices are also presented.

**VET 2110 Veterinary Parasitology and VET 2110L Veterinary Parasitology Lab**

This course is an introduction to parasitic disease organisms commonly encountered in veterinary patients. Topics include life cycles, clinical diagnostic techniques, and prevention of common parasitic organisms in domestic animals. Emphasis is placed on laboratory safety and management, including safe handling of laboratory specimens and quality control.

**VET 2130 Veterinary Anesthesia & Analgesia and VET 2130L Veterinary Anesthesia & Analgesia Lab**

This course is a survey of anesthetic and pain management principles and techniques used in veterinary patients. Topics include administration of commonly used pharmacological anesthetic agents as well as monitoring and management of patient status. Emphasis is placed on patient and personal safety from induction through the post-operative period.

**VET 2140 Veterinary Business Management and Ethics**

The course covers basic management procedures common in a veterinary clinic as well as a survey of ethical considerations in veterinary medicine. Topics include medical record keeping, human resources management, financial considerations, and client communication. Emphasis is placed on modern communication techniques, professionalism, and ethics.

**VET 2201 Emergency and Critical Care Nursing and VET 2200C Emergency and Critical Care Nursing Clinical**

This course continues instruction in the essential skills needed by veterinary team members. Topics to be covered include advanced nursing techniques such as blood transfusions, bandaging, and urinary catheterization as well as emergency and critical care skills such as cardiopulmonary resuscitation protocols and trauma care. Emphasis is placed on patient triage and critical thinking.

**VET 2221 – Laboratory and Exotic Animal Medicine**

This course is an introduction to the study of laboratory and exotic animals. Topics include laboratory and exotic animal husbandry and medicine, as well as the role of veterinary technicians in the research environment. Emphasis is placed on the principles of animal research, animal welfare regulations, maintaining human and animal health and safety, and nursing procedures.
VET 2210 Veterinary Surgical Nursing and Dentistry

This course covers the practical roles and responsibilities of veterinary technicians in surgical and dental procedures. Emphasis is placed on sterile techniques including the methods, equipment and instrumentation, and the roles of the operating room staff. The dental section includes a basic understanding of dental anatomy, instrument identification and function, dental exams and cleaning, personnel safety, and client education.

VET 2300 Veterinary Technician Internship

This one term clinical experience provides the student with the opportunity to refine clinical skills in off-campus veterinary facilities. Students are trained under the supervision of certified veterinary technicians or veterinarians. Approved sites include specialty, emergency and critical care animal hospitals and veterinary practices that specialize in equine, feline and exotic animals. This course includes 13 weeks of full-time training for a total of 320 hours. Students are expected to provide their own transportation.

General Education Courses

BIO 1010 Biology

This course is an introduction to biology. Topics include the scientific method, basic biochemistry, cell structure and function, cell physiology, cell reproduction and development, Mendelian genetics, population genetics, natural selection, evolution, and ecology.

CHM 1010 Chemistry

This course is an introduction to chemistry. Topics are both descriptive and mathematical and include acids and basis, atomic structure, chemical equations, chemical language, gases, molecular structure, solution chemistry, and chemical mathematics.

COM 3010 Business Communication in Healthcare

This course focuses on the principles and methods of business communication in the healthcare field with special emphasis on nursing.

ENG 1010 College Writing I

This course is an introduction to college writing. The course emphasizes reading, critical thinking, discussion, research, and the writing of expository and persuasive papers. Students will produce clear, concise, and coherent papers, using current methods and standards for academic writing.

ENG 1020 College Writing II

This course continues the development of college writing begun in English 1010. The course concentrates on critical reasoning, analysis, evaluation, argumentation, and research in response to selected readings and classroom discussion. Students will complete a research paper as part of the course requirements.

ENG 1045 Public Speaking

This course introduces students to the research, preparation, and presentation skills used in a variety of public speaking opportunities. Topics include researching information, assessment of audience and environments, use of visual aids, organizing for public speaking, outlining, and developing speeches for a variety of purposes.

ENG 1050 Fundamentals of Speech Communication

This course explores the theories and practice of speech communication behavior to promote communication competence in interpersonal, small group, and public speaking situations. The course also examines the influence of communication technologies on human interaction.

ENG 1060 English Composition

This course is an introduction to college writing. The course emphasizes reading, critical thinking, discussion, research, and the writing of expository and persuasive papers. Students will produce clear, concise, and coherent papers, using current methods and standards for academic writing.

ENG 3020 Advanced Writing and Research

This course presents a systematic approach to research writing through the critical analysis of source materials. Students will study the methods of inquiry, research, and argument with an emphasis on critical thinking and clarity in writing according to the standards of academic discourse.
ENG 3030 Scientific Writing
This course focuses on writing scientific articles and papers. Topics include research methods and writing aimed at publication of original research in professional journals, conference proceedings, books, and technical reports.

GOV 1010 Introduction to American Government and Politics
This course is an introduction to the theory and practice of American politics. Topics include the constitutions of the United States and California; political parties and elections; the legislative, executive, and judiciary branches; civil liberties and rights; the federal and state bureaucracies; and national, state, and local policy making.

HUM 1020 World Religions
This course is an introduction to major religions of the world. The course will explore the personalities, texts, principles, rituals, and social institutions of Hinduism, Buddhism, Confucianism, Judaism, Christianity, Islam, and other religious traditions.

HUM 1030 The Socio-Cultural Experience
This course is an introduction to major cultures and societies of the world. The course will explore the principles and social institutions Southern California’s varied social, ethnic, cultural, religious populations. Practices and traditions in conflict with today’s modern world and methods to deconflict will be explored.

HUM 4010 Contemporary Fine Art
This course is designed to expose students to the contemporary world of fine arts. Topics include the visual arts, music, dance, and film as well as stylistic trends, historical, and technological developments.

MATH 1010 College Algebra I
This course prepares students to use algebra to solve mathematical problems. Topics include integers, variable expressions, exponents, real numbers, polynomials, linear equations, and interpreting graphs.

MATH 1020 Statistics
This course introduces the student to the basics of statistics — techniques which statisticians use to summarize numeric data obtained from censuses, surveys, and experiments. The topics include the scope, nature, tools, language, and interpretation of elementary statistics; descriptive statistics; graphical and numerical representation of information; measures of location, dispersion, position, and dependence; exploratory data analysis; elementary probability theory; discrete and continuous probability models.

MATH 3010 Statistics for the Social Sciences
This course is an introduction to the basics of social statistics — techniques which sociologists and other social scientists use to summarize numeric data obtained from censuses, surveys, and experiments. The topics include frequency distribution, central tendency, variability, probability theory, and estimation, as well as how to test hypotheses for group differences in means (z test, t test) and for association between two variables (correlation, chi-square test).

ORI 1000 Introduction to Online Education
This course provides a one-week orientation to taking online courses at Stanbridge University. Use of the Edverum platform is exercised in discussions and assignments similar in form to those used in credit-bearing courses.

PSY 1001 Introduction to Interpersonal Relationships
This course is an introduction to the complex interaction of social and psychological forces in human communication. The course critically evaluates interpersonal relationships and the communication issues surrounding human interaction in various contexts. It examines basic concepts, theories, and research findings relevant to initiating, developing, modifying, and maintaining, relationships in communication process.

PSY 1004 Psychology
This introductory course will provide students with an overview of the current body of knowledge and methods of the science of psychology. Topics will include the historical foundations of psychology, cognition, emotions, learning, human development, biological bases of behavior, personality, psychological disorders, psychotherapy and behavior change, and social behavior. Emphasis also will be placed on the application of psychology to diverse human endeavors.
PSY 1010 Introduction to Psychology
This course is designed to present students with a general overview of psychology. Topics include historical perspectives, research methods, human development, social psychology, and other current issues.

PSY 1020 Developmental Psychology: Life Span Psychology
This course will provide an in-depth review of human development from a biopsychosocial approach with emphasis on the cultural context of development, the roles of age and gender, and applications to daily living.

PSY 3010 Organizational Psychology
This course focuses on the major concepts and theories comprising organizational psychology. Topics include individual differences, diversity and cultural differences, perceptions, motivations, reward systems, leader-member exchange theory, interpersonal communication, ethical decision making, designing organizations, and change and development in organizations.

SCI 1010 Physical Science
This course is an introduction to the principles and methods of the physical sciences. The course emphasizes terminology, concepts, and methods used in physics, chemistry, astronomy, meteorology, and geology.

SCI 1020 Anatomy and Physiology
This course covers the basic concepts of human anatomy and physiology including anatomical terminology, basic biochemistry, cellular respiration, homeostasis, organization of the human body, cells, tissues and organs, and the integumentary, skeletal, muscular, nervous, cardiovascular, lymphatic/immune, respiratory, reproductive, endocrine, excretory and digestive systems. This course integrates medical terminology, word roots, combining forms, and abbreviations. Positional and locational terminology is also introduced. Due to the academic rigorous nature of the PTA Program, a heavy emphasis is placed on learning the gross anatomy of the human body. The course is intended to provide the fundamental knowledge needed to be successful in the PTA Program. Specific courses that rely heavily on a sound understanding of gross human anatomy are, but not limited to, Kinesiology, Therapeutic Exercise, Modalities, Electrotherapy, Orthopedic and Neurologic Interventions. Students will experience hands on learning in state of the art anatomy labs and will be able to identify and examine neuromusculoskeletal and vascular structures using human cadavers, synthetic human cadavers (SYNDVERS) and medical grade, 1/4-scale male anatomical models. PTA students will also have access to various other anatomical models for instructional purposes. Clinical palpation skills are heavily incorporated into the curriculum for SCI 1020 and are taught to competency. Upon successful completion of the course, the student will develop vital clinical skills such as understanding the length tension relationships of both contractile and non-contractile soft tissue structures when those structures are placed in specific anatomical positions.

SCI 1021 Anatomy and Physiology
This course covers the basics of human anatomy and physiology including anatomical terminology, basic biochemistry, organization of the human body, cells, tissues and organs, and the integumentary, skeletal, muscular, nervous, cardiovascular, lymphatic/immune, respiratory, reproductive, endocrine, renal, and digestive systems. Positional and locational terminology is emphasized. It introduces common human disease processes and the concept of homeostasis and cellular respiration. The course is intended to provide fundamentals for later specific investigation of selected body systems and organs. This course integrates medical terminology, word roots, combining forms, and abbreviations.

SCI 1030 Human Anatomy
This course focuses on the structure of organ systems at the gross, sub-gross, and microscopic levels based on human material and dissection. Anatomy Lab is a component of the course.

SCI 1040 Physiology
This course is designed to provide students with an understanding of the function & regulation of the human body and physiological integration of the organ systems to maintain homeostasis. Physiology Lab is a component of the course.

SCI 1050 General Microbiology
An introduction to the basic concepts and principles of microbiology as it affects human health. Topics include the process of disease transmission, immunology, physical and chemical methods of disease prevention and control as well as major infectious diseases of the body systems. Microbiology Lab is a component of the course.
SCI 3010 Environmental Studies
This course focuses on the complex relationship between technological advancement and finite resources. Topics include the dynamics of human population, impact of industry, role of consumerism in ecosystems, limited resources available for human use, and methods by which individuals and societies can decrease pollution and the depletion of natural resources.

SOC 1010 Introduction to Sociology
This course is an introduction to sociology as a way of understanding the world. Sociology is a field of study that explains social, political, and economic phenomena in terms of social structures, social forces, and group relations. It will introduce you to the field by focusing on several important sociological topics, including socialization, culture, the social construction of knowledge, inequality, race and ethnic relations, poverty, and political sociology.

SOC 3010 Cultural Identity and Diversity
This course focuses on how diversity plays a central role in cultural values, public policy, and the shape of our daily lives. It explores cultural diversity based on categories of religion, age, geography, language, class, race and ethnicity, gender, and sexual orientation.
Publication Date
January 1, 2018
